In pursuance of an order of the City Council of Boston, approved May 17th, 1910. Payable \$3,000, annually, July 1st, 1911, to July 1st, 1919, inclusive, and \$2,000, annually, July 1st, 1920, to July 1st, 1930, inclusive.

VARIOUS MUNICIPAL PURPOSES—EAST BOSTON COURTHOUSE AND POLICE STATION, \$80,000.

In pursuance of an order of the City Council of Boston, approved May 6th, 1909. Payable \$4,000, annually, July 1st, 1911, to July 1st, 1930, inclusive.

In accordance with the provisions of Chapter 486, Acts of Massachusetts, 1909, the effect of premiums on the "Serial Loans" will be to reduce the total amount of bonds issued. This reduction because of premiums will be made from the installments last maturing of the several orders, and no bonds will be issued for less than \$1,000.

All loans will be issued in Registered Bond Certificates of \$1,000 each, or any multiple thereof, and will be paid on the dates specified for each loan, all with interest at the rate of 4 per cent. per annum, payable semiannually, on the first days of January and July in each year, at the office of the City Treasurer, Boston.

By an Act of the Legislature these Bonds are exempt from taxation in Massachusetts.

Interest for less than one month will be calculated on a basis of 365 days to the year.

The certificates will be dated July 1st, 1910, and will be ready for delivery, and money received for the same July 18th, 1910. Interest will begin July 1st, 1910, and will cease on the date on which the Bonds are made payable.

Holders of these certificates, if they so desire, can receive the semiannual interest through the mail by check payable to their order.

Proposals must be sealed and addressed to Charles H. Slattery, City Treasurer, Boston, Mass., endorsed "Proposals for Loans," and clearly state whether for the whole or part of said loans, and, if for part, the amount. Each proposal must be accompanied by a certified check on a Boston National Bank, or by cash, equal to one per cent. of the amount of loans bid for, the check made payable to the City of Boston, Charles H. Slattery, City Treasurer. The check or cash of any bidder to whom an award is made will be retained as part payment for the loan or loans awarded, but no interest will be allowed thereon. All other checks or cash will be returned.

Accrued interest from July 1st, 1910, to date of delivery is to be paid by the purchaser.

All proposals will be opened by the undersigned in the office of the City Treasurer, Monday, July 11th, 1910, at 12 o'clock M. The City Treasurer reserves the right to reject any or all bids or to accept such bid or bids as may seem to him to be the most advantageous to the city.

(July 2-9.) CHARLES H. SLATTERY,
City Treasurer.

CITY OF BOSTON.

PROPOSALS FOR LAND IN EAST BOSTON.

Proposals will be received for selling to the City of Boston, approximately 15,000 square feet of land for a courthouse and police station, in the vicinity of Central square, East Boston. Proposals will be received and publicly opened and read at the office of the Superintendent of Public Buildings, Room 30, Old Court House, Boston, on Wednesday, July 6, 1910, at 12 o'clock noon. Proposals must be made in duplicate, placed in envelopes properly sealed and marked "Proposal for Land in East Boston." One proposal to be sent to the City Auditor, City Hall, previous to the time named for opening of same, and the other to be sent to the office of the Superintendent of Public Buildings, as stated above. Proposals which are more than twenty-five per cent higher than the average assessed valuation of the property during the previous three years will not be considered. The right is reserved by the undersigned to reject any and all proposals.

G. W. MORRISON,
Superintendent of Public Buildings.
(July 2.)

CITY OF BOSTON.

PROPOSALS FOR ARTIFICIAL STONE SIDEWALKS.

The Superintendent of Streets of the City of Boston, office 47 City Hall, invites proposals for constructing artificial stone sidewalks in School street (southerly side), between Washington and Athelwold streets, Dorchester, and giving bond therefor of a surety company approved by the superintendent. Only proposals obtained at said office, filled out, signed by the bidder and left at said office before 12 o'clock m. of Tuesday, July 12, 1910, with a certified check for \$300, payable to and to be the property of the city if the proposal is not carried out, will at said hour and place be publicly opened and read. The proposals must be made in duplicate, the duplicate, without check, to be deposited by the bidder with the City Auditor previous to the time named for opening the bids. The undersigned reserves the right to give preference to the proposals of bidders agreeing to pay the trades unions' rate of wages, and the right to reject any or all proposals. The proposals should be inclosed in an envelope, sealed and marked "Proposal for Artificial Stone Sidewalks in School Street."

LOUIS K. ROURKE,
Superintendent of Streets.
Boston, June 30, 1910. (July 2.)

CITY OF BOSTON.

TO GENERAL CONTRACTORS.

The Schoolhouse Commissioners of the City of Boston invite sealed proposals for fireproofing the basements of various schoolhouses, Boston, Mass., and giving bond of a surety company therefor in the sum of \$2,000. Only proposals obtained at the office of the commissioners, 120 Boylston street, signed by the bidder and left before 12 o'clock m. of Wednesday, July 13, 1910, at said office, with a certified check for \$500, payable to the city if the proposal is not carried out, will then and there be publicly opened and read. The bid must be made in duplicate, the one with the check to be sent as above, the other to be sent to the City Auditor, City Hall. The commissioners reserve the right to reject any and all proposals and to give preference to bidders paying the trades unions' rate of wages.

(July 2.) CHARLES LOGUE,
JOHN F. KENNEDY,
EDWARD R. GREGORY,
Commissioners.

CITY RECORD

OFFICIAL PUBLICATION OF THE CITY OF BOSTON.

VOL. 2.

SATURDAY, JULY 9, 1910.

NO. 28

City of Boston.

CITY RECORD.

Published weekly under legislative act by the
City of Boston, Mass.

BY SUBSCRIPTION . . . \$1.00 Per Year.
SINGLE COPIES . . . 5 Cents.
IN ADVANCE.

NOTICE TO SUBSCRIBERS.

Subscribers will find the expiring date of their subscription stamped upon the mailing wrapper. As payment must be made in advance, remittance should be made on or before that date.

Application for entry as second-class mail matter pending.

ADVERTISING.

A rate of 10 cents per agate line has been established for such advertisements as under the law must be printed in the *City Record*. Advertising and other copy must be in hand by Thursday of each week to insure its publication in the Saturday issue.

Copies for sale at the Mayor's Office, Room 27, City Hall.

MUNICIPAL SERVICE.

Complaints, inquiries or suggestions regarding the work of municipal departments should be made in writing to the officials directly in charge. The failure of such officials to make reply within a reasonable length of time should be brought to the attention of the Mayor. Communications should be directed as follows:

TO THE BOARD OF STREET COMMISSIONERS, Room 41, City Hall, for information relative to the laying out, relocation, widening and discontinuance of highways; the taking of real property for municipal purposes; the assessments of betterments for streets and sewers; the plotting of undeveloped areas for streets and the opening of private ways; the granting of licenses for the storage or sale of merchandise in public streets; the regulation of street traffic; the making of specific repairs in public streets; the naming of public streets; the planting and removal of trees in public ways; the issuing of licenses for the storage of gasoline, oil and other inflammable substances or explosive compounds; the use of the public ways for any permanent or

temporary obstruction or projection in, under or over the same, including the location of conduits, poles and posts for telephone, telegraph, street railway or illuminating purposes, signs, marqueses, bay windows, coal holes and vaults.

TO THE SUPERINTENDENT OF STREETS, Room 44, City Hall, for information as to the watering, cleaning, lighting and repairing of streets, the construction and care of sewers and catch-basins, the operation of the ferries, the maintenance of bridges and drawbridges and the removal of ashes and offal.

TO THE BOARD OF HEALTH, Room 11, Old Court House (rear of City Hall), for information relative to the inspection of milk, vinegar, meat, fish and vegetables, the issuance of permits for stables, slaughter houses, etc., smoke nuisances, the existence of contagious diseases or public health nuisances.

TO THE WATER COMMISSIONER, Room 58, City Hall, for information relative to the supplying or metering of water and the water charges of the city.

TO THE SUPERINTENDENT OF PUBLIC GROUNDS, 154 East Cottage street, for information as to the care of the Common, Public Garden, and the small parks throughout the city other than playgrounds, and the extermination of the gypsy moth and the charges made for the same.

TO THE PARK COMMISSIONERS, Pinebank, Jamaica Plain, for information as to Franklin Park and Field, Commonwealth avenue, the Back Bay Fens, Marine Park and playgrounds in general throughout the city.

TO THE SCHOOL COMMITTEE, Mason street, for information relative to the operation of the schools of the city.

TO THE SCHOOLHOUSE COMMISSIONERS, 120 Boylston street, for information as to the construction and repair of school buildings.

MUNICIPAL CALENDAR.

Meeting of City Council, Monday, July 18, at 3.30 p. m.

Soley & Blair, Inc., \$935; George T. Rendle, \$1,400; John P. Cavanaugh, \$1,650.

On July 7 the Mayor approved a contract with James H. Ferguson for building the Kimball street overflow. Bids on this work, opened June 29, were as follows:

James H. Ferguson, \$11,163.65; McCarthy & Walsh, \$12,107.25; Peter W. Hill, \$14,870.75; John J. Falvey, \$15,733.

On July 7 the Mayor approved a contract with James H. Ferguson for building sewerage works in Norfolk and Clarkwood streets, Dorchester. Bids on this work, opened June 28, were as follows:

J. H. Ferguson, \$3,153.51; Charles J. Jacobs & Co., \$3,340.37; John McCourt & Co., \$3,374.45; Murphy & Dolan, \$3,482.50; E. F. Kennelly, \$3,498.59; J. B. O'Rourke & Co., \$3,511.10; Antonio D'Addario Company, \$3,684.51; Charles M. Callahan, \$3,726.67.

SUPPLY DEPARTMENT.

On July 7 the Mayor approved a contract with Hosmer, Robinson & Co. for furnishing No. 1 hay and straw in the South Boston, East Boston, Charlestown, city proper and Roxbury districts. Bids on these goods, opened June 29, were as follows:

	No. 1 Hay.	No. 2 Hay.	Straw.
SOUTH BOSTON. Hosmer, Robinson & Co.....	\$23 00	\$22 00	\$13 50
EAST BOSTON. Hosmer, Robinson & Co.....	23 00	22 00	13 50
CHARLESTOWN. Hosmer, Robinson & Co.....	23 00	22 00	13 50
CITY PROPER. Hosmer, Robinson & Co.....	22 75	21 75	13 50
Landy Brothers.....	23 50	22 50	14 50
ROXBURY. Hosmer, Robinson & Co.....	23 00	22 00	13 50
W. P. Whittemore Company.....	23 00	22 00	13 50
Landy Brothers.....	23 50	22 50	14 50

ADDITIONS AND ALLOWANCES TO CONTRACTS.

CONSUMPTIVES' HOSPITAL DEPARTMENT.

On July 5 the Mayor approved a deduction amounting to \$45 from the contract with R. F. Brown for plumbing work in the Second Ward building, on account of the omission of pipe covering on the supply pipes. Original contract, \$4,819. Total deductions, \$158.50. Contract as standing, \$4,660.50.

PARK DEPARTMENT.

On July 6 the Mayor approved an extension of the contract with the Hugh Nawn Contracting Company for filling at the North Brighton Playground, on account of completing and planting the playground, at 25 cents per load of not less than 40 cubic feet. Original contract not to exceed \$3,000. Contract with above addition not to exceed \$4,500.

APPOINTMENT OF ARCHITECTS.

On July 6 the Mayor approved the appointment, by the Board of Schoolhouse Commissioners, of Brainerd & Leeds as architects of the building to be erected in the Prescott district, Charlestown, to contain a boiler plant for the use of the schools in this district.

CONTRACTS AWARDED.

SUPPLY DEPARTMENT.

On July 7 the Mayor approved a contract with the W. P. Whittemore Company for furnishing No. 1 hay and straw in the Dorchester, West Roxbury and Brighton districts, and for furnishing oats, shorts and corn in all districts. Bids on these goods, opened June 29, were as follows:

	No. 1 Hay.	No. 2 Hay.	Straw.	Oats.	Shorts.	Corn.
SOUTH BOSTON.						
W. P. Whittemore Company				\$0 47	\$24 00	\$0 70
EAST BOSTON.						
W. P. Whittemore Company				47	24 00	70
CHARLESTOWN.						
W. P. Whittemore Company				47	24 00	70
CITY PROPER.						
W. P. Whittemore Company				46½	24 00	70
Landy Brothers				48	23 50	73
ROXBURY.						
W. P. Whittemore Company				46½	24 00	70
Landy Brothers				48½	23 50	73
DORCHESTER.

W. P. Whittemore Company	23 00	22 00	13 50	47½	24 00	70
WEST ROXBURY.						
Hosmer, Robinson & Co.	23 50	22 50	13 50			
W. P. Whittemore Company	23 00	22 00	13 50	47½	24 00	70
BRIGHTON.						
Hosmer, Robinson & Co.	23 00	22 00	13 50			
W. P. Whittemore Company	23 00	22 00	13 50	47½	24 00	70

STREET COMMISSIONERS.

On July 2 the Mayor approved the order of the Board of Street Commissioners determining damages sustained by various estates on account of the relocation, extension and construction of Leon street, Roxbury, as a highway from Ruggles street to Greenleaf street:

Michael O'Neil	\$75 00
Heirs and devisees of Philip Dorr and Louisa Dorr	75 00
Helen Donovan	50 00
Sophia Scheid	50 00
Walter P. Scheid	50 00
City of Boston (Schoolhouse)	150 00
W. Ray Baldwin	400 00
Michael O'Neil	100 10
Eva Schwab	75 00
Mary Donovan	300 00
Minna F. Weiler	50 00
Lucian Stanek	40 00
George J. Blasser	40 00
James and Annie Campbell	50 00
Catherine Costello and Heirs and Devises of Bridget Costello	50 00
Heirs or Devises of Ann Carey	50 00
Patrick, Mary and Hannah Carey and Mary and Hannah Carey Trustees	50 00
Charles J. Blasser	50 00
Edward L. Estabrook, et al.	300 00
Total damages	\$1 955 00

Betterments resulting from this improvement were assessed as follows:

Lot 2, Minna W. Weiler	\$44 85
Lot 3, Lucian Stanek	22 05
Lot 4, George J. Blasser	103 50
Lot 5, James and Annie Campbell	70 62
Lot 6, Catherine Costello and Heirs or Devises of Bridget Costello	73 68
Lot 7, Heirs or Devises of Ann Carey	59 04
Lot 8, Patrick, Mary and Hannah Carey and Mary and Hannah Carey Trustees	176 20
Lot 9, Charles J. Blasser	178 36
Lot 10, John P. Weiler	191 40
Lot 11, Heirs or Devises of Benjamin Sewall	120 96
Lot 12, Heirs or Devises of Benjamin Sewall	175 28

Lot 34, City of Boston (Schoolhouse)	147 18
Lot 35, William R. Baldwin	52 83
Lot 36, John T. O'Neil	102 00
Lot 37, Eva Schwab	72 00
Lot 38, Mary Donovan	60 16
Lot 39, Mary Donovan	61 56
Lot 40, Mary Donovan	63 08
Lot 41, John Harmon	86 16
Lot 42, Mary Donovan	91 68
Lot 43, United Drug Company	1,500 00
Total betterments assessed	\$5,132 58

LAND-TAKING.

On July 1 the Mayor granted to the Board of Schoolhouse Commissioners authority to request the Board of Street Commissioners to take, for the purpose of erecting a building to contain a boiler plant for the Prescott District Schools, a certain parcel of land situated on Polk street, Charlestown, containing 7,100 square feet, at an expenditure not to exceed \$8,000.

Similar authority was granted to take for the purpose of enlarging the yard of the Bennett School a parcel of land situated on Chestnut Hill avenue, containing 900 square feet, at an expenditure not to exceed \$500; and to take for schoolhouse purposes a parcel of land in the Warren District, Charlestown, containing 10,997 square feet, at an expenditure not to exceed \$15,000.

AUTHORITY TO ERECT BUILDING.

On July 1 the Mayor approved an instrument authorizing Joseph Lewenberg to erect a one-story building upon Blue Hill avenue in which the City of Boston maintains an easement for the construction of sewerage works.

CLAIMS.

On July 5 the Mayor approved the following awards made by the Committee on Claims of the City Council; the said awards having been approved by the heads of departments involved and by the Corporation Counsel:

James F. McGahan, \$250 for damage done to stock of goods stored in basement of 697 Washington street, caused by water from broken main in Tremont street, January 3, 1910.

P. Shevlin, \$175 for damage to property 599 East First street, caused by water entering and destroying the cellar on or about April 13, 1910.

APPOINTMENTS AND CONFIRMATIONS.

APPOINTMENTS.

The following appointments have been made, subject to confirmation by the Board of Civil Service Commissioners:

July 5, Joseph P. Lomasney, to be a member of the Board of Health.

July 5, Patrick F. McDonald, to be Superintendent of Supplies.

CONFIRMATIONS.

The following appointments were confirmed on the date given:

July 8, Richard M. Walsh, to be a Bath Trustee.

July 8, William M. Murphy, to be a Bath Trustee.

URGES STATE TAX ON WATER WASTE.

HARRISBURG, PA.—The necessity of conserving the supply of water in Pennsylvania is becoming so imperative that the State Water Supply Commission, in its annual report to Governor Stuart, suggests a state tax on water waste, such as is being undertaken in New Jersey. The report gives in detail the results of observations taken of the flow of the principal streams of Pennsylvania, and says:

"It would seem from the above reports that the normal precipitation in some parts of Pennsylvania is little more than sufficient for the requirements. A given deficiency in the precipitation to-day is of more importance than formerly, for the consumption for domestic and industrial purposes is increasing rapidly, while at the same time the proportion of run-off to rainfall tends in many parts of the state to decrease yearly, owing probably to changed watershed conditions; so that the available balance between consumption and supply is growing less, and in the case of some watersheds has been exhausted." Continuing, the report goes into the recent droughts and their effect on the water supply: "The droughts of 1895, 1900, 1904 and 1908 have taught us that with our fairly equal seasonable distribution of precipitation a seemingly small departure from the normal, either in distribution or total precipitation, has a great effect upon the run-off of streams and the available water supply. To meet these conditions it will be necessary either to restrict the use of water and control its waste or to store it in wet seasons for use when the stream flow depreciates. As in the case of other natural resources, the water supply should be used to the fullest, but unnecessary waste should be prevented. The State of New Jersey has attempted to prevent the waste of water by levying a tax of from \$1 to \$10 per million gallons for all water used for the supply of municipalities over and above a rate of 100 gallons per capita per day. Similar methods are applicable to industrial or commercial water supplies.—*Municipal Journal Engineer.*

PROCEEDINGS OF CITY COUNCIL.

Wednesday, July 6, 1910.

Regular meeting of the City Council, held in the Council Chamber, City Hall, at 3.30 p. m., President BALLANTYNE in the chair, and all the members present.

The Council voted, on motion of Coun. HALE, to dispense with the reading of the records of the last meeting.

APPOINTMENTS BY THE MAYOR.

The following was received:

City of Boston,
Office of the Mayor, July 6, 1910.
To the City Council:
Subject to confirmation by your honorable body, I hereby appoint John A. Duggan, Jr. (73 G street, Ward 15), and Edward S. Stevens (216 West Fourth street, Ward 13) constables of the City of Boston for the term ending April 30, 1911.

Respectfully,

JOHN F. FITZGERALD, Mayor.

Laid over under the law.

RESURFACING NORTH BENNET STREET PLAYGROUND.

The following was received:

City of Boston,
Office of the Mayor, July 6, 1910.
To the City Council:
The inclosed statement has been received, in answer to the request contained in your order of June 13, 1910, herewith inclosed, requesting the Park Department to resurface the North Bennet Street Playground.

Yours respectfully,

JOHN F. FITZGERALD, Mayor.

City of Boston,
Board of Commissioners of the
Department of Parks,
July 1, 1910.

Hon. John F. Fitzgerald, Mayor,
City Hall, Boston:

Dear Sir,—With reference to the inclosed order of the City Council, requesting that the Park Department resurface the North Bennet Street Playground, and to make a report as to the same to the City Council, I am directed to say that in our estimates for appropriations to be provided for by a loan bill an item of \$3,600 is asked for for this purpose.

Yours respectfully,

GEORGE F. CLARKE, Secretary.
Placed on file.

GRADING OF LAND, BRIGHTON.

The following was received:

City of Boston,
Office of the Mayor, July 1, 1910.
To the City Council:
I transmit herewith a communication from the Street Department, containing a reply to your order relating to the grading of vacant land at the corner of Cambridge and Mansfield streets.

Respectfully,

JOHN F. FITZGERALD, Mayor.

Street Department, June 30, 1910.

To the Honorable the Mayor:
With reference to inclosed order of the City Council, "that the Superintendent of Streets, through his Honor the Mayor, be requested to confer with the Park Commission in regard to the advisability of using street sweepings in the Brighton district for grading the vacant land at the corner of Cambridge and Mansfield streets," you are respectfully informed that by the Auditor's Report this land appears to be in custody of the Street Commissioners. If the intention of this order is to put this land in condition for future use as a park or playground, it would seem that the first step would be for the City Council to transfer it from the Street Commissioners to the Park Department. It is understood that the Street Commissioners have no objection to such transfer.

Respectfully,

L. K. ROURKE,
Superintendent of Streets.

Placed on file.

TEMPORARY CITY ENGINEER.

The following was received:

City of Boston,
Office of the Mayor, July 1, 1910.
To the City Council:
You are hereby notified that I have this day, under the provisions of section 12 of chapter 486 of the Acts of 1909, designated Superintendent of Streets Louis K. Rourke to discharge temporarily the duties of the office of City Engineer, which was made vacant by the death of William Jackson.

Respectfully,

JOHN F. FITZGERALD, Mayor.

Placed on file.

UNDERGROUND STATIONS.

The following was received:

City of Boston,
Office of the Mayor, June 28, 1910.
To the City Council:

I beg to transmit herewith passages from a report dated March 2, 1910, prepared by the Board of Health, which has been forwarded to me by that body, in reply to the order passed by your honorable body on June 13, requesting that the Health Department furnish you certain information in regard to underground stations at Lowell square and Bowdoin square. The original report was one of several prepared by heads of departments, which were forwarded by me to your honorable body at your meeting of May 2 and referred to the Executive Committee.

Respectfully,

JOHN F. FITZGERALD, Mayor.

Convenience Station in Bowdoin Square.

Bowdoin square is an area of perhaps 10,000 square feet in all, badly cut up by railroad tracks. There are four streets joining here, each of which has its own track with switches connecting the various rails, so that there is available for any purpose such as the construction of a convenience station only about 200 square feet in the middle of the triangle, which space is required at the present time for the use of vehicles. It does not seem feasible, therefore, to establish a convenience station either above or below ground in the street portion of Bowdoin square. The nearest available city property is at Chardon street, about 400 feet distant and inconveniently located with reference to the square. There is an inset into the Revere House which is possibly large enough for a single house for men, but its relation to the stores which face upon this bit of sidewalk would be such that grave injury to them would result. There seems not to be in Bowdoin square any place which this Board can recommend for the purpose of a convenience station, unless private property were taken and entered on, which at that place would make the initial cost of such an establishment prohibitive.

Convenience Station at Lowell Square.

The place suggested at Lowell square is the large open park on Cambridge and Lynde streets, comprising about 7,000 feet. It would be possible to install here a single or a double convenience station, but this particular location would seem to be central in a residential district, distant from transfer stations or great concourses of people, and it would hardly seem as if, in view of the urgent needs of other sections, the placing of a station in this square would be justified.

Placed on file.

BALL FIELD, COMMON.

The following was received:

City of Boston,
Office of the Mayor, June 28, 1910.
To the City Council:
I beg to transmit the inclosed communication from the Superintendent of Public Grounds, which relates to an order passed by your honorable body at the meeting of June 13, and is self-explanatory.

Respectfully,

JOHN F. FITZGERALD, Mayor.

City of Boston,
Public Grounds Department, June 25, 1910.

Hon. John F. Fitzgerald, Mayor of the City of Boston:
Dear Sir,—In regard to the inclosed order from the City Council, dated June 13, 1910, "that the Superintendent of Public Grounds be requested, through his Honor the Mayor, to report to the City Council as to the advisability of reserving a certain part of the Common for juvenile baseball games; and as to the possibility and advisability of having such a baseball field included in the new plans for the Common," I would state that a juvenile playground and baseball field have been duly considered and are being incorporated in the new plans that are being drawn up by Messrs. Olmsted Brothers for the betterment of the Boston Common.

Very truly yours,

D. H. SULLIVAN, Superintendent.
Placed on file.

MODIFICATION OF RESTRICTIONS.

The following was received:

City of Boston,
Office of the Mayor, July 2, 1910.
To the City Council:
I beg to forward herewith a petition from the President of Boston University, in regard to the land on East Concord and Stoughton streets, owned by the university, together with a communication from the Corporation Counsel and an order modifying the restrictions heretofore attached to the ownership of this estate, with the

recommendation that this order be passed by your honorable body.

Respectfully,

JOHN F. FITZGERALD, Mayor.
(Annexed was petition referred to.)

City of Boston,
Law Department, June 23, 1910.
Hon. John F. Fitzgerald, Mayor,
City Hall, Boston:

Dear Sir,—I return herewith petition and an order in regard to the land on East Concord and Stoughton streets, owned by the Boston University. I think that there can be no reasonable objection to this modification. I have remodeled the order which is to be passed, and return it to you in a new form, which Governor Bates says is satisfactory to him. The release which you are to sign will have to be changed and I will have Governor Bates change it so as to meet the approval of the conveyancers and myself.

Yours respectfully,

THOMAS M. BABSON,
Corporation Counsel.

Ordered, That his Honor the Mayor be and hereby is authorized to execute an instrument, to be approved by the Corporation Counsel, whereby the city shall modify the restriction contained in a certain indenture, dated July 26, 1875, on land now owned by Boston University on East Concord and Stoughton streets, so that said premises may hereafter be used, in addition to the purposes limited therein, for the purposes of Clinical Research and Preventive Medicine and either in connection with said Boston University or the Massachusetts Homeopathic Hospital.

Referred to the Executive Committee.

RELOCATION OF EVERETT STATUE.

The following was received:

City of Boston,
Office of the Mayor, July 2, 1910.
To the City Council:
I beg to recommend the passage of the appended order, appropriating five hundred dollars (\$500) for the transfer and relocation of the statue of Edward Everett, now standing in the Public Garden, to Edward Everett square, Dorchester. It seems peculiarly appropriate that this attractive square should contain a statue of the statesman whose name it bears, and the unanimous vote of the Art Commission, which is forwarded herewith, affords complete assurance that the removal will not affect unfavorably the appearance of either site.

Respectfully,

JOHN F. FITZGERALD, Mayor.
Annexed was vote of Art Commission.

Ordered, That the sum of five hundred dollars (\$500) be appropriated to be expended by the Art Commission, for the transfer of the statue of Edward Everett, now located on the Public Garden, to Edward Everett square, Dorchester, and that the same be charged to the Reserve Fund.
(Referred to the Executive Committee.)

PLAYGROUND, WARD 7.

The following was received:

City of Boston,
Office of the Mayor, July 6, 1910.
To the City Council:
I beg to refer to your honorable body the inclosed communication from the Secretary of the Board of Commissioners of the Department of Parks, referring to an order passed in the City Council at the meeting of June 13 relating to the selection of a playground in Ward 7. I have notified the Park Commissioners that it is my intention to authorize the issue of the bonds referred to in this communication, and have requested them to take immediate steps toward the selection of an appropriate site.

Respectfully,

JOHN F. FITZGERALD, Mayor.

City of Boston,
Board of Commissioners of the
Department of Parks,
July 1, 1910.

Hon. John F. Fitzgerald, Mayor,
City Hall, Boston, Mass.:
Dear Sir,—Referring to the inclosed order of the City Council of June 13, asking the Mayor to take steps towards the selection of a playground in Ward 7, the money for which was included in the loan bill of 1909, I am directed to say that no action was taken by the Board towards the selection of a site, for the reason that the appropriation, which was for \$25,000, was not approved by the Mayor, who alone has authority to issue bonds.

Mr. Pettigrew will look over the ground with a view to reporting on any sites available.

Yours respectfully,

GEORGE F. CLARKE, Secretary.
Placed on file.

PETITIONS REFERRED.

The following petitions were received and referred to the committees named, viz.:

Claims.

John Keany, for compensation for damages to property at rear 418 Dorchester avenue by employees of the Sewer Division.

Thomas Cox, for injuries received while employed in the Public Grounds Department.

Frank I. Cobb, to surrender an alleged invalid tax deed of estate on Water street, Charlestown.

Mrs. Ellen Neville, for compensation for damages caused by backing up of sewer at 12 Neptune avenue, Ward 1.

Samuel Medway, for compensation for damages caused by the issuing of a certificate relating to assessments against estate 23 Elmwood street.

Faneuil Hall, etc.

Ladies of the G. A. R., Department of Massachusetts, to use Faneuil Hall October 24-28, inclusive.

John F. Fitzgerald, to use Faneuil Hall July 4.

Executive Committee.

Petitions for sidewalks, viz.:

Artificial Stone.

George Stodder *et al.*, 107 Blackstone street, Ward 6.

J. E. Doherty, 355 Atlantic avenue, Ward 7.
J. Hourihan, corner Vila street and Fenwood road, Ward 19.

Henry Green, 52 Astor street, Ward 10.

Alfred Howard, 122 Talbot avenue, Ward 20.

R. G. Crosby, 44-46 Glendale street, Ward 20.

A. G. Jones, Bird street, corner Hancock street, Ward 20.

Joseph Rivitz, 23 Homestead street, Ward 21.

Henry Green, 141-145 Harold street, Ward 21.

W. H. Sullivan, 679, 683, 687, 691, 695 Morton street, Ward 23.

Joseph J. Lannin, Trustee, 234 South street, Ward 23.

T. J. Lannary, 137 Belgrade avenue, Ward 23.

O. S. Haywood, 22 Florida street, Ward 24.

F. E. Griffin, 24 Florida street, Ward 24.

A. Ripley, 28 Florida street, Ward 24.

Thomas Rush, 40 Florida street, Ward 24.

V. Farina, 1532 Dorchester avenue, Ward 24.

George W. Johnstone, 1914-1926 Beacon street, Ward 25.

Mary G. Stacey, 80 Corey road, Ward 25.

Brick.

Marks Harris, 2-4 Galena street, Ward 21.

COAL AND COKE LICENSE.

A copy of coal and coke license granted by the Secretary of the Commonwealth was received. Placed on file.

STORAGE OF EXPLOSIVES.

Notices were received of the keeping and sale of explosives at the following locations, and of intention to use buildings for same purpose for the ensuing year, viz.:

Kirkwood Bros., 23 Elm street, Ward 6.
Boston Yacht Club, Columbia road, foot of O street.

S. P. Blackburn & Co., 287 Atlantic avenue, Ward 6.

Placed on file.

CONSTABLES' BONDS.

The City Treasurer, after having duly approved of the same, submitted the constables' bonds of George E. Harrington and William C. Wall.

Placed on file.

RAILROAD POLICE.

A communication was received from the Police Commissioner certifying that Walter D. Elcock had been appointed railroad police officer on the Boston, Revere Beach & Lynn Railroad Company. Placed on file.

NOTICE OF HEARING.

Notice was received from the Railroad Commissioners of hearing on July 11, on petition of the Old Colony Street Railway Company, for approval of 7th and 8th locations.

Notice was received from the Railroad Commissioners of hearing on July 1, on petition of Old Colony Railroad Company, for crossover at Mat-tapan square.

Notice was received from the Railroad Commissioners of hearing on July 11, on petition of West End Street Railway Company, for approval of 308th, 309th, 310th, 311th and 312th locations.

Placed on file.

NOTIFICATION OF APPOINTMENTS.

Notification was received of the appointment by the Mayor of Joseph P. Lomasney as Health

Commissioner, and Patrick F. MacDonald as Superintendent of Supplies, and of the delivery of certified copies of said appointments to the Civil Service Commission.

Placed on file.

APPROVAL OF APPOINTMENTS.

Notice was received from the Civil Service Commissioners of approval of appointments of Fred E. Bolton as assessor, and of Charles Logue as Schoolhouse Commissioner.

Placed on file.

REMOVAL, ETC., OF POLES.

Copies of orders were received from the Street Commissioners as follows:

Removal of pole of New England Telephone and Telegraph Company on Saratoga street, Ward 1.

Removal of pole of New England Telephone and Telegraph Company on Landseer street, Ward 23.

Removal of pole of New England Telephone and Telegraph Company on Ashland street, Ward 23.

Removal of pole of Edison Electric Illuminating Company of Boston on Bay State road, Ward 11.

Placed on file.

ERECTION OF POSTS.

Copy of order was received from the Wire Commissioner giving permission to the Police Commissioner to erect posts for police signal boxes on Dorchester avenue and other streets.

Placed on file.

SIDEWALK SCHEDULE.

A communication was received from the Superintendent of Streets of order of constructing gravel sidewalks with granite edgestones in front of estates on Massachusetts avenue, between Southampton street and the bridge, recommending the passage of the following:

Ordered, That the persons named in the within schedule be, and they hereby are, charged and assessed with one-half the sums set to their respective names, as their proportional parts of the cost of constructing gravel sidewalks with granite edgestones in front of their estates on said street, and the same is ordered to be certified, and notice given to the parties aforesaid, under the provisions of chapter 437, of the Acts of 1893, said amount being \$3,883.88.

The order was passed.

SIDEWALKS AROUND PUBLIC GROUNDS.

The following was received:

City of Boston.

Public Grounds Department, June 28, 1910.
Mr. John T. Priest.

City Clerk, Boston, Mass.:

Dear Sir:—In regard to the inclosed order from the City Council, dated June 13, and approved by the Mayor June 25, "that the Superintendent of Public Grounds be requested to place granolithic sidewalks at the junction of Union Park street, Waltham street and Harrison avenue; the expense attending the same to be charged to the appropriation for Public Grounds Department." I would say that I made a reply to the Mayor's office on June 16, concerning this order, in which I stated that "all the sidewalks on the outside of the public grounds are in the charge of the Street Department." Therefore, this order should become null and void, as the Public Grounds Department has no jurisdiction in the matter and no appropriation for such a purpose.

Very truly yours,

D. H. SULLIVAN, Superintendent.

Placed on file.

INVITATION TO IRRIGATION CONGRESS.

An invitation was received by the County Commissioners to attend the eighteenth session of the National Irrigation Congress to be held in Pueblo, Col., September 26-30, 1910.

Placed on file.

MINORS' LICENSES.

President BALLANTYNE submitted petitions for minors' licenses of twelve newsboys, four vendors and one bootblack, and asked of the Council on the same.

The licenses were granted on the usual conditions.

CONFIRMATION OF APPOINTMENT.

Coun. BRAND called up No. 1 unfinished business, viz.:

1. Action on appointment submitted by the Mayor June 27 of Charles G. Stone, to be a

Weighter of Coal and a Measurer of Wood and Fuel, for the term ending April 30, 1911.

The question came on confirmation. Committee—Coun. Brand and Buckley. Whole number of ballots cast 8, yeas 8, and the appointment was confirmed.

CAR SPEED, DUDLEY STREET.

President BALLANTYNE offered an order—That his Honor the Mayor be requested to ask the Boston Elevated Railway Company to instruct their appropriate division superintendent to cause the cars to be run on Dudley street, from Vine street to Dearborn street, at a rate not exceeding four miles an hour until such time as the rails on the street are put in proper condition, as under existing conditions the residents on and in the vicinity of said street are unable to converse in ordinary tones or sleep quietly on account of the noise made by the cars.

Passed.

VACATION FOR JANITORS.

President BALLANTYNE offered an order—That the Superintendent of Public Buildings be authorized to give the janitors under his charge a vacation, as in former years, and under the same conditions.

Passed.

TERMS FOR PERMITS, ETC.

Coun. HALE offered the following:

AN ORDINANCE ESTABLISHING TERMS UPON WHICH CERTAIN PERMITS OR LICENSES ARE TO BE ISSUED BY THE STREET COMMISSIONERS.

Section 1. Permits or licenses for the storage of gasoline or oil, or other inflammable substances or explosive compounds, are to be issued upon the terms and conditions provided for by chapter five hundred and two of the acts of nineteen hundred and eight.

Section 2. The fee or charge for a license or permit to put a coal hole or chute under the sidewalk, said coal hole or chute to be used only for the reception of fuel, shall be one (1) dollar.

Section 3. The fee or charge for a license or permit for the construction, use and occupation of a vault under the sidewalk covered by a bulkhead or door and used only for the reception or delivery of goods, wares and merchandise, shall be one (1) dollar.

Section 4. The fee or charge for a license or permit for a vault under the sidewalk connecting with the cellar or basement of a building shall be one (1) dollar.

Section 5. The fee or charge for a license or permit for a marquee shall be one (1) dollar and an additional ten (10) dollars for each support resting on the street.

Section 6. The fee or charge for a license or permit for a bay window extending over the street shall be as follows:

Paragraph 1. For a bay window, opening into one room on one story with a window or windows at each of its sides and with each of its sides forming an angle of at least 135 degrees with the adjoining exterior wall of the building:

(a) On a house the height of which is $2\frac{1}{2}$ or more times the width of the street, \$100.

(b) On a house the height of which is 2 or more but less than $2\frac{1}{2}$ times the width of the street, \$50.

(c) On a house the height of which is $1\frac{1}{2}$ or more but less than 2 times the width of the street, \$25.

(d) On a house the height of which is 1 or more but less than $1\frac{1}{2}$ times the width of the street, \$5.

(e) On a house the height of which is less than the width of the street, \$1.

Paragraph 2. If a bay window extends across more than one room, a fee twice as large as the fee provided for in paragraph 1 shall be added to that fee for each extra room.

Paragraph 3. If either side of the bay window forms with the adjoining exterior wall of the building an angle of less than 135 degrees, or if a bay window has not a window or windows at each side, then the fee for such bay window shall be twice as much as the fee provided for in paragraph 1.

Paragraph 4. If a bay window runs up two or more stories, it shall be considered for the purpose of assessing fees under this ordinance a separate bay window on each story.

Paragraph 5. If the height of a building on which a bay window has been built subject to this ordinance shall be increased, an additional fee shall be charged equal to the difference between the fee originally charged and the fee that would have been charged had the building been of the increased height at the time the bay window was built.

Paragraph 6. If the room or rooms adjacent to a bay window built subject to this ordinance shall be subdivided, an additional fee shall be charged, equal to the difference between the fee originally charged and the fee that would have been charged had the increased number of rooms existed at the time the bay window was built.

Paragraph 7. If the building on which the bay window is to be built is opposite a public park or playground the fee for such bay window shall be one (1) dollar.

Referred to the Executive Committee.

PAYMENT FOR JANITOR SERVICE.

Ordered, That the bill of John McCloskey, amounting to \$39, for extra janitor service at the Dorchester High School on February 9, March 7 and 25, 1910, in connection with hearings held by the Mayor and City Council at said school on the dates named, be approved and charged to the appropriation for City Council, incidental expenses.

Passed.

PAYMENT OF CARRIAGE HIRE.

Coun. HALE offered an order—That the bill of James F. Ormond, amounting to \$56, for carriage hire for the members of the City Council to attend the funeral of the late ex-Mayor Hibbard on June 1, 1910, be approved and charged to the appropriation for City Council, incidental expenses.

Passed.

APPROVAL OF BILLS.

Coun. HALE offered an order—That the bills incurred for advertising and stenographic services in connection with hearings held by the Executive Committee, on petition of the trustees of the Copley Square Trust for a release of the restrictions on land formerly used for the Museum of Fine Arts, be approved and charged to the appropriation for City Council, incidental expenses.

Passed.

SIDEWALK, ELM HILL AVENUE.

Coun. BRAND presented a petition of the Mt. Pleasant Home, 59 Elm Hill avenue, Roxbury, for granolithic sidewalk with edgestone in front of said home.

In connection with the petition Coun. BRAND offered an order—That the Superintendent of Streets be requested to construct a granolithic sidewalk with edgestone in front of the Mt. Pleasant Home, 59 Elm Hill avenue, Roxbury, Ward 21, under the provisions of chapter 437 of the Acts of 1893.

Passed.

REMOVAL OF TREE.

Coun. BRAND offered an order—That the Superintendent of Public Grounds be requested, through the Board of Street Commissioners, to remove a tree standing in the sidewalk of 93 Fuller street, Dorchester, Ward 24.

Passed.

LAND FOR PARK, WARD 20.

Coun. BRAND offered an order—That the Committee on Finance be requested to include in the first Loan Bill, the sum of twenty-seven thousand (27,000) dollars for the purchase of the land on Washington street for an Overlook Park, between 396 and 406 on said street, Ward 20.

Referred to Finance Committee.

REMOVAL OF POLES.

Coun. BRAND offered an order—That the New England Telephone and Telegraph Company or Edison Electric Illuminating Company be requested, through the Board of Street Commissioners, to remove two poles about 12 feet from their present location, at the corner of Dorchester avenue and Washington street, Pierce square, Dorchester Lower Mills, Ward 24, to permit the construction of a new building at that point.

Passed.

PAYMENT OF FERRY TOLLS.

Coun. BUCKLEY offered an order—That the City Auditor be authorized to allow for payment to the Superintendent of Streets on account of the Ferry Division the sum of one dollar, and the said superintendent is hereby authorized to accept the same in lieu for tolls for the ferries on July 1, 1910, said sum to be charged to the appropriation for Mayor, public celebrations.

Passed.

CLAIMS.

Coun. BUCKLEY, for the Committee on Claims, submitted the following:

(1) Report on petition of Board of Police (referred 1905) for payment to Carl Carstein

for amount of judgment obtained against him—recommending the passage of the following:

Ordered, That there be allowed and paid to Carl Carstein the sum of \$50 for expenses incurred by him in suit against him for act as police officer, said sum to be charged to the appropriation for Police Department.

Report accepted; order passed.

(2) Report on petition of Edward R. Olds (referred June 20) to be reimbursed for expense of suit brought against him—recommending the passage of the following:

Ordered, That there be allowed and paid to Edward R. Olds the sum of \$68.73 for expenses incurred by him in suit against him for act as police officer, said sum to be charged to the appropriation for Police Department.

Report accepted; order passed.

(3) Report on petition of Orren Pray (referred June 27) for compensation for expense incurred by him while an officer at Deer Island—recommending the passage of the following:

(Acting as County Commissioners.)

Ordered, That there be allowed and paid to Orren Pray the sum of \$562.27 for expenses incurred in suit against him for act as officer at the House of Correction, Deer Island, said sum to be charged to the appropriation for County of Suffolk, Penal Institutions Department, House of Correction.

The report was accepted, and the question came on giving the order a second reading.

Coun. KENNY—Mr. President, I move that the order lie over to the next meeting of the Council.

Coun. BUCKLEY—Mr. President, I am also in favor of having the order go over. I am always opposed to having these orders go through as they have. But the precedent has been established in the city government and it is hard to go behind it. The members generally are in favor of these orders anyway; so there is nothing to do but report them. I am agreeable, however, to have this order go over for a week.

The order was assigned to the next meeting.

THE NEXT MEETING.

On motion of Coun. KENNY it was voted that when the Council adjourn it be to meet on Monday, July 18, at 3 p. m.

IMPROVEMENT OF WELLESLEY PARK.

Coun. COLLINS called up No. 3, past assignment, viz.:

3. Resolved, That the Superintendent of Public Grounds be requested, through his Honor the Mayor, to expend the sum of \$750 for improvement and care of Wellesley Park, Dorchester, said sum to be taken from the appropriation for Public Grounds Department; and that the sum of \$750 be taken from the income of the Parkman Fund and expended on Boston Common, under the direction of said superintendent.

The resolution, No. 3 on the calendar, was indefinitely postponed.

CONSTRUCTION OF WHITFIELD STREET.

Coun. BRAND presented a petition signed by Eldora Pillsbury *et al.*, for the acceptance of Whitfield street.

In connection with the petition Coun. BRAND offered the following:

Ordered, That the Board of Street Commissioners be requested to order the laying out and construction of Whitfield street, between Wheatland avenue and Talbot avenue, Ward 20.

Passed.

ASSESSMENT OF RAILROAD PROPERTY.

Coun. BRAND offered an order—That the Board of Assessors be requested to report to the City Council, at its earliest convenience, the area of parcel or parcels of land owned by the New York Central Railroad Company in space bounded by Huntington avenue, Boylston street, Massachusetts avenue and Exeter street, and the tax levied on said parcel or parcels.

The order was read a second time and the question came on its passage.

Coun. CURLEY moved that the order be assigned to the next meeting; declared lost. Coun. CURLEY doubted the vote and asked for the yeas and nays.

The order was assigned to the next meeting, yeas 4, nays 2.

Yeas—Coun. Collins, Curley, Hale, McDonald—4.

Nays—Coun. Ballantyne, Brand—2.

Coun. HALE moved reconsideration of the assignment.

Assignment was reconsidered, and the order was passed.

MARKING OF TREES.

Coun. COLLINS offered an order—That the Superintendent of Public Grounds be requested

to mark two trees on the Common, both off-shoots of the "Old Elm," in such manner as recommended by the New England Historical and Genealogical Society, the expense to be charged to the appropriation for Public Grounds Department.

FIREPROOFING HOSPITAL BUILDINGS.

Coun. COLLINS offered an order—That his Honor the Mayor be requested to transfer the sum of sixty thousand dollars (\$60,000) from the Reserve Fund to an appropriation for "City Hospital Department, Fireproofing Buildings."

Passed.

MONEY EXPENDED, WARDS 8, 10, 11.

Coun. CURLEY offered an order—That the Statistics Department furnish the City Council, at its earliest convenience, a report as to the amounts of money expended during the past twenty years in Wards 8, 10 and 11 on parks, playgrounds, boulevards, street improvements, etc.

Passed.

RECESS TAKEN.

The Council voted, on motion of Coun. HALE, at 4.06 p. m., to take a recess subject to the call of the President.

The members of the Council reassembled in the Council Chamber and were called to order by the President at 4.57 p. m.

TRANSFER OF LAND, BRIGHTON.

Coun. HALE offered an order—That the parcel of land at Cambridge, Lincoln and Mansfield streets, Brighton, containing about 13,948 square feet, now in charge of the Board of Street Commissioners, be transferred to the care and custody of the Park Commissioners.

Passed.

USE OF FANEUIL HALL.

Coun. CURLEY, for the Committee on Faneuil Hall, etc., submitted reports on petitions (referred to-day) for the use of Faneuil Hall—that leave be granted, viz.:

John F. Fitzgerald, Mayor, on July 4.

Ladies of the G. A. R., Department of Massachusetts, October 24-28, inclusive.

Reports accepted; leave granted on the usual conditions.

MOTION TO ADJOURN.

Coun. KENNY moved to adjourn. Lost.

NAVY YARD WORK BY CIVILIANS.

Coun. CURLEY called up No. 5, reconsideration, viz.:

5. Resolved, That in the opinion of the Boston City Council the best interests of the city will be served by having all new and all repair work at the Charlestown Navy Yard done by civilians.

Ordered, That a copy of these resolutions be forwarded to the President and to the Secretary of the Navy.

Question, on motion of Coun. HALE, to reconsider the adoption of the foregoing resolution.

Coun. HALE'S motion to reconsider the adoption of the foregoing resolution and order was declared carried.

Coun. CURLEY doubted vote and asked for yeas and nays, and reconsideration prevailed, yeas 5, nays 4.

Yeas—Coun. Ballantyne, Brand, Collins, Hale, Kenny—5.

Nays—Coun. Attridge, Buckley, Curley, McDonald—4.

The question came on the passage of the resolve and the order.

The question of adopting the resolution and order was assigned to the next meeting.

EXECUTIVE COMMITTEE.

Coun. HALE, for the Executive Committee, submitted the following:

(1) Report on message of Mayor, petition and order (referred to-day) for modification of restriction contained in a certain indenture on land owned by the Boston University on East Concord and Stoughton streets—that the order ought to pass.

Report accepted; order passed.

(2) Report on message of Mayor and order (referred to-day) to expend \$500 for relocation of statue of Edward Everett in Everett square—that the order ought to pass.

Report accepted; order passed.

(3) Report on order (referred June 20) to authorize holidays and vacations to city employees not on yearly salary without loss of pay

—that the same be referred to the departments employing such service with a report of the cost of same.

Report accepted; said reference ordered.

On motion of Coun. BUCKLEY the report was amended, requesting the officers and boards in charge of various departments who are to make these reports to do so at the next meeting, and as amended was accepted.

Coun. KENNY—Mr. President, I was about to suggest that in the matter of ascertaining the expense the auditor also be consulted. I did make that motion in committee, but it seems that it did not get in then.

Pres. BALLANTYNE—There is no matter before the House now.

Coun. KENNY—May I move a reconsideration, Mr. President, so that that amendment may be adopted?

Coun. BUCKLEY—Mr. President, I hope reconsideration will not prevail in this case. We had a very thorough discussion of the matter in the executive committee meeting and it seems to me the gentleman should have made his request at that time and had it thrashed out pro and con. I trust that reconsideration will not prevail.

Pres. BALLANTYNE—It seems to me that the report covers the point, Mr. Kenny, that the order calls for an estimate of expense in connection with each department.

Coun. KENNY—Mr. President, I was going to move that the words "and that the auditor be consulted to ascertain the cost," be inserted.

Coun. CURLEY—Mr. President, I rise to a point of order. An answer to all questions relating to financial matters must be received from the auditor and my point is that the order as drawn is proper, that there is no occasion for reconsideration and amendment.

Reconsideration was declared lost. Coun. KENNY doubted the vote and asked for the yeas and nays.

Reconsideration was lost, yeas 4, nays 4.

Yeas—Coun. Attridge, Collins, Kenny, McDonald, 4.

Nays—Coun. Ballantyne, Buckley, Curley, Hale, 4.

(4) Report on order (referred June 27) to allow employees in Ferry Division two weeks' vacation—that the same be referred to the Superintendent of Streets for his opinion and the cost of same.

The question came on accepting the report.

Coun. BUCKLEY—Mr. President, I think there should be some time limit within which the head of the department should report. Take this vacation order for employees—if the Superintendent of Streets should report favorably upon it about the first of next January it certainly would not be very effective. So, while I know it is impossible to pass this order to-day, as you have the votes here, I move as an amendment that the head of the department be instructed to report at the next meeting of this Council. I move that as an amendment to the report.

The amendment was adopted, the report was accepted and the order was referred to the Superintendent of Streets for his opinion and statement of the cost of same, with a request that he report thereon at the next meeting.

(5) Report on resolution (referred June 27), relative to making reserve men permanent employees—that the same be referred to the Superintendent of Streets for a report.

Report accepted; said reference ordered.

The question came on accepting the report and adopting the recommendation.

The report was accepted. Coun. CURLEY doubted the vote and asked for the yeas and nays.

The report was accepted and the order referred to the Superintendent of Streets for a report on the same, yeas 5, nays 4.

Yeas—Coun. Ballantyne, Brand, Collins, Hale, Kenny—5.

Nays—Coun. Attridge, Buckley, Curley, McDonald—4.

(6) Report on order (referred June 13) to discontinue the wearing of uniforms by city employees—that the same be referred to the Superintendent of Streets for a report on same.

Report accepted; said reference ordered with a request to report at next meeting.

(7) Reports on petitions (severally referred to-day) for sidewalks—recommending the passage of orders that the Superintendent of Streets make sidewalks on hereinafter named streets in front of following named estates, said sidewalks to be from 3 to 10 inches above the gutter adjoining, to be from 5 to 12 feet in width, and to be built of artificial stone with granite edgestone, the owner to furnish said material, viz.:

George Stodder et al., 107 Blackstone street, Ward 6.

J. E. Doherty, 355 Atlantic avenue, Ward 7. J. Hourihan, corner Vila street and Fenwood road, Ward 19.

Henry Green, 52 Astor street, Ward 10.

Alfred Howard, 122 Talbot avenue, Ward 20.

R. G. Crosby, 44-46 Glendale street, Ward 20.

A. G. Jones, Bird street, corner Hancock street, Ward 20.

Joseph Ritz, 23 Homestead street, Ward 21.

Henry Green, 141-145 Harold street, Ward 21.

W. H. Sullivan, 679, 683, 687, 691, 695 Morton street, Ward 23.

Joseph J. Lannin, Trustee, 234 South street, Ward 23.

T. J. Lannary, 137 Belgrade avenue, Ward 23.

O. S. Haywood, 22 Florida street, Ward 24.

F. E. Griffin, 24 Florida street, Ward 24.

A. Ripley, 28 Florida street, Ward 24.

Thomas Rush, 40 Florida street, Ward 24.

V. Farina, 1532 Dorchester avenue, Ward 24.

George W. Johnstone, 1914-1926 Beacon street, Ward 25.

Mary G. Stacey, 80 Corey road, Ward 25.

Marks Harris, 2-4 Galena street, Ward 21 (brick).

Reports severally accepted; orders passed.

REMOVAL OF TREES.

Coun. McDONALD offered an order—That the Superintendent of Public Grounds be requested to remove a dead tree at or near the corner of Lexington and Bunker Hill streets, Charlestown, the expense attending the same to be charged to the appropriation for Public Grounds Department.

Passed.

GENERAL RECONSIDERATION.

On motion of Coun. HALE, the Board refused a general reconsideration of all action taken to-day.

Adjourned, on motion of Coun. COLLINS, at 5.17 p. m., to meet on Monday, July 18, at 3 p. m.

PROCEEDINGS OF SCHOOL COMMITTEE.

July 1, 1910.

A special meeting of the School Committee was held in the School Committee Chamber, Mason-street Building, at 4.22 o'clock, P.M., the Chairman presiding.

Present: Messrs. Brock, Ellis, Lee, Magenis and Scannell.

APPROVAL OF RECORDS.

The reading of the records of the last meeting was omitted, the Board approving them as printed.

AMENDMENT TO COURSE OF STUDY FOR THE NORMAL SCHOOL.

On motion of the Superintendent, it was ORDERED, That the Course of Study for the Normal School for the year 1910-11, as printed in the minutes of May 9, 1910, page 84, and adopted at the meeting of June 27, 1910, be amended as follows:—

Regular Course. First Year; First Period of 12 weeks: Strike out the word "Physiology" in the seventh line and substitute in place thereof—Psychology, so that the item will read as follows:—

Elementary Psychology.....2

Insert the following as a sub-heading to immediately precede the paragraph which reads "Twelve weeks of this year spent in practice in the schools":—

Second Year.

Second Year; Third Period of 12 weeks. Strike out the provision for School Hygiene, 1 period, in the fifth line, and substitute in place thereof the following:—

School Hygiene.....2

SALARY OF WOMEN PLAYGROUND INSPECTORS.

On motion of the Superintendent, it was ORDERED, That the salary of playground inspectors, women, be, and hereby is, established at the rate of one dollar and fifteen cents (\$1.15) for one session and two dollars and twenty-five cents (\$2.25) for two sessions during the summer season of 1910.

SALE OF 64 NORTH MARGIN-STREET SCHOOL ESTATE.

The following order was offered:— ORDERED, That it is advisable to sell the 64 North Margin-street School Estate, in accordance with the provisions of chapter 259 of the acts of 1906.

Passed, unanimously.

TEMPORARY NURSING SERVICE IN OPEN-AIR ROOMS.

On motion, it was ORDERED, That the Superintendent be authorized to accept the offer of the Pea-

body House to provide temporary nursing service in open-air rooms without expense to the city.

RESOLUTIONS ON THE DEATH OF ROBERT E. BURKE.

The following resolutions were offered on the death of the late Robert E. Burke, Assistant Superintendent:—

RESOLVED, That the School Committee of the City of Boston has learned with profound sorrow of the death of Robert E. Burke, a member of the Board of Superintendents, which took place on Monday, June 27, 1910. A career full of promise has been thus brought to a sudden and unexpected close, and the Board records with sincere regret the loss of one of the ablest and most progressive men in the school service.

Mr. Burke was born in this city on March 28, 1874, and received his early education in the Eliot Grammar and the English High Schools. In 1896 he was graduated from the Bridgewater Normal School and three years later completed the course in Harvard University, with the degree of S.B. He first entered the Boston service in November, 1896, as an assistant in the Bigelow Evening School. In February, 1900, he began permanent service in the day schools as a junior master in the Mechanic Arts High School, remaining in this position until February 10, 1904, when he was appointed master in the Normal School. On January 14, 1907, he resigned from this position to accept appointment as Assistant Superintendent of Schools.

Mr. Burke's intellectual ability and personal qualities enabled him to rise rapidly in his chosen profession, and by each successive step he demonstrated his fitness for more responsible duties. He failed in nothing that he undertook, and especially in the office of Assistant Superintendent he showed a breadth of conception, grasp of details, and intellectual attainments of no small order.

His death, resulting from an accident, was a painful reminder of the uncertainty of human existence, and of the dangers that too often cut short lives that promise years of useful service.

The Board tenders its sincere and respectful sympathy to the mother and members of the immediate family of Mr. Burke, and joins with his other friends in their feelings of grief. It directs that this resolution be entered in full in the official minutes of the Board, and that a copy thereof be suitably engrossed and transmitted to the family of the deceased.

Adopted unanimously by a rising vote.

ADJOURNMENT.

The Board adjourned at 4:30 o'clock P.M. Attest:

THORNTON D. APOLLONIO,
Secretary.

AVOIDING A DEFICIT.

The annual deficit of the City of Philadelphia continues to grow larger and larger, and its financing becomes increasingly difficult. When the City Council undertook to sell the municipal gas plant a few years ago—not under competitive but at private sale—the only reason offered was that unless money was raised by some process, the city would soon be in a condition of hopeless bankruptcy. Now the council is approaching the difficulty on another side. It has appointed a special commission to go through the tax rolls with an X-ray apparatus, and discover every item that will stand an increase. By this they hope to bring the total up from \$1,410,000,000 to \$2,000,000,000 of assessable property.

SMOKE SPECIALIST.

Dayton, Ohio, is so much in earnest in its efforts to get rid of smoke that the business men have raised a fund to be used to supplement such a salary as the city feels it can pay to procure the most expert man that can be found on this subject. Smoke is one of the most expensive and deadly products of the modern city.

MARKET HOUSE OF KNOXVILLE, TENN.

When Knoxville, Tenn., was laid out in 1787 by James White, the founder of Knoxville, he donated an acre of land in the center of the city for a market place, with the provision that the country people should never be deprived of the privilege of selling their produce there; further, that in the center there should be a market house, the length to be regulated by the growth of that particular section as to buildings. For a half of a century an old building stood on the lot, which was later doubled in size; and as this had again become inadequate, in 1897, when S. G. Heiskell, the present mayor, was elected, the first thing he did was to recommend a new market house building. A tax was levied and an appropriation was made of \$32,000 for the building, and Baumann Brothers prepared plans which were adopted.

At the north end of the square was the three-story city hall, with the frontage at the north end of forty-five feet and a depth of about 100 feet, the ground floor being used as a fire station. The old market building was razed, the firemen were removed from the city hall building, and on the site a handsome three-story building, of only two floors, however, went up. The building extends north and south something like 500 feet, and is forty-one feet wide.

The first floor, which is used as the market place, comprises fifty-five booths or stalls, fifty-four of which are rented at a rate of \$1.10 per front foot per month, yielding a monthly revenue of \$715. One stall in the city hall section has been utilized as the site for a safe, three stories in height.

Every butcher or vendor of perishable goods has a large refrigerator in his stall, which he himself must furnish. They are well constructed, so as to suit the appointment of the stall and give satisfaction. Each counter is covered with Knox county marble, either the gray Knox or the Knox county or Hawkins county variegated grades. It is now proposed to build a basement under the market house, and there install an ice and refrigerating plant and warerooms; but as the truck growers of this section almost wholly supply the vegetables and the local abattoirs the meats, the necessity is not now imperative even with the fish dealers, who have provided ample refrigerators under the counters. The ice used is furnished by local concerns at a very low figure.

The heating of the market house is very simple, being from a furnace located under the arcade section, and by means of pipes which ramify through the building. Owing to the temperate climate of this section, the system distributes the heat in such a manner that the inmates of the market house are kept comfortable, but the heat does not become sufficient to affect the vegetables and meats. The building is lighted by electricity furnished free by the city, as is the water. In front of every stall is a neat metallic sink for washing goods, and drop lights depend from the ceiling, several for each stall. A system of fans has been installed, propelled by electricity, which keep off flies and insects. Enough room is afforded for basket peddlers to stand along the center of the walkway and dispose of their produce, such as butter and eggs, and they are charged no rent or license for this. The vendors from the wagons also are immune from tax or license under the provisions of James White, who gave the site.

In this market is sold everything that goes upon the table, from the pickled pig's

feet or oldfashioned rye hominy, made by the country women from the mountains, to the most choice steak, roast or confectioner's cake.—*Municipal Journal and Engineer.*

RAILWAY TERMINAL PROBLEM.

The railway terminal problem was recently discussed by Mr. James J. Hill in a speech prepared for the National Association of Millers at Minneapolis. The burden of this address was the inability of the railways to keep up with the demands made upon them, because of the inability of making transfers at the principal terminal points without long delays. The remedy where it is practicable is manifestly the enlargement of the terminal facilities and an increase in the effectiveness of existing facilities. A partial remedy which he suggested is the decentralization of business so far as it is practicable. In the case of the milling industry this could be done by delivering the mill products directly to the smaller cities and towns instead of consigning them to central agencies which must transfer them to the smaller buyers, thereby putting a strain on the overworked large transfer terminals. The importance of this subject was pointed out by Mr. Hill in the following words: "The problem of terminals is the greatest problem of the country. It is the problem of transportation agencies, of financiers, of the communities directly affected, and of all the industries that depend directly or indirectly upon cheap and speedy carriage for the commodities which they buy and sell. It is a problem for everybody since probably not one business man in the whole country would fail to feel the disastrous effects if it were to be neglected for the next five years, as it has for the last ten, and blight every form of activity by paralyzing the whole trade." Attention is called to this subject because from the viewpoint of economy there is hardly any feature of railway operation to-day in which mechanical resources are so little utilized as in the handling of goods at terminals and transfer yards. The country seems wedded to the two-wheel truck and the perspiring freighthandler, although it is pretty certain that the combination is wasteful of both time and money. Fortunately some installations are now being worked out which may be expected to demonstrate that machinery can be substituted for a large proportion of the archaic methods so universal to-day.—*Engineering Record.*

BILL RELATING TO GARBAGE CREMATORIES.

Crematories for the disposal of garbage within ten miles of the corporate limits of any city in the State of New York are to be operated in the future, according to the provisions of a bill signed on June 11 by Governor Hughes, with such appliances and methods as to prevent offensive and noxious gases and fumes arising from the treatment of garbage, offal, dead animals or fish. A private corporation or a municipality operating any such crematory which allows or permits such a nuisance is deemed guilty of a misdemeanor, punishable by a fine of not less than \$100 or more than \$250 for each day that the odors are permitted to exist, or by imprisonment for not more than one year, or both. The new law takes effect on September 1. According to press reports the bill aims to do away with the odors from garbage disposition plants on Barren Island, N. Y., which are said to be objectionable at times.

PROPOSALS FOR BRICK BLOCK PAVEMENT.

The Superintendent of Streets of the City of Boston, office 47 City Hall, invites proposals for brick block pavement and regulating Dudley street, between Warren and Magazine streets, Roxbury, and giving bond therefor of a surety company approved by the superintendent. Only proposals obtained at said office, filled out, signed by the bidder and left at said office before 12 o'clock m. of Monday, July 18, 1910, with a certified check for \$2,500, payable to and to be the property of the city if the proposal is not carried out, will at said hour and place be publicly opened and read. The proposals must be made in duplicate, the duplicate, without check, to be deposited by the bidder with the City Auditor previous to the time named for opening the bids. The undersigned reserves the right to give preference to the proposals of bidders agreeing to pay the trades unions' rate of wages and the right to reject any or all proposals, and no proposal will be accepted unless a fair, reasonable price is bid for each item. The proposal should be inclosed in an envelope, sealed and marked "Proposal for Brick Block Pavement, Dudley Street."

LOUIS K. ROURKE,
Superintendent of Streets.

Boston, July 7, 1910. (July 9.)

READVERTISEMENT.

PROPOSALS FOR BRICK BLOCK PAVEMENT.

The Superintendent of Streets of the City of Boston, office 47 City Hall, invites proposals for brick block pavement and regulating Geneva avenue, between Bowdoin and Park streets, Dorchester, and giving bond therefor of a surety company approved by the superintendent. Only proposals obtained at said office, filled out, signed by the bidder and left at said office before 12 o'clock m. of Monday, July 18, 1910, with a certified check for \$2,500, payable to and to be the property of the city if the proposal is not carried out, will at said hour and place be publicly opened and read. The proposals must be made in duplicate, the duplicate, without check, to be deposited by the bidder with the City Auditor previous to the time named for opening the bids. The undersigned reserves the right to give preference to the proposals of bidders agreeing to pay the trades unions' rates of wages and the right to reject any or all proposals, and no proposal will be accepted unless a fair, reasonable price is bid for each item. The proposal should be inclosed in an envelope, sealed and marked "Proposal for Brick Block Pavement, Geneva Avenue."

LOUIS K. ROURKE,
Superintendent of Streets.

Boston, July 7, 1910. (July 9.)

PROPOSALS FOR SEWERAGE WORKS.

The Superintendent of Streets of the City of Boston, office 47 City Hall, invites proposals for building sewerage works in Friend street, between Traverse and Market streets, City Proper, and giving bond therefor of a surety company approved by the Superintendent in the sum of two thousand dollars (\$2,000), to secure the due performance of the contract and the full protection of the City. Forms of bids may be obtained at the said office of the Superintendent of Streets. Each bid should be inclosed in an envelope, sealed, marked "Bid for Building Sewerage Works in Friend Street," and left at the said office of the Superintendent of Streets before 12 m. on Tuesday, July 19, 1910, with a certified check for five hundred dollars (\$500), payable to and to become the property of the city if the bid after acceptance is not carried out. The bids will then and there be publicly opened and read. Bids must be made in duplicate, the duplicate without check to be deposited by the bidder with the City Auditor previous to the time named for opening the bids. The undersigned reserves the right to give preference to the proposals of bidders agreeing to pay the trades unions' rate of wages and the right to reject any or all proposals.

LOUIS K. ROURKE,
Superintendent of Streets.

Boston, July 7, 1910. (July 9.)

PROPOSALS FOR LAND IN PARKER HILL DISTRICT, WARD 19.

The Park Commissioners of Boston invite proposals for the sale to the city of suitable land for a playground in the Parker Hill District, the proposals to state location, area and price per square foot of the land offered, to be marked "Proposals for Land for Playground," and sent by mail, or otherwise, to the office of the Board, Olmsted Park, Jamaica Plain, on or before 12 m. of July 30, 1910. The Board reserves the right to reject any or all proposals.

ROBERT S. PEABODY,
JAMES M. FRIEDBERG,
DANIEL H. COOKLEY,
Commissioners.

(July 9.)

CITY OF BOSTON.

PROPOSALS FOR \$3,803,000 4 PER CENT. CITY OF BOSTON LOANS. BONDS EXEMPT FROM TAXATION IN MASSACHUSETTS.

TREASURY DEPARTMENT.

OFFICE OF THE CITY TREASURER.

CITY HALL, BOSTON, MASS., June 27, 1910.

In pursuance of the authority given by Acts of Massachusetts, orders of the City Council of Boston, and of the School Committee of Boston, the undersigned will receive proposals until 12 o'clock M., Monday, July 11th, 1910, for the whole or any part of the following loans:

LOANS SECURED BY SINKING FUNDS.

BOSTON RIVERBANK SUBWAY LOAN, \$500,000.

In pursuance of Chap. 573, Acts of Massachusetts 1907. Payable July 1st, 1950.

RAPID TRANSIT—CAMBRIDGE CONNECTION, \$500,000.

In pursuance of Chap. 520, Acts of Massachusetts 1906. Payable July 1st, 1950.

SERIAL LOANS.

LAND AND BUILDINGS FOR SCHOOLS, \$500,000.

In pursuance of an order of the School Committee of Boston, of February 12th, 1909. Payable \$25,000, annually, July 1st, 1911, to July 1st, 1930, inclusive.

LAND AND BUILDINGS FOR SCHOOLS, \$500,000.

In pursuance of an order of the School Committee of Boston, of March 29th, 1910. Payable \$25,000, annually, July 1st, 1911, to July 1st, 1930, inclusive.

VARIOUS MUNICIPAL PURPOSES—CONSUMPTIVES' HOSPITAL, DOMESTIC BUILDING, \$100,000.

In pursuance of an order of the City Council of Boston, approved May 6th, 1909. Payable \$5,000, annually, July 1st, 1911, to July 1st, 1930, inclusive.

VARIOUS MUNICIPAL PURPOSES—HIGHWAYS, MAKING OF, \$300,000.

In pursuance of an order of the City Council of Boston, approved May 6th, 1909. Payable \$15,000, annually, July 1st, 1911, to July 1st, 1930, inclusive.

HIGHWAYS, MAKING OF, \$300,000.

In pursuance of an order of the City Council of Boston, approved May 17th, 1910. Payable \$15,000, annually, July 1st, 1911, to July 1st, 1930, inclusive.

SEWERAGE WORKS, \$300,000.

In pursuance of an order of the City Council of Boston, approved March 30th, 1910. Payable \$10,000, annually, July 1st, 1911, to July 1st, 1940, inclusive.

SEPARATE SYSTEMS OF DRAINAGE, \$674,000.

In pursuance of an order of the City Council of Boston, approved April 12th, 1910. Payable \$23,000, annually, July 1st, 1911, to July 1st, 1924, inclusive, and \$22,000, annually, July 1st, 1925, to July 1st, 1940, inclusive.

BOWDOIN STREET, GRADE DAMAGES, \$49,000.

In pursuance of an order of the City Council of Boston, approved May 17th, 1910. Payable \$3,000, annually, July 1st, 1911, to July 1st, 1919, inclusive, and \$2,000, annually, July 1st, 1920, to July 1st, 1930, inclusive.

VARIOUS MUNICIPAL PURPOSES—EAST BOSTON COURTHOUSE AND POLICE STATION, \$80,000.

In pursuance of an order of the City Council of Boston, approved May 6th, 1909. Payable \$4,000, annually, July 1st, 1911, to July 1st, 1930, inclusive.

In accordance with the provisions of Chapter 486, Acts of Massachusetts, 1909, the effect of premiums on the "Serial Loans" will be to reduce the total amount of bonds issued. This reduction because of premiums will be made from the installments last maturing of the several orders, and no bonds will be issued for less than \$1,000.

All loans will be issued in Registered Bond Certificates of \$1,000 each, or any multiple thereof, and will be paid on the dates specified for each loan, all with interest at the rate of 4 per cent. per annum, payable semiannually, on the first days of January and July in each year, at the office of the City Treasurer, Boston.

By an Act of the Legislature these Bonds are exempt from taxation in Massachusetts.

Interest for less than one month will be calculated on a basis of 365 days to the year.

The certificates will be dated July 1st, 1910, and will be ready for delivery, and money received for the same July 18th, 1910. Interest will begin July 1st, 1910, and will cease on the date on which the Bonds are made payable.

Holders of these certificates, if they so desire, can receive the semiannual interest through the mail by check payable to their order.

Proposals must be sealed and addressed to Charles H. Slattery, City Treasurer, Boston, Mass., endorsed "Proposals for Loans," and clearly state whether for the whole or part of said loans, and, if for part, the amount. Each proposal must be accompanied by a certified check on a Boston National Bank, or by cash, equal to one per cent. of the amount of loans bid for, the check made payable to the City of Boston, Charles H. Slattery, City Treasurer. The check or cash of any bidder to whom an award is made will be retained as part payment for the loan or loans awarded, but no interest will be allowed thereon. All other checks or cash will be returned.

Accrued interest from July 1st, 1910, to date of delivery is to be paid by the purchaser.

All proposals will be opened by the undersigned in the office of the City Treasurer, Monday, July 11th, 1910, at 12 o'clock M. The City Treasurer reserves the right to reject any or all bids or to accept such bid or bids as may seem to him to be the most advantageous to the city.

(July 9.)

CHARLES H. SLATTERY,
City Treasurer.

CITY OF BOSTON.

PROPOSALS FOR COAL.

The Trustees of the Boston City Hospital will receive sealed proposals for supplying the Hospital with 5,300 tons, more or less, 2,240 pounds to the ton, of semi-bituminous coal of the best quality, free from excessive sulphur, slate, moisture or dirt, and which will not develop a dangerous heat in the bins. Deliveries to be made in cargo lots, 1,000 to 1,300 tons each, as follows: First lot, third week in September; second lot, third week in October; third lot, second week in November; fourth lot, first week in December; fifth lot, first week in January, 1911. Delivery of coal to be alongside the coal pocket, Roxbury Canal. Car weights (sworn to) must accompany all bills, in addition to bills of lading for all cargoes of coal delivered to the Hospital. Proposals to be made on printed forms to be obtained at the office of the Superintendent of the Hospital, and left at that office not later than July 20, 1910, at 12 o'clock noon, at which time and place the proposals will be publicly opened. Each proposal must be accompanied by a properly certified check for \$500, and a bond will be required for the faithful performance of the contract. A duplicate copy of the proposal must be filed with the City Auditor before 12 o'clock noon on the date given above for receiving proposals. The right is reserved by the Trustees to choose such coal as they deem best for the interests of the Hospital, or to reject any or all proposals.

Per order of the Trustees,

(July 9.) JOHN H. MCCOLLOM,
Superintendent.

CITY OF BOSTON.

TO HEATING CONTRACTORS.

The Schoolhouse Commissioners of the City of Boston invite sealed proposals for installing new boiler plant and other work incidental thereto in the Prescott District, Polk street, Charlestown, Mass., and giving bond of a surety company therefor in the sum of \$5,000. Only proposals obtained at the office of the commissioners, 120 Boylston street, signed by the bidder and left before 12 o'clock m. of Wednesday, July 20, 1910, at said office, with a certified check for \$1,000, payable to the city if the proposal is not carried out, will then and there be publicly opened and read. The bid must be made in duplicate, the one with the check to be sent as above, the other to be sent to the City Auditor, City Hall. The commissioners reserve the right to reject any and all proposals and to give preference to bidders paying the trades unions' rate of wages.

(July 9.) CHARLES LOGUE,
JOHN F. KENNEDY,
EDWARD R. GREGORY,
Commissioners.

CITY OF BOSTON.

PROPOSALS FOR FLOUR.

The Penal Institutions Commissioner invites proposals to supply the House of Correction, Deer Island, with 300 barrels, more or less, of hard wheat flour, and to furnish a bond in a surety company of \$500, if required by the commissioner. Said flour to be delivered on or before August 11, 1910, on board the steamer "Monitor" at Eastern Avenue Wharf, Boston, Mass. Specifications and sample of the grade as the standard may be obtained at office of the Penal Institutions Commissioner, 32 Tremont street. Proposals will be received until July 14, 1910, at 12 m., when the same will be publicly opened. The commissioner reserves the right to reject any or all bids. A duplicate of bid must be filed with City Auditor at or before same time.

(July 9.)

FRED S. GORE,
Commissioner.

CITY OF BOSTON.

PROPOSALS FOR FILLING NEPONSET PLAYGROUND.

Proposals for furnishing 14,000 cubic yards, more or less, of good clean filling, and giving bonds of a surety company therefor in such sum as the Park Commissioners may determine, signed by the bidder and left before 3 p. m. of July 20, 1910, at the office of the Park Commissioners, Pine Bank, Olmsted Park, Jamaica Plain, with a certified check for \$200, payable to and to be the property of the city if the proposal is not carried out, will then and there be publicly opened and read. A duplicate proposal, without the check, must be deposited with the City Auditor previous to the time for opening the bids. Bids for a smaller quantity than the whole amount required, not less than 500 cubic yards, will be considered. The filling must be deposited over the whole playground, as directed by the person in charge, and may be either gravel, clay or ashes, free from refuse or decomposable material. The proposal must state the price per cubic yard measured in the carts or cars in which delivery is made and the time required to do the work. The commissioners reserve the right to reject any or all proposals.

(July 9-16.) ROBERT S. PEABODY,
JAMES M. PRENDERGAST,
DANIEL H. COAKLEY,
Commissioners.

CITY OF BOSTON.

TO GENERAL CONTRACTORS.

The Schoolhouse Commissioners of the City of Boston invite sealed proposals for building addition to Wyman Street School, Wyman street, Jamaica Plain, Mass., and giving bond of a surety company therefor in the sum of \$8,000. Only proposals obtained at the office of the commissioners, 120 Boylston street, signed by the bidder and left before 12 o'clock m. of Monday July 18, 1910, at said office, with a certified check for \$1,000, payable to the city if the proposal is not carried out, will then and there be publicly opened and read. The bid must be made in duplicate, the one with the check to be sent as above, the other to be sent to the City Auditor, City Hall. The commissioners reserve the right to reject any and all proposals and to give preference to bidders paying the trade unions' rate of wages.

(July 9.) CHARLES LOGUE,
JOHN F. KENNEDY,
EDWARD R. GREGORY,
Commissioners.

CITY OF BOSTON.

TO GENERAL CONTRACTORS.

The Schoolhouse Commissioners of the City of Boston invite sealed proposals for erecting and completing building and installing plumbing and electric systems in Boiler House, Prescott District, Polk street, Charlestown, Mass., and giving bond of a surety company therefor in the sum of \$3,000. Only proposals obtained at the office of the commissioners, 120 Boylston street, signed by the bidder and left before 12 o'clock m. of Monday, July 18, 1910, at said office, with a certified check for \$1,000, payable to the city if the proposal is not carried out, will then and there be publicly opened and read. The bid must be made in duplicate, the one with the check to be sent as above, the other to be sent to the City Auditor, City Hall. The commissioners reserve the right to reject any and all proposals and to give preference to bidders paying the trades unions' rate of wages.

(July 9.) CHARLES LOGUE,
JOHN F. KENNEDY,
EDWARD R. GREGORY,
Commissioners.

CITY OF BOSTON.

TO GENERAL CONTRACTORS.

The Schoolhouse Commissioners of the City of Boston invite sealed proposals for altering heating and ventilating apparatus in Wyman Street School, Wyman street, Jamaica Plain, Mass., and giving bond of a surety company therefor in the sum of \$3,000. Only proposals obtained at the office of the commissioners, 120 Boylston street, signed by the bidder and left before 12 o'clock m. of Monday, July 18, 1910, at said office, with a certified check for \$1,000 payable to the city if the proposal is not carried out, will then and there be publicly opened and read. The bid must be made in duplicate, the one with the check to be sent as above, the other to be sent to the City Auditor, City Hall. The commissioners reserve the right to reject any and all proposals and to give preference to bidders paying the trade unions' rate of wages.

(July 9.) CHARLES LOGUE,
JOHN F. KENNEDY,
EDWARD R. GREGORY,
Commissioners.

CITY RECORD

OFFICIAL PUBLICATION OF THE CITY OF BOSTON.

VOL. 2.

SATURDAY, JULY 16, 1910.

No. 29

City of Boston.

CITY RECORD.

Published weekly under legislative act by the
City of Boston, Mass.

BY SUBSCRIPTION . . . \$1.00 Per Year.
SINGLE COPIES . . . 5 Cents.
IN ADVANCE.

Application for entry as second-class mail
matter pending.

ADVERTISING.

A rate of 10 cents per agate line has been established for such advertisements as under the law must be printed in the *City Record*. Advertising and other copy must be in hand by Thursday of each week to insure its publication in the Saturday issue.

Copies for sale at the Mayor's Office, Room 27,
City Hall.

MUNICIPAL SERVICE.

Complaints, inquiries or suggestions regarding the work of municipal departments should be made in writing to the officials directly in charge. The failure of such officials to make reply within a reasonable length of time should be brought to the attention of the Mayor. Communications should be directed as follows:

TO THE BOARD OF STREET COMMISSIONERS, Room 41, City Hall, for information relative to the laying out, relocation, widening and discontinuance of highways; the taking of real property for municipal purposes; the assessments of betterments for streets and sewers; the plotting of undeveloped areas for streets and the opening of private ways; the granting of licenses for the storage or sale of merchandise in public streets; the regulation of street traffic; the making of specific repairs in public streets; the naming of public streets; the planting and removal of trees in public ways; the issuing of licenses for the storage of gasoline, oil and other inflammable substances or explosive compounds; the use of the public ways for any permanent or temporary obstruction or projection in, under or over the same, including the location of conduits, poles and posts for telephone, telegraph, street railway or illuminating purposes, signs, marquis, bay windows, coal holes and vaults.

TO THE SUPERINTENDENT OF STREETS, Room 44, City Hall, for information as to the watering, cleaning, lighting and repairing of streets, the construction and care of sewers and catch-basins, the operation of the ferries, the maintenance of bridges and drawbridges and the removal of ashes and offal.

TO THE BOARD OF HEALTH, Room 11, Old Court House (rear of City Hall), for information relative to the inspection of milk, vinegar, meat, fish and vegetables, the issuance of permits for stables, slaughter houses, etc., smoke nuisances, the existence of contagious diseases or public health nuisances.

TO THE WATER COMMISSIONER, Room 58, City Hall, for information relative to the supplying or metering of water and the water charges of the city.

TO THE SUPERINTENDENT OF PUBLIC GROUNDS, 154 East Cottage street, for information as to the care of the Common, Public Garden, and the small parks throughout the city other than playgrounds, and the extermination of the gypsy moth and the charges made for the same.

TO THE PARK COMMISSIONERS, Pinebank, Jamaica Plain, for information as to Franklin Park and Field, Commonwealth avenue, the Back Bay Fens, Marine Park and playgrounds in general throughout the city.

TO THE SCHOOL COMMITTEE, Mason street, for information relative to the operation of the schools of the city.

TO THE SCHOOLHOUSE COMMISSIONERS, 120 Boylston street, for information as to the construction and repair of school buildings.

MUNICIPAL CALENDAR.

Morgan, tree climber, 1 day at \$2.25, \$2.25; Thomas Mealey, sodder, ¼ day at \$2.50, \$1.87; Thomas Manning, moth destroyer, 2 days at \$2.50, \$5; John Mullen, sodder and grader, ¼ day at \$2.25, \$1.69; Peter Minton, gardener, 2½ days at \$3.00, \$8.25; Michael Maguire, moth destroyer, 2 days at \$2.25, \$4.50; John J. Murphy, teamster, 1 day at \$2.25, \$2.25; Cornelius Murphy, gardener, 1½ days at \$2.25, \$3.94; Hugh McGoldrick, moth destroyer, 1½ days at \$3.00, \$4.50; William McGowan, moth destroyer, 3½ days at \$2.25, \$7.31; Patrick McDonough, laborer, 2½ days at \$2.25, \$4.78; Bartholomew McGrath, laborer, ½ day at \$2.25, \$1.13; John Murphy, laborer, 1½ days at \$2.25, \$3.38; Patrick McGaffrey, laborer, 1½ days at \$2.25, \$3.38; Michael McLaughlin, laborer, ½ day at \$2.25, \$1.13; Robert Marsey, laborer, ½ day at \$2.25, \$1.13; John T. Neary, moth destroyer, 1 day at \$2.25, \$2.25; Dennis O'Connell, mason's tender, 2½ days at \$2.50, \$6.87; Michael O'Malley, steamfitter's helper, ¼ day at \$2.25, \$1.13; Patrick O'Hearn, gardener, ¼ day at \$2.50, \$1.87; Michael Prior, moth destroyer, 1 day at \$2.50, \$2.50; Aaron Parker, tree climber, 1½ days at \$2.50, \$4.37; James B. Quinn, 1½ days at \$3.00, \$5.25; John Rooney, moth destroyer, 1 day at \$2.50, \$2.50; Michael J. Reardon, gardener, 1 day at \$2.75, \$2.75; James J. Sullivan, gardener, 2 days at \$2.25, \$4.50; Harry Shaw, gardener, 2½ days at \$3.50, \$9.63; Peter Sweeney, steamfitter's helper, ¼ day at \$2.25, \$1.69; Richard Tyler, sodder, 2½ days at \$3.00, \$8.25; Edward Powers, gardener, 2½ days at \$2.50, \$6.87; Michael Vaughn, laborer, ½ day at \$2.25, \$1.13.

Street Department.

John P. Meehan, chauffeur, at \$21 per week, 1 day, \$3.

Street Department (Highway Division).

For the week ending Thursday, July 7, 1910, as follows:

Andrew T. Roach, weigher, 1 day at \$2.50, \$2.50; John T. Sweeney, subforeman, 1 day at \$3.50, \$3.50; William L. Carty, inspector, 1½ days at \$3, \$4.50; Francis P. Aieta, clerk, 1 day at \$2.50, \$2.50; James E. McNulty, paver, 1 day at \$2.50, \$2.50; James J. Sullivan, messenger, 1 day at \$3, \$3; John H. Murphy, inspector, 1 day at \$3, \$3; Dwight L. Hubbard, junior assistant engineer, ½ day at \$4.50, \$2.25; George L. Grainger, instrumentman, ½ day at \$3, \$1.50; James J. Doyle, rodman, ½ day at \$2.50, \$1.25; James D. Gorman, inspector, ¼ day at \$3, \$2.25; George W. Jepson, inspector, 2½ days at \$3, \$7.50; Thomas W. H. Kelley, inspector, 1 day at \$4, \$4; Frank E. Martin, inspector, ½ day at \$3, \$1.50; Richard V. Quirk, inspector, ¼ day at \$3, \$0.75; Michael F. O'Brien, inspector, 1½ days at \$3, \$4.50; James A. Keveney, inspector, ¼ day at \$3, \$2.25; Frederick A. Breen, inspector, 1 day at \$3, \$3; John F. Cullen, inspector, 1½ days at \$3, \$4.50; and 66 laborers, \$162.

A. P. Turnbull, assistant drawtender, 1 day at \$1,200 per year, \$3.29; James

E. Murray, assistant drawtender, 1 day at \$1,200 per year, \$3.29; William J. Doherty, assistant drawtender, 2 days at \$900 per year, \$4.93; John J. Graham, assistant drawtender, 2 days at \$900 per year, \$4.93; Francis L. Morse, assistant drawtender, days at \$800 per year, \$8.76; Matthew L. Kelly, assistant drawtender, 3 days at \$800 per year, \$6.57; Dennis C. Mahoney, assistant drawtender, 3 days at \$800 per year, \$6.57; Daniel J. Shea, assistant drawtender, 3 days at \$800 per year, \$6.57; P. J. Coleman, assistant drawtender, 2 days at \$800 per year, \$4.38; George W. Pike, assistant drawtender, 2 days at \$800 per year, \$4.38; William T. O'Neil, assistant drawtender, 2 days at \$800 per year, \$4.38; Thomas D. Leahy, assistant drawtender, 1 day at \$800 per year, \$2.19; Richard N. Power, assistant drawtender, 1 day at \$800 per year, \$2.19; Edward J. Sullivan, assistant drawtender, 1 day at \$800 per year, \$2.19; Charles H. Powers, assistant drawtender, 1 day at \$800 per year, \$2.19; Dennis Clifford, assistant drawtender, 1 day at \$800 per year, \$2.19; John J. Delay, assistant drawtender, 1 day at \$800 per year, \$2.19; John F. Collins, assistant drawtender, 1 day at \$900 per year, \$2.46; John Doran, assistant drawtender, 1 day at \$800 per year, \$2.19; John J. Rand, assistant drawtender, 1 day at \$800 per year, \$2.19; William M. Tracy, assistant drawtender, 1 day at \$800 per year, \$2.19.

Street Department (Sanitary Division).

For the week ending Thursday, July 7, 1910:

James Reagan, inspector, 1 day at \$3, \$3; John Duggan, inspector, 2½ days at \$3, \$7.50; F. A. Sullivan, inspector, ½ day at \$2.50, \$1.25; J. C. Smith, dumper, 1 day at \$2.75, \$2.75; James Barry, scowman, ½ day at \$2.50, \$1.25; Edmund Hardy, scowman, 1 day at \$2.50, \$2.50; J. A. Dillon, foreman, 1½ days at \$3.50, \$5.25; and 97 laborers, \$108.11.

N. V. Quinn, inspector, 2½ days at \$2.50, \$6.25; D. J. Cronin, inspector, ¼ day at \$2.50, \$1.88; J. P. Kelley, inspector, 2½ days at \$3, \$7.50; John Dillon, inspector, 1 day at \$2.50, \$2.50; F. J. Dowd, inspector, ½ day at \$2.50, \$1.25; J. J. Farrell, inspector, ½ day at \$2.50, \$1.25; Thomas J. Gargan, inspector, 3½ days at \$3, \$10.50; P. J. McNulty, inspector, 2½ days at \$3, \$7.50; J. J. Dolan, inspector, 2½ days at \$3, \$7.50; C. J. Scanlon, inspector, 3½ days at \$2.50, \$9.38; Richard Welch, inspector, 2½ days at \$3, \$7.50; D. J. Griffin, inspector, 2½ days at \$2.50, \$6.25; N. F. Mondello, inspector, ½ day at \$2.50, \$1.25; Thomas Collins, fireman, 2 days at \$2.83½, \$5.67; Thomas Griffin, fireman, 3 days at \$2.83½, \$8.50; James Kelly, fireman, 3 days at \$2.83½, \$8.50; and 164 laborers, \$848.98.

Street Department (Sewer Division).

For the week ending Thursday, July 7, 1910:

James A. Mitchell, inspector, 1 day at \$3, \$3; John W. O'Neil, inspector, 1½ days at \$3.50, \$6.13; James A. Berrill, inspector, ½ day at \$5, \$2.50; W. H. Marnell, inspector, ½ day at \$5, \$2.50; Dennis Callaghan, laborer, ½ day at \$2.50, \$1.25; Michael Conley, laborer, 1½ days at \$2.50, \$3.75; Edward Flaherty, laborer, ½ day at \$2.50, \$1.25; James F. Granles, subforeman, ½ day at \$3.75, \$1.88; Patrick J. Hartigan, teamster, ½ day at \$2.50, \$1.25; Walter McDonough, laborer, ½ day at \$2.50, \$1.25; Roger Doherty, laborer, 1 day at \$2.50, \$2.50; Daniel Donohue, bracer, 1 day at \$2.50, \$2.50; Frank J. Johnson, yardman, 2 days at \$2.50, \$5; Dennis Burke, laborer,

1 day at \$2.50, \$2.50; Patrick J. Barrett, laborer, 1 day at \$2.50, \$2.50; Michael Foley, bracer, 1 day at \$2.50, \$2.50; Patrick Keeley, laborer, 1 day at \$2.50, \$2.50; James Lee, bracer, 1 day at \$2.50, \$2.50; Thomas McDonald, yardman, 2 days at \$2.50, \$5; Richard F. Moore, laborer, 1 day at \$2.50, \$2.50; Michael Durfee, engineer, 1 day at \$3, \$3; Nathan F. O'Neil, teamster, 1½ days at \$2.50, \$3.75; Timothy Reardon, laborer, 1 day at \$2.50, \$2.50; John Flaherty, yardman, 1 day at \$2.50, \$2.50; Thomas Hughes, laborer, 1 day at \$2.50, \$2.50; Luke Lyons, laborer, 1 day at \$2.50, \$2.50; Peter Ducie, watchman, 1 day at \$2.50, \$2.50; Patrick J. Foley, 1 day at \$2.50, \$2.50; Michael Harrison, laborer, 1 day at \$2.50, \$2.50; Charles R. Palmer, steam engineer, 1 day at \$4.66, \$4.66; George W. Emerson, steam engineer, 1 day at \$4.66, \$4.66; James H. Finn, steam engineer, 1 day at \$4.66, \$4.66; 77 laborers, 70½ days at \$2.25, \$158.63.

CONTRACTS AWARDED.

The following contracts for work, materials and supplies have been awarded with the approval of the Mayor. Those awarded without public advertisement are specially indicated. Week ending July 14, 1910:

PARK DEPARTMENT.

On July 12 the Mayor approved a contract with the Old Colony Broken Stone and Concrete Company for furnishing trap rock. Bids on these goods were as follows:

	Per Ton, Commonwealth avenue, between Brighton and Brook- line avenues.	Per Ton, Fens and Riverway, between Agassiz road and Huntington avenue.
Old Colony Broken Stone and Concrete Company...	\$1 73	\$1 65
Lane Quarry Company.....	1 80	1 80

SCHOOLHOUSE DEPARTMENT.

On July 12 the Mayor approved a contract with Alfred J. Hixon for installing electrical system in the addition to the Girls' High School. Bids on this work, opened June 27, were as follows:

Alfred J. Hixon, \$4,024; E. C. Lewis, \$4,394; Lord Electric, \$4,900.

On July 12 the Mayor approved a contract with William L. Morrison for moving portable buildings and furniture. Bids on this work, opened July 5, were as follows:

William L. Morrison, Item No. 1, \$543; No. 2, \$543; No. 3, \$543; No. 4, \$573; No. 5, \$623; No. 6, \$335; No. 7, \$583; No. 8, \$563; No. 9, \$879; No. 10, \$297; No. 11, \$585; No. 12, \$305; No. 13, \$273.

Charles D. Redmond, Item No. 10, \$685; No. 11, \$1,370; No. 12, \$685.

STREET DEPARTMENT (Sewer Division).

On July 9 the Mayor approved a contract with William J. Barry for building Section 7 of the Stony brook conduit. Bids on this work, opened June 7, were as follows:

William J. Barry, \$75,326.50; Charles R. Gow Company, \$82,105; Antony Cefalo, \$83,553.50; Bruno & Petitti, \$83,623.25; Coughlan & Sheils, \$84,928.91; Coleman

Brothers, \$85,610.50; McCarthy & Walsh, \$87,167.10; Jones & Meehan, \$89,572; John J. Falvey, \$89,774.50; Metropolitan Construction Company, \$90,595.25; Peter W. Hill, \$93,221; Luke D. Mullen, \$93,224.

On July 12 the Mayor approved a contract with Edward F. Kennelly for building sewerage works in Cabot street. Bids on this work, opened July 5, were as follows:

E. F. Kennelly, \$3,760.30; John McCourt & Co., \$4,016.65; Commonwealth Construction Company, \$4,279.10.

SUPPLY DEPARTMENT.

On July 12 the Mayor approved a contract with the Standard Oil Company for furnishing 200,000 gallons, more or less, of emulsified oil at \$4.95 per gallon, and 200,000 gallons, more or less, of emulsion oil at \$3.90 per gallon. But one bidder. Bids opened June 29.

WITHOUT ADVERTISING.

ELECTION DEPARTMENT.

In view of the representation made in the accompanying letter the Mayor has granted to the Board of Election Commissioners authority to award, without advertising, a contract for printing and furnishing ballots for the state primary in 1910 and the city election in 1911, the estimated cost of which will exceed \$1,000.

BOARD OF ELECTION COMMISSIONERS. Boston, July 7, 1910.

HON. JOHN F. FITZGERALD, Mayor:

DEAR SIR,—The preparation and printing of ballots we consider one of the most important functions of this department. It is essential that the person, firm or corporation that prints and provides ballots should be accurate in the work, capable of guarding safely such ballots before transmission to this Board and exactly on time in their delivery. The responsibility for the selection of such firm or corporation rests, of course, absolutely with the Election Commissioners.

In order that the necessary time be given to providing paper and other materials for the proper execution of this work, such selection, in our opinion, should be made in July. At this time it is impossible accurately to estimate the number of candidates, and consequently impracticable to formulate a proposal for this work, and when such number of candidates does definitely become known, which is ten days before a primary or election, it is absolutely too late to advertise for bids.

For these reasons the Board of Election Commissioners at a meeting held July 7, 1910, all the members being present, unanimously passed the following vote, exactly similar to a vote passed in the last six years:

"Voted, That his Honor the Mayor be requested to give written authority to this Board, as required by law, to do the work of preparing and furnishing ballots in the City of Boston for the state primary in 1910 and the city election in 1911, the estimated cost of which will exceed \$1,000, without inviting proposals therefor by advertisement.

"A true record.

"Attest: M. W. BURLIN,
Secretary."

In accordance with such vote we respectfully request such authority.

Respectfully,

BOARD OF ELECTION COMMISSIONERS,
JOHN M. MINTON,
Chairman.

STREET DEPARTMENT (Sewer Division).

On July 12 the Mayor approved a contract made without advertising with the Lockwood Manufacturing Company for furnishing labor and use of tools for making repairs in main bearing of Engine No. 4 at the Sewer Division Pumping Station, at an estimated cost of \$1,200.

"It is urgent that this engine be put in condition as soon as possible, and not practicable to delay the work to advertise for bids. The proposed contractor is experienced and competent and the prices reasonable.

"(Signed) L. K. ROURKE,
"Superintendent of Streets."

ADDITIONS AND ALLOWANCES TO CONTRACTS.

WATER DEPARTMENT.

On July 9 the Mayor approved an addition amounting to approximately \$85 on the contract with the Metropolitan Construction and Supply Company for laying water pipe in Taft avenue, Winthrop, on account of cutting out two manholes; removing surplus material over trench; widening trench for a distance of 200 feet; digging three test pits; excavating below grade for a distance of 200 feet and furnishing material for repairing manhole.

STREET COMMISSIONERS.

On July 8 the Mayor approved the vote of the Board of Street Commissioners abating an assessment levied against the Chamber of Commerce for the laying out and construction of an extension to Milk street in the amount of \$1,000.

On July 13 the Mayor approved an order of the Board of Street Commissioners suspending the collection of assessments for sewerage works in Avalon road on specified lots forming part of the estate of Mary F. Connolly for such time as said lots remain vacant.

APPROVAL OF SCHOOLHOUSE PLANS.

The Mayor has approved the following plans for schoolhouse construction: Heating and ventilating, plumbing and electrical plans for the addition to the Blackinton school; and plans prepared by Messrs. Coolidge & Carlson, architects, for electrical system for the addition to Girls' High school.

MODIFICATION OF RESTRICTION.

In pursuance of an order of the City Council, approved July 7, the Mayor has executed an instrument, approved by the Corporation Counsel, whereby the city shall modify the restriction on land now owned by the Boston University on Concord and Stoughton streets, so that the said premises may hereafter be used, in addition to the purposes limited therein, for the purpose of clinical research and preventive medicine and either in connection with said Boston University or the Massachusetts Homeopathic Hospital.

PERMISSION TO CONSTRUCT.

On July 12 the Mayor granted to the Superintendent of Streets authority to construct with the department force, without advertising, the following work: Resurface, with macadam, Bay State road from Beacon street to Chilmark street, at an estimated cost of \$2,000.

"This is maintenance work and can, in my opinion, be done as advantageously by day labor methods as any work now necessary.

"(Signed) L. K. ROURKE,
"Superintendent of Streets."

SCHEDULE OF CHARGES FOR PERMITS ISSUED BY THE STREET DEPARTMENT.

Schedule of charges for the various classes of permits issued by the Street Department (Permit Office) of the City of Boston in accordance with an Act of the Legislature, approved May 26, 1910, which reads:

CHAPTER 571.

AN ACT TO AUTHORIZE THE COLLECTION OF FEES FOR PERMITS AND LICENSES ISSUED BY DEPARTMENTS OF THE CITY OF BOSTON.

SECTION 1. The heads of the various departments of the city of Boston may establish, subject to the approval of the mayor, reasonable fees for charges for the issuance of permits and licenses by said departments; provided, however, that the charge for a permit to make excavations in any street or sidewalk shall not exceed 50 cents.

Proposed schedule of charges for the various classes of permits issued by the Street Department, authorized by section 1, chapter 571 of the Acts of 1910.

CITY OF BOSTON—STREET DEPARTMENT. Notice to Corporations, Contractors and Others.

On and after July 15, 1910, a charge will be made for each permit issued from the Permit Office of this department in accordance with the following schedule:

1. Openings in streets or sidewalks, 50 cents each. Limited to 100 linear feet on one permit.
2. Emergency permits, Class A (for the above purpose), 50 cents each.
3. Advertising by man wearing hat and coat lettered (annual permit), \$5 (or \$1 per month).
4. Cleaning snow from roofs (occupation of sidewalk and street while so doing), annual permit \$1 each.
5. Driving cattle through the streets (annual permit to driver), \$5.
6. Dumping snow from private property into public alleys (annual permit), 50 cents.
7. Erecting and repairing awnings (annual permit), 50 cents each.
8. Erecting, altering or repairing buildings (occupation of street or sidewalk), 1 cent per square foot per month up to 5,000 feet, and ½ cent per foot per month in excess of 5,000 feet. The minimum charge to be at one month rate.
9. Painting or minor repairs, 50 cents each.
10. Feeding horses on streets (annual permit), \$1 each.
11. Moving buildings in streets, \$5 per day; minimum charge, \$10.
12. Painting signs or notices on obstruction fences, \$1 each.
13. Placing and removing signs flat on buildings, 50 cents each.
14. Projecting signs or lamps from buildings, \$1 each.
15. Raising or lowering safes, machinery, etc., \$1 each.
16. Loading and unloading goods (annual permit), charged to be based on conditions at each location. Minimum, \$1; maximum, \$5.
17. Emergency permits (Class B), 50 cents each.
18. Special permits for other than above purposes, 25 cents each.

All extensions will be considered renewals and the charge collected as for a new permit.

The estimated income based on the proposed charges, not including Item 8, is about \$15,000.

The income based on charges under Item 8, according to the record of permits issued the past year for occupation, will amount to a considerable sum.

APPROVAL OF LEASE.

The Mayor has approved the lease of a portion of the fourth floor in the Keany Building for the use of the Printing Department for the term of nine months ending, January 31, 1911, at a rental of \$500 per year.

ISSUE OF SERIAL LOANS.

On July 13 the Mayor requested the City Treasurer to issue bond certificates of indebtedness of the City of Boston, bearing interest at 4 per cent per annum, in the following amounts and for objects specified:

OBJECT OF LOAN.	Amount.	Amount Maturing Annually.	Term.

John J. Garrity, \$100, for damage to estate 19 Gustin street caused by change of grade of Old Colony avenue.

Daniel Marr, \$50, for labor and materials furnished in construction of a sewer in Malta street, January 1908.

PAYMENTS TO DISABLED EMPLOYEES.

The following allowances have been made by the superintendent and approved by the Mayor:

Michael Murray, Sewer Division, 6 days at \$2.25, \$13.50; Charles Hadley, Ferry Division, 28 days at \$2.30, \$64.40.

APPOINTMENTS AND CONFIRMATIONS.

CONFIRMATION.

The following appointment was confirmed on the date given:

July 8, Manus J. Fish as Superintendent of Public Buildings.

EXTENSION OF LEASE.

The Mayor has approved the extension of the lease of the building numbered 563 Tremont street, owned by John Cifrino and Giuseppe Cataldo, for the term of seven months, beginning July 1, 1910, to January 1, 1911, at a rate of \$2,000 per year.

CHICAGO IMPROVES.

From being one of the worst cities of the union in the prevalence of typhoid fever, Chicago has reformed and become one of the best. Last year its typhoid death rate was the lowest of any of the great cities. Times have changed since the Chicago river was an open sewer, flowing sluggishly into the lake from which the city's drinking water was obtained. Now the river flows backward and is clean. A pair of typhoid germs starting into life at sunrise on a hot summer day by nightfall should have about 100,000,000 descendants. Several thousand of these will hang onto a foot of a fly ready to drop off and begin operations on any piece of food with which the fly comes in contact.—*Pacific Outlook.*

NATIONAL AID TO HIGHWAYS.

A bill was introduced in Congress for the appropriation of \$25,000,000 to be expended during a period of five years as government aid to highway construction. The plan is for the nation to pay half and the local authorities half toward a general system. On an average cost of \$2,000 a mile this would build 5,000 miles a year. Under this plan we would soon have a good automobile road clear across the continent.

NOTICE TO SUBSCRIBERS.

Subscribers will find the expiring date of their subscription stamped upon the mailing wrapper. As payment must be made in advance, remittance should be made on or before that date.

NEW FIRE HELMET TESTED.

New York, N. Y.—A new fire helmet designed to protect firemen from inhaling smoke, gas and ammonia fumes was tested last week in a smoky fire in the basement of a feather warehouse, occupied by Charles Forbert, at 6 Bond street. Fireman Thomas Casey, of Truck 9, who was sent into the fire with the helmet, reported that, unlike former helmets that had been tried, it had kept out the smoke without impairing his vision or hampering him by its weight. It will be tested again shortly. The helmet resembles a diver's. It fits in the form of a long leather bag over the head and tightly around the neck. The front is of glass. In the back is a small cylinder containing water, which is made to drop in regulated quantities upon several small cubes of chemicals in a compartment below, thereby generating oxygen by much the same process as acetylene gas is made. The newly generated oxygen is blown through the helmet by means of a small tube leading from the mouth, and held between the fireman's teeth. The helmet is fitted also with a small bulb horn, like that of an automobile, sounded by hand by the fireman as a signal in case of trouble.—*Municipal Journal and Engineer.*

TEST FOR WOULD-BE DRIVERS IN FIRE DEPARTMENT.

Rochester, N. Y.—Candidates for positions as drivers in the Fire Department were put through the paces on the Maplewood road running north from Driving Park avenue, near Engine 10 fire house, last week. The commission gave seventeen of the thirty-six candidates the practical test one morning and on the next morning the remainder went through the various tests under the eyes of Fire Chief Charles Little, Charles T. Chapin, T. Edward Freckleton and George F. Roth, all expert horsemen.—*Municipal Journal and Engineer.*

TOO MUCH GLASS ON STREETS.

Omaha, Neb.—The Fire and Police Board has requested Chief of Police Donahue to see that the ordinance relative to the throwing of glass on the streets be strictly enforced.—*Municipal Journal and Engineer.*

COURTHOUSE COMMISSION.

PROPOSALS FOR ADDITION TO COURTHOUSE.

The commissioners for the enlargement of Suffolk County Courthouse invite proposals for making additions and alterations in northerly portion of said courthouse at Boston, Mass., including all trades, giving a contract therefor, and a ten thousand dollar (\$10,000) bond of a surety company, as security for carrying out the contract. The proposal to be used must be obtained at the office of the architect, George A. Clough, Room 34, Courthouse, Pemberton square, Boston, Mass., and left at the office of James R. Dunbar, one of the commissioners, 75 Ames Building, 1 Court street, Boston, Mass., before 12 m. of July 30, 1910, Boston, Mass.; and as a security for giving the contract and bond a certified check on a Boston bank for twenty-five hundred dollars (\$2,500), payable to the Commonwealth of Massachusetts, must be left with the proposal. Only such proposals, so left, signed, and with check, will at said hour and place be publicly opened and read. The commissioners reserve the right to reject any or all proposals.

JAMES R. DUNBAR,
JOSEPH J. CORBETT,
WILLIAM H. WELLINGTON,
Commissioners.

(July 16-23.)

CITY OF BOSTON.

PROPOSALS FOR FILLING NEPONSET PLAYGROUND.

Proposals for furnishing 14,000 cubic yards, more or less, of good clean filling, and giving bonds of a surety company therefor in such sum as the Park Commissioners may determine, signed by the bidder and left before 3 p. m. of July 20, 1910, at the office of the Park Commissioners, Pine Bank, Olmsted Park, Jamaica Plain, with a certified check for \$200, payable to and to be the property of the city if the proposal is not carried out, will then and there be publicly opened and read. A duplicate proposal, without the check, must be deposited with the City Auditor previous to the time for opening the bids. Bids for a smaller quantity than the whole amount required, not less than 500 cubic yards, with a certified check for \$50, payable to and to be the property of the city if the proposal is not carried out, will be considered. The filling must be deposited over the whole playground, as directed by the person in charge, and may be either gravel, clay or ashes, free from refuse or decomposable material. The proposal must state the price per cubic yard measured in the carts or cars in which delivery is made and the time required to do the work. The commissioners reserve the right to reject any or all proposals.

ROBERT S. PEABODY,
JAMES M. PRINDLESTANT,
DANIEL H. COAKLEY,
Commissioners.

(July 16.)

CITY OF BOSTON.

PROPOSALS FOR SEWERAGE WORKS.

The Superintendent of Streets of the City of Boston, office 47 City Hall, invites proposals for building pipe sewers and surface drains and appurtenances in Warwick street, from Windsor street to Hammond street, Roxbury, and giving bond therefor of a surety company approved by the Superintendent in the sum of two thousand dollars (\$2,000), to secure the due performance of the contract and the full protection of the city. Forms of bids may be obtained at the said office of the Superintendent of Streets. Each bid should be inclosed in an envelope, sealed, marked "Bid for building pipe sewers in Warwick street, Roxbury," and left at the said office of the Superintendent of Streets before 12 m. on Tuesday, July 26, 1910, with a certified check for five hundred dollars (\$500), payable to and to become the property of the city if the bid after acceptance is not carried out. The bids will then and there be publicly opened and read. Bids must be made in duplicate, the duplicate without check to be deposited by the bidder with the City Auditor previous to the time named for opening the bids. The undersigned reserves the right to give preference to the proposals of bidders agreeing to pay the trade unions' rate of wages and the right to reject any or all proposals.

LOUIS K. ROURKE,
Superintendent of Streets.

Boston, July 14, 1910.

(July 16.)

CITY OF BOSTON.

PROPOSALS FOR SEWERAGE WORKS.

The Superintendent of Streets of the City of Boston, office 47 City Hall, invites proposals for building sewerage works in Centre street, between point 100 feet north of Cottage avenue and La Grange street, West Roxbury, and giving bond therefor of a surety company approved by the superintendent in the sum of twelve hundred dollars (\$1,200), to secure the due performance of the contract and the full protection of the city. Forms of bids may be obtained at the said office of the Superintendent of Streets. Each bid should be inclosed in an envelope, sealed, marked "Bid for Building Sewerage Works in Centre Street," and left at the said office of the Superintendent of Streets before 12 m. on Monday, July 25, 1910, with a certified check for five hundred dollars (\$500), payable to and to become the property of the city if the bid after acceptance is not carried out. The bids will then and there be publicly opened and read. Bids must be made in duplicate, the duplicate without check to be deposited by the bidder with the City Auditor previous to the time named for opening the bids. The undersigned reserves the right to give preference to the proposals of bidders agreeing to pay the trade unions' rate of wages and the right to reject any or all proposals.

LOUIS K. ROURKE,
Superintendent of Streets.

Boston, July 14, 1910.

(July 16.)

CITY OF BOSTON.

PROPOSALS FOR SEWERAGE WORKS.

The Superintendent of Streets of the City of Boston, office 47 City Hall, invites proposals for building sewerage works in Corey road, between Washington street and Wellington road, Brighton, and giving bond therefor of a surety company approved by the superintendent in the sum of one thousand dollars (\$1,000), to secure the due performance of the contract and the full protection of the city. Forms of bids may be obtained at the said office of the Superintendent of Streets. Each bid should be inclosed in an envelope, sealed, marked "Bid for Building Sewerage Works in Corey Road," and left at the said office of the Superintendent of Streets before 12 m. on Monday, July 25, 1910, with a certified check for five hundred dollars (\$500), payable to and to become the property of the city if the bid after acceptance is not carried out. The bids will then and there be publicly opened and read. Bids must be made in duplicate, the duplicate without check to be deposited by the bidder with the City Auditor previous to the time named for opening the bids. The undersigned reserves the right to give preference to the proposals of bidders agreeing to pay the trade unions' rate of wages and the right to reject any or all proposals.

Superintendent of Streets.

Boston, July 14, 1910.

(July 16.)

PROPOSALS FOR SEWERAGE WORKS.

The Superintendent of Streets of the City of Boston, office 47 City Hall, invites proposals for building pipe sewer and appurtenances in Downer avenue, from DeWolf street to about 234 feet northwesterly, Dorchester, and giving bond therefor of a surety company approved by the superintendent in the sum of four hundred dollars (\$400), to secure the due performance of the contract and the full protection of the city. Forms of bids may be obtained at the said office of the Superintendent of Streets. Each bid should be inclosed in an envelope, sealed, marked "Bid for building pipe sewer in Downer avenue, Dorchester," and left at the said office of the Superintendent of Streets before 12 m. on Tuesday, July 26, 1910, with a certified check for two hundred dollars (\$200), payable to and to become the property of the city if the bid after acceptance is not carried out. The bids will then and there be publicly opened and read. Bids must be made in duplicate, the duplicate without check to be deposited by the bidder with the City Auditor previous to the time named for opening the bids. The undersigned reserves the right to give preference to the proposals of bidders agreeing to pay the trade unions' rate of wages and the right to reject any or all proposals.

LOUIS K. ROURKE,
Superintendent of Streets.

Boston, July 14, 1910.

(July 16.)

TO HEATING CONTRACTORS.

The Schoolhouse Commissioners of the City of Boston invite sealed proposals for furnishing, setting and piping up boilers in various schools, Boston, Mass., and giving bond of a surety company therefor in the sum of \$1,000. Only proposals obtained at the office of the commissioners, 120 Boylston street, signed by the bidder and left before 12 o'clock m. of Wednesday, July 27, 1910, at said office, with a certified check for \$500, payable to the city if the proposal is not carried out, will then and there be publicly opened and read. The bid must be made in duplicate, the one with the check to be sent as above, the other to be sent to the City Auditor, City Hall. The commissioners reserve the right to reject any and all proposals and to give preference to bidders paying the trade unions' rate of wages.

CHARLES LOGUE,
JOHN F. KENNEDY,
EDWARD R. GREGORY,
Commissioners.

(July 16.)

TO HEATING CONTRACTORS.

The Schoolhouse Commissioners of the City of Boston invite sealed proposals for installing new boiler plant and other work incidental thereto in the Prescott District, Folk street, Charlestown, Mass., and giving bond of a surety company therefor in the sum of \$5,000. Only proposals obtained at the office of the commissioners, 120 Boylston street, signed by the bidder and left before 12 o'clock m. of Friday, July 22, 1910, at said office, with a certified check for \$1,000, payable to the city if the proposal is not carried out, will then and there be publicly opened and read. The bid must be made in duplicate, the one with the check to be sent as above, the other to be sent to the City Auditor, City Hall. The commissioners reserve the right to reject any and all proposals and to give preference to bidders paying the trades unions' rate of wages.

CHARLES LOGUE,
JOHN F. KENNEDY,
EDWARD R. GREGORY,
Commissioners.

(July 16.)

FINANCE COMMISSION.

July 14, 1910.

HON. JOHN F. FITZGERALD, Mayor:

SIR,—On May 25, 1910, your Honor requested the Finance Commission to investigate certain charges made by Dr. Frank B. Gallivan on the previous day, before a committee of the Legislature, against two officials of the Health Department of the City of Boston, Dr. Samuel H. Durgin, the chairman of the Board, and Dr. James C. Jordan, the head of the Bureau of Inspection of Milk and Vinegar. Dr. Gallivan had been employed as a chemist in the bureau from February 1, 1905, to August 31, 1908, resigning on the latter date.

In response to your Honor's request the commission held public hearings on May 26 and June 2, at which Dr. Gallivan and several other witnesses were heard.

Dr. Gallivan stated his belief that Dr. Jordan was in collusion with certain large dealers in milk, as a result of which such dealers escaped prosecution for violations of the milk laws. He cited eleven specific instances of alleged favoritism, based upon his observation and experience during the three and one-half years he had served as chemist of the bureau.

The charges appear below, and under each appears a brief statement of the evidence, followed by the findings of the commission.

The Charges, the Evidence and the Findings.

CHARGE NO. 1.

That Thomas J. Slater, a milk dealer, was prosecuted by Dr. Jordan and convicted of selling watered skimmed milk which Slater said he had obtained from the Deerfoot Farm Company's car; but though a sample of the Deerfoot Farm Company's milk was taken directly from the same car and found on analysis by Dr. Gallivan to be below standard, no prosecution was brought against the owners of the Deerfoot Farm.

This case was cited by Dr. Gallivan as evidence sustaining his general allegation that Dr. Jordan had discriminated in favor of large dealers.

Evidence.

The records of the bureau show that on January 1, 1907, Slater was prosecuted on a sample of skimmed milk taken from his wagon; that he was convicted and fined \$50; and that the Deerfoot Farm proprietors were not prosecuted at that time.

Dr. Jordan stated, however, that if the sample was taken from the car of the Deerfoot Farm and analyzed, as alleged, it was done without his knowledge and that he knew of no circumstances existing at the time which would warrant his prosecution of the proprietors of the Deerfoot Farm. The records of the bureau contain no verification of the statement of Dr. Gallivan that a sample was taken from the car of the Deerfoot Farm, analyzed and found to be below standard, on or about the time the sample was taken from Slater, upon which he was subsequently convicted.

The records show, however, that on December 18, 1906, two weeks earlier than the date of Slater's conviction, the manager of the Deerfoot Farm, A. N. Lockwood, was prosecuted by Dr. Jordan for a similar offence, convicted and fined \$50. At the time that Lockwood was convicted Slater, who was known to Dr. Jordan to

be a customer of the Deerfoot Farm, was notified that the skimmed milk was below standard and that he must be careful not to use such milk. Soon after this warning Slater was found to have watered skimmed milk in his possession, and was prosecuted and convicted, as already stated.

Finding.

The commission finds no evidence of discrimination in favor of the Deerfoot Farm. A milk dealer not employed by the Deerfoot Farm and the manager of the Deerfoot Farm were both prosecuted for similar offences and each fined \$50. Dr. Jordan seems to have performed his duty impartially in these two cases.

CHARGE NO. 2.

That a dealer named Wilmot S. Putnam was prosecuted by Dr. Jordan in the Roxbury Court, convicted and fined \$90 on two complaints based on the same sample of milk, whereas Curtis Laffin, a driver for the Elm Farm Milk Company, who at about the same time was prosecuted in the Dorchester Court on two complaints, based on the same sample of milk, was convicted on only one, the other having been placed on file. Dr. Gallivan stated that John F. Cusick, attorney for the defendant, Laffin, requested that the complaint for having milk below standard be filed; that the judge then asked Dr. Jordan if he was willing, and that Dr. Jordan, after some hesitation, said "Yes." The complaint was then placed on file and a fine of \$50 was imposed on the other complaint.

This case is cited as evidence of severity towards Putnam, a small dealer, and leniency to the Elm Farm Milk Company, a large concern; of discrimination against the weak and in favor of the strong.

Evidence.

Putnam did not have counsel and he made no request to have one of the two complaints placed on file. He entered a plea of not guilty, the case was tried, and the judge imposed a fine of \$90, as stated, \$75 for having watered milk and \$15 for having milk below standard, both with intent to sell. Dr. Jordan was not requested by the defendant or the judge to consent to having one of the complaints placed on file. In the Laffin case, however, a request was made to have the complaint for the less serious offence placed on file, and Dr. Jordan decided that under the circumstances it was proper to grant it. In this case, unlike the Putnam case, a plea of guilty had been entered by the defendant and a trial was thereby avoided. Dr. Jordan states that he took this fact into consideration, also the judge's evident willingness to have one complaint filed if he had no objection.

Finding.

The commission finds no evidence that Dr. Jordan's action in either of these cases was improper. He had a right to take into consideration in Laffin's favor the fact that by pleading guilty he had saved the court and the milk bureau the time necessary for trial. He was under no duty to volunteer suggestions to the judge of the Roxbury Court in the Putnam case; and there is no evidence that he did not exercise a sound discretion in the Laffin case when called upon by the judge of the Dorchester Court. Requests to place on file one of two complaints based on the same sample of milk are frequently made, and Dr. Jordan sometimes grants and at other times refuses such requests, exercising his discretion in each case according to its circumstances. No evidence has

been presented to the commission which shows that this discretionary power has been abused.

CHARGE NO. 3.

That the bureau is "very closely associated" with the Walker-Gordon Laboratory Company; that on July 24, 1905, a sample of that company's milk showed on analysis 11.79 per cent milk solids, the statutory standard being 12 per cent, but that the company was not prosecuted; whereas a smaller dealer, whose name Dr. Gallivan could not recall, was prosecuted on a sample which showed 11.76 per cent milk solids, and was, therefore, only slightly inferior to the sample of the Walker-Gordon Company.

Evidence.

Dr. Jordan denied that he had any understanding or "association" with the Walker-Gordon Company, or that it had ever received any favors from him. The company was not prosecuted in this case, but Dr. Jordan said that no reputable dealer would be prosecuted on a single sample which showed on analysis such a close approximation to the statutory standard. The records of the bureau show that out of ninety-one samples taken from the Walker-Gordon Company, in the period between February 3, 1905, and May 11, 1910, only five were found below the standard, and the deviations from standard in these five cases were slight. Dr. Jordan stated that it is difficult to secure convictions in cases where the deviation from standard is very slight, and that for this reason, and also because he believes it to be a proper course under the circumstances, he does not prosecute, but simply warns dealers who are found to have samples of milk in their possession which are only slightly below the statutory standard, if he believes that the deviation from standard is not the fault of the dealer, and that he is actually trying his best to live up to the law.

The case of the small dealer who was alleged by Dr. Gallivan to have been prosecuted on or about July 24, 1905, on a sample showing 11.76 per cent milk solids, does not appear on the records of the bureau. Dr. Jordan stated that Dr. Gallivan's description of the case was not sufficient to enable him to identify it, and that he believed there was no such case. He said that if at any time he did prosecute for such a slight deviation from standard, it was because the dealer's past record warranted such action.

Finding.

The commission finds no evidence to sustain the charge that favoritism was shown to the Walker-Gordon Company, or that any small dealer was prosecuted, as alleged by Dr. Gallivan, on a sample showing 11.76 per cent milk solids. The discretionary power seems to have been properly exercised by Dr. Jordan in the Walker-Gordon Company case.

CHARGE NO. 4.

That in December, 1907, one C. S. Walkup was prosecuted in the East Boston District Court by Dr. Jordan, and fined \$50 for selling as cider vinegar that which was not the legitimate product of pure apple juice; and that when the case came up in the Superior Court on appeal Dr. Jordan appeared and stated that he had no evidence against the defendant, whereupon the case was dismissed. Dr. Gallivan stated that he learned of Dr. Jordan's action in the Superior Court from "reliable authority," and referred the commission to Percy E. J. Holloway,

chemist, who has an office at 173 State street, Boston. This alleged abandonment of the prosecution was cited as evidence of neglect of duty by Dr. Jordan.

Evidence.

The conviction was obtained in the lower court, as Dr. Gallivan stated, but there is no evidence that the dismissal of the case against the defendant in the Superior Court was due to any act or omission of Dr. Jordan's. Dr. Jordan stated that he was prepared to prosecute the case in the Superior Court, but was notified by the district attorney's office, after he had waited four or five days for trial, that he could go back to the milk bureau and there await a telephone call which would be sent when the case was about to be reached. This statement was corroborated by Hugh J. Doherty, Esq., who was employed in the district attorney's office at the time of the trial. Mr. Doherty stated that he asked Assistant District Attorney Isaacs to notify him when the case was about to be reached, that the latter agreed to do so, and that he, Doherty, in turn, promised Dr. Jordan to notify him in time. Doherty stated that he was not notified when the case was about to be reached, and that consequently he did not notify Dr. Jordan. Both Doherty and Holloway, the chemist referred to by Dr. Gallivan, stated that Dr. Jordan was not in court when the case was reached. Holloway stated that when the case was reached he was in court ready to testify for the defendant; that a court officer, who was sent to look about the premises for Dr. Jordan, returned and stated to Assistant District Attorney Isaacs that Dr. Jordan had no evidence to offer; that Isaacs repeated this statement to the judge, adding that it was not fair to keep the defendant and his witnesses waiting any longer, and that the judge thereupon ordered a jury to be impanelled and instructed them to return a verdict of not guilty.

Finding.

The commission finds that this charge is not sustained; that Dr. Jordan had

a right to rely upon the assurance he received from the district attorney's office that he would be duly notified of the time of trial; that he was prepared to prosecute and would have done so if he had been notified; that he was not notified, and that the failure to prosecute was not due to any fault upon his part.

CHARGE No. 5.

That a great many samples of D. Whiting & Sons' milk were found by Dr. Gallivan to be below standard, but that he had never been called as a witness in any case against this concern and had never heard of their being tried in court.

The inference is that D. Whiting & Sons received immunity from prosecution.

Evidence.

Both Dr. Jordan and John K. Whiting of D. Whiting & Sons denied that immunity had been given or that favoritism had been shown. The records of the bureau show that from February, 1905, to the middle of May, 1910, a period of about five and one-fourth years, D. Whiting & Sons' employees have been prosecuted by Dr. Jordan sixteen times and fined in the aggregate \$230; that the prosecutions were brought on 10.06 per cent of the cases where their samples were found below standard, and that prosecutions were brought against the seven other largest dealers, or their employees, in a slightly larger percentage of cases, to wit: 10.85 per cent. In the cases of four of the seven dealers, however, the percentage of prosecutions was even less than in the case of D. Whiting & Sons. Moreover, the average of the analyses of samples found below standard in the cases of some of the seven dealers was lower than that of the samples of Whiting's milk that were also found below standard. Thus, greater deviations from standard than those of Whiting's are shown in the cases of three dealers in column No. 1, six dealers in column No. 2, and all seven dealers in column No. 3 in the following table:

AVERAGE ANALYSES OF SAMPLES OF MILK OF EIGHT LARGEST DEALERS IN CASES WHERE NO PROSECUTIONS WERE BROUGHT.
1905 to 1909, Inclusive.

DEALER.	Standard.	13	12	12.15
Number 1	Average Analyses.....	12.62	11.98	12.00
Number 2	Average Analyses.....	12.75	11.72	11.87
Number 3	Average Analyses.....	12.39	11.77	11.92
Number 4	Average Analyses.....	12.51	11.85	11.99
Number 5	Average Analyses.....	12.48	11.76	11.76
Number 6	Average Analyses.....	12.53	11.76	11.97
Number 7	Average Analyses.....	12.58	11.85	12.03
Number 8 (D. Whiting & Sons).....	Average Analyses.....	12.52	11.89	12.05

Finding.

The commission finds that the charge of discrimination in favor of D. Whiting & Sons is not sustained by the evidence.

CHARGE No. 6.

That Dr. Jordan's office was instrumental in causing the transfer from a small to a large concern of the cream trade of the S. S. Pierce Company; that "it was a deliberate attempt on the part of a large contractor here to use the milk office to put a small dealer out of business"; and

that the test adopted by the milk bureau to detect the presence of an adulterant in cream was of no value.

Evidence.

Dr. Jordan stated that in November, 1908, the small dealer in question was accused of adding sucrate of lime to his cream for the purpose of thickening the same; that he notified the S. S. Pierce Company that a sample of their cream was found to contain sucrate of lime; and that the S. S. Pierce Company soon afterwards discontinued its purchases from

the small cream dealer and transferred its custom to a larger concern. He stated that he did not suggest, and in fact had nothing to do with, the transfer of the S. S. Pierce Company's custom, but simply did his duty in notifying the company of the fact that the cream which they were obtaining was adulterated.

He stated that he began a campaign in 1908 against the use of sucrate of lime in cream, and that as a result of prosecutions which he brought the use of sucrate of lime, so far as he can discover, has been abandoned. He prosecuted three defendants on nine counts and got convictions on each. The State Board of Health, between November, 1908, and February, 1909, prosecuted seven dealers for using sucrate of lime in cream; convictions were secured in three cases, one case was not pressed, and in the other three cases the defendants were acquitted. Thus the prosecution seems to have succeeded in six of the ten sucrate of lime cases brought by Dr. Jordan and the State Board of Health. No cases have been prosecuted since February, 1909, as no cream samples have since then been obtained which were found to contain sucrate of lime. Dr. Jordan also stated that, in his opinion, the test adopted to detect the presence of sucrate of lime is a valuable one which ultimately will be adopted generally in this country.

Finding.

The commission finds the charge that Dr. Jordan allowed his office to be used for the purpose of aiding a large dealer to secure the customer of a smaller dealer is not sustained by the evidence. It also finds that the evidence is not sufficient to sustain the charge that the test adopted by the milk bureau is of no value.

CHARGE No. 7.

That Dr. Jordan used to "telephone around" to find out who the chemist for the defence would be before he determined to begin a prosecution.

This was said to be evidence of neglect of duty on Dr. Jordan's part.

Evidence.

Dr. Gallivan gave as his authority for the above statement the name of Theodore P. Grant, a dealer in cream. Mr. Grant, however, stated to the commission that Dr. Gallivan "got the cart before the horse as to the telephone," as his chemist said that it was he who had telephoned to Dr. Jordan. There was no evidence, other than Dr. Gallivan's statement, that Dr. Jordan sought to ascertain whom the defence would employ; and no evidence was offered to show that Dr. Jordan was influenced to prosecute or refrain from prosecuting on account of the employment of certain chemists by the defence.

Finding.

The commission finds the charge that Dr. Jordan sought to learn the name of the chemists who were to be employed by the defence is not sustained by the evidence.

CHARGE No. 8.

That John F. Cusick, an attorney "who appeared in a great many cases, representing the milk contractors, seems to know exactly what the milk inspector is going to do and what he is not going to do in advance."

This implies that information was given Mr. Cusick to which he was not entitled. The statement was made before a committee of the Legislature, by Dr.

Gallivan, as one of the grounds which justified his belief that Dr. Jordan was in collusion with certain milk dealers.

Evidence.

No evidence was submitted tending to show that information was improperly given to Mr. Cusick. Dr. Jordan and Mr. Cusick admitted that information respecting prosecutions of the latter's clients was frequently requested and given; but both denied that information was ever given which an attorney did not have a right to request and Dr. Jordan a right to grant. Dr. Jordan stated that he gave to Mr. Cusick only such information as he customarily gave to attorneys who appeared for other defendants—that no favors of any kind were given to Mr. Cusick.

Finding.

The commission finds no evidence that information was given to Mr. Cusick which he was not entitled to receive.

CHARGE No. 9.

Dr. Gallivan stated that the milk bureau has not established any system for ascertaining whether objectionable sources of milk supply have been improved; that there is no following up of the original notices sent to the milk contractors to warn them of an excessive number of bacteria.

Evidence.

Dr. Jordan stated that he considers the method of following up the original notices a very effective one. When a sample is taken showing bacteria in excess of 500,000 per cubic centimeter the number of the dairy which furnished the milk is also taken and a notice is sent to the contractor apprising him of the facts. The contractor, after the receipt of the notice from the bureau, is expected to send notice to the dairyman, and Dr. Jordan said he felt certain that the notices were in fact sent to the dairyman, as self-interest would prompt the contractor to send the notices. The collectors of samples employed by the milk bureau are instructed to take samples of the milk of the suspected dairy, and if the milk shows no improvement the bureau then notified the contractor that milk from the obnoxious source shall thereafter be excluded from the City of Boston. Dr. Jordan stated that, as a result of this system, milk from offending sources is excluded every year, and in some cases milk from such sources is never again sent to the city. In other cases, where the milk shows improvement, the prohibition is removed and the milk may be sold in the city.

Finding.

The commission finds no evidence that the milk bureau of the Board of Health neglected their duty, or that the system is not effective.

CHARGE No. 10.

That the milk bureau has established a policy of prosecuting employees rather than their employers. This was cited as evidence of discrimination against the small dealers in favor of the large dealers.

Evidence.

The records show that in the great majority of cases employees and not employers have been prosecuted. Thus, in the five years, 1905 to 1909, inclusive, there were 95 prosecutions brought against either the eight largest dealers in the City of Boston or their employees.

Of these 14 were against the employers and 81 against their employees. In 63 of the 81 cases against employees, however, the employers were corporations. Up to about six months ago, Doctor Jordan believed he could not begin in an inferior court the prosecution of a corporation for a violation of the milk law, but that such corporations could be proceeded against only by indictment in the Superior Court. He stated that this belief was founded upon statements of the law which had previously been made to him by Mr. Fred C. Ingalls and by Mr. Edward J. Lord, clerk and first assistant clerk, respectively, of the Municipal Court of the City of Boston. Both Mr. Ingalls and Mr. Lord stated to the commission that they had given such advice to Dr. Jordan. Dr. Jordan also stated that District Attorneys Stevens and Moran advised him that it would aid the work of the district attorney's office if cases were brought against the employees of corporations in the lower courts, instead of being brought against the corporations by indictment of the Grand Jury. Acting on the advice thus given him by the clerks of the court and the district attorneys, he prosecuted employees of corporations in the lower courts. The corporations pay the fines imposed on their employees, and the responsible party, therefore, does not in reality escape the penalty of the law.

As already stated 63 of the 95 prosecutions of the eight largest dealers against their employees were brought against the employees of corporations. Of the remaining 32 prosecutions 18 were of the employees of unincorporated dealers and 14 were of employers or their managers. The 18 cases brought against the employees of unincorporated dealers might have been brought against the employers, but Doctor Jordan stated that in these cases he sought only to accomplish the ends of justice without unnecessarily injuring the reputation of the dealer. He stated that in some cases the dealer seems to be punished sufficiently by having to pay the fine of his employee without suffering also the loss of business which would result from his own conviction and the inevitable publication of the fact. Under the Revised Laws, chapter 56, section 62, a producer of milk is not liable to prosecution for milk produced by him which is not of good standard quality unless the sample of milk is taken upon his premises, or while in his possession, or under his control. If the milk passes out of his possession or control by sale or delivery to a dealer, and a sample is then taken from such dealer, the producer cannot be convicted on that sample, and thus the man actually responsible escapes the penalty of the law. The dealer in such a case, though selling the milk just as he received it, may be prosecuted, and, though he had no intention to violate the law, made to suffer for the fault of another.

Finding.

The Finance Commission finds that the charge of prosecuting employees rather than employers, as a means of discriminating against small dealers in favor of larger ones, is not sustained by the evidence. Summarizing the ninety-five cases brought against the eight large dealers or their employees, the commission finds:

1. That the sixty-three prosecutions brought against employees of corporations were all made in good faith, and were justifiable in view of the advice given to Dr. Jordan.
2. That there is no evidence that he

did not in good faith and in a proper manner exercise the discretionary power vested in him, when he prosecuted eighteen employees of unincorporated dealers rather than the employers themselves.

3. That the remaining fourteen prosecutions were of the employers themselves and have not been the subject of criticism.

CHARGE No. 11.

That Dr. Durgin, Chairman of the Board of Health, at a meeting of the Women's Municipal League on March 1, 1909, "publicly confessed that he had an understanding with the milk contractors."

Dr. Gallivan made this statement to a committee of the Legislature. He further quoted Dr. Durgin as having said that the Board of Health had a regulation limiting the number of bacteria per cubic centimeter of milk; that there were opportunities to prosecute and that they had been used, but that the Board soon found that it would have to prosecute those whom it "wanted especially to have friendly—the contractors"; and that "the contractors are the real milk inspectors of the City of Boston."

Evidence.

Dr. Durgin denied that there was any improper understanding or arrangement between the Board of Health and the milk contractors, or that he ever publicly or privately stated that there was. He stated that at the meeting in question he explained that the bacteria standard was an arbitrary one, not intended as a basis for rigid prosecution, but rather as part of a process of education showing the milk dealers and producers that a large number of bacteria may mean dirt, or some other cause of disease; that a number of prosecutions were brought against persons who had in their possession, with intent to sell, milk containing more than 500,000 bacteria per cubic centimeter; and that because of these prosecutions, and of the agitation which they produced, the quality of milk sold in the City of Boston had improved. He said that he had told the milk dealers that the Board sought to establish with them a policy of co-operation, and that if they checked any faults in the handling or transportation of milk, or on the farm, the Board would appreciate the assistance and feel less disposed to prosecute them.

Finding.

The commission finds that there is no evidence in the public statement of Dr. Durgin, or in any evidence which has yet been brought to its attention, that any improper relation or agreement has existed between the Board of Health and the milk dealers. The commission believes that the statement in question was made publicly for the purpose of protecting the milk consumers through a system of co-operation between the Board of Health and the milk dealers. If a collusive agreement between the Board of Health and the milk dealers had actually existed, no greater folly could be conceived than that the chairman of the Board of Health should confess the fact before a large audience of women actively interested in improving the milk supply of the City of Boston.

EXAMINATION OF THE RECORDS.

The evidence which has been examined has been insufficient to sustain any of the charges heretofore enumerated. No other specific evidence was pointed out to the commission by Dr. Gallivan to sustain his general allegation that the Board of

Health and the head of the milk bureau have had an agreement or understanding with certain large dealers in milk as a result of which such dealers have received comparative immunity from prosecution. He stated, however, that this allegation would be borne out by an examination of the records of the milk bureau. A public accountant was consequently employed by the commission to make a thorough examination of the records. In a report submitted June 29 he shows the total number of samples taken in the five years 1905 to 1909, inclusive, from all of the milk dealers who do business in Boston. For convenience these have been divided into two classes, the first including the eight largest dealers, and the second all the other dealers, 105 in number.

The following table shows the number of samples taken from these two classes of dealers, the number which were found below standard, the number and percentage of prosecutions brought on samples found below standard, and the fines imposed in such cases:

SUMMARY—1905 TO 1909, INCLUSIVE.

TOTAL NUMBER OF SAMPLES TAKEN.	8 large Dealers.	105 Small Dealers.
	12,906.	14,075.
Below Standard:		
Number.....	887	1,592
Per cent.....	6.90	11.31
Prosecutions:		
Number.....	95	321
Per cent.....	10.71	20.16
Fines:		
Total.....	\$1,810 00	\$5,378 00
Average.....	\$19 05	\$16 75

The above table shows that, taking the number of samples below standard as a basis for calculation, prosecutions have been brought against the 105 small dealers in 20.16 per cent of the cases, while prosecutions against the eight large dealers amount to only 10.71 per cent of the cases. But the table also indicates that the average quality of milk furnished by the small dealers is not as good as that furnished by the large dealers, for 11.31 per cent of the samples taken from the small dealers and only 6.95 per cent of those taken from the large dealers were found to be below standard. As the taking of these samples covered a period of five years, this record must be regarded as conclusive evidence of the quality of milk furnished by these two classes of dealers.

It should be remembered that the prosecuting officer cannot prosecute in every case of violation of the milk laws. He has not a sufficient number of assistants nor a sufficient appropriation to do so, even if it seemed necessary or desirable to prosecute in every case of violation. Dr. Jordan was obliged to exercise his discretion as to the time when, and the persons against whom, prosecutions should have been brought. If the deviations from standard were comparatively slight he felt that he should warn rather than prosecute. If, on the other hand, the deviations from standard were great he felt the necessity of prosecuting. It was not, therefore, the mere fact that a sample was below standard which determined whether a prosecution should have been brought, but whether the sample

showed a large or small deviation from standard. The significant circumstance appears that the milk of the small dealers was of poorer quality than that of the large dealers, and this accounts for the greater percentage of prosecutions in the case of the former. The following table

shows that on all samples found to be below standard the average quality was higher in the case of the eight large dealers than in the case of the 105 small dealers, confirming the conclusion that the larger percentage of prosecutions against small dealers was justified:

SAMPLES BELOW STANDARD—1905 TO 1909, INCLUSIVE.

Eight Large Dealers.

	Average Analyses.	Statutory Standard.*	Amount Below Standard.
Cases prosecuted.....	{ 11.65 11.27 11.34	13.00 12.00 12.15	1.35 .73 .81
Cases not prosecuted.....	{ 12.56 11.83 11.99	13.00 12.00 12.15	.44 .17 .16
All cases, prosecuted or not.....	{ 12.51 11.64 11.90	13.00 12.00 12.15	.49 .36 .25

105 Small Dealers.

	Average Analyses.	Statutory Standard.*	Amount Below Standard.
Cases prosecuted.....	{ 11.56 11.20 11.42	13.00 12.00 12.15	1.44 .80 .73
Cases not prosecuted.....	{ 12.51 11.82 11.94	13.00 12.00 12.15	.49 .18 .21
All cases, prosecuted or not.....	{ 12.39 11.61 11.85	13.00 12.00 12.15	.61 .39 .30

* Required percentage of milk solids at different periods in the last five years. (R. L, chapter 56, section 56; Acts of 1908, chapter 643.)

Moreover, the figures in the following table, in which the cases of milk samples $\frac{1}{2}$ per cent and 1 per cent and upwards, respectively, are grouped, show a very close relation between the large variations from standard and the number of prosecutions brought. The eight large dealers were prosecuted in 22.8 per cent of the cases, had 24.8 per cent of the samples

$\frac{1}{2}$ per cent or more below standard, and 27 per cent of those 1 per cent or more below standard; the 105 small dealers were prosecuted in 77.2 per cent of the cases, had 75.2 per cent of the samples $\frac{1}{2}$ per cent or more below standard, and 73 per cent of those 1 per cent or more below standard.

	PROSECUTIONS.		ONE-HALF PER CENT OR MORE BELOW STANDARD.		ONE PER CENT OR MORE BELOW STANDARD.	
	Number.	Per Cent.	Number.	Per Cent.	Number.	Per Cent.
8 large dealers.....	95	22.8	77	24.8	41	27.0
105 small dealers.....	321	77.2	234	75.2	111	73.0
Totals.....	416		311		152	

If it had appeared from the records that in the case of the small dealers a smaller percentage of the samples was below standard and that the deviation from standard was less on the average than in the case of the large dealers, but that the small dealers, nevertheless, were prosecuted in a larger proportion of the cases below standard than the large dealers, such records would be ample proof of the charge of discrimination against the small dealers. But the records show exactly the reverse. They show that a greater number of prosecutions were brought against those who were the worse offenders, that is, those whose milk fell the more frequently below standard, and also to a greater depth below standard.

If the number of prosecutions brought or the amounts imposed as fines are considered, they will be found to furnish no evidence of discrimination against the

small dealers. In the five years in question the prosecutions against the eight large dealers were only 95, or an average of 11 $\frac{1}{2}$ for each, while in the same period the prosecutions against the 105 small dealers amounted to 321, or an average of about 3 $\frac{1}{2}$ each. Moreover, the fines, as already shown, amounted to \$1,810 in the case of the large dealers and \$5,371 in the case of the small dealers, or an average of \$19.05 against the former and \$16.75 against the latter.

The statements of Chief Justice Bolster of the Municipal Court and Mr. Justice Bragg of the Charlestown Court, both of whom appeared before the commission, should be considered.

Chief Justice Bolster stated that, so far as he could see the results of Dr. Jordan's work in court, he believed him to be the equal of any prosecuting officer who is not a member of the bar; that his cases are well selected, he knows what he has to

prove, and that he rarely fails to secure a conviction; that it is not Dr. Jordan's practice to interfere very much with the disposition of a case, that he puts in his evidence well, and when technical questions arise seems unusually well qualified to deal with them.

Judge Bragg stated that Dr. Durgin and Dr. Jordan have always excited his admiration for the way in which they have conducted themselves; that they have always been fair and impartial, without any apparent malice or vindictiveness; that he has never observed any tendency on the part of either to select for prosecution poor persons in preference to wealthy corporations or individuals; and that, so far as his observation extended, he has not seen the slightest evidence of discrimination between different classes of milk dealers.

CONCLUSIONS.

The commission finds that all of the charges made against Dr. Jordan of the milk bureau, as well as the charge made against Dr. Durgin, the Chairman of the Board of Health, are absolutely without foundation so far as the testimony and records produced before the commission show. No evidence has been submitted which shows that either of these officials is not striving honestly, faithfully, and to the best of his ability to perform successfully the important tasks which have been assigned to him. In view of the importance of their respective offices, and of the gravity of the charges which have been made against them, the commission believes that your Honor was entirely justified in asking for a full and impartial investigation of the case. The commission feels that your Honor, as chief magistrate of the city, may safely reject as entirely without foundation the serious charges which have been brought against the officers in question.

Respectfully submitted,

THE FINANCE COMMISSION,
by JOHN A. SULLIVAN,
Chairman.

AN ENDLESS HOUSE.

A most unique proposition in connection with the housing problem is that proposed by Mr. E. S. Chambless of New York, who has spent some years in developing the idea and has managed to obtain for it some attention and notice. His idea is to build a continuous house from the city or center of industry and occupation, following approximately a contour into and across the country, and, we presume, returning again to the same center. This house might be several miles in length, and later developments might result in lines of houses connecting the two branches of this loop or running out as spurs from the same. This continuous house would be three or four stories high and would be divided off by solid and noiseless partition walls into separate dwellings. The roofs of the houses would form a promenade, a part of which would be roofed over and possibly inclosed to provide shelter against sun and inclement weather so that one could walk from his residence to the city, should he so desire. On the ground level through the center of this chain of houses would run a transportation line in which electricity would probably be the motive power. This would serve to carry the residents of this town (which is called Road Town) to and from the city, and also to transport all freight, express, mail, etc. In a gallery on the ground floor or basement would also be carried all wires and pipes neces-

sary for bringing to each residence gas, water, steam heat, electric light and power, vacuum for cleaning, refrigeration in the summer time, telephone and burglar alarm wires, and possibly other services such as the delivery of milk and whatever future inventiveness may make possible. Thus no carriage roads would be necessary except for pleasure vehicles, but each one would have on either side of his house spacious grounds, which could be used by him for gardens or any other purpose. There would therefore be no dust nuisance, as no highways would pass in front of the house; there would be no noise (except such as might be made by the railroad in the basement or the tramping of feet overhead) and the admission of light and air on two sides of the house would be absolutely unrestricted, although the other two sides would necessarily be windowless.

The chief advantage in this system of construction and mode of living would appear to be the facilities for transportation of all matters from electric current to coal. If the houses should average 40 feet front (as all light and air must enter from front and rear it would not be advisable to have the houses too deep), 132 houses would constitute a mile of buildings and house probably 800 persons. It is estimated that about 100,000 commuters enter New York from New Jersey every day and they and their families and servants probably make up a population of at least 500,000. The housing of all of these in an endless house would, therefore, require 625 miles of houses, with the accompanying railroad track and pipe and wire system. We do not know whether any exact calculation has been made to compare the economy of this with the present method of existence in New Jersey towns. The novelty of the idea combined with the enormous length of trackage and houseage involved seems startling. —*Municipal Journal Engineer.*

WOULD HAVE NATION BUILD STATE ROADS.

Washington, D. C.—Representative Grant of North Carolina has a most ambitious plan for government co-operation in road building. He wants Congress to appropriate \$25,000,000, which is to be used in the states which put up equal amounts. It is a plan for the government to go in, half and half, with states, counties or civil districts on road building. In a bill which the North Carolinian presented in the House he provides that the government's share be disbursed by a body of three road commissioners, under a bureau of roads, which his bill also creates. The commissioners are to receive \$4,000 a year. Not all of the \$25,000,000 is to become available at once. Only one-fifth of the sum is to be used the first year, and the same amount each year thereafter until the whole sum is expended. If the scheme works and the states and counties respond a total of \$50,000,000 will be expended in five years for road improvements in the United States.—*Municipal Journal and Engineer.*

VALUE OF CITY CHEMIST.

Tacoma, Washington, has a city chemist whose business it is to pass on all cement and construction materials used in city work and upon oil and other supplies purchased by the city. In a recent report he claimed for his office that it had saved the city already about \$40,000.

PUBLIC CONVENIENCE IN LONDON.

Greater London comprises a number of "cities and boroughs." With respect to public conveniences perhaps the city of Westminster is the most representative, and these are described as follows by its Town Clerk:

"The accommodation is of two kinds, viz.: (a) Underground public conveniences for men and for women, of which there are 17 in Westminster, the majority situated in busy streets; and (b) above-ground urinals for men, of which there are 40. The underground public conveniences are mostly constructed under the streets, or under the public parks adjacent to and with means of access direct from the streets. They contain urinals, water-closets and lavatory accommodation. In the case of one of these underground conveniences there is also a dressing room, which can be hired on payment of a small fee. A charge of 1 penny (2 cents) is made (by means of penny-in-the-slot locks) for the use of the water-closets, and 2d (4 cents) for the use of the lavatories.

"The underground conveniences are opened at 7.30 a. m. on week days and at 9 a. m. on Sundays; most of the men's conveniences are kept open till 1 a. m., and most of the women's conveniences till midnight. There is an attendant always in charge at each underground convenience, and at the larger conveniences two attendants." —*Municipal Journal and Engineer.*

STREET NAMES ON CURBS.

A method of placing street names on curbs, which is novel to us, has been adopted by the city of Pasadena, Cal., and at our request Mr. S. J. Van Ornum, the city engineer, has sent us the following information concerning the same:

Formerly there was a great deal of complaint from delivery men and visitors, and also from the police, that it was almost impossible to locate a given house number, as these were generally placed in an inconspicuous place. Recently the mayor has been authorized to have the names of the streets and the numbers of the houses painted on the curbs throughout the city, and he has employed two painters to do this work. The names of the streets are placed on the face of the curb close to the street intersection and consist of black letters 1½ inches high on a white background, painted by means of a stencil. The house numbers are painted on the top of the curb directly in front of each house, being black on a white ground, similar to the street names. The white paint, of oil and white lead, is first applied, and after this is thoroughly dry the black letters are stenciled on, the paint used consisting of one-half bone black and one-half lampblack mixed with oil. The approximate cost of this work is five cents per each house number and seven cents for each street name.—*Municipal Journal Engineer.*

STREET CLEANERS PARADE.

The annual parade of the street cleaning department of New York City was held recently and reviewed by Mayor Gaynor. There were 4,500 men in line, not to count horses, carts, sweepers, snow plows and other apparatus. A prize of a silver cup was given to the borough that made the best showing and was won this year by the Bronx. A feature of the parade was the Juvenile Street Cleaning League of the Bronx, which was composed of 300 public schoolboys from nine to twelve years of age.

MONTHLY CONFERENCE.

Boston, July 11, 1910.

Monthly conference between the City Council and heads of city departments, in the Mayor's hearing chamber, City Hall, at three o'clock, p. m. Hon. John F. Fitzgerald, Mayor, presided, and in calling the meeting to order said:

Gentlemen, this meeting is held under an ordinance passed some months ago providing that the heads of departments of the city should meet with the Mayor at three o'clock on the first Monday afternoon of each month "for discussion and co-operation concerning the business of the city and the respective departments. The City Council and the heads of departments so assembled shall, in their discretion, upon application of accredited representatives of associations and organizations interested in city affairs, designate a time when such representatives may appear before them and be heard upon the subject of their application."

The city charter, under an amending act passed in 1885, authorizes the Mayor to "call together the heads of departments for consultation and advice upon the affairs of the city; and at such meetings and at all times they shall furnish such information as to matters under their control as the Mayor may request."

The charter also provides that the Mayor shall quarterly, in the months of June, September, December and March, and at such other times and at such places as he shall appoint, hold conferences, at which may be present the Penal Institutions Commissioner, the Institutions Registrar, two members of the Board of Trustees of Children, two members of the Board of Insane Hospital Trustees and so forth.

So that these conferences are not new. A new feature about the conferences, and the most important feature, is the fact that the City Council is invited to participate; and, inasmuch as the City Council is composed of such a small number of persons now as to make it easy for that body to be brought into consultation with the heads of departments, it makes the present arrangement for consultation of the different heads of departments of the city and the City Council of great importance to the citizens.

I appreciate the fact that the day is a very warm one, that we are right in the middle of the summer, and I do not intend to burden you with a long address this afternoon. I will content myself with a few words about the desirability of meetings like this, and the good that can be accomplished by them.

We are all working for the City of Boston, and we ought to feel that in working for the city we are working for the most worthy of employers, because we are working for the public, and for the public good. Working for the public good is being more and more appreciated every day. Those men who give over their lives to the accumulation of money, and who become millionaires, most of them by methods not morally or ethically correct, find in this age that wealth is not appreciated as it was in years gone by; that men are judged by the character of their service, the amount of time they give to the public good, rather than by the amount of time they give to gathering money that properly belongs to the community or to somebody else other than those who accumulate the millions. It has been very truthfully stated that there are very few men in possession of a fortune of hundreds of millions of dollars of whom it could be said that they got it honestly. Most of them got it dishonestly, morally and ethically.

So, I say, our employment, working for the public good, should be considered, and is considered, the most honorable kind of employment. It is true that, because of criticism upon public works and public officials in Boston in the last three or four years—most of which was unjust and undeserved—there were men connected with the city who felt that their work was not appreciated, and who felt like separating themselves from the city service. But I think the public has arrived at a most just appreciation of the situation in the last two years, and that now public men are being judged, and will be judged in the future, in accordance with the character of the service that they render the city.

Meetings like this, of course, should have a tendency to bring the heads of departments together in a better way, so that they will work in greater unity for the good of the city. I have found sometimes, both during my present administration and when I was in office before, a spirit of jealousy and perhaps of narrowness prevailing among some of the heads of departments. They would be willing to better the reputation of their own departments at the expense of the reputation of the city, by saying that in their particular line they were doing such and such a high class of work, while some other department was doing its work in a way that was detrimental to the city. That spirit is not the proper spirit for any of us who are engaged in the city's service, and it is one of the hopes of those who are friendly to such an organization as we see assembled here to-day that resulting from it there will be a better spirit pervading all departments, that we will work more in unison, more in harmony than ever before, with the resultant good to the city. If it shall appear that in some ways the work of departments clashes, when that fact develops in meetings of this kind I think we will find that the trouble can be easily remedied. Mr. Rourke, for instance,

when he took charge of the Street Department, found that the street cleaning in the Dorchester, Jamaica Plain and Brighton sections of the city was under the charge of Mr. Sullivan, the Superintendent of the Paving Division, while the street cleaning work in other sections of the city was under the charge of Mr. Foss, of the Sanitary Division.

He did not think that that was a good method of doing the public business, and I agreed with him. He found also, in going about through the park system, that the Street Department had charge of the lighting of public parkways. For instance, one side of Columbia road is public park, but the Street Department was paying for the lighting, where it should properly have been charged to the Park Department.

There are a dozen or more agencies here for the public health, and perhaps some day this administration, or one that will follow it, will have the ability, brains and means necessary to organize a Health Department on a proper basis.

There are a great many other ways in which the work of one department clashes with that of another; and an organization such as this, meeting every month with the members of the City Council, can thresh these things out for two or three hours of an afternoon, and I think we can thereby come to a better understanding of the duties of the different departments, and that we will realize more keenly the necessity of co-operation and of a better understanding all around.

I think I have stated as fully as I can the objects to be accomplished by such meetings, and I would now like to hear from any gentleman present. If there is anything that should have been said that I have left out, I trust that somebody will say it.

The Mayor here called upon Councilors Brand and Hale, but each said that he had nothing to say at this time.

Mayor FITZGERALD—I understand that Mr. Slattery has a report of the Committee on Rules, appointed at the last meeting, to submit.

Mr. CHARLES H. SLATTERY, City Treasurer, for the Committee on Rules, submitted the following:

RULES FOR CONDUCT OF MEETINGS OF THE CITY COUNCIL AND HEADS OF DEPARTMENTS.

Order of Business.

Rule 1. At every regular meeting of this body the order of business shall be as follows:

Meeting called to order by the chairman.

Reading and approval of the minutes of the last meeting.

Reading of communications.

Reports of committees.

Unfinished business.

New business.

Secretary.

Rule 2. It shall be the duty of the secretary of this body to prepare a docket or calendar on the special matters to be considered at each meeting, such matters to have precedence over new business. Applications to have matters placed on the docket or calendar must be made to the secretary not less than three days preceding the meeting.

Motions.

Rule 3. When a question is under debate the following motions only shall be entertained, and in the order in which they stand arranged:

1. To adjourn.
2. To lay on the table.
3. To postpone to a day certain.
4. To commit.
5. To amend.
6. To postpone indefinitely.

Parliamentary Practice.

Rule 4. The rules contained in "Cushing's Manual of Parliamentary Practice" shall govern in all cases wherein they do not conflict with any special rules of this body.

The report was accepted and the rules were declared adopted.

The City Clerk read a transcript of the records of the last meeting, which were approved.

Mayor FITZGERALD—Are there any committees to report? (No response.) Are there any communications to be read? (No response.) Is there any unfinished business? (No response.) Is there any new business?

Coun. COLLINS—Mr. Chairman, I move you, sir, that a copy of the rules that have been adopted be sent to the heads of the respective departments and to each member of the City Council.

Coun. COLLINS' motion was carried.

Mayor FITZGERALD—I would like to ask the secretary whether, in accordance with the rules, there is any docket or calendar prepared for this meeting?

(City Clerk PRIEST stated that there was not, as the rules have not been enforced until the present moment.)

Mayor FITZGERALD—The secretary says that no docket or calendar has been prepared for the meeting, because the rules were not adopted until this meeting. I suppose that such a docket or calendar will be prepared for the next meeting. Is there any head of a department here now who has any particular instance in mind where his department clashes with some other department, which could be aired this afternoon with possible benefit to the public in this warm weather, for instance? I would say that this morning I came

down Columbus avenue and noticed a woman with two or three children trying to get water from a fountain at the Columbus Avenue Playground. The fountain at the eastern end of the playground was out of commission, and I thought it very strange that she should be compelled to go over to the westerly end of the Columbus Avenue Playground to find water. I got out of the machine and went to the fountain at the easterly side of the ground, Mr. Pettigrew, and found that the water was shut off, so that women and children could not drink there. I suppose it is under either your department or the School Committee. I called up Mr. Ellis of the School Committee last week and pointed out the fact that, whereas \$20,000 had been set aside by the School Committee for water department purposes in connection with the fixing up of these playgrounds, these fountains should be properly looked after, and he said he would speak to Mr. Lee about it. I supposed there would be no further difficulty, until I noticed the trouble I speak of there this morning. When I called his attention to it again this morning he said he supposed that Mr. Lee had attended to the matter. Now, do I understand, Mr. Pettigrew, that that water fountain, which I understand is at the easterly end of the Columbus Avenue Playground, is under the charge of the School Committee?

Mr. PETTIGREW—Yes. I think it is out of repair, and it will be repaired at once.

Mayor FITZGERALD—Well, whose is the responsibility?

Mr. PETTIGREW—Well, that part of the ground is in charge of the School Committee, and the fountain has been shut up and they haven't repaired it.

Mayor FITZGERALD—So it is the fault of the School Committee?

Mr. PETTIGREW—The matter is in abeyance at the present time, and I don't know just what is being done.

Mayor FITZGERALD—Well, this is pretty warm weather, 96 degrees in the shade, and these meetings are for just such purposes—to find out who is and who is not responsible for things like that. You say the School Committee is responsible.

Mr. PETTIGREW—It will be fixed at once.

Mayor FITZGERALD—Were those fountains put in there by your department?

Mr. PETTIGREW—That fountain was set up by the School Committee; the one in the center of the ground was put up by the Park Department.

Mayor FITZGERALD—Well, I think we have cut a little red tape. You go in there, Mr. Pettigrew, to-morrow if it is not fixed, and put it in order.

Mr. PETTIGREW—Yes.

Mayor FITZGERALD—Is there any other head of a department here who has any suggestion in regard to any matter that will promote the public good, now that the warm weather is here?

Coun. ATTRIDGE—Mr. Mayor, I desire to know if there is any real, valid objection to the use of the children's playgrounds throughout the city on Sunday afternoons during the summer season? There are many children who cannot go to the outlying parks and possibly it might be to their advantage if they could be allowed the privilege of going into the playgrounds on Sunday afternoons—for instance, such playgrounds as the Randolph Street Playground. There is one little corner there for children, and I think if the children could have the use of that playground on Sunday afternoons it would be of great advantage to them—that is, for legitimate sport, such as children enjoy in our playgrounds.

Mayor FITZGERALD—That question was brought up at one of the town meetings, Mr. Councilor, and we supposed assurances had been given that that ground would be opened. Isn't that so, Mr. Pettigrew?

Mr. PETTIGREW—Yes; I think so.

Mayor FITZGERALD—Is it a fact that it is not opened?

Coun. ATTRIDGE—That question of the opening of the Randolph Street Playground, as referred to in the town meetings, related to Saturday afternoons. Last year it was closed Saturday afternoons, but now it is open. But I am now speaking of Sunday afternoons.

Mayor FITZGERALD—Will you make a motion that it is the sense of this body that the School Committee be requested to open up all the children's playgrounds on Saturday afternoons and Sunday afternoons throughout the city?

Coun. ATTRIDGE—I will make that motion, because I believe in it.

The motion was carried.

Mayor FITZGERALD—And to send word to this body at its next conference whether it has been done or not. It will be a pretty long time to wait, but we will see that it is done in the meantime. Is there any other business?

Coun. COLLINS—Mr. Mayor, at the last meeting of this body a question was raised as to the exact powers of the Bath and Park Departments in respect to the bath houses of the city, over which it is said that both have concurrent jurisdiction. At that time I asked Chairman Peabody of the Park Department just what the powers of that department were, where they began and where they ended. At the time he was at a loss to say. Perhaps Mr. Babson may be able to help us on this matter.

Mayor FITZGERALD—What is your particular question?

Coun. COLLINS—For instance, take the case at L street. Assume that the City Council appropriates \$35,000 for the placing of additions on the bath house there. Or assume, for example, that it is decided to build a small bath house at McKenzie Beach, in the lower part of Dorchester. The Council passes an order. It goes before the Bath Department, and between the Bath Department and the Park Department the matter is hung up, and no progress is made. My idea is to find out just exactly where the powers of these respective departments begin and end. I suggested at the last meeting that it might be wise to have both departments sit jointly on matters in which they have a common interest. I would like to have Mr. Pettigrew, of the Park Department, or Dr. Mansfield, of the Bath Department, if he is here, express their views on that matter.

Mayor FITZGERALD—Is Dr. Mansfield here? (No response.) Who represents the Bath Department here?

Mr. CARROLL—Mr. Mayor, I happen at present to be a member of the Board of Trustees.

Mayor FITZGERALD—Mr. Leahy, did you communicate with the Bath Department in regard to being represented here?

Secretary LEAHY—Yes; I communicated with all the heads of departments.

Mr. CARROLL—I think, Mr. Mayor, that that is a law question, rather than a question of opinion for a member of the Board of Trustees to pass upon offhand. There has been no controversy, although there have been some difficulties, over the situation at L street and at McKenzie Beach. The McKenzie Beach matter, I understand, has been settled by an arrangement which permits a temporary building to be erected, the Park Department trustees permitting that with the understanding that it is not to be a permanent affair.

Mayor FITZGERALD—Mr. Pettigrew, can you state the position of the Park Commissioners on this question—particularly in regard to the proposed changes at L street? I understand that there has been some dispute between the Park Commissioners and I think, the old Board of Trustees of the Bath Department.

Mr. PETTIGREW—I would simply say that I was requested to come here to represent, as well as I could, the Park Department. Mr. Peabody is in Europe and Mr. Prendergast is out of town, and Mr. Prendergast wished me to express regret that he could not be here. I believe the trustees of the Bath Department requested additional room at L street, so that they could extend the bath house farther along the beach. The Board of Park Commissioners thought that the end of the street there should not be stopped up, that the Bath Department had abundant room there if it made some rearrangement of the lockers. It was felt that instead of having such large rooms—the lockers or closets now being 4 or 5 feet in diameter—there might be a rearrangement with alleyways and banks of lockers 15 or 18 inches in diameter, which is found ample in other places, as, for instance, at Savin Hill. It was felt that they did not need any more room if things were properly arranged there, and that it would be a pity to cut off more of the beach from the people. Therefore the Park Department refused to grant their request.

Mayor FITZGERALD—Did the Park Commissioners and the Bath Trustees have any conference on the matter, that you know of?

Mr. PETTIGREW—Not since that time, that I know of.

Mayor FITZGERALD—They did at that time? Mr. PETTIGREW—They did.

Mayor FITZGERALD—That was some time ago, but have they recently got together and gone over any plans?

Mr. PETTIGREW—Not that I am aware of.

Mayor FITZGERALD—Mr. Babson, what is the situation in case the City Council passes an order directing the Bath Commission or the Park Commission to do a certain thing? Can the Park Commission, for instance, refuse to recognize an order passed by the City Council.

Corporation Counsel THOMAS M. BABSON—In regard to the situation at L street, South Boston, which has been referred to, I do not understand that the Bath Department has any rights there except what it gets from the Park Commission. Of course, the situation might be different in different cases. But if the Park Department refuses to allow the use of additional land over there for the enlargement of the bath house, I don't see what the Bath Department can do about it.

Mayor FITZGERALD—The City Council has no authority in the matter?

Mr. BABSON—The City Council has placed the park grounds under the charge of the Park Department.

Mayor FITZGERALD—Mr. Collins, Mr. Babson reports that the Park Department, which is established by statute, has complete authority in the matter of the parks, and that no direction by the City Council would have any force in the direction you suggest, unless the Park Commission was willing to do what was requested.

Coun. COLLINS—I appreciate that fact. I also agree with Mr. Carroll when he says there has been no controversy, although there had been some difficulty. But in matters of this kind where two such departments have interests in common, it seems to me on such matters of public interest they should sit and discuss the matters jointly.

Mayor FITZGERALD—Is there not a committee of the City Council on Bath Department? I was going to suggest that if there were such a com-

mittee—and it seems to me there should be—they could investigate the problem, have action taken by the City Council and then meet with the Park Commission and the Bath Commission and simply say what the views of the City Council were on that matter. I don't think you would find the Park Commissioners taking a position contrary to what they thought were the best interests of the city as emphasized by a vote of the City Council.

Coun. COLLINS—It only seems to me that there is a shifting of responsibility, and that with that shifting of responsibility there is a lack of progress.

Mayor FITZGERALD—I know, but the members of the City Council are elected to take these things up. If the Park Commissioners refuse to do what the Bath Commissioners want, the Mayor's office, of course, is willing to take its responsibility in the matter. In fact, the Mayor's office has already taken steps in the matter. I directed Mr. Mansfield a week ago to employ an architect to go over there and investigate the conditions as they obtain in the hot weather and to make a report on the matter, bringing in plans if necessary. It seems to me if the City Council took the matter up, through a committee on Bath Department, something of value might be arrived at in that way. They could find out what the needs were, and make a report after a proper investigation; and if certain things were recommended by the City Council to the Park Commission, after such investigation, I do not believe the Park Commission would hesitate to do what was wanted.

Coun. COLLINS—Assume that the City Council passed an order, providing, say, \$10,000 for the construction of a bath house at a certain place, on the recommendation of the Bath Trustees. It seems to me that the City Council, having done that, has done its duty, until it hears affirmatively from the departments interested. That is just the difficulty.

Mayor FITZGERALD—I don't think that the Bath Department ought to recommend such action until it knows what it is doing, and I don't think that the City Council ought to pass such an order until it knows what it is doing. Such an investigation as I suggest ought to be made by a committee of the City Council, whose duty it should be to look after bath house affairs and report to the City Council. If that is the course taken, that is one situation; but if the City Council passes an order simply upon the say so of the Bath Department, or any other department, and knows nothing about the facts, it has not done its duty.

Coun. COLLINS—Of course, I am not speaking for the other eight members of the City Council. But ours is a small board. Each of us is nominated and elected at large. We all represent the city, and we have been against the appointment of too many small committees. We are very willing to co-operate with either of the two departments, but it seems to us there has been a sort of division of responsibility for which we are not responsible, and which we cannot mend since the Park Department is created by statute. Coming specifically to the two questions I have in mind, the McKenzie Beach matter has been settled.

Mayor FITZGERALD—Yes.

Coun. COLLINS—As to L street, \$35,000 was appropriated, under an order offered by Coun. Kenney, some three months ago. I would like to know what progress has been made on that.

Mayor FITZGERALD—The McKenzie Beach situation was settled by the Mayor going over there with Mr. Pettigrew and the chairman of the Board. We found a location and decided that a new building could be built, to be used at the beginning of the season. In regard to the other proposition, it was found that it would take six or seven months, so that it could not be effected this season. Nothing has been done about it except, as I said a moment ago, that I have asked the chairman of the Board to employ an architect to visit the bath house, pay some attention to the situation there during the next two or three months, note the conditions and prepare plans. That is being done. In the meantime I think it is the duty of the City Council to appoint a committee to look into this matter which has been referred to, as well as other matters which are considered by the body. Then when there is a dispute between two departments the facts will be known and some intelligent action can be taken in the way of settling the dispute. Is there any other business to come before the body? (No response.) The Chair will not detain the meeting longer. The afternoon is warm and I appreciate the fact that many of you are now at your summer homes and are anxious to catch trains or boats. Inasmuch as there have been up to the present time no rules, the rules not having been promulgated until this meeting, I suppose nothing more can be done at this time. But I do wish that you would all think over the objects of these meetings and come here prepared at subsequent meetings with suggestions and with information that may be required. Have your suggestions in writing, so that they can be acted upon intelligently. I think these meetings are going to be productive of a great amount of good.

It has been suggested that the city shall take part in a civic parade which is to take place some time in November next, in connection with a movement looking to the advancement of the interests of the city. You will get a letter from the Mayor's office along that line between now and the next meeting. It is something that may very well be discussed at that time, and I hope you will all come prepared to discuss it with reference to

the financial aspect and condition of the plants of which you are the heads, and as to the advisability of going into it. I hope every man will give this matter consideration between now and the next meeting, which will be on the first Monday in August.

If there is no further business to come before the meeting, the Chair awaits a motion to adjourn.

Adjourned at 3.49 p. m., to meet on Monday, August 1, at 3 p. m.

UTILIZATION OF PANAMA CANAL.

The utilization of the Panama Canal as a means of developing the American merchant marine has taken an unexpected turn recently through the action of Mr. B. N. Baker, formerly President of the Atlantic Transport Line. Although he has retired from business, he is devoting much attention to the possibility of building up a large business for American ships by way of the canal, and has had a conference with President Taft and his advisers on the subject. It is understood that if the Government will give a mail contract for the new line, capital can be raised for constructing a number of vessels specially for the service between New Orleans and New York and Colon, and Pacific Coast points and Panama. The project includes the construction of large transfer stations at both Colon and Panama, since Mr. Baker is of the opinion that these facilities are absolutely essential for any successful shipping business by way of the canal. The idea is to establish such stations on both sides of the Isthmus for developing the trade with South America. He believes that on the completion of the canal some ships will run directly from New York by way of the canal to the west coast of South America, but he also holds that there will always be an enormous transfer trade on both sides of the Isthmus. Every ship going into the canal will necessarily have to stop at both ends, and if there are large dock facilities there with the means for rapidly handling transfer cargo, the resulting trade should develop rapidly, in his opinion. It is desirable to reach some agreement in the matter now because it will take time to build the ships for the new line and to plan and construct the transfer facilities. Mr. Baker stated that it took about twelve years for the Atlantic Transport Line to obtain a fleet of really good vessels. Time is also important because docks must be secured in New York and other ports, which is no small matter when it is understood that the terminal expenses per ton in New York and London were greater for the Atlantic Transport Line than the cost of the ocean transportation of 3,200 miles between the two cities. The early discussion of the use of the canal in such a business-like way is a gratifying indication of its future usefulness.—*Engineering Record*.

AVOIDING A DEFICIT.

The annual deficit of the city of Philadelphia continues to grow larger and larger, and its financing becomes increasingly difficult. When the City Council undertook to sell the municipal gas plant a few years ago—not under competitive but at private sale—the only reason offered was that unless money was raised by some process, the city would soon be in a condition of hopeless bankruptcy. Now the council is approaching the difficulty on another side. It has appointed a special commission to go through the tax rolls with an X-ray apparatus, and discover every item that will stand an increase. By this they hope to bring the total up from \$1,410,000,000 to \$2,000,000,000 of assessable property.

OFFICIAL DIRECTORY.

MAYOR'S OFFICE.

Room 27, City Hall. Tel. Fort Hill 3000.
 JOHN F. FITZGERALD, *Mayor*.
 WILLIAM A. LEAHY, *Secretary*.
 RICHARD F. FIELD, *Assistant Secretary*.

CITY RECORD

OFFICIAL PUBLICATION OF THE CITY OF BOSTON.

VOL. 2.

SATURDAY, JULY 23, 1910.

No. 30

City of Boston.

CITY RECORD.

Published weekly under legislative act by the
City of Boston, Mass.

By SUBSCRIPTION \$1.00 Per Year.
SINGLE COPIES 5 Cents.
IN ADVANCE.

Application for entry as second-class mail
matter pending.

ADVERTISING.

A rate of 10 cents per agate line has been established for such advertisements as under the law must be printed in the *City Record*. Advertising and other copy must be in hand by Thursday of each week to insure its publication in the Saturday issue.

Copies for sale at the Mayor's Office, Room 27, City Hall.

MUNICIPAL SERVICE.

Complaints, inquiries or suggestions regarding the work of municipal departments should be made in writing to the officials directly in charge. The failure of such officials to make reply within a reasonable length of time should be brought to the attention of the Mayor. Communications should be directed as follows:

TO THE BOARD OF STREET COMMISSIONERS, Room 41, City Hall, for information relative to the laying out, relocation, widening and discontinuance of highways; the taking of real property for municipal purposes; the assessments of betterments for streets and sewers; the plotting of undeveloped areas for streets and the opening of private ways; the granting of licenses for the storage or sale of merchandise in public streets; the regulation of street traffic; the making of specific repairs in public streets; the naming of public streets; the planting and removal of trees in public ways; the issuing of licenses for the storage of gasoline, oil and other inflammable substances or explosive compounds; the use of the public ways for any permanent or temporary obstruction or projection in, under or over the same, including the location of conduits, poles and posts for telephone, telegraph, street railway or illuminating purposes, signs, marquis, bay windows, coal holes and vaults.

TO THE SUPERINTENDENT OF STREETS, Room 44, City Hall, for information as to the watering, cleaning, lighting and repairing of streets, the construction and care of sewers and catch-basins, the operation of the ferries, the maintenance of bridges and drawbridges and the removal of ashes and offal.

TO THE BOARD OF HEALTH, Room 11, Old Court House (rear of City Hall), for information relative to the inspection of milk, vinegar, meat, fish and vegetables, the issuance of permits for stables, slaughter houses, etc., smoke nuisances, the existence of contagious diseases or public health nuisances.

TO THE WATER COMMISSIONER, Room 58, City Hall, for information relative to the supplying or metering of water and the water charges of the city.

TO THE SUPERINTENDENT OF PUBLIC GROUNDS, 154 East Cottage street, for information as to the care of the Common, Public Garden, and the small parks throughout the city other than playgrounds, and the extermination of the gypsy moth and the charges made for the same.

TO THE PARK COMMISSIONERS, Pinebank, Jamaica Plain, for information as to Franklin Park and Field, Commonwealth avenue, the Back Bay Fens, Marine Park and playgrounds in general throughout the city.

TO THE SCHOOL COMMITTEE, Mason street, for information relative to the operation of the schools of the city.

TO THE SCHOOLHOUSE COMMISSIONERS, 120 Boylston street, for information as to the construction and repair of school buildings.

MUNICIPAL CALENDAR.

Meeting of City Council, Monday, August 29, at 3 p. m.

Meetings of the Boston Transit Commission are held Tuesday and Thursday of each week at 10.30 a. m.

HEARINGS.

A public hearing will be given in the old Aldermanic Chamber, City Hall, on Wednesday, July 27, at 11 a. m., on the question of the selection of Fort Hill square as a site for the new High School of Commerce and the Administration Building of the School Committee and the Schoolhouse Commission.

A hearing will be held on the petition of James W. Reid for leave to occupy a proposed wooden building for one cow and one horse at 774 Weld street, Ward 23, in the office of the Board of Health, 11 Old Court House, on Thursday, July 28, at 10 a. m.

PROPOSALS ADVERTISED.

Bids have been asked for by advertisements in the *City Record* by the following departments. The attention of

contractors and others is specially called to the closing time for the receipt of such proposals. This will be published weekly.

COURTHOUSE COMMISSION.

Advertisers for proposals for making additions and alterations to the northerly portion of the courthouse. Blank forms for proposals may be obtained at the office of the architect, George A. Clough, Room 34, Courthouse, Pemberton square. Bids to be filed at the office of James R. Dunbar, Room 75, No. 1 Court street.

Bids close Saturday, July 30, at 12 m.

PARK DEPARTMENT.

Advertisers for proposals for the sale to the city of land for a playground in the Parker Hill district, Ward 19. Proposals to be filed at the office of the Park Commissioners, Olmsted Park, Jamaica Plain.

Bids close Saturday, July 30, at 12 m.

Advertisers for proposals for the sale to the city of land for a playground in Ward 7. Proposals to be filed at the office of the Park Commissioners, Olmsted Park, Jamaica Plain.

Bids close Saturday, August 6, at 12 m.

SCHOOL COMMITTEE.

Advertisers for proposals for furnishing high efficiency metallic filament lamps. Bids to be filed at the office of the Auditor of the School Committee, Room 53, 168 Tremont street.

Bids close Thursday, August 4, at 2 p. m.

SCHOOLHOUSE DEPARTMENT.

Sullivan, teamster, $\frac{1}{2}$ day at \$2.25, \$1.69; Peter Welch, teamster, 1 day at \$2.25, \$2.25; Patrick Cassidy, watchman, 1 day at \$2.25, \$2.25; Michael Dwyer, watchman, 1 day at \$2.25, \$2.25; Patrick J. Gorman, watchman, 1 day at \$2.25, \$2.25; Daniel J. Buckley, watchman, 1 day at \$2.25, \$2.25; James F. Donovan, watchman, 1 day at \$2.25, \$2.25; William Regan, watchman, 1 day at \$2.25, \$2.25; Patrick McCarthy, watchman, 1 day at \$2.25, \$2.25; John Buckley, watchman, 1 day at \$2.25, \$2.25; James J. Hayes, watchman, 1 day at \$2.25, \$2.25; William P. Kilty, yardman, 1 day at \$2.25, \$2.25; Daniel J. Donovan, watchman, 1 day at \$2.25, \$2.25; Humphrey Sullivan, watchman, 1 day at \$2.25, \$2.25; David McCarthy, gateman, 1 day at \$2.50, \$2.50; Dennis McCarthy, gateman, 1 day at \$2.50, \$2.50; James M. Synnott, gateman, 1 day at \$2.50, \$2.50; Mark Cuniff, laborer, 1 day at \$2.25, \$2.25; Timothy J. Leary, laborer, 1 day at \$2.25, \$2.25; John J. Gallagher, pipe layer, 1 day at \$2.50, \$2.50; Patrick

Joyce, watchman, 1 day at \$2.25, \$2.25; Eugene Shea, watchman, 1 day at \$2.25, \$2.25; Hugh Cauley, pipe layer, 1 day at \$2.50, \$2.50; Michael Galvin, watchman, 1 day at \$2.25, \$2.25; John Rogers, watchman, 1 day at \$2.25, \$2.25.

Water Department (Income Division).

For the week ending Thursday, July 14, 1910:

P. J. Clougherty, laborer, $1\frac{1}{2}$ days at \$2.25 a day, \$3.80; R. J. Connorton, meter tester, $\frac{1}{2}$ day at \$2.50 a day, \$1.88; J. H. Cullen, plumber, $\frac{1}{2}$ day at \$3 a day, \$0.38; M. J. Dinneen, laborer, $\frac{1}{2}$ day at \$2.25 a day, \$1.13; T. J. Dolan, plumber, $\frac{1}{2}$ day at \$3 a day, \$1.50; M. H. Fenton, plumber, $\frac{3}{4}$ day at \$3 a day, \$1.13; P. F. Gateley, plumber, 1 day at \$2.75 a day, \$2.75; E. H. Gilmore, meter tester, $\frac{1}{2}$ day at \$2.50 a day, \$1.88; O. J. Gilloon, plumber, $\frac{1}{2}$ day at \$3 a day, \$2.44; M. M. Kenney, laborer, 1 day at \$2.25 a day, \$2.25; F. B. Lang, meter tester, $\frac{1}{2}$ day at \$2.50 a day, \$0.94; B. Magee, carpenter, $\frac{1}{2}$ day at \$3.50 a day, \$0.44; E. Mahoney, laborer, $1\frac{1}{2}$ days at \$2.25 a day, \$3.80; J. J. Mahoney, laborer, $\frac{1}{2}$ day at \$2.25 a day, \$0.28; T. McAuliffe, laborer, $1\frac{1}{2}$ days at \$2.25 a day, \$3.66; F. McCarthy, laborer, $1\frac{1}{2}$ days at \$2.50 a day, \$2.81; P. J. McCarthy, plumber, $\frac{3}{4}$ day at \$2.75 a day, \$2.49; M. M. McGrath, laborer, $\frac{1}{2}$ day at \$2.25 a day, \$1.41; M. Mulkern, laborer, $1\frac{1}{2}$ days at \$2.25 a day, \$2.95; J. H. O'Brien, laborer, $\frac{1}{2}$ day at \$2.25 a day, \$2.04; T. J. Ratchford, laborer, $\frac{1}{2}$ day at \$2.50 a day, \$0.94; J. Rice, meter tester, $1\frac{1}{2}$ days at \$2.50 a day, \$3.75; J. J. Roche, laborer, $\frac{3}{4}$ day at \$2.25 a day, \$1.83; P. A. Russell, laborer, $1\frac{1}{2}$ days at \$2.25 a day, \$3.59; J. J. Shea, $\frac{1}{2}$ day at \$2.25 a day, \$1.83; D. Sullivan, laborer, $\frac{3}{4}$ day at \$2.25 a day, \$2.11; J. Sullivan, laborer, $1\frac{1}{2}$ days at \$2.25 a day, \$2.74; T. J. Sullivan, plumber, $\frac{3}{4}$ day at \$3 a day, \$2.44; M. P. Welch, plumber, $\frac{3}{4}$ day at \$2.75 a day, \$2.58.

CONTRACTS AWARDED.

The following contracts for work, materials and supplies have been awarded with the approval of the Mayor. Those awarded without public advertisement are specially indicated. Week ending July 21, 1910:

BATH DEPARTMENT.

On July 16 the Mayor approved a contract with Wilbur J. Hatch for erecting shelters at McKenzie, Tenean and Savin Hill beaches. Bids on this work, opened June 29, were as follows:

	Tenean Beach.	McKenzie Beach.	Savin Hill Beach.
Wilbur J. Hatch...	\$192	\$192	\$492
Hapgood, Frost & Co	545	545	545
James F. Flaherty.		555	555
George A. Cahill...		1,800*	
Holmes Building Company	646	646	646

* 3 shelters.

PENAL INSTITUTIONS DEPARTMENT.

On July 20 the Mayor approved a contract with Potter & Wrightington for

furnishing 300 barrels of flour. Bids on these goods, opened July 14, were as follows:

Potter & Wrightington, \$4.93 per barrel; James H. Knowles \$5.05; Washburn-Crosby Company, \$5.40.

STREET DEPARTMENT.

On July 18 the Mayor approved a contract with the Atlantic Works for the repair of the towboat Cormorant. Bids on this work, opened July 8, were as follows:

Atlantic Works, \$1,976; Bertelsen & Petersen Engineering Company, \$2,275; Lockwood Manufacturing Company, \$2,784.

STREET DEPARTMENT (Sanitary Division).

On July 15 the Mayor approved a contract with James H. McCarthy for collecting and removing ashes, etc., in the Brighton district from July 15, 1910, to January 31, 1911. Bids on this work, opened June 27, were as follows:

James H. McCarthy, \$613.85 per month; B. E. Grant, \$850 per month; John H. Carter \$900 per month; Frank F. Riley, \$924 per month, and John Lane \$900 per month.

On July 16 the Mayor approved a contract with Simon Collins for collecting and removing ashes, etc., from July 15, 1910, to January 31, 1911, in the East Boston district. Bids on this work, opened July 8, were as follows:

Simon Collins, \$1,083 per month; John H. Carter \$1,100 per month; Charles Bermen, \$1,250 per month; William F. Hedington, \$15,000 per year.

On July 20 the Mayor approved a contract with John T. Lane for collecting and removing house offal in the East Boston district. Bids on this work, opened June 27, were as follows:

John T. Lane, \$416.66 per month; Joseph W. Hawes, \$400 per month; Frank Neelon, \$500 per month.

WITHOUT ADVERTISING.

STREET DEPARTMENT (Highway Division).

On July 16 the Mayor, in view of the following representation, approved a contract, awarded without advertising, to William J. Rafferty for the construction of a macadam roadway and artificial stone sidewalks in Welles avenue, Dorchester, between Argyle street and Talbot avenue, at an estimated cost of \$2,600.

"This is an extension of the present contract for constructing Welles avenue, between Dorchester avenue and Argyle street, which was awarded to Mr. Rafferty, the lowest bidder. The prices allowed in the extension are the same prices that were bid in the first contract and are as advantageous as might be obtained by submitting this 278-foot street to open competition. This will complete the construction of Welles avenue between Dorchester avenue and Washington street.

"(Signed) L. K. ROURKE,
"Superintendent of Streets."

ADDITIONS AND ALLOWANCES TO CONTRACTS.

CONSUMPTIVES' HOSPITAL DEPARTMENT.

On July 20 the Mayor approved an addition amounting to \$21.70 on contract with Robert F. Brown for plumbing in the Second Ward Building, on account of furnishing valves on hot water risers and check valves on cold water supply to boiler and circulating pipes to same.

Original contract, \$4,819; total additions, \$21.70; total deductions, \$158.50; contract as standing, \$4,682.20.

A deduction amounting to \$55 on the contract with C. F. Brown for erecting the Women's Cottage Building, on account of omitting stain on exterior shingles. Original contract, \$8,040; total additions, \$1,627; total deductions, \$55; contract as standing, \$9,612.

SCHOOLHOUSE DEPARTMENT.

In view of the representations contained in the accompanying letter, the Mayor approved an addition amounting to \$1,171.80 to the contract with the John F. Griffin Company for the erection of the Peter Faneuil Schoolhouse.

BOSTON, July 20, 1910.

HON. JOHN F. FITZGERALD, Mayor:

DEAR SIR,—At the new Peter Faneuil Schoolhouse on Joy street, the coal pocket is at the front of the building underground. When the specifications for this building were written they called for the driveway approaching the pocket to be paved in ordinary paving brick laid flat in sand. The heavily laden coal teams in driving over this paving would ruin it, and it would cause no end of expense to the department to keep it in repair. It has been suggested by the architects, and approved by me, that the driveway should be paved on a concrete base with heavy vitrified paving brick. It will entail a cost to the city, at this time, of \$1,171.80. This is a net figure, the contractor allowing the cost of for what was originally specified. This amount being in excess of the one thousand dollars' limit, your Honor's permission is asked to make an order of addition to the contract of John F. Griffin Company, who are the contractors for this building. The building is rapidly approaching completion, and it will be occupied in September. This paving should be done at once.

Your early approval of this matter will greatly facilitate matters.

I am,
Very respectfully yours,
CHARLES LOGUE,
Chairman.

PETITIONS GRANTED.

The following petitions granted by the Board of Street Commissioners have been approved by the Mayor:

Signs.—S. Markovitz, 258 Bowdoin street, Ward 20; Arthur E. Cook, 126 Dartmouth street; Isaac Miller, 2777½ Washington street; Charles W. Benton, 51 Merrimac street; Alfred Pisco, 135 Richmond street; Matt Downey, 204 Dartmouth street; Thomas J. Mahoney, 48 Crescent avenue, Dorchester.

Illuminated Signs.—Frank Ortolano, 86 Dartmouth street; F. W. Woolworth & Co., 1075 Washington street; F. O. Swallow, 1904 Centre street, Ward 23; Burke, Gallagher & Co., 396-398 Atlantic avenue; Rosse Germano, 1615 Washington street.

Bay Window.—Lillian Goldfadden, 63 Myrtle street.

Gasolene.—Reliance Motor Truck Company, 944 Massachusetts avenue.

CONTRACTS FOR SIDEWALKS.

On July 16 the Mayor granted to the Superintendent of Streets authority to award contracts, without advertising, for the construction of artificial stone sidewalks in the public streets of Boston, to C. W. Dolloff & Co., and John Landis, the estimated amount for labor and materials to be furnished by the contractor being over \$2,000.

"The contractors who lay artificial stone sidewalks furnish a surety company guaranty bond for maintaining the work for a period of five (5) years to the satisfaction of the Superintendent of Streets. The amount paid by the city toward the cost of constructing these sidewalks is a fixed one (6 cents per square foot), equal to one-half the cost of a brick sidewalk, which the city assumes as its share of the cost of a new sidewalk. The list submitted for your approval includes all reputable companies known by this department who desire such a contract with the city.

"(Signed) L. K. ROURKE,
"Superintendent of Streets."

REPAIR OF OLD STATE HOUSE.

On July 16 the Mayor authorized Manus J. Fish, Superintendent of Public Buildings, to carry out the provisions of chapter 385 of the Acts of 1907, relating to the repair of the Old State House, according to plans and specifications submitted by the architect, Mr. Joseph E. Chandler.

SCHEDULE OF BAND CONCERTS ARRANGED BY MUSIC DEPARTMENT, SEASON 1910.

APPOINTMENT OF ARCHITECTS.

The Mayor has approved the appointment by the Board of Schoolhouse Commissioners of the following named architects for various school buildings:

Charles R. Greco, as architect for the elementary school, Comins District.

Charles K. Cummings, as architect for the elementary school, Roger Wolcott District.

Edward T. P. Graham, as architect for the elementary school, Lyman District.

Messrs. Maginnis & Walsh, as architects for the elementary school, Phillips Brooks District.

Harrison H. Atwood, as architect for the elementary school, Lewis District.

Commission in each case to be 5 per cent on general contract and 2½ per cent on the domestic engineering, i. e., heating, ventilating and electrical work.

PARK PRIVILEGES GRANTED.

On July 18 the Mayor approved the action of the Board of Park Commissioners granting to Ralph G. Stowell the privilege of maintaining and operating for hire a public boat service and of selling refreshments at the boat landing, Jamaica Pond, for the season of 1910.

On the same date the Mayor approved the action of the Board extending the concession to Edward J. Tomlin to occupy the pavilion on the Strandway at L street to sell light refreshments for one year from March 16, 1910, at a rental of \$100 per year and the further consideration that he keep the premises neat and clean and furnishes, between May 1 and October 1, the labor necessary to pick up stray papers on the Strandway between K and M streets.

PERMISSION TO SELL.

FIRE DEPARTMENT.

On July 20 the Mayor granted to the Fire Commissioner authority to sell a quantity of scrap and two old automobiles for the sum of \$150.

WATER DEPARTMENT.

On July 14 the Mayor granted to the Water Commissioner authority to sell a quantity of old cast-iron pipe which is being removed from a trench in Sumner street, East Boston, to an amount not exceeding \$125, and for the sale of a lot of cast-iron junk at the yard 710 Albany street, to an amount not exceeding \$500.

APPOINTMENTS AND CONFIRMATIONS.

APPOINTMENT.

The following appointment has been made, subject to confirmation by the Civil Service Commission:

July 15, Philip O'Brien to be a member of the Board of Assessors.

CONFIRMATION.

The following appointment was confirmed on the date given:

July 19, Charles Bruen Perkins as a Schoolhouse Commissioner.

LAND-TAKING FOR SCHOOL PURPOSES.

On July 21 the Mayor approved the vote of the Board of Street Commissioners to take, upon request of the Board of Schoolhouse Commissioners, under right of eminent domain, for school purposes, a parcel of land supposed to belong to Frank F. and Clarence W. Barron, and containing 7,200 square feet, more or less, situated on Polk street, Charlestown, together with the estimate of the Board that the sum of \$5,800 represents the damages to the estate of Frank F. and Clarence W. Barron.

PITTSBURG SUBWAY.

A rapid transit subway for Pittsburg has been studied for the authorities of that place by Mr. B. J. Arnold. He reports that the city is not adapted topographically for elevated railways, but that a subway between the downtown business district and certain centers in the outlying territory appears to be a natural development which must be carried out eventually. The justification for the expense of such a subway is to be found not only in the better rapid transit but also in the fact that a subway line can be operated at a relatively less percentage of the gross earnings than a surface system. In order to make such a line financially practicable, the average annual earnings from passengers must be at least 12 per cent of the first cost. The Pittsburg surface system is now earning about \$10 per capita on an average, and in some districts as much as \$28. At \$10 per capita the subway must serve 180,000 people in order to earn 12 per cent on the \$15,000,000 which will be needed for the initial investment. The maximum density of population in Pittsburg over any considerable area is about 100 per acre, while in Harlem, which is the best contributing district for the New York subway, the density is 150 per acre. Considering these facts and the practi-

cability of spreading out in Pittsburg, Mr. Arnold reaches the conclusion that the first section of the subway must serve an area of about 4 square miles in order to be reasonably profitable. To cover such an area it will be necessary, in his opinion, for the subway to be operated in conjunction with the suburban lines of existing steam railroads, which should be electrified, and also with the surface system. Consequently the thing to do now is to ascertain the best terms on which private capital will enter upon a subway proposition, or to secure by legislation the right for the city to issue bonds, outside the debt limit, for such an undertaking. The attitude of the street railway and the steam railway companies toward a co-operative use of the subway must be ascertained, and careful examinations must be made to determine the probable development of different sections of the city and the outlying districts. All things considered, the report is a most interesting example of an engineering document, in that it states clearly just what can be determined at present, and points out what further investigations are needed in order that definite information may be available for a decision as to the desirability of engaging in such work at the present time.

COURTHOUSE COMMISSION.

PROPOSALS FOR ADDITION TO COURTHOUSE.

The commissioners for the enlargement of Suffolk County Courthouse invite proposals for making additions and alterations in northerly portion of said courthouse at Boston, Mass., including all trades, giving a contract therefor, and a ten thousand dollar (\$10,000) bond of a surety company, as security for carrying out the contract. The proposal to be used must be obtained at the office of the architect, George A. Clough, Room 34, Courthouse, Pemberton square, Boston, Mass., and left at the office of James R. Dunbar, one of the commissioners, 75 Ames Building, 1 Court street, Boston, Mass., before 12 m. of July 30, 1910, signed by the bidder; and as a security for giving the contract and bond a certified check on a Boston bank for twenty-five hundred dollars (\$2,500), payable to the Commonwealth of Massachusetts, must be left with the proposal. Only such proposals, so left, signed, and with check, will at said hour and place be publicly opened and read. The commissioners reserve the right to reject any or all proposals.

JAMES R. DUNBAR,
JOSEPH J. CORBETT,
WILLIAM H. WELLINGTON,
Commissioners.

(July 23.)

CITY OF BOSTON.

PROPOSALS FOR LAND IN PARKER HILL DISTRICT, WARD 19.

The Park Commissioners of Boston invite proposals for the sale to the city of suitable land for a playground in the Parker Hill district, the proposals to state location, area and price per square foot of the land offered, to be marked "Proposals for Land for Playground," and sent by mail, or otherwise, to the office of the Board, Olmsted Park, Jamaica Plain, on or before 12 m. of July 30, 1910. Proposals which are more than 25 per cent higher than the average assessed valuation of the property during the previous three years cannot be considered. The Board reserves the right to reject any or all proposals.

ROBERT S. PEABODY,
JAMES M. PRENDERGAST,
DANIEL H. COAKLEY,
Commissioners.

(July 23.)

BOSTON TRANSIT COMMISSION.

Notice is hereby given that on Wednesday, July 27, at 10.30 a. m., at the office of the undersigned, 15 Beacon street, a public hearing will be given under chapter 579 of the Acts of 1910, being an act entitled "An Act to provide for the relocation of the westerly terminal or connection of the Riverbank subway in the City of Boston," which act was accepted by the Boston Elevated Railway Company on July 19, 1910.

BOSTON TRANSIT COMMISSION,
By B. LEIGHTON BEAL,
Secretary.

(July 23.)

CITY OF BOSTON.

PROPOSALS FOR PIPE SEWER.

The Superintendent of Streets of the City of Boston, office 47 City Hall, invites proposals for building pipe sewer and appurtenances in Beacon street, between Ayr road and Cleveland Circle, Brighton, and giving bond therefor of a surety company approved by the superintendent in the sum of eight hundred dollars (\$800), to secure the due performance of the contract and the full protection of the city. Forms of bids may be obtained at the said office of the Superintendent of Streets. Each bid should be inclosed in an envelope, sealed, marked "Bid for Building Pipe Sewer in Beacon Street," and left at the said office of the Superintendent of Streets before 12 m. on Thursday, July 28, 1910, with a certified check for five hundred dollars (\$500), payable to and to become the property of the city if the bid after acceptance is not carried out. The bids will then and there be publicly opened and read. Bids must be made in duplicate, the duplicate without check to be deposited by the bidder with the City Auditor previous to the time named for opening the bids. The undersigned reserves the right to give preference to the proposals of bidders agreeing to pay the trade unions' rate of wages and the right to reject any or all proposals.

LOUIS K. ROUREKE,
Superintendent of Streets.
(July 23.)

Boston, July 21, 1910.

CITY OF BOSTON.

PROPOSALS FOR MAZDA LAMPS.

The School Committee invites proposals for furnishing and delivering (within one year from the acceptance of bid), at such school buildings as the Auditor of the School Committee may designate, high efficiency metallic filament lamps in accordance with the following schedule:

5,435—25-watt, clear.
202—40-watt, frosted.
50—60-watt, frosted.
3—100-watt, frosted.

The number required may be less or more as found to be necessary. The lamps to be furnished are to be of the class known as Mazda tungsten type regular, clear and frosted. These lamps are to be delivered in good condition to the various schools as required. Bids for furnishing and delivering will be received at the office of the auditor, Room 53, No. 168 Tremont street, until Thursday, August 4, 1910, at 2 o'clock p. m. A duplicate bid must be sent to the City Auditor, City Hall. The right to reject any or all bids is reserved.

WILLIAM J. PORTER,
Auditor.

(July 23.)

CITY OF BOSTON.

TO CARPENTER CONTRACTORS.

The Schoolhouse Commissioners of the City of Boston invite sealed proposals for furnishing and installing new equipment and doing other work incidental thereto in physical laboratory, Girls' High School, Boston, Mass., and giving bond of a surety company therefor in the sum of \$1,000. Only proposals obtained at the office of the commissioners, 120 Boylston street, signed by the bidder and left before 12 o'clock m. of Friday, July 29, 1910, at said office, with a certified check for \$500, payable to the city if the proposal is not carried out, will then and there be publicly opened and read. The bid must be made in duplicate, the one with the check to be sent as above, the other to be sent to the City Auditor, City Hall. The commissioners reserve the right to reject any and all proposals and to give preference to bidders paying the trade unions' rate of wages.

CHARLES LOGUE,
JOHN F. KENNEDY,
CHARLES B. PERKINS,
Commissioners.

(July 23.)

CITY OF BOSTON.

TO PLUMBING CONTRACTORS.

The Schoolhouse Commissioners of the City of Boston invite sealed proposals for installing plumbing system and other work incidental thereto in Minot School, Dorchester, Boston, Mass., and giving bond of a surety company therefor in the sum of \$1,500. Only proposals obtained at the office of the commissioners, 120 Boylston street, signed by the bidder and left before 12 o'clock m. of Monday, August 1, 1910, at said office, with a certified check for \$800, payable to the city if the proposal is not carried out, will then and there be publicly opened and read. The bid must be made in duplicate, the one with the check to be sent as above, the other to be sent to the City Auditor, City Hall. The commissioners reserve the right to reject any and all proposals and to give preference to bidders paying the trade unions' rate of wages.

CHARLES LOGUE,
JOHN F. KENNEDY,
CHARLES B. PERKINS,
Commissioners.

(July 23.)

CITY OF BOSTON.

PROPOSALS FOR CLEANING SEWERS.

The Superintendent of Streets of the City of Boston, office 47 City Hall, invites proposals for cleaning sewers in the following streets, viz., Commercial street, between Battery street and Clark street, City Proper; Prince street, between Salem street and Snow Hill street, City Proper; Brook street, between Florence street and Ridge street, West Roxbury; Marion street, from Florence street 412 feet northerly, West Roxbury; Harrison street, from Florence street 574 feet northerly West Roxbury, and giving bond therefor of a surety company approved by the superintendent. Only proposals obtained at said office, filed out, signed by the bidder and left at said office before 12 o'clock m. of Thursday, July 28, 1910, with a certified check for \$100, payable to and to be the property of the city if the proposal is not carried out, will, at said hour and place, be publicly opened and read. The proposals must be made in duplicate, the duplicate, without check, to be deposited by the bidder with the City Auditor previous to the time named for opening the bids. The undersigned reserves the right to give preference to the proposals of bidders agreeing to pay the trade unions' rate of wages, and the right to reject any or all proposals. The proposals should be inclosed in an envelope, sealed, and marked "Proposal for Cleaning Sewers."

LOUIS K. ROUREKE,
Superintendent of Streets.
(July 23.)

Boston, July 21, 1910.

CITY OF BOSTON.

PROPOSALS FOR HAY, GRAIN AND STRAW.

Sealed proposals will be received at the office of the City of Boston Supply Department, Room 826, Tremont Building, until 11 o'clock Wednesday, July 27, for the hay, grain and straw needed in the different departments for August, 1910. The bid must cover the cost of delivery. The bidder is requested to bid on both No. 1 and No. 2 hay. The hay to be timothy hay, clean and sweet; the straw to be No. 1, straight rye straw. The grade of hay and straw must comply with the rules of the National Hay Association, and shall be weighed and inspected by a weigher appointed under the ordinances of the City of Boston. The oats must be No. 2, clipped white oats, to test not less than 34 pounds to the bushel. Samples of the oats must be given with the proposal, and must conform to the grade adopted by the Chamber of Commerce. The bidder must use the form to be obtained at Room 826, Tremont Building. A bid in duplicate must be filed, without the check, with the City Auditor. The successful bidder must deposit a certified check for one-quarter the amount of the contract as surety that the terms of the contract will be carried out. The proposals will be publicly opened and read on Wednesday, July 27, at 11 a. m. The superintendent reserves the right to reject or accept bids.

J. EDWARD MULLEN,
Superintendent of Supplies.

(July 23.)

CITY OF BOSTON.

TO ELECTRICAL CONTRACTORS.

The Schoolhouse Commissioners of the City of Boston invite sealed proposals for electric work in Public Latin and English High School, Boston, Mass., and giving bond of a surety company therefor in the sum of \$1,000. Only proposals obtained at the office of the commissioners, 120 Boylston street, signed by the bidder and left before 12 o'clock m. of Tuesday, July 26, 1910, at said office, with a certified check for \$500, payable to the city if the proposal is not carried out, will then and there be publicly opened and read. The bid must be made in duplicate, the one with the check to be sent as above, the other to be sent to the City Auditor, City Hall. The commissioners reserve the right to reject any and all proposals and to give preference to bidders paying the trade unions' rate of wages.

CHARLES LOGUE,
JOHN F. KENNEDY,
CHARLES B. PERKINS,
Commissioners.

(July 23.)

CITY OF BOSTON.

PROPOSALS FOR LAND IN WARD 7.

The Park Commissioners of Boston invite proposals for the sale to the city of suitable land for a playground in Ward 7, the proposals to state location, area (from $\frac{1}{4}$ to $\frac{1}{2}$ of an acre) and price per square foot of the land offered, to be marked "Proposals for Land for Playground," and sent by mail, or otherwise, to the office of the Board, Olmsted Park, Jamaica Plain, on or before 12 m. of August 6, 1910. Proposals which are more than 25 per cent higher than the average assessed valuation of the property during the previous three years cannot be considered. The Board reserves the right to reject any or all proposals.

ROBERT S. PEABODY,
JAMES M. PRENDERGAST,
DANIEL H. COAKLEY,
Commissioners.

(July 23-30.)

PROCEEDINGS OF CITY COUNCIL.

July 18, 1910.

Regular meeting of the City Council, held in the Council Chamber, City Hall, at 3.30 o'clock p. m., President BALLANTYNE in the chair, and all the members present.

The Council voted, on motion of Coun. HALE, to dispense with the reading of the records of the last meeting.

JURORS DRAWN.

Forty-one traverse jurors were drawn for the Superior Criminal Court under the provisions of chapter 514 of the Acts of 1894, to appear August 3 (the Mayor being present), viz.:

James M. Cleary, Ward 25; George Ramos, Ward 9; Frank G. Rourke, Ward 20; William Smith, Ward 12; James F. Paul, Ward 15; James Bartley, Ward 8; John Conway, Ward 4; Patrick Waters, Ward 8; John L. Findley, Ward 7; Alphon Seufert, Ward 19; Frank E. Martin, Ward 25; John J. Hoar, Ward 24; Henry H. Pierce, Ward 24; William H. Golden, Ward 14; John H. Kelly, Jr., Ward 25; Thomas J. Kenny, Ward 23; Dennis J. Whalen, Ward 22; Guilford W. Colpitts, Ward 23; William Fraser, Ward 13; James Napier, Ward 1; Charles Z. Horner, Ward 17; Michael M. J. Hoeffner, Ward 13; Michael A. Keough, Ward 17; Thomas H. O'Brien, Ward 20; Joseph S. Donnell, Ward 1; Arthur W. Ellis, Ward 17; Joseph P. McGarry, Ward 13; James H. Kelly, Ward 16; Louis D. Latz, Ward 22; Harry W. Theall, Ward 17; Eugene Lyman Haskell, Ward 20; John J. Morey, Jr., Ward 5; George E. Staples, Ward 5; John W. Linzee, Jr., Ward 11; Julian F. Fisher, Ward 24; Joseph M. Wiggins, Ward 16; Timothy A. Daly, Ward 13; James E. Gordon, Ward 23; Joseph F. Daly, Ward 15; Charles W. Curtis, Ward 19; William T. Dunbar, Ward 1.

APPOINTMENTS BY THE MAYOR.

Subject to confirmation by the City Council the Mayor submitted the following appointments, viz.:

- (1) Paul R. Wild (136 Highland avenue, Somerville), a Weigher of Coal, for the term ending April 30, 1911.
- (2) Robert H. Triggs (28 Edson street, Ward 24), a Constable of the City of Boston for the term ending April 30, 1911.
- (3) Fred Fougere (36 Bennington street, Ward 1) and Alexander Modell (17 Lawrence park, Ward 20), Weighers of Coal and Weighers of Boilers and Heavy Machinery for the term ending April 30, 1911.

Severally laid over under the law.

COST OF VACATION, FERRY EMPLOYEES.

The following was received:

City of Boston,
Office of the Mayor, July 18, 1910.

To the City Council:

I beg to inclose herewith a communication from the Superintendent of Streets, in reply to a request from your honorable body, as to the expense of allowing "two weeks vacation, without loss of pay to all employees of the Ferry Division of the Street Department."

Respectfully,
JOHN F. FITZGERALD, Mayor.

Street Department,
City Hall, Boston, July 18, 1910.

To the Honorable, the Mayor:
Reinclosed order of the City Council, "That the Superintendent of Streets be authorized to allow two weeks' vacation, without loss of pay, to all employees of the Ferry Division of the Street Department," with request that cost thereof be furnished, you are respectfully informed that the estimated extra expense per year is \$6,000.

Respectfully,
L. K. ROURKE,
Superintendent of Streets.
Referred to the Executive Committee.

HISTORIC SITES, DORCHESTER.

The following was received:

City of Boston,
Office of the Mayor, July 18, 1910.

To the City Council:

The appended communications from Mrs. John A. Fowle deal with the commemoration of historic sites in Dorchester, and seem to me deserving of attention by your honorable body.

Respectfully,
JOHN F. FITZGERALD, Mayor.

Dorchester Historical Society,
Old Blake House, Dorchester, July 11, 1910.
Secretary William A. Leahy:

Dear Sir,—Yours of the date June 26, duly received. I thank you for the attention and I well know the "convention" of last week has fully taxed the time and strength of our good public

spirited Mayor, but I am very anxious to have the letter containing the request regarding "the site of the first free school" and the suggestion of a children's school of forestry, the first of the kind to be established here in good old Dorchester, under the supervision of the Public City Forester, Mr. Sullivan. This has been a pet project of mine. There is a letter on file with the School Board of the city, and as the subject has been brought forward the past week I am more anxious that "Old Dorchester" should have the credit. Councilman Brand knows of our great interest for neighborhood good. We are proud to think he has at last succeeded in getting the appropriation for moving the statue of "Edward Everett" to the Square near our old Blake house. Mr. Brand has been a good friend to the public good of Dorchester. We also have great need to be proud of our "Mayor" in these times of need for special attention to the working people of Boston and vicinity. Please convey my special thanks and in due time we shall hope to hear favorably regarding the requests. The old building on the "site" is a brick one, clapboarded, with a good granite foundation. I have all the particulars and would be pleased to send them.

Most respectfully,
MRS. JOHN A. FOWLE.

Dorchester Historical Society,
Old Blake House, Dorchester, June 26, 1910.
Our Public Spirited Mayor:

Mentioning on two notable occasions of late your reference to the "first free school site here in good old Dorchester" I am tempted to add a word along that line. During the regime of our late Mayor Hibbard a letter was sent hoping that during his Mayorship something might be brought to bear on marking the notable spot with a suitable memorial. We hoped for a branch of the Public Library as one is much needed in that growing section. Mention was also made of a children's school of forestry on the ground now owned by Chauncey Brewer, adjoining the Blake house ground [Richardson Park] and the site of the first free school. Dorchester Day, 1909, Mayor Hibbard said the letter was still on his table, and he hoped to take the matter up, but I'm afraid it got lost with other good promises. Mention was made also of the playground and park on Savin Hill during your administration, and the query, "What will you do for us?", was left an open question, hoping we might honor the name of Hibbard. It has long been a pet project of mine to have the city own this ground and make it a "public neighborhood good". We have our Richardson Park as a playground, with our historic old Blake house, and I am quite sure you will be interested in a children's school of forestry and a suitable memorial for our first free school site.

Respectfully,
MRS. JOHN A. FOWLE.
Would you advise the purchase by the state, or is it possible to touch the Parkman Fund as it adjoins Richardson Park?
Referred to the Executive Committee.

TAX, NEW YORK CENTRAL RAILROAD PROPERTY.

The following was received:

City of Boston,
Office of the Mayor, July 16, 1910.

To the City Council:

I transmit herewith a communication from the Assessing Department containing a reply to your order requesting information as to the tax levied on certain land owned by the New York Central Railroad Company.

Respectfully,
JOHN F. FITZGERALD, Mayor.

City of Boston,
Assessing Department,
City Hall, July 15, 1910.

Hon. John F. Fitzgerald,

Mayor of Boston:

Sir,—In reply to the order passed by the City Council, regarding the area and assessed value of the land owned [or occupied] by the New York Central Railroad Company, in the space bounded by Huntington avenue, Boylston street, Massachusetts avenue and Exeter street, the information is herewith given:

Small parcel on west side of Exeter street, east of Hotel Lenox, contains 40,800 square feet and is assessed at \$9 per foot, owned by the New York Central Railroad.

Land assessed	\$367,200
Building assessed	7,800
	\$375,000

The large tract bordering on above and extending along Boylston street to Massachusetts avenue, contains 436,304 square feet; is owned by the Boston & Albany Railroad and is leased to the New York Central Railroad. Land is assessed at \$7.75 per foot, giving a value of \$2,509,700
Buildings assessed at 7,000
\$2,515,700

The large tract east of the railroad tracks, bounded by Huntington avenue, rear of Mechanic's Building, Belvidere and Dalton streets, contains 616,948 square feet; this belongs to the Boston & Albany Railroad Company and is leased to the New York Central Railroad and it is assessed at \$3.50 per foot, giving a value of \$2,159,000
Buildings assessed at 30,000
\$2,189,000

There is also a small piece between the tracks and the rear of Cambria street. This contains 13,913 square feet, and is assessed at 80 cents per foot, giving a value of \$11,100.

Recapitulation.

Exeter street parcel	\$375,000
Boylston street parcel	2,515,700
Huntington avenue parcel	2,189,000
Small parcel	11,100
Grand total	\$5,090,800

Respectfully,
CHARLES E. FOLSOM, Secretary.
Referred to the Executive Committee.

SANITARIES, ETC., SQUANTUM,—VETO.

The following was received:

City of Boston,
Office of the Mayor, July 12, 1910.
To the City Council:

I return herewith, without my approval, your order passed at the meeting of June 27, requesting that the sum of five hundred dollars (\$500) be transferred from the Reserve Fund, to be expended under the direction of the Superintendent of Streets for the installation of a system of sanitariums and water supply on the land owned by the city at Squantum, and prescribing a fee of five dollars (\$5) for a limited number of permits to be issued to campers on this tract of land by the Superintendent of Streets. I am informed by the Corporation Counsel that the city of Quincy holds several tax claims against this property, and that the exact title to it is somewhat in doubt. Under the circumstances it seems inadvisable to charge even a nominal rental for property, the title to which does not stand clearly in the name of the city. There is also small prospect of the required number of applications being filed. Only sixty have thus far been received and the total of one hundred applications, prescribed in your order, is not likely to be reached during the remainder of the summer season.

As bearing upon certain aspects of the question, I beg to append a copy of portions of a communication from the Corporation Counsel:

"In reference to the matter of this Squantum land, I would say that if this land which is not actually used for the sewerage works is held by the city for sale or revenue, and not for a public use, it is taxable, and I understand that the city of Quincy has taxed it for the last ten years, and has sold the land for the taxes.

If the validity of these tax deeds should ever come before the court for decision the question would be, did the city hold the land in good faith for a public use or did it hold it for revenue or for sale. The fact that we did lease it to the campers, and did put in water pipes for the accommodation of tenants, would be some evidence tending to show that the city held the land for revenue, intending to lease or sell it. The land should be disposed of as soon as possible. Meanwhile, in my opinion, nothing should be done to improve it for residence."

Respectfully,
JOHN F. FITZGERALD, Mayor.

Placed on file.

EXTENSION OF STREETS, ETC.

The following was received:

City of Boston,
Office of the Mayor, July 11, 1910.
To the City Council:

I beg to transmit the appended communication from the Secretary of the Street Laying-Out Department, replying to an order passed by your honorable body at its meeting of June 22, to the effect that the Street Commissioners be requested, through his Honor the Mayor, to report as to the advisability of extending East Dedham street to South Boston, and filling the South Bay south of East Dedham street, and widening Northampton street from Washington street to Harrison avenue.

Respectfully,
JOHN F. FITZGERALD, Mayor.

City of Boston,
Street Laying-Out Department,
City Hall, July 9, 1910.

Hon. John F. Fitzgerald, Mayor:

Dear Sir,—Replying to the inclosed order of the City Council, requesting the Board of Street Commissioners to report as to the advisability of extending East Dedham street to South Boston, filling the South Bay south of East Dedham street, and widening Northampton street, from Washington street to Harrison avenue, the following is submitted.

All three suggested improvements would doubtless be of great advantage to real estate in the neighborhood, and of general public advantage. They would be very costly, however, and the financial condition of the city would seem to enter largely into their consideration at this time. The Board has made the following estimates of the cost of the suggested improvements:

East Dedham Street Extension.	
To extend East Dedham street to South Boston, at a width of 60 feet, would cost for	
Land damages.....	\$50,000
Bridge and construction.....	750,000
Total exclusive of sewerage works...	\$800,000
Filling South Bay, South of East Dedham Street:	
Filling.....	\$650,000
Damages to property abutting on the South Bay and Roxbury Canal.....	600,000
Total, exclusive of sewerage works...	\$1,250,000

Widening Northampton Street.	
To widen Northampton street from Washington street to Harrison avenue to 60 feet would cost for	
Land and building damage.....	\$116,000
Construction.....	14,000
Total, exclusive of sewerage works...	\$130,000

The total of these three estimates is \$2,180,000. Respectfully submitted,
J. J. O'CALLAGHAN, Secretary.
Referred to the Executive Committee.

PERMITS FOR GARAGES.

The following was received:
City of Boston,
Office of the Mayor, July 7, 1910.
To the City Council:
I beg to transmit the accompanying communication from Building Commissioner Arthur G. Everett, in reply to an order passed by your honorable body at its meeting of June 27 requesting him to state whether or not when a permit is asked for the building of a garage the abutters are notified and are given a hearing before the Building Commissioner.

Respectfully,
JOHN F. FITZGERALD, Mayor.

City of Boston, Building Department,
Old Court House, July 6, 1910.
Hon. John F. Fitzgerald,
Mayor of the City of Boston:
Sir,—Replying to the order of the City Council, under date of June 27, 1910, I would say that the abutters are not notified when permit is applied for for the erection of a building to be occupied as a garage.

There seems to be no provision of law requiring such notice and hearing to abutters or others.

Yours respectfully,
ARTHUR G. EVERETT,
Building Commissioner.

Placed on file.

ELECTRIC LIGHTS, MARINE PARK.

The following was received:
City of Boston,
Office of the Mayor, July 15, 1910.
To the City Council:
I beg to transmit the inclosed communication from the temporary chairman of the Board of Commissioners of the Department of Parks, referring to an order passed by your honorable body at its meeting of June 20 requesting the Park Commissioners to locate two additional electric lights at Marine Park, South Boston.

Respectfully,
JOHN F. FITZGERALD, Mayor.

City of Boston,
Board of Commissioners
of the Department of Parks,
July 11, 1910.

Hon. John F. Fitzgerald, Mayor,
City Hall, Boston:
Dear Sir,—Referring to the inclosed order of the City Council, requesting the park commissioners to locate two additional lights on high poles at the Marine Park, South Boston, one opposite the end of East Fourth street, just north of the bandstand, and the other opposite the end of East Third street, I would say that these electric lights have been installed.

Yours respectfully,
JAS. M. PRENDERGAST,
Chairman pro tem.

Placed on file.

JUVENILE BALL FIELD, CHARLESBANK.

The following was received:
City of Boston,
Office of the Mayor, July 15, 1910.
To the City Council:
I beg to transmit the inclosed communication from the secretary of the Board of Commissioners

of the Department of Parks, in reply to an order passed by your honorable body at its meeting of June 27 to the effect "that the Park Commissioners be requested to consider and report to the City Council the advisability of setting a portion of the Charlesbank aside for a juvenile baseball field."

Respectfully,
JOHN F. FITZGERALD, Mayor.

City of Boston,
Board of Commissioners
of the Department of Parks,
July 12, 1910.

Hon. John F. Fitzgerald, Mayor,
City Hall, Boston:

Dear Sir,—The Board has received the inclosed order of the City Council, requesting it to consider and report to the Council the advisability of setting a portion of Charlesbank aside for a juvenile baseball field, and I am directed to say that there is no ground at Charlesbank available for a baseball field. Charlesbank is now taxed to its fullest capacity, and it would be dangerous to those now using the reservation to allow a baseball game to be played there.

Yours respectfully,
GEORGE F. CLARKE, Secretary.

PASSAGEWAY, CAMBRIDGE BRIDGE.

The following was received:
City of Boston,
Office of the Mayor, July 15, 1910.

To the City Council:
I beg to inclose a communication from the Corporation Counsel, in answer to a letter from the chairman of the Metropolitan Park Commission referring to the jurisdiction of certain departments over a passageway under Cambridge Bridge, at present unlighted and poorly policed. Following out the suggestions contained in his letter I respectfully recommend that chapter 28 of the Revised Ordinances of 1898 be amended by inserting after the word "Charlesbank" in the fourth line the words "including the passageway under Cambridge Bridge," so that the first portion of said ordinance shall read:
"Section. 1. The Park Department shall be under the charge of the Board of Park Commissioners, consisting of three commissioners, who shall construct, improve, equip, govern and regulate the Charlesbank, including the passageway under Cambridge Bridge, etc."

Respectfully,
JOHN F. FITZGERALD, Mayor.

City of Boston, Law Department,
Boston, July 13, 1910.
Hon. John F. Fitzgerald, Mayor,
City Hall, Boston:

Dear Sir,—In reply to Mr. Leahy's letter of the eighth instant, which asks for my opinion as to what department has charge of the passageway under Cambridge Bridge, I would say that at the present time no department of the city is responsible for it and its lighting in the sense indicated by Mr. Las Casas' letter.

Up to the time that the new bridge to Cambridge was constructed the place where the passageway now exists was earth underneath Cambridge street. The new bridge was constructed by the Cambridge Bridge Commission and built at a higher grade than the old bridge. The commission must have thought that the convenience of the public would be served by leaving open a passageway between the Charlesbank which then existed and the Charles River Embankment which was then under construction, so they built this bridge leaving this open passageway underneath it.

The Bridge Commission retained some jurisdiction over this passageway, as there is a door in the first arch of the bridge opening into this passageway and the passageway furnishes the only means of access which the bridge employees have to this door. The Boston Park Commission has put up a gate on the Charlesbank side which is closed at night and opened in the morning. As this passageway serves as a connection between the embankment and the Charlesbank, in my opinion it should be put in charge of the Boston Park Commission.

I would recommend that the Park Department ordinance be amended by inserting after the word "Charlesbank" in the fourth line the words "including the passageway under Cambridge Bridge."

I send with this a plan of the bridge showing the locus and the position of the door leading into the arch. I also return Mr. Las Casas' letter.

Yours respectfully,
THOMAS M. BABSON,
Corporation Counsel.

Referred to the Committee on Ordinances.

STUDY OF TRANSIT SITUATION.

The following was received:
City of Boston,
Office of the Mayor, July 14, 1910.
To the City Council:
The Boston Transit Commission has requested that two appropriations of \$4,000 and \$3,500 respectively be made by the city government to enable it to carry out the investigations called for by chapters 94 and 97 of the Resolves of the General

Court for 1910. Believing that no more important studies of the transit situation could be made than those proposed in the resolves designated above, I beg to recommend the passage of the accompanying orders. The letter of the secretary of the Transit Commission and copies of the resolves are appended for your information.

Respectfully,
JOHN F. FITZGERALD, Mayor.

Ordered, That the sum of four thousand dollars (\$4,000) be appropriated, to be expended, in accordance with chapter 94 as amended by chapter 139 of the Resolves of the General Court for 1910, by the Boston Transit Commission and the Board of Railroad Commissioners, for the purpose of carrying out the investigation of a subway, Park street to South Station, called for in said chapter 94; and that the City Auditor be authorized, with the approval of the Mayor, to transfer the above-mentioned amount from the Reserve Fund, to be expended for this purpose.

Ordered, That the sum of three thousand five hundred dollars (\$3,500) be appropriated, to be expended, in accordance with chapter 97 as amended by chapter 139 of the Resolves of the General Court for 1910, by the Boston Transit Commission and the Board of Railroad Commissioners, for the purpose of carrying out the investigation of subways to to Dorchester and South Boston, called for in said chapter 97; and that the City Auditor be authorized, with the approval of the Mayor, to transfer the above-mentioned amount from the Reserve Fund, to be expended for this purpose.

Boston Transit Commission,
15 Beacon Street, Boston,
July 12, 1910.

Hon. John F. Fitzgerald,
Mayor of Boston:
Dear Sir,—By direction of the commission I inclose copies of chapters 94 and 97 of the Resolves of the General Court for the year 1910. The commission requests an appropriation of \$4,000 to carry out the investigation called for by chapter 94 and \$3,500 to carry out the investigation called for by chapter 97.

Yours respectfully,
B. LEIGHTON BEAL, Secretary.

[Appended were copies of the acts referred to.]
Referred to the Executive Committee.
Later in the session the orders were passed. See "Executive Reports."

APPROPRIATION FOR BOSTONIAN SOCIETY.

The following was received:
City of Boston,
Office of the Mayor, July 8, 1910.

To the City Council:
I beg to invite the attention of your honorable body to section 2 of chapter 298 of the Acts of 1910, a copy of which is forwarded herewith, and to the appended letters of the Superintendent of public Buildings and the Clerk and Treasurer of the Bostonian Society, recommending that an additional appropriation of one thousand dollars (\$1,000) be made by the city for the purposes set forth in the aforesaid section.

I am convinced that this additional sum is necessary to complete the installation of a new heating plant in the Old Provincial State House, and have approved an order providing for a transfer of one thousand dollars (\$1,000) from the Reserve Fund, which I respectfully recommend for passage by your honorable body.

Respectfully,
JOHN F. FITZGERALD, Mayor.

Ordered, That the City Auditor be authorized to transfer the sum of one thousand dollars from the Reserve fund to the appropriation for Old Provincial State House, to be expended by his Honor the Mayor to meet the city's portion of the expense to be incurred under chapter 298, section 2, of the Acts of 1910.

Bostonian Society,
Boston, Mass., July 1, 1910.

Hon. John F. Fitzgerald,
Mayor of Boston:
Dear Sir,—In accordance with the instructions of the Board of Directors of the Bostonian Society, I write to ask your Honor if an order can be introduced in the City Council appropriating \$1,000 by the city towards a new steam heating plant for the Old State House. The amount named is one-half of the cost of a plant as estimated by the Public Buildings Department, and the Commonwealth has recently appropriated a like amount (\$1,000) for the same purpose.

The present plant is wholly inadequate, and we also desire that the entire building, including the attic floor which is not served by the present plant, be properly heated.

I inclose a copy of the legislative act granting \$1,000 for the above purpose.
I am writing this letter to you at the suggestion of Mr. George W. Morrison, Superintendent of Public Buildings, and I am also sending a similar letter to him.

Yours truly,
CHARLES F. READ,
Clerk and Treasurer.

City of Boston,
Office of Public Buildings Department,
July 8, 1910.

Hon. John F. Fitzgerald,
Mayor of Boston:

Sir,—The work of the restoration of the Old State House building, as now provided by chapter 385 of the Acts of 1907, and for which the Commonwealth of Massachusetts and the City of Boston each appropriated the sum of \$7,500, or a total of \$15,000, is now practically completed and the said sum expended.

The steam heating plant now in the building is not sufficient to properly heat the entire building; in fact, there is no provision for heating the top floor.

The Commonwealth of Massachusetts under chapter 289 of the Acts of 1910 authorized an expenditure of \$1,000 for repairs and improvements in the interior of the Old State House building, and in my opinion the installation of a new steam boiler and proper radiation is essential, but I find that the same will cost about \$2,000, and in order to do the said work I recommend the City Council be requested to appropriate the sum of \$1,000 in order that the said work of installation may be done.

The above has also been requested by the Directors of the Bostonian Society.

Yours respectfully,

G. W. MORRISON,
Supt. of Public Buildings.

[Appended is chapter 298 of the Acts and Resolves of 1910.]

Referred to the Executive Committee.

Order passed later. See "Executive Reports."

WIDENING UNION PARK STREET.

The following was received:

July 18, 1910.

To the City Council:

I beg to recommend for passage the accompanying loan order for \$95,000 for the widening of Union Park street, between Washington street and Harrison avenue, to a mean width of about seventy-one feet. It has always been regarded as unfortunate that Union Park street should be contracted at this portion of its course to a narrow and unattractive passageway. It forms the northern boundary of the Cathedral of the Holy Cross, which is one of the largest and noblest edifices of public worship in the city. The flank view of this great pile is, I am assured, particularly fine from an architectural standpoint, but its effect is lost to a great extent because of the absence of a proper perspective. By broadening Union Park street an admirable oblique view of the entire structure, including the façade and one side, with the left transept, may be obtained from Washington street, and its cruciform character, from which the name is derived, will be plainly revealed.

It appears that the property on Union Park street which would require to be removed is insignificant in itself and that most of it stands in the name of the Archbishop of Boston. Thus the interest that will be served by the street improvement is identical with that which sustains the damage, and I am assured that terms can be made which will be extremely favorable to the city. The betterments to be assessed upon adjoining property will also reduce materially the net cost of the improvement. The Street Commissioners are ready to approve the taking, if the necessary appropriation is voted by your honorable body.

I may point out that somewhat similar action was taken in the order for the laying out of Louis Pasteur avenue, the land for which was given to the city by Major Henry L. Higginson. It scarcely admits of dispute that no city can afford to be parsimonious in providing convenient access to its public institutions and liberating its architectural treasures to the view of citizens and of strangers.

Respectfully,
JOHN F. FITZGERALD, Mayor.

Ordered, That the sum of ninety-five thousand dollars (\$95,000) be appropriated, to be expended by the Board of Street Commissioners for the widening of Union Park street, between Washington street and Harrison avenue, from its present mean width of approximately thirty-five feet to an approximate mean width of seventy-one feet; and that the City Treasurer be authorized to issue, from time to time, on the request of the Mayor, bonds or certificates of indebtedness of the City of Boston to said amount.

Referred to the Committee on Finance.

EXCHANGE OF PROPERTY.

The following was received:

City of Boston,
Office of the Mayor, July 18, 1910.

To the City Council:

I submit for your consideration the accompanying order, relating to a proposed exchange of property between the city and the trustees of the Winsor School. A letter from the Board of Park Commissioners, notifying your honorable body that the portion of Berners square which it is proposed to exchange is no longer needed for park purposes, is herewith appended.

Respectfully,
JOHN F. FITZGERALD, Mayor.

Whereas the Board of Park Commissioners of the City of Boston, by an instrument dated May 20, 1901, and recorded with Suffolk Deeds, Lib. 2759, page 240, did take for park purposes a certain parcel of land situate in the Roxbury District of Boston and known as Berners Square, and

Whereas, said Board of Park Commissioners, now having charge of said Square, has notified the City Council that the northeasterly portion of said Square, to wit, a parcel of land bounded southeasterly by Bellevue street, one hundred thirty-six and 50-100 feet; southwesterly by the remaining portion of said Square, two hundred twenty feet; northwesterly by Plymouth street, one hundred thirty-six and 50-100 feet; northeasterly by Berners street, two hundred twenty feet, and containing thirty thousand and thirty square feet, more or less, is no longer required for public purposes, it is hereby

Ordered, That his Honor the Mayor be and he hereby is authorized in the name and behalf of the city and in a manner satisfactory to the Law Department to convey to the Winsor School the above-described parcel of land in exchange for a parcel of equal or greater area to be conveyed by said Winsor School to the City, to wit, all that parcel of land lying between Longwood avenue and the present southwesterly boundary of said Square and bounded northwesterly by Plymouth street, and southeasterly by Bellevue street, and upon such further terms as the Mayor shall consider proper.

City of Boston,
Board of Commissioners of the
Department of Parks,
July 15, 1910.

To the Honorable the City Council,
City Hall, Boston:

Gentlemen,—The Board of Park Commissioners of the City of Boston, having charge of the parcel of land in the Roxbury District known as Berners Square, which was taken by the Board for park purposes on the twentieth day of May, 1901, hereby notifies you that in its opinion the northeasterly portion of said square, to wit, that portion thereof which is bounded southeasterly by Bellevue street, one hundred thirty-six and 50-100 feet; southwesterly by the remaining portion of said square two hundred twenty feet; northwesterly by Plymouth street one hundred thirty-six and 50-100 feet; northeasterly by Berners street two hundred twenty feet; and containing 30,030 square feet, more or less, is no longer required for public purposes; with the understanding, however, that no conveyance of said portion of said square is to be authorized except in exchange for a parcel of land shown and marked Charles W. Hubbard and Francis W. Fabyan, Trustees, on the plan herewith submitted, and lying between Longwood avenue and the present southwesterly boundary of said square, together with the parcel shown on said plan as Woodstock street.

Yours respectfully,

JAMES PRENDERGAST,
DANIEL H. COAKLEY.

(A majority of the Board of Park Commissioners of the City of Boston.)

Referred to the Committee on Public Lands.

HOSPITAL AND CELEBRATION APPROPRIATIONS.

The following was received:

City of Boston,
Office of the Mayor, July 18, 1910.

To the City Council:

I respectfully recommend that your honorable body pass the appended order, appropriating five thousand dollars (\$5,000), to be expended for public celebrations, under the direction of the Mayor, and thirty-five thousand dollars (\$35,000), to be expended by the hospital trustees for maintenance and minor repairs.

The presence of President Taft in this city on Independence Day and the adoption of a new form of celebration caused an increased expenditure of nearly three thousand dollars (\$3,000) from the fund for public celebrations, and the creation of a new holiday, Columbus Day, in the fall will necessitate a further unusual outlay.

A communication from the chairman of the Board of Hospital Trustees, under date of May 23, explains the necessity for a special appropriation for the Hospital Department.

Respectfully,

JOHN F. FITZGERALD, Mayor.

Ordered, That to provide additional means to meet the current expenses payable during the financial year beginning with the first day of February, 1910, of performing the duties devolving by statute upon the City of Boston or upon the departments or officers thereof, the sum of money hereinafter specified be and the same is hereby appropriated for the object and purpose hereinafter stated; that said sum be met by taxes to the amount so appropriated, and be raised by tax on the polls and estates taxable in the City of Boston, and that all orders heretofore passed relating to taxes and the interest thereon apply to the taxes herein provided for.

City Hospital Department, maintenance and repairs, thirty-five thousand dollars.	\$35,000
Mayor, public celebrations, five thousand dollars.	5,000
	<u>\$40,000</u>

The Boston City Hospital,
Boston, May 23, 1910.

Hon. John F. Fitzgerald,

Mayor of the City of Boston:

Dear Sir,—I would respectfully call your attention to the fact that the appropriation for maintenance at the Boston City Hospital will probably not be sufficient for the year ending January 31, 1911. In my communication addressed to Hon. George A. Hibbard, dated December 17, 1909, and also in a communication to Your Honor, it was stated that if the number of patients did not increase materially over last year, and if the cost of food supplies did not materially increase, the appropriation of \$498,000 would be sufficient. In comparing February, March, April, and to May 15, 1909, with the corresponding months of 1910, it will be seen that there was an increase in the number of days board given to persons at the Boston City Hospital of 1,282. There was an increase in the number of patients in the main department of the hospital, where surgical cases are treated. There was also a considerable diminution in the number of patients treated at the South Department. There has been an increase in the cost of subsistence supplies, and also in general supplies. Wages have increased materially, owing to the labor laws, and also owing to the fact that there has been a general increase in wages throughout the country. The most notable increase, however, occurred in subsistence supplies. An analysis of the prices paid a year ago, as compared with the prices paid at the present time, shows that there has been an average increase of 17 per cent in all food supplies. The increase in the cost of rubber has been an important factor in increasing the cost per capita per patient at the hospital. The prices now paid for cotton has also been a very important factor in increasing the cost.

There was also a very marked increase in the cost of the X-Ray Department, owing to the fact that there was a greater number of patients treated from the 1st of February to the 23d of May, 1910, than during the corresponding months in 1909, the number for 1909 being 1,021, and for 1910, 1,473. The cost of the chemicals in this department, the prices paid for electricity, and the necessary photographic plates, increase very materially the cost of this department.

The cost per capita has necessarily increased to a certain extent. An analysis, however, of twenty leading hospitals, shows that there are only three hospitals of the twenty taken for comparison, in which the rate is lower than at the Boston City Hospital.

Up to May 1, 1910, there was collected and paid into the City Treasury, \$15,942.32, as compared with \$19,326.25 for the corresponding period last year. Deducting the amount received from private and paying patients, the net cost to the City of Boston for the financial year ending January 31, 1910, was \$8.39. Unless there is an increased appropriation, it will be necessary to close some four or five wards of the hospital. It will require at least \$35,000 for maintenance. Many repairs will be necessary on the buildings. The plumbing in many of the wards is old, and should be changed. The roofs of certain of the buildings will have to be repaired to a very considerable extent. For this purpose something like \$12,000 will be required. Painting and the usual renovations cannot be accomplished with the present appropriation. The trustees feel that the hospital has been economically run, but owing to the increased cost of living it is impossible to conduct the hospital at as low a rate per capita as in previous years.

This matter of the condition of the finances has been carefully considered by the trustees, and therefore the foregoing statement is made.

Regretting the necessity of asking for more money in the present state of the finances of Boston, the trustees feel that the well-being of the hospital imperatively demands this increase.

Respectfully submitted,
For the Board of Trustees,
A. SHUMAN, President.

The question came on the adoption of the items appended to the communications which were divided on motion of Coun. BUCKLEY.

The item appropriating \$35,000 for City Hospital Department, maintenance and repairs, was adopted, yeas 8, nays 0.

The question came on the adopting of the item appropriating \$5,000 for Mayor, public celebrations.

The item for Mayor, public celebrations, \$5,000, was adopted, yeas 6, nay 1, Coun. Buckley voting nay.

Coun. BUCKLEY—Mr. President, I move a reconsideration of the last vote, whereby we voted to increase the amount for public celebrations by five thousand dollars.

Reconsideration prevailed.

On motion of Coun. BUCKLEY, the item of \$5,000 for Mayor, public celebrations, was assigned to the next meeting.

HOSPITAL, SOUTH DEPARTMENT, EXTENSION.

The following was received:

City of Boston,
Office of the Mayor, July 18, 1910.

To the City Council:

The inclosed correspondence discloses an agreement between the City Hospital Trustees and Mr. Robert Treat Paine, Jr., as to the value of certain property bounded by Massachusetts avenue, Harrison avenue, and Northampton street, which the Board of Hospital Trustees recommends for purchase for the erection of an extension of the South Department, for infectious diseases. The cost of the buildings, exclusive of the land, has been estimated by the trustees at one hundred and sixty-five thousand dollars (\$165,000). As both items of expenditure, if deemed necessary, would be provided for by a loan order or orders, I beg to submit the available information upon the subject, for consideration by your honorable body.

Respectfully,
JOHN F. FITZGERALD, Mayor.

The Boston City Hospital,
July 14, 1910.

Hon. John F. Fitzgerald,

Mayor of the City of Boston:

Dear Sir,—In reply to the communication of Robert Treat Paine, Jr., referred from the office of your Honor, regarding the property bounded by Massachusetts avenue, Harrison avenue and Northampton street, I have to report that at a meeting of the Board of Trustees it was voted to recommend to your Honor the purchase of this property for the sum of \$67,000, \$65,000 for the estate just described and \$2,000 for the rights in the passageway between the estate and the hospital.

Respectfully submitted,
For the Trustees,
A. SHUMAN, President.

July 2, 1910.

Hon. John F. Fitzgerald,

Mayor of the City of Boston:

My dear Mr. Fitzgerald,—In my letter of May 27th to you I stated that I should be very glad to meet one or more of the trustees with their real estate expert or experts and give full consideration and weight to any arguments that they might be able to advance to show that our proposed price was not a fair offer to the city. Under date of June 1st I received a letter from your secretary, stating that my letter with its proposition would be referred to the hospital trustees, with the request that they take such action as may seem to them proper under the circumstances.

Not hearing from the trustees June 23, I wrote Mr. Codman renewing my suggestion, and stating that while I was not trying to dispose of the property, I was not willing to be put in the attitude of blocking them in their attempt to buy this estate and desired to do everything that I might reasonably and fairly do to meet them on an equitable basis. Mr. Codman called upon me and stated that (if I can state it correctly) the trustees did not wish to employ a real estate expert in their behalf.

I have somewhat fully and frankly stated, both to them and to you, some of the reasons which led me to think that the assessed value would be a fair asking price. For the sake of compromise I had tentatively suggested to them the sum of \$69,000. I confess I am considerably surprised that they are willing to offer me no argument or reason to show wherein the assessed values are unreasonably high or that my offer is not an equitable one to the city. I have the opinion, deliberately formed, after investigation, of an especially competent real estate expert, that the estate is worth more than what I am now suggesting to you that we will sell it to the city for. My father agrees to sell the estate which is assessed for \$73,100, for \$65,000, together with the sale of the land and rights over the land in the passageway between his estate and the hospital lands, for the sum of \$2,000.

It would be considerably more gratifying to him to receive what we regard as its fair value to us, and then to make a gift to the trustees of the hospital of the difference of \$8,000. As this does not seem to be a feasible arrangement I submit to you the above offer which amounts, for both parcels, to \$67,000.

Believe me, very truly yours,
ROBERT T. PAINE, JR.

Boston, June 7, 1910.

Hon. John F. Fitzgerald,

Mayor of the City of Boston:

Dear Sir,—At a meeting of the Board of Trustees, a communication from Robert Treat Paine, Jr., sent to your Honor, was considered. It was voted, on the recommendation of Messrs. Codman and Shillaber, to advise the purchase of the property at \$65,000, or, failing an agreement with Mr. Paine at that figure, to advise taking by right of eminent domain; and the president was instructed to so report to his Honor the Mayor. Your Honor's attention is called to the importance of an early decision in this matter, owing to the crowded condition of the South Department, due to the prevalence of scarlet fever at the present time, and the necessity of providing suitable accommodations for future outbreaks of the disease.

Please find herewith the communication from Robert Treat Paine, Jr., which your Honor wished to have returned with this report.

Awaiting your Honor's action in this matter, I remain,

Very truly yours,
In behalf of the Trustees,
A. SHUMAN, President.

Referred to the Committee on Finance.

WATER DEPARTMENT ORDINANCE.

The following was received:

City of Boston,
Office of the Mayor, July 18, 1910.

To the City Council:

I beg to submit for your consideration the inclosed copy of an ordinance to be substituted in place of chapter 42 of the Revised Ordinances of 1898 with its amendments. I would suggest that section 5 of the Regulations would be strengthened by inserting the words "at least" between the words "meters" and "five" in line six of the section in the copy appended, as it seems to me that the city should equip more than 5 per cent of the unmetered water services with water meters annually.

Letters from the Water Commissioner and the Corporation Counsel are appended herewith for your information.

Respectfully,
JOHN F. FITZGERALD, Mayor.

City of Boston,

Law Department, Boston, July 12, 1910.

William E. Hannan, Esq.,

Water Commissioner, City Hall, Boston:

Dear Sir,—I have examined your draft of proposed ordinance for the Water Department with accompanying regulations. They seem to me to be in good legal form and so far as I have knowledge about the matter seem to cover the subject.

Yours truly,
THOMAS M. BABSON,
Corporation Counsel.

Office of the Water Commissioner,

Boston, July 15, 1910.

Hon. John F. Fitzgerald, Mayor:

Dear Sir,—Owing to the establishing of the Metropolitan Water System and the recent legislation relative to the installation of water meters, a few technical changes have become necessary in the wording of chapter 42 of the Revised Ordinances of 1898, which relates to the Water Department. This chapter has been amended several times since its adoption and I have collected the amendments, with the few changes referred to above, in the form of a new chapter, to take the place of the old one, which I submit herewith and recommend for adoption by the City Council.

The form of the ordinance has been approved by the Corporation Counsel and I would respectfully call attention to the necessity for immediate action if it is to be acted upon at all, as the water bills for 1911 should be printed at once, and the ordinance requires that the regulations be printed on the bills.

Yours respectfully,
WILLIAM E. HANNAN,
Water Commissioner.

City of Boston,

In the Year Nineteen Hundred Ten.

An Ordinance Concerning the Water Department. Be it ordained by the City Council of Boston, as follows:

Chapter forty-two of the Revised Ordinances of 1898, as amended by chapter one of the Ordinances of 1898, second series, chapter twelve of the Ordinances of 1908, chapter five of the Ordinances of 1909, and chapter two of the Ordinances of 1910 is hereby further amended by striking out the whole of said chapter forty-two as amended, and inserting in place thereof the following:

CHAPTER 42.

Water Department.

Section 1. The Water Department shall be under the charge of the Water Commissioner, who shall have the care and control of all property acquired or held by the city for the purpose of its water supply; shall maintain the same in good order and condition; shall use and operate the same, and furnish all supplies required therefor; shall take all measures necessary to protect and preserve the purity of the water; shall purchase, lay, maintain, and test all meters, pipes, and other fixtures and appliances necessary for supplying water for the inhabitants of the city, including the placing of drinking fountains and supplying the same with cold water; shall, as often at least as once in each year, cause the premises of every person who takes water to be visited, and the water fixtures therein to be examined by a skilled inspector; shall shut the water off from, and let it on to, any particular service when notified by the City Collector that the water rate therefor has not, or has, been paid, and at such other times as he deems it necessary; shall exercise a constant supervision over the use of water and, with the approval of the Mayor, shall, from time to time, determine and establish the rates for the use of water.

Section 2. Said commissioner shall make contracts, issue bills for the use of water and send the bills to the City Collector; shall make abatements of charges for water where improperly assessed;

shall provide that all bills for water by annual rates shall be due in advance on the first day of January of each year, and be paid within sixty days thereafter; that all bills for fractional parts of a year, or for specific supplies shall be due when the water is let on or delivered, and be paid within ten days thereafter; that all bills for water furnished and measured by meter shall never be less than eight dollars per year, shall be due on the first day of January, April, July and October, and shall be paid within ten days thereafter; shall, when two or more dwelling-houses are valued together for the assessment of taxes, make separate valuations for each; and shall, when a portion only of an estate is chargeable for the water, make a separate valuation of such portion, and on such valuations the amounts to be paid, if based on values, shall be assessed.

Section 3. Said commissioner shall require the chief clerk of the department to receive all moneys deposited on account of main, service, fire, elevator and motor pipes; and for labor, materials, etc., outside of department work; give a receipt in behalf of the city therefor; pay to the City Collector from the moneys so received all amounts due the city, as provided in chapter 3, section 18 of these ordinances; refund to the depositor any balance that may be found due him upon adjustment of his account.

Section 4. Said commissioner shall, from time to time, as he deems necessary, apply, remove, and test water meters and maintain the same in good condition; shall record in a book kept for the purpose, a statement of the style, size, number of each meter, date when purchased, location, date when set, reading at such date, date when taken out, the reason therefor, the reading at such date, a detailed statement of test and percentage of error shown, and the reading and date when reset; also a description of all defects and repairs of such meters.

Section 5. Said commissioner, whenever the water has been shut off from any premises because the bill for water has not been paid, and there is a change in the occupancy of said premises, may let the water on again without waiting for the payment of the amount due from any former occupant. In case of contracts for specific supplies he shall shut the water off as soon as the contract has been carried out; the foregoing provisions shall apply when two or more parties take water from the same service pipe, although one or more may have paid the amount due from him or them.

Section 6. Said commissioner shall cause the following regulations to be printed on every bill for water, which shall constitute a part of the contract with every taker of water furnished by the city:

Regulations.

1. Every water taker shall pay the rates for water furnished on his application within the time and at the place specified in the bills therefor; shall, at his own expense, keep the service pipes within his premises, including any area or vault beneath the sidewalk, in good order and repair and protected from frost; shall not allow the water to leak away or run to waste; shall not—unless he pays the rates established therefor, or takes water by meter rates—use water from a hose; shall not use water from a hose in any case, except during such days and hours and in such manner as the Water Commissioner may from time to time specify; shall not make any change in the pipes or water fixtures under the street or within his premises, unless such change is approved by the Water Commissioner; shall not conceal the purpose for which the water is used; shall allow the Water Commissioner and persons authorized by him to enter the premises supplied with water, examine the fixtures, and ascertain the quantity of water used, the manner of use, and whether there is unnecessary waste; and shall indemnify the city for all damages it may sustain or be required to pay in consequence of any injury resulting from any violation of these regulations by the water taker.

2. Every water taker must stop the use of water for any purpose when required to do so by the Water Commissioner, and must guard against collapse of a boiler and other injuries liable to result from want of water, as the water is liable to be shut off at any time without notice.

3. No water taker shall, except in accordance with a written permit from the Water Commissioner, or in case of fire in the neighborhood, allow water to be taken from his premises or use water for any purpose other than those for which he pays, or unscrew or open any hydrant attached to the water pipes of the city.

4. No water taker shall demand or be entitled to any abatement of his water rates for any year on account of the premises being vacated, unless they are vacated before the first day of January, and notice thereof is given to the Water Commissioner before the first day of February of such year; nor shall any water taker demand or be entitled to any abatement of rates, compensation, or damage on account of the shutting off, or the stopping of the use of water for any cause.

5. The Water Commissioner shall equip with water meters all new services installed, and shall also, in accordance with the provisions of Chapter Five Hundred Twenty-Four of the Acts of Nineteen Hundred and Seven, as amended by Chapter One Hundred Seventy-Seven of the Acts of Nineteen Hundred and Nine, annually equip with water meters five per cent of the water service which were unmetered on December Thirty-first, Nineteen Hundred and Seven; shall, if a water taker refuses to allow a water meter to be placed on his premises, cause the water to be shut off from the

same; may, without notice, cause the water to be shut off from any premises, or require the use of water for any purpose designated by him to be stopped; and may, if any water taker, whether supplied through an independent service pipe or a service pipe used in common with another, violates any of these regulations, cause the water to be shut off from all premises supplied by such pipe until satisfied that the regulations will be observed and all amounts due for water have been paid to the City Collector, together with such further sum, not exceeding Ten Dollars, as said Collector may require.

SECT. 7. Said Commissioner shall keep suitable books, in which shall be entered the names of all persons who take water, the kind of building in which it is taken, the name of the street, and the number thereon, the nature of the use, the number of taps, and the rate assessed.

SECT. 8. Said Commissioner shall, in his annual report, include a statement of the number of water-takers and the purposes for which the water is taken, the number and kind of meters applied during the previous municipal year, the number and kind of meters in use, the number of cases where the water has been shut off, and the number and amount of abatements which have been made during the preceding municipal year.

The ordinance was amended, as suggested in the communication from the Mayor, and as amended was passed.

PETITIONS REFERRED.

The following petitions were received and referred to the committees named, viz.:

Claims.

John McNeil, for compensation for damages by fireworks at Cottage Street Playground, July 11, 1910.

Walter B. Page, trustee, to be paid for damages to the Bird estate, 1949-1951 Centre street, Jamaica Plain, caused by the overflow of a sewer.

John Woods *et al.*, for compensation for damage caused by the overflow of a cesspool at 42 Haverhill street, Charlestown, June 18, 1910.

Florida Bongaardo, by father, John S. Bongaardo, for compensation for injuries received by fireworks discharged by the city at South Boston on July 4.

George H. Street, for compensation for damage to his office and office furniture, 55 Broad street, by the break in water main.

Smith & Lovett Company, for compensation for damages to wagon at East Boston Ferry.

Boston Tow Boat Company, for compensation for detention of towboat at draw in Chelsea Bridge.

Bronsahan & Coleman, for compensation for damage to property at 675 Atlantic avenue by the breaking of a sewer.

John Langenfeld, for compensation for damage to property at 258 E street, South Boston, caused by the blocking of sewer in said street.

Mercie M. Souther, to be paid \$500 for putting walls at Adams and Beaumont streets in proper condition, said walls having been weakened and exposed in setting edgestones and laying sidewalks.

George A. Donohue, for compensation for injuries caused by being kicked by a horse belonging to the Sanitary Division.

Faneuil Hall, etc.

Petitions for use of Faneuil Hall, viz.: Cloak & Skirt Makers' Union, Local No. 56, Friday, July 15, in the evening.

Thirty-fifth Regiment, Massachusetts Volunteer Infantry Association, daytime, September 17.

Polish United Societies, day and evening, Sunday, July 17.

Public Lands.

Bartholomew H. Couig, for modification of certain restrictions on land corner South street and Park road, Ward 23.

Executive.

Petitions for sidewalks, viz.:

Artificial Stone.

George A. McDuffee, 118-128 Wrentham street, Ward 24.

William Douse, 824-828 Washington street, Ward 24.

William Douse, 107-113 Fuller street and on Washington street, Ward 24.

John S. McKone, 363-373 Neponset avenue, Ward 24.

Annie Mackin, 2002 Dorchester avenue, Ward 24.

Hattie A. Pratt, 2006 Dorchester avenue, Ward 24.

Allan M. Brown, 2004 Dorchester avenue, Ward 24.

Henry J. Bowden, 577-581 Norfolk street, Ward 24.

W. H. Giggins, 2014 Dorchester avenue, Ward 24.

John J. O'Neil, 93 Bloomfield street, Ward 20.

Israel Burnes, 8-24 Merrill street, Ward 20.

J. W. Biggs, 93 Bernard street, Ward 20.

Mary Cook, Florida street side of estate 76 Lonsdale street, Ward 20.

Fred C. Bowditch, 205-207 Pleasant street, Ward 20.

N. Isaacson, 49 Erie street, Ward 20.

Brick.

I. P. Coppelman, 55 Hollander street, Ward 21.

MINORS' LICENSES.

President BALLANTYNE submitted applications for minors' licenses from sixteen newsboys, two bootblacks and eight vendors, and asked approval of the same.

The licenses were granted on the usual conditions.

EXPENSE OF VACATIONS.

The following was received:

City of Boston,
Office of the City Clerk,
City Hall, July 18, 1910.

To the Honorable City Council:

Gentlemen,—I transmit herewith the replies received from the various departments in relation to the order authorizing holidays, half holidays and two weeks' vacation to employees not on a yearly salary.

For your convenience I have made a summary of the reports, as follows:

Departments reporting that all employees are on a yearly basis, or that no additional expense would be incurred under the provisions of the order: Art, Auditing, Bath, Boston Infirmary, Building, Children's Institutions, City Clerk, Consumptives' Hospital, Fire, Institutions Registration, Library, Market, Music, Overseeing of the Poor, Public Buildings, Registry, Schoolhouse, Soldiers' Relief, Statistics, Street Laying-Out, Supply, Treasury, Weights and Measures, Wire.

Departments in which an additional expenditure would be required to carry out the provisions of the order, and the estimated expense:

Department.	Amount.
Assessing.....	\$144 00
Cemetery.....	9,319 00
Collecting.....	792 00
Election.....	144 00
Engineering.....	987 00
Health.....	
Hospital.....	1,080 00
Law.....	20 00
Park.....	16,474 00
Penal Institutions.....	642 00
Printing.....	4,000 00
Public Grounds.....	4,121 00
Street.....	140,000 00
Water.....	14,432 16

Respectfully,

JOHN T. PRIEST, City Clerk.

CONSTABLE'S BOND.

The City Treasurer, after having duly approved of the same, submitted the constable's bond of Raffaele Camelo.

Approved by the Council.

RAILROAD POLICE.

A communication was received from the Boston, Revere Beach & Lynn Railroad Company stating that certain railroad police officers are no longer employed by them.

Placed on file.

NOTIFICATION OF APPOINTMENT.

Notification was received of the appointment of Philip O'Brien as Assessor, and of the delivery of certified copy of same to the Civil Service Commission.

Placed on file.

APPROVAL OF APPOINTMENTS.

Notices were received from the Civil Service Commission of approval of the appointments of William M. Murphy and Richard M. Walsh as Bath Trustees, and Manus J. Fish as Superintendent of Public Buildings.

Placed on file.

NOTICE OF HEARING.

Notice was received from the Railroad Commissioners of hearing on petition of West End Street Railway Company for approval of 313th location on July 20.

Placed on file.

ERECTION AND REMOVAL OF POLES.

Copies of orders were received from the Street Commissioners, as follows:

Erection and removal of two poles of Edison Electric Illuminating Company of Boston on Dorchester avenue, Ward 20.

Erection of ten poles of New England Telephone and Telegraph Company of Massachusetts on Beech street, Ward 23.

Erection of four poles of same company on Weld street, Ward 23.

Attaching of wires to poles of said company on Browne street, Ward 23.

Placed on file.

STORAGE OF EXPLOSIVES.

Notices were received of the keeping and sale of explosives at the following locations, and of intention to use said premises for same purpose for the ensuing year, viz.:

William Read & Sons, 107 Washington street, George H. Wood Corporation, rear 431 Medford street, Ward 4.

Thomas C. Kelly, 18 Hyde Park avenue.

Standard Oil Company of New York, rear 250 Freeport street, Dorchester.

The same company, 6-8 Custom House street.

The same company, Chelsea street, East Boston.

Placed on file.

INFORMATION FROM STREET COMMISSIONERS.

The following was received:

City of Boston,
Street Laying-Out Department,
Boston, July 9, 1910.

To the Honorable the City Council:

Gentlemen,—The Board of Street Commissioners has given careful consideration to several orders of your honorable body of June 13, last, requesting a report as to the advisability and possibility of making public improvements as follows:

1. Extending Bowker street through Chardon street to Pitts street.
2. Extending Bowdoin street to Moss place.
3. Constructing a street where Pike's alley now is.
4. Asphalting Auburn street and Wall street.
5. Using certain streets in the West End district during certain hours of the day for playgrounds for children.
6. Making Lowell street and Wall street one-way streets.

Answering, the Board begs to say that it cannot recommend the suggested improvements in orders 1, 2 and 3, as the loan authorized for the laying out, construction, widening and extension of streets, is far from adequate for the purpose.

An estimate of the cost of these proposed improvements has been made, and is submitted for the information of your honorable body.

To extend Bowker street would cost, without sewerage works, \$142,900. To extend Bowdoin street would cost, without sewerage works, \$133,400. To make a 40-foot street where Pike's alley now is would cost, exclusive of sewerage works, \$71,300. The total for these three improvements would be \$347,600. You will recall that the loan for street improvements for this department for this year is \$300,000.

Replying to the fourth order the Board has to say that it cannot order the substitution of one pavement for another. It can authorize such a change, and the Superintendent of Streets may make it or not, as he sees fit. If such an improvement is to be made a recommendation ought to come from the Superintendent of Streets from whose appropriation the cost must be paid.

The Board does not believe it has authority to authorize the use of public streets for playground purposes. To make such use of a street it must necessarily be closed to travel, and the Corporation Counsel has advised the Board that it has no authority to so close it.

The Board has under consideration some proposed changes in the traffic regulations, and before these are disposed of it will give careful attention to your suggestion that Lowell and Wall streets be made one-way streets.

Very truly yours,

J. J. O'CALLAGHAN, Secretary.

Placed on file.

CONFIRMATION OF APPOINTMENT.

Coun. HALE called up No. 1, unfinished business, viz.:

1. Action on appointment submitted by the Mayor July 6 of John A. Duggan, Jr., and Edward S. Stevens to be Constables of the City of Boston for the term ending April 30, 1911.

The question came on confirmation. Committee—Coun. Collins and Hale. Whole number of ballots cast 7, yeas 7, and the appointment was confirmed.

CONSTRUCTION OF OLD COLONY AVENUE.

Coun. KENNY called up No. 2, unfinished business, viz.:

2. Ordered, That the sum of twenty-eight thousand dollars be and hereby is appropriated, to be expended by the Street Department for the construction of Old Colony avenue, from Dorchester street across Hyde street, and for the connection of Mitchell, Frederick and Lark streets with Old Colony avenue, and that to meet such appropriation the City Treasurer be and hereby is authorized to issue, from time to time, on the request of the Mayor, bonds of the City of Boston for the above amount.

On June 21 the foregoing order was read once and passed, yeas 7.

The order was read a second time and again passed, yeas 9.

RESCISSION OF CLAIM ORDER.

Coun. BUCKLEY offered an order—That the order passed June 13, 1910, voting the sum of \$1,800 to the Boylston Market Association in compensation for damage to property on Washington street, caused by bursting of water main in Tremont street on January 3, 1910, said order being recommended by the Committee on Claims, be and the same is hereby rescinded.

CLAIMS.

Coun. BUCKLEY, for the Committee on Claims, submitted a report on claim of Boylston Market Association for compensation for damage to their property, the Gaiety Theater building, Washington street, Boston, caused by break in water main in Tremont street January 3, 1910—recommending the passage of the following:

Ordered, That there be allowed and paid to the Boylston Market Association the sum of \$1,840 in compensation for damage to their property, the Gaiety Theater building, Washington street, caused by the bursting of a water main in Tremont street on January 3, 1910, said sum to be charged to the appropriation for Water Department.

(Recommended by the Water Commissioner.)
Report accepted; order passed.

SOLDIERS' RELIEF.

Coun. HALE, for the Committee on Soldiers' Relief, submitted a report recommending the passage of an order for the payment of aid to soldiers and sailors and their families in the City of Boston for the month of July.

Report accepted; order passed.

PURCHASE OF COMMONWEALTH DOCK PROPERTY.

Coun. BRAND offered an order—That his Honor the Mayor and the Corporation Counsel be requested to take up the subject of the purchase by the city of the harbor front property known as the Commonwealth Dock, and adjacent land, and that the chief executive of the Commonwealth, his Excellency Governor Draper, be immediately requested to suspend further negotiations with the New York, New Haven & Hartford Railroad Company, in reference to the lease of said property, until the city shall first be given an opportunity to purchase.

The order was passed.

REBUILDING OF MEDWAY STREET BRIDGE.

Coun. BRAND offered the following:

Whereas, In the opinion of this Board it is necessary for the security and convenience of the public that the bridge over the Old Colony Division of the New York, New Haven and Hartford Railroad at Medway street be rebuilt, said bridge being the crossing of a public way and railroad; be it

Ordered, That the Corporation Counsel be instructed to apply to the Board of Railroad Commissioners for said Board to take action on such rebuilding under the provisions of sections 23 and 25 of Part I of chapter 463 of the Acts of the year nineteen hundred and six as amended by chapter 542 of the Acts of nineteen hundred and eight.

Passed.

ACCEPTANCE OF RETIREMENT ACT.

Coun. HALE offered the following:

Whereas, The Legislature of the Commonwealth of Massachusetts has passed an act authorizing the cities and towns of the Commonwealth to establish a retirement system for their employees; and

Whereas, It is the opinion of the Boston City Council that such a retirement system would be of benefit to the city and to the employees; therefore be it

Ordered, That the provisions of chapter 619 of the Acts of 1910 be accepted by the Boston City Council in behalf of the City of Boston.

The order was assigned to the next meeting.

THANKS OF CITY COUNCIL, JULY FOURTH EXERCISES.

Coun. KENNY offered the following:

Resolved, That the thanks of the City Council be tendered to James H. Wolf, Esq., for the oration delivered by him at Faneuil Hall in commemoration of the one hundred and thirty-fourth anniversary of the Declaration of Independence, and that he be requested to furnish his portrait and a copy of said oration for publication.

Passed.

Resolved, That the thanks of the City Council be tendered to Rev. Mortimer E. Twomey for officiating as chaplain at the services in Faneuil

Hall on July 4, 1910, in commemoration of the anniversary of the Declaration of Independence.

Passed.

Resolved, That the thanks of the City Council be tendered to Master Wilfred J. Kelly for his services as reader at the Old State House on July 4, 1910, in commemoration of the anniversary of the Declaration of Independence.

Passed.

INFORMATION CONCERNING LOANS.

Coun. KENNY offered an order—That his Honor the Mayor be requested to transmit in writing to the City Council a memorandum of the loans inside the debt limit authorized but not issued which in his opinion it may be expedient and desirable to negotiate during the current year; also a memorandum of such loans which in his opinion it may not be expedient and desirable to negotiate during the current year.

And be it further

Ordered, That his Honor the Mayor be requested to inform the Council if there are at present any loans authorized, issued or not issued, which in his opinion should be transferred to sources for purposes and objects other than contemplated when such loans were authorized.

Passed.

SIGNING OF RELEASES, CITY EMPLOYEES.

Coun. BUCKLEY offered an order—That the Committee on Claims be requested to confer with the Corporation Counsel as to what action, if any, is necessary to remedy the injustice caused by the practice of compelling an injured city employee to sign a release before being put back at work.

Passed.

PAYMENT TO ORREN PRAY.

Coun. BUCKLEY called up No. 3, special assignment, viz.:

3. Report of Committee on Claims, recommending the passage of the following:

Ordered, That there be allowed and paid to Orren Pray the sum of \$562.27 for expenses incurred in suit against him for act as officer at the House of Correction, Deer Island, said sum to be charged to the appropriation for County of Suffolk, Penal Institutions Department, House of Correction.

Report accepted; order passed.

RECONSTRUCTION OF EASTERN AVENUE WHARF.

Coun. COLLINS offered an order—That the sum of \$15,000 be appropriated, to be expended by the Engineering Department in the reconstruction of Eastern Avenue Wharf, and that the City Auditor be authorized, with the approval of the Mayor, to transfer the above-mentioned amount from the Reserve Fund, to be expended for this purpose.

Coun. COLLINS—Mr. President, some time ago—I believe it was in the month of April—when the Committee on Public Lands, consisting of Coun. Attridge, you, Mr. President, and myself, were going to East Boston in company with Superintendent Emerson, he called our attention to the dilapidated condition of this slip known as Eastern Avenue slip. Since then, may it please you, Mr. Gore, the Penal Institutions Commissioner, has communicated with the Mayor, and the letters are before us now. It seems to me that the responsibility is in a measure with us to see that this improvement is started, as far as we can do it. To be short, may I call your attention to these letters:

Penal Institutions Department,
Boston, April 18, 1910.

To the Mayor of Boston:

Sir,—I forward herewith a communication which I received this morning from the City Engineer.

It would seem that some steps should be taken at once for the reconstruction of Eastern Avenue Wharf, and I await your orders as to what course I shall pursue in the matter.

Respectfully yours,
FRED S. GORE, Commissioner.

Engineering Department,
Boston, April 18, 1910.

Mr. Fred S. Gore,

Institutions Commissioner:

Dear Sir,—A partial examination of Eastern Avenue Wharf shows it to be in a dangerous condition and it should be rebuilt at once or closed to heavy teams.

Respectfully,
WILLIAM JACKSON, City Engineer.

Engineering Department,
Boston, June 2, 1910.

Mr. Fred S. Gore,

Commissioner Penal Institutions:

Dear Sir,—The estimated cost of rebuilding Eastern Avenue Wharf, using oak piles, hard pine timber and decking, spruce covering plank,

Winter patent drop and keeping part of wharf available for passengers at usual hours for boats is.....\$7,600
Add 15 per cent.....1,140

Rebuilding two piers.....\$3,000
Add 15 per cent.....450

\$8,740

3,450

Say \$12,000.

Respectfully yours,
F. A. McINNES,
Acting City Engineer.

Estimated cost to rebuild Eastern
Avenue Wharf.....\$12,000
Add to reconstruct buildings.....3,000

Total.....\$15,000

Respectfully submitted,
FRED S. GORE,
Penal Institutions Commissioner.

I believe when the committee visits that slip to-morrow it will agree with me that this work ought to be done at once. Accordingly I offer that order.

The order was referred to the Executive Committee.

GRAND TRUNK TERMINAL.

Coun. COLLINS offered the following:

Resolved, That it is the opinion of the City Council of Boston that the Grand Trunk terminal should be located in this city.

Resolved, That President Hays of the Grand Trunk Railroad be requested by this Council to use his influence in causing the terminal to be located in Boston.

Ordered, That the City Clerk be directed to transmit a copy of these resolutions to President Hays of the Grand Trunk Railroad.

The resolutions were read a second time and the question came on their passage.

The resolutions were adopted.

FILLING IN OF MILL POND.

Coun. COLLINS offered an order—That the Superintendent of Streets be requested, through his Honor the Mayor, to fill in the mill pond, so called, situated in the Harrison square district, Dorchester.

Passed.

TRIMMING OF TREE.

Coun. ATTRIDGE offered an order—That the Superintendent of Public Grounds be requested to trim a tree in front of estate No. 508 Summer street, East Boston, the expense attending the same to be charged to the appropriation for Public Grounds Department.

Passed.

SEATS, CHARLES RIVER BASIN.

Coun. ATTRIDGE offered an order—That his Honor the Mayor be requested to ask the Metropolitan Park Commissioners to place settees and benches on the esplanade of the Charles River Basin for the accommodation of the public.

Passed.

NAVY YARD WORK BY CIVILIANS.

On motion of Coun. CURLEY the Council took up special assignment, viz.:

4. Resolved, That in the opinion of the Boston City Council the best interests of the city will be served by having all new and all repair work at the Charlestown Navy Yard done by civilians.

Ordered, That a copy of these resolutions be forwarded to the President and to the Secretary of the Navy.

The question came on the passage of the resolve and order.

Coun. CURLEY—Mr. President, I ask that when the vote be taken it be by roll call.

President BALLANTYNE directed the Clerk to call the roll on passage.

Coun. KENNY—Mr. President, I move that the matter be referred to the Executive Committee.

President BALLANTYNE—It is a little too late. The Clerk has been ordered to call the roll.

The resolution and order was passed, yeas 9, nays 0.

DAY OFF FOR WATER EMPLOYEES.

Coun. CURLEY offered an order—That the Water Commissioner be authorized to grant leave of absence, without loss of pay, on the day of their annual picnic, August 11, to all employees of his department whose services can be dispensed with.

Passed.

CONSTRUCTION OF MARSH STREET.

Coun. CURLEY offered an order—That the Board of Street Commissioners be requested to consider the advisability of constructing Marsh street from Adams street to Neponset avenue, Ward 21.

Passed.

PLANK WALK, MORELAND STREET.

Coun. CURLEY offered an order—That the Superintendent of Streets, through his Honor the Mayor, be requested to place a plank walk on Moreland street, from Dennis street to Brook avenue, Ward 17.

Passed.

GAS LAMPS, BELFORT STREET.

Coun. CURLEY offered an order—That the Superintendent of Streets, through his Honor the Mayor, be requested to locate a gas lamp on Belfort street at rear entrance of St. William's Church.

Passed.

SIDEWALK, WASHINGTON STREET, WARD 18.

Coun. CURLEY offered an order—That the Superintendent of Streets make a sidewalk along the westerly side of Washington street, between Williams and Marvin streets, Ward 18, in front of the estates bordering thereon, said sidewalk to be from 3 to 10 inches above the gutter adjoining, to be from 5 to 12 feet in width, and to be built of artificial stone with granite edgestone, under the provisions of chapter 437 of the Acts of 1893.

Passed.

SIDEWALK, WELD HILL STREET.

Coun. BRAND offered an order—That the Superintendent of Streets make a sidewalk along Weld Hill street, from Hyde Park avenue to the cemetery fence, Ward 23, in front of the estates bordering thereon; said sidewalk to be from 3 to 10 inches above the gutter adjoining, to be from 5 to 12 feet in width, and to be built of artificial stone under the provisions of chapter 437 of the Acts of 1893.

Passed.

LAYING OUT OF CHAMPNEY STREET.

Coun. BRAND offered an order—That the Street Commissioners be requested to lay out and construct as a public way Champney street, from Washington street to Stratton street, Oak square, Brighton, Ward 25.

Passed.

ERECTION OF MUSIC STANDS.

Coun. BRAND offered an order—That the sum of \$15,000 be appropriated this year from the Parkman Fund income for the erection of music stands at points now used for band concerts, located in the park system, that come under the provisions of the will, the stands to be erected under the supervision of the Music Department.

The order was referred to the Committee on Parkman Fund.

RECESS.

The Council voted at 4.34 p. m., on motion of Coun. HALE, to take a recess subject to the call of the Chair.

The members reassembled in the Council Chamber and were called to order by the President at 4.56 p. m.

FINANCE.

Coun. KENNY, for the Committee on Finance, submitted a report on message of Mayor and order (referred June 27), for loan of \$15,000 for playground, Ward 25,—that the order ought not to pass.

The report was accepted and the order rejected, yeas 1, nays 7; Coun. Buckley voting yea.

USE OF FANEUIL HALL.

Coun. CURLEY, for the Committee on Faneuil Hall, etc., submitted reports on petitions (severally referred to-day) for the use of Faneuil Hall—that leave be granted, viz.:

Cloak and Skirt Makers' Union, Local No. 56, evening of Friday, July 15.

Polish United Societies, day and evening, Sunday, July 17.

Thirty-fifth Regiment, Massachusetts Volunteer Infantry Association, daytime, September 17.

Reports severally accepted; leave granted on the usual conditions.

THE NEXT MEETING.

Coun. KENNY—Mr. President, I move that when the Council adjourns to-day it be to meet on Monday, August 29, at 3 p. m.

Coun. BRAND—Mr. President, I would amend the motion so that we will meet on Monday, September 12, the first Monday after Labor Day.

Coun. KENNY—Mr. President, there would be an objection to that. The Mayor has submitted to the Council an order that would become operative shortly after that time, and I think the Council should have time to consider and report upon that order. It will have ample time if we adjourn to August 29.

Coun. HALE—What is the order that the Mayor has submitted?

Coun. KENNY—We have it here. It is for the widening of Union Park street, \$95,000, and the time limit expires September 18. If we adjourn to the 12th we would hardly have time to consider it properly. It seems to me that is drawing the line rather close.

Coun. Brand's amendment to adjourn to September 12 was declared adopted. Coun. KENNY doubted the vote and asked for yeas and nays.

Coun. Brand's amendment was rejected, yeas 3, nays 4:

Yeas—Coun. Ballantyne, Brand, Hale—3.

Nays—Coun. Buckley, Collins, Kenny, McDonald—4.

Coun. BRAND—Mr. President, as some of the members were absent and did not have a chance to vote on this matter, I now move a reconsideration. Reconsideration of the rejection of Coun. Brand's amendment was refused.

Coun. Kenny's motion, that when the Council adjourn it be to meet on August 29, at three o'clock p. m., was declared carried. Coun. BRAND doubted the vote and asked for the yeas and nays. The motion was carried, yeas 6, nays 2:

Yeas—Coun. Attridge, Ballantyne, Buckley, Collins, Kenny, McDonald—6.

Nays—Coun. Brand, Hale—2.

Later in the session Coun. HALE said:

Mr. President, I move a reconsideration of the vote whereby we decided to adjourn to August 29. If reconsideration prevails I wish to put in a substitute motion, that we adjourn subject to the call of the Chair. I realize to the full the force of Coun. Kenny's suggestion that we should not let anything get by us, and I think we can safely leave the matter to our President. If there is anything upon which we should act he can call us together in time for us to do so.

Coun. KENNY—Of course the Mayor can call us together at any time.

Coun. HALE—But there might be an occasion when we would want to meet and when the Mayor did not want us to meet.

The Council refused to reconsider the adjournment to August 29. Coun. HALE doubted the vote and asked for the yeas and nays, and the Council refused to reconsider the adjournment to August 29, yeas 2, nays 5:

Yeas—Coun. Brand, Hale—2.

Nays—Coun. Attridge, Buckley, Collins, Kenny, McDonald—5.

EXECUTIVE REPORTS.

Coun. HALE, for the Executive Committee, submitted the following:

(1) Report on message of Mayor, communication (etc.), from Boston Transit Commission and transfer orders (referred to-day) of \$3,500 and \$4,000, respectively, from Reserve Fund to provide for investigation of subways to Dorchester and South Station—that the orders ought to pass. Report accepted; orders passed, yeas 8, nays 0.

(2) Report on message of Mayor, communications and order (referred to-day), to transfer \$1,000 from the Reserve Fund to the appropriation for Old Provincial State House—that the order ought to pass. Report accepted; order passed, yeas 8, nays 0.

(3) Report on order (referred to-day) that \$15,000 be transferred from the Reserve Fund to be expended for the reconstruction of Eastern Avenue Wharf—recommending its passage in the following new draft, viz.:

Ordered, That his Honor the Mayor be requested to transfer the sum of \$15,000 from the Reserve Fund, said sum to be expended by the Engineering Department in the reconstruction of Eastern Avenue Wharf.

Report accepted; order passed.

(4) Reports on petitions (severally referred to-day) recommending the passage of orders that the Superintendent of Streets make sidewalks along the following named streets in front of the hereinafter named estates; said sidewalks to be from 3 to 10 inches above the gutter adjoining, to be from 5 to 12 feet in width, and to be built as specified, the owners to furnish the material, viz.:

Artificial Stone.

George A. McDuffee, 118-128 Wrentham street, Ward 24.

William Douse, 824-828 Washington street, Ward 24.

William Douse, 107-113 Fuller street and on Washington street, Ward 24.

John S. McKone, 363-373 Neponset avenue, Ward 24.

Annie Mackin, 2002 Dorchester avenue, Ward 24.

Hattie A. Pratt, 2006 Dorchester avenue, Ward 24.

Allan M. Brown, 2004 Dorchester avenue, Ward 24.

Henry J. Bowden, 577-581 Norfolk street, Ward 24.

W. H. Googins, 2014 Dorchester avenue, Ward 24.

John J. O'Neil, 93 Bloomfield street, Ward 20.

Israel Burnes, 8-24 Merrill street, Ward 20.

J. W. Biggs, 93 Bernard street, Ward 20.

Mary Cook, Florida street side of estate 76 Lonsdale street, Ward 20.

Fred C. Bowditch, 205-207 Pleasant street, Ward 20.

N. Isaacson, 49 Erie street, Ward 20.

Brick.

I. P. Coppelman, 55 Hollander street, Ward 21. Reports severally accepted; orders passed.

REMOVAL OF TREES.

Coun. BRAND offered an order—That the Superintendent of Public Grounds be requested to remove two trees in the center of Peabody square, Ashmont, Ward 24, both of which obstruct the view of the new clock recently erected at that point.

Passed.

LATE ADAMS STREET CAR.

Coun. COLLINS offered an order—That the Boston Elevated Railway Company be requested, through his Honor the Mayor, to cause a car to be run from the Dudley Street Terminal to the Adams street car barn later than 11.45 p. m.

IMPROVEMENTS ON COMMON.

Coun. CURLEY offered an order—That the Superintendent of Public Grounds be requested to consider the following suggestions and criticisms and take such steps as he may deem proper to follow them to their logical conclusion, viz.:

1. Renovation, repair and painting of ladies' toilet house, near West street, and placing of signs alike, instead of the two differently painted and designed, calling attention to said house.

2. Replacing of sticks which hold the wire preventing persons making paths across Common with permanent and artistic supports, if such wire is to be continued for such purpose.

3. Repair of benches which have had slats ripped off.

4. Replacing of permanent signs by enameled instead of printed signs.

5. Playing of fountain from 4 o'clock p. m. to sunset during the summer months.

Passed.

GENERAL RECONSIDERATION.

On motion of Coun. COLLINS the Board refused a general reconsideration of all action taken to-day.

Adjourned, on motion of Coun. HALE, at 5.23 p. m., to meet on Monday, August 29, at 3 p. m.

SANITATION AND WATERWORKS IN SOUTH AMERICA.

One of our many subscribers, who seems to be looking ahead, writes us for some information in regard to sanitary matters in South America. There seems to be somewhat of a scarcity of information in that respect, but we can say that probably the most progressive city of the South American land is the city of Buenos Ayres in Argentina. This city is said to rank nearly with Philadelphia in size, and it compares, favorably, in many ways with the other large cities in the world. The sewer system and the water supply are maintained by the national treasury and the service is claimed to be equal to that of any city of its class in the world. The water for the city is taken from the La Plata river at a considerable distance above the city so as to guard against any chances of pollution, the supply coming from wells which were driven beneath the surface of the river and the water is pumped through tunnels to the city where it is distributed from a central station, after being filtered and the sediment removed. We know too little about this great country which is growing up to the south of us and which must, some day, be reckoned with as one of the factors in the trade of the world.—*Domestic Engineering.*

CHICAGO WASTE DISPOSAL SYSTEM.

A system arranged to receive and dispose of waste materials produced in the central business district of Chicago has been placed in service by George W. Jackson, Inc., of that city. Until recently the disposal of such waste materials as ashes, spoil from excavations, refuse from building operations, and so forth, other than garbage, from that district has been comparatively simple. The shore line of Lake Michigan along the front of the business district originally was at Michigan avenue, but the edge of the water is now more than half a mile out in the lake from that street. Practically all of the intervening land has been reclaimed with refuse from the adjacent congested area.

The first of the reclamation work came as a result of the great fire in 1871, when a strip about 300 feet wide, between Michigan avenue and the Illinois Central Railroad right of way, was brought up to the present grade of 14 feet above the water level in the lake. The project of reclaiming outside of the right of way of that railroad an area of several hundred acres for park purposes was started later. Much of this area was submerged 10 to 20 feet, and as the grade was to be raised to as much as 20 feet above the lake level in places, a vast amount of material was required to accomplish the reclamation. For many years slow progress was made in extending the fill, because all of the materials that were available had to be hauled from the city in wagons. Finally permission was obtained from the city to extend to the site a temporary branch of the freight tunnels of the Chicago Subway, and thence to lay surface tracks on which wastes and spoil could be delivered in tunnel cars. Shortly prior to that time dredging was started in the adjacent harbor to secure materials to use in reclaiming a part of the park site.

The station occupies a narrow strip of ground along the west bank of the river, between Madison and Washington streets, a series of important main line railroad tracks extending along the rear of the site. The building is 60 feet wide by 409 feet in length, and four stories in height. It is of permanent construction throughout, having a heavy concrete substructure and a brick superstructure carried by a steel frame. The first floor is at the same grade as the site, which is about 4 feet above the water level in the river. The roadway on the bridge which carries Madison street over the river, and on the bridge that is to be built to carry Washington street, are close to 20 feet above the ground. Between the ground and the level of these roadways are the two lower stories of the building. The third floor is approximately at the grade of the approaches to both bridges, and is reached from each of the latter by a ramp carried by an elevated structure. The fourth floor is above the roadways, an elevator being installed to give access to it.

The arrangement of the station is such that wagons enter the third floor of the building from both bridges. They regularly come in from the Washington street end and depart at the Madison street end. They also can enter at the one side of the Madison street end, go to the opposite end and turn to come out the same way as those entering from Washington street. This scheme keeps traffic moving through the building in one direction. It also enabled a difference in grade between the approach to the Madison street bridge and the third floor of the building to be overcome readily.

The wastes brought to the station through the streets are delivered in

the two-yard, four-wheel bottom-dump wagons. Four 4 by 6-foot openings are made in the third floor on the river side of the building, with a chute extending out over the water from each of them. Each opening is closed by a trap door that opens down, and is counter-weighted to bring it shut. The door also is held up by means of a lock controlled by a lever, in order to avoid any chance of a horse going through an opening. Rails spiked to the floor guide the wagons and keep them off the door. When a wagon dumps its load the lever holding the door is unlocked and the material is discharged through the chute directly into a scow along the dock. The chutes are 10 feet wide and lined with steel plates, their size preventing the lodgment of materials and the steel plates taking the wear. Each chute also is hinged at the building, and its outer end is swung from a pair of blocks and falls to enable it to be raised to clear the channel.

A branch of the Chicago Subway freight tunnel system is built longitudinally under the structure at a depth of 45 feet from the surface. A concrete lined shaft, 18 by 30 feet in plan, extends from the first floor of the building down to the tunnel. At the bottom of the shaft are two parallel tunnel tracks, which are arranged so tunnel cars may be set where they can be reached by cranes carried by the structural steel frame of the building. The two cranes which have been installed each consist of a motor-driven hoist on a carriage operating on a double trolley track suspended, transversely to the building, on girders over the third floor. The track is continued on frames cantilevered 20 feet over the river, in order that both carriages may also travel out over scows anchored at the dock. Each frame is hinged at the inner end and is suspended at the outer end by chains wound on a hoist so it may be raised to clear the channel when necessary.

The methods of delivering directly into cars in the tunnel spoil from excavations for buildings, wreckage, ashes and the like have been described in various articles printed in this journal. The tunnel cars used in handling these materials have loose wooden bodies, with a capacity of 365 cubic yards. These bodies are arranged so they can be lifted from the trucks and raised to the surface by the hoists on the cranes over the shaft in the disposal station. The arrangement of the cranes also enables the latter to carry the car bodies out over scows moored at the dock. The bottom of each body is hinged to the sides and is held closed by a latch set so it opens when the body is lowered into the scow.

The materials loaded at the receiving station are hauled out into the lake in specially designed self-propelled scows of the type designed for similar service in the vicinity of New York City. Essentially these scows each consist of two hulls arranged as a catamaran, with open hoppers between them. They are each 161 feet long and have a 35-foot beam, with a draft of about 11 feet when loaded. The hulls are heavy steel construction, designed to permit safe and certain operation in rough water and through the large fields of ice adjacent to the shore of Lake Michigan during the winter. Transverse bulkheads divide the hulls into watertight compartments, and together, with transverse partitions in the hoppers between the two hulls, give great lateral stability to the scows.

The hoppers have a capacity of 800 to 1,000 cubic yards of materials, depending on the character of the letter. On ac-

count of the heavy materials handled, these hoppers are placed much lower than are those of the scows of this type used in New York Harbor, because those scows are used in transporting household refuse and garbage.

The scows had to be designed so they could be maneuvered easily in the narrow Chicago river, with its numerous bridges. This has been accomplished by equipping both hulls as though each were a distinct vessel. To this end a compound marine engine and a battery of marine boilers is placed in each hull, each engine driving a propeller screw on its respective hull. A steam-operated rudder is also provided. With this equipment the scows can be turned as if on a pivot by reversing one engine and keeping the other running ahead. The scows are also low enough to pass under most of the bridges over the river.

Several of the special scows are to be operated in connection with the disposal system. Two of them are being built at the bridge and steel works of George W. Jackson, Inc., and the others will be put under construction this season. Pending the completion of the first scow, ordinary dump scows, towed by tugs, are used in handling materials from the receiving station.

The four-story building, in addition to being a receiving station for the disposal system, also was built as a warehouse and equipped to handle construction materials received by vessel in the river or in cars on the tracks at the rear of it. A trolley crane similar to those which hoist the tunnel-car bodies out of the shaft is installed over the fourth floor near one end of the building. By means of this hoist, materials may be handled from vessels to the third and fourth floors for storage or distribution. They also can be unloaded by hand directly into the first story, and rail shipments are unloaded in the same manner. A 10-ton elevator travels from the first to the fourth floors so materials may be moved as is desired.

A large volume of construction material is expected to be handled through the building in the manner described. The great value of the plant, however, to the construction department of George W. Jackson, Inc., is the opportunity of maintaining in the central part of the city a sufficient supply of material to keep large contracts moving without hindrance from petty difficulties which arise in transporting these materials through city streets and over congested railroad facilities. Aside from this advantage of the plant, the storage space provided by it is particularly valuable, since practically no space is available for storing such materials in the business section of the city, except in the streets.

—*Engineering Record.*

PUBLICITY FUND.

The Chamber of Commerce of Rochester is agitating for an annual appropriation by the city of \$50,000 to be used for systematic publicity, to put forward the claims of Rochester as a place to live and to do business. This sum sounds large, but running back twenty years and adding up all the money expended by the Chamber of Commerce of Los Angeles in exhibits, fairs, conventions, literature and other ways of attracting immigration, we believe it would aggregate about \$1,000,000, which would be \$50,000 a year. Certainly that total would be reached if the cost of fiestas and other celebrations were added.

CITY RECORD

OFFICIAL PUBLICATION OF THE CITY OF BOSTON.

VOL. 2.

SATURDAY, JULY 30, 1910.

No. 31

City of Boston.

CITY RECORD.

Published weekly under legislative act by the
City of Boston, Mass.

By Subscription . . . \$1.00 Per Year.
Single Copies . . . 5 Cents.
IN ADVANCE.

ADVERTISING.

A rate of 10 cents per agate line has been established for such advertisements as under the law must be printed in the *City Record*. Advertising and other copy must be in hand by Thursday of each week to insure its publication in the Saturday issue.

Copies for sale at the Mayor's Office, Room 27, City Hall.

MUNICIPAL SERVICE.

Complaints, inquiries or suggestions regarding the work of municipal departments should be made in writing to the officials directly in charge. The failure of such officials to make reply within a reasonable length of time should be brought to the attention of the Mayor. Communications should be directed as follows:

TO THE BOARD OF STREET COMMISSIONERS, Room 41, City Hall, for information relative to the laying out, relocation, widening and discontinuance of highways; the taking of real property for municipal purposes; the assessments of betterments for streets and sewers; the plotting of undeveloped areas for streets and the opening of private ways; the granting of licenses for the storage or sale of merchandise in public streets; the regulation of street traffic; the making of specific repairs in public streets; the naming of public streets; the planting and removal of trees in public ways; the issuing of licenses for the storage of gasoline, oil and other inflammable substances or explosive compounds; the use of the public ways for any permanent or temporary obstruction or projection in, under or over the same, including the location of conduits, poles and posts for telephone, telegraph, street railway or illuminating purposes, signs, marquis, bay windows, coal holes and vaults.

TO THE SUPERINTENDENT OF STREETS, Room 44, City Hall, for information as to

the watering, cleaning, lighting and repairing of streets, the construction and care of sewers and catch-basins, the operation of the ferries, the maintenance of bridges and drawbridges and the removal of ashes and offal.

TO THE BOARD OF HEALTH, Room 11, Old Court House (rear of City Hall), for information relative to the inspection of milk, vinegar, meat, fish and vegetables, the issuance of permits for stables, slaughter houses, etc., smoke nuisances, the existence of contagious diseases or public health nuisances.

TO THE WATER COMMISSIONER, Room 58, City Hall, for information relative to the supplying or metering of water and the water charges of the city.

TO THE SUPERINTENDENT OF PUBLIC GROUNDS, 154 East Cottage street, for information as to the care of the Common, Public Garden, and the small parks throughout the city other than playgrounds, and the extermination of the gypsy moth and the charges made for the same.

TO THE PARK COMMISSIONERS, Pinebank, Jamaica Plain, for information as to Franklin Park and Field, Commonwealth avenue, the Back Bay Fens, Marine Park and playgrounds in general throughout the city.

TO THE SCHOOL COMMITTEE, Mason street, for information relative to the operation of the schools of the city.

TO THE SCHOOLHOUSE COMMISSIONERS, 120 Boylston street, for information as to the construction and repair of school buildings.

MUNICIPAL CALENDAR.

Meeting of City Council, Monday, August 29, at 3 p. m.

Meetings of the Boston Transit Commission are held Tuesday and Thursday of each week at 10.30 a. m.

PROPOSALS ADVERTISED.

Bids have been asked for by advertisements in the *City Record* by the following departments. The attention of contractors and others is specially called to the closing time for the receipt of such proposals. This will be published weekly.

PARK DEPARTMENT.

Advertises for proposals for the sale to the city of land for a playground in Ward 7. Proposals to be filed at the office of the Park Commissioners, Olmsted Park, Jamaica Plain.

Bids close Saturday, August 6, at 12 m.

PENAL INSTITUTIONS DEPARTMENT.

Advertises for proposals for the reconstruction of Eastern Avenue Wharf. Blank forms for proposals may be obtained at the office of the City Engineer, Room

60, City Hall. Bids to be filed at the office of the commissioner, 32 Tremont street.

Bids close Tuesday, August 9, at 12 m.

SCHOOL COMMITTEE.

Advertises for proposals for furnishing high efficiency metallic filament lamps. Bids to be filed at the office of the Auditor of the School Committee, Room 53, 168 Tremont street.

Bids close Thursday, August 4, at 2 p. m.

SCHOOLHOUSE DEPARTMENT.

Advertises for proposals for installing plumbing system in the Minot School, Dorchester. Blank forms for proposals may be obtained at the office of the commissioner, 120 Boylston street. Bids to be filed at same office.

Bids close Monday, August 1, at 12 m.

Advertises for proposals for making repairs to steam plants in various school buildings. Blank forms for proposals may be obtained at the office of the commissioner, 120 Boylston street. Bids to be filed at same office.

Bids close Thursday, August 11, at 12 m.

STREET DEPARTMENT (Highway Division).

Advertises for proposals for laying brick block pavement in Damrell street, Dorchester. Blank forms for proposals may be obtained at the office of the Superintendent of Streets, City Hall. Bids to be filed at same office.

Bids close Monday, August 8, at 12 m.

Advertises for proposals for constructing macadam roadway in Bucknam street, Roxbury. Blank forms for proposals may be obtained at the office of the Superintendent of Streets, City Hall. Bids to be filed at same office.

Bids close Monday, August 8, at 12 m.

Advertises for proposals for laying asphalt pavement and regulating Parkman street, city proper. Blank forms for proposals may be obtained at the office of the Superintendent of Streets, City Hall. Bids to be filed at same office.

Bids close Monday, August 8, at 12 m.

Advertises for proposals for repairing Warren Bridge. Blank forms for proposals may be obtained at the office of the Superintendent of Streets, City Hall. Bids to be filed at same office.

Bids close Wednesday, August 10, at 12 m.

STREET DEPARTMENT (Sewer Division).

Advertises for proposals for furnishing and driving piles for sewerage works in Windsor street, Roxbury. Blank forms for proposals may be obtained at the office of the Superintendent of Streets, City Hall. Bids to be filed at same office.

Bids close Thursday, August 4, at 12 m.

Advertises for proposals for building sewerage works in Geneva avenue, from Blue Hill avenue to Columbia road. Blank forms for proposals may be obtained

at the office of the Superintendent of Streets, City Hall. Bids to be filed at same office.

Bids close Tuesday, August 9, at 12 m.

SUPPLY DEPARTMENT.

Advertises for proposals for furnishing 900 tons of semi-bituminous coal for the Parental School, West Roxbury. Blank forms for proposals may be obtained at the office of the superintendent, Room 826, Tremont Building. Bids to be filed at same office.

Bids close Wednesday, August 3, at 12 m.

WATER DEPARTMENT.

Advertises for proposals for furnishing 615 tons of cast-iron water pipe and 25 tons of special castings. Blank forms for proposals may be obtained at the office of the commissioner, City Hall. Bids to be filed at same office.

Bids close Monday, August 8, at 12 m.

DEPARTMENT CHANGES.

The following changes in the number, rating and compensation of city employees have been made during the week ending July 28, 1910:

AUDITING DEPARTMENT.

Designation of Julien C. Haynes to act as Auditor at such times as the City Auditor may be absent during the four weeks beginning Monday, July 25, 1910.

CHILDREN'S INSTITUTIONS DEPARTMENT.

Appointment of Elizabeth Egan to the position of sewing teacher, at the summer school, Rainsford Island, with salary at \$240 per year.

Increase in salary to Thomas P. Sullivan as supervisor of the Suffolk School for Boys, from \$540 to \$600 per year.

Increase in salary to Robert E. Tracy, assistant agent in Placing Out and Office Division, from \$1,100 to \$1,200 per year.

CONSUMPTIVES' HOSPITAL DEPARTMENT.

On July 28 the Mayor approved a contract with Pierce & Cox for installing heating and ventilating plant in the Prescott district, Charlestown. Bids on this work, opened July 22, were as follows:

Pierce & Cox, \$12,073; J. J. Hurley & Co., \$12,240; F. W. Zemier & Co., \$12,446; Laskey & McMurrer, \$12,559; Huey Brothers Company, \$13,567; J. P. Dwyer, \$13,950; Chase & Baker, \$14,146; Lynch & Woodward, \$15,191.

On July 28 the Mayor approved a contract with D. F. Burke for erecting boiler house in Prescott district. Bids on this work, opened July 18, were as follows:

D. F. Burke, \$13,467; W. L. Morrison, \$14,173; Vroom Brothers, \$14,223; J. B. Graham, \$14,432; A. Varnerin & Co., \$14,986.

On July 28 the Mayor approved a contract with the J. E. Locatelli Company for building an addition to the Wyman School. Bids on this work, opened July 18, were as follows:

J. E. Locatelli Company, \$14,271; A. Varnerin Company, \$15,939; Vroom Brothers, \$16,937; C. H. Belledu, \$18,528; McGahey & O'Connor, \$19,204.

On July 28 the Mayor approved a contract with J. P. Dwyer for installing heating system in the addition to the Wyman School. Bids on this work, opened July 18, were as follows:

J. P. Dwyer, \$4,487; J. J. Hurley & Co., \$4,615; Laskey & McMurrer, \$4,735; F. W. Zemier & Co., \$4,844; Huey Brothers Company, \$4,897; Lynch & Woodward, \$4,937; C. H. Sanborn, \$4,970; Chase & Baker Company, \$5,287.

STREET DEPARTMENT (Highway Division).

On July 21 the Mayor approved a contract with the W. A. Murtfeldt Company for the construction of artificial stone sidewalks in Harvard street, Dorchester. Bids on this work, opened July 12, were as follows:

W. A. Murtfeldt Company, \$4,951;

Adams-Pond Company, \$4,956; Warren Brothers, \$5,467.50; James Doherty, \$5,632.50.

On July 22 the Mayor approved a contract with James Doherty for laying brick block pavement in Dudley street, Roxbury. Bids on this work, opened July 18, were as follows:

James Doherty, \$25,552.30; Central Construction Company, \$25,708.40; J. H. McCarthy, \$25,882.70; J. B. O'Rourke, \$28,490.20; Coleman Brothers, \$29,005.

On July 22 the Mayor approved a contract with the Central Construction Company for laying brick block pavement in Geneva avenue. Bids on this work, opened July 18, were as follows:

Central Construction Company, \$23,567.30; James Doherty, \$23,727.80; James B. O'Rourke & Co., \$24,678.20; F. S. & A. D. Gore, \$25,206.10; Coleman Brothers, \$25,809.50.

STREET DEPARTMENT (Sewer Division).

On July 22 the Mayor approved a contract with Andrew M. Cusack for constructing pipe sewer in Geneva avenue, Dorchester. Bids on this work, opened July 13, were as follows:

Andrew M. Cusack, \$5,873.78; J. B. O'Rourke & Co., \$7,049.50; Commonwealth Construction Company, \$7,141.30; Murphy & Dolan, \$7,549; John W. McCourt & Co., \$7,720.65; McCarthy & Walsh, \$8,275.50; Devencenzi & Co., \$10,821.41; Michael Russo, \$11,171.10.

On July 22 the Mayor approved a contract with J. B. O'Rourke & Co. for building sewerage works in Friend street, \$5,570.60; Commonwealth Construction Company, \$5,679.50; Coleman Brothers, \$6,302.80; McCarthy & Walsh, \$6,580.25; John Falvey, \$7,543.60.

WITHOUT ADVERTISING.

FIRE DEPARTMENT.

On July 28 the Mayor approved a contract, without advertising, for the

purchase of one Buick Roadster automobile, together with top and freight charges, to cost \$1,898, less an allowance of \$100 for an old Baker Electric.

ADDITIONS AND ALLOWANCES TO CONTRACTS.

PUBLIC BUILDINGS DEPARTMENT.

The Mayor has approved an addition amounting to \$1,472 on the contract with the A. Varnerin Company for the new library building, Ward 22, on account of furnishing and erecting bookcases. Bids were asked for on this work and resulted as follows:

A. Varnerin Company, \$1,472; Perkins Wood Working Company, \$1,575; G. W. Morrison, \$1,618.

SCHOOLHOUSE DEPARTMENT.

The Mayor has approved the following additions and allowances to contracts:

Deduction, amounting to \$50, on the contract with William Crane on the Dorchester High School, on account of the substitution of granolithic gutter in wardrobes instead of zinc gutters. Original contract, \$125,875; total additions, \$1,647; total deductions, \$19,519; contract as standing, \$108,003.

Addition, amounting to \$296, to the contract with Robert F. Brown on the Dorchester High School, for connecting water and supply to grindstone and installing soapstone sink. Original contract, \$5,709; total additions, \$337; contract as standing, \$6,046.

Addition, amounting to \$10.06, to the contract with Pierce & Cox on the Lafayette School, for additional water-closet seats. Original contract, \$3,330; total additions, \$10.06; Contract as standing, \$3,340.06.

Addition, amounting to \$45.78, to the contract with Pierce & Cox on the Abraham Lincoln School, for additional water-closet seats. Original contract, \$14,865; total additions, \$45.78; contract as standing, \$14,910.78.

Addition, amounting to \$10, to contract with William Crane on the Girls' High school, for installing 18-inch by 24-inch door in vent duct of gymnasium vestibule. Original contract, \$105,880; total additions, \$389; total deductions, \$9,175; contract as standing, \$97,094.

CONTRACTS FOR SIDEWALKS.

On July 28 the Mayor granted to the Superintendent of Streets authority to award contracts, without advertising, for the construction of artificial stone sidewalks in the public streets of Boston, to John Mahan, the estimated amount for labor and materials to be furnished by the contractor being over \$2,000.

"The contractors who lay artificial stone sidewalks furnish a surety company guaranty bond for maintaining the work for a period of five (5) years to the satisfaction of the Superintendent of Streets. The amount paid by the city toward the cost of constructing these sidewalks is a fixed one (6 cents per square foot), equal to one-half the cost of a brick sidewalk, which the city assumes as its share of the cost of a new sidewalk. The list submitted for your approval includes all reputable companies known by this department who desire such a contract with the city.

"(Signed) L. K. ROURKE,

"Superintendent of Streets."

PETITIONS GRANTED.

The following petitions granted by the Board of Street Commissioners have been approved by the Mayor:

Signs.—E. J. Cotter, 255 Tremont street; Tony De Angelis, 114 Prince street; Hennessy Brass Works, 54 High street; Joe Omansky, 267 Bunker Hill street; F. W. Woolworth & Co., 17 Tremont row; S. Tocman, 316 Bunker Hill street; John E. Jackson, 59½ Waltham street; Fred B. Pearson, 21 Traverse street; Nicholas De Blasis, 8 Garden Court street; Nicholas De Blasis, 8 Garden Court street; Paulina Levenson, 213 Pleasant street; Michael Caloca, 283 Sumner street; John T. Bradlee, trustee, 134 State street; Felice Lauricella, 273-275 Hanover street; David Silverman, 102 Prince street; Halford Company, 200 Milk street; Alland Bros., 22 Tremont row; N. M. Ovsianisk, 3348 Washington street; McCredy Bros., 14 Province street; Morris Libman, 23 Motte street; Curtis and Page, 115 Water street; Felice Lauricella, 273-275 Hanover street, and corner Richmond street; I. B. Jenkinson, 103 Park street, Ward 23; Charles Stemler, 1 Kingston street; S. Robinson & Co., 295 Tremont street; Horace W. Lyons, 1500 Dorchester avenue; Joe Roberto, 1708 Washington street.

Illuminated Signs.—Patrick Bowen, 736 Washington street; A. J. & G. E. Coleman, 607 Washington street; Charles Badia, 96 Union street; James P. McShane, 855 East Sixth street; Weiss & Park, 650 Blue Hill avenue; Packard Pharmacy Company, Maverick square; George W. McConnell, 243 Meridian street; Ziegmond Samuels, 81 Sumner street; Ziegmond Samuels, corner Franklin and Washington streets; Nesmith Shoe Company, 23 West street; Wong Kew, 209 Shawmut avenue; Samuel Barnard, 121 Hanover street; Bieringer Bros., 12 Dock square; Rosenthal Bros., 326 Hanover street; Prof. Frank, 154 Canal street; William De Wolfe, 47 Dearborn street; N. Kandall, 16 Lowell street; H. Bloomberg, 361 Washington street; H. Bloomberg, 361 Washington street; D. J. Tracey, 329 Tremont street; H. Shneider, 52 Spring street; Marks & Chester, 105 Dudley street; Fred Green, 37 Tremont street; Staples Coal Company, 475 Broadway; F. W. Woolworth, corner F and Broadway; William Roper Curtis, 218 Essex street; S. S. Kresge, 8-9 Tremont row; George Pantegrecis, 6 State street; Frank Kenney, 559 Columbus avenue; Neil E. Canny, 119-123 Causeway street; A. E. Lazaro, 29 Ferdinand street; Thomson Bros., 288 Shawmut avenue.

Bay Windows.—Annie Shoolkin, 58 Spring street; Vincenzo Bonainto, 32 Liverpool street.

Gasolene.—Allen Woodle, 107-109 West Brookline street; J. A. Dowling, Commonwealth and Harvard avenues; Maria D. Whiteher, 17 Melville avenue, Dorchester; F. W. Carter, 107 Ocean street, Dorchester; Columbia Yacht Club, club house, Columbia road; E. P. & E. J. Legg, 40 Geneva avenue; Robert I. Kendall, 39 Stanhope street; Angelo Ragusa, to sell from boat, Dorchester bay; Fire Commissioner, Fort Hill square; John and Jacob Nathan, 590 Parker street; John D. McPherson, 336 Freeport street; Dennis O'Neil, boat, at Commercial and T wharves; George A. White, Montana street, Roxbury; Jacob Mosser, corner Elm Hill avenue and Homestead street.

Guy Posts.—William Crane, opposite 92 West Newton street; Thompson-

Starrett Company, Batterymarch street; George R. Dugad, Sleeper street.

Areas.—T. Dennie Boardman *et al.*, 37 Merchants row.

Move Wooden Buildings.—T. J. Billings, from 452 Geneva avenue to 99 Dakota street, Dorchester.

Move Buildings.—H. S. Angus & Son, 15 Ashley street to 198 Leyden street; H. S. Angus & Son, 31 Ashley street to 8 Antrim street; H. S. Angus & Son, 7 Ashley street to 31 Ashley street; T. H. Waldron, 9 Ashley street to 14 Ashley street.

Pole Locations.—New England Telephone and Telegraph Company: Erect and remove one pole, Savin Hill avenue, Ward 20; erect and remove one pole, Charles street, Ward 20; erect and remove two poles, Washington street and Dorchester avenue; erect and remove one pole, Woodward street, Ward 15; remove four poles, Chelsea street near Scott street, Ward 3; to transfer two poles to Edison Electric Company on Ruggles street, near Columbus avenue. Edison Electric Illuminating Company: To remove one pole, Renfrew street, near Harrison avenue, Ward 17; to remove three poles, Washington street, near Arborway, and two poles, west of Asticou road, Ward 23.

Street Railway Location.—West End Street Railway Company, two additional curves on P street entering the car house of said company.

Marquise.—E. H. Smith Company, 11-13 Temple place; George H. Gardner, 531-539 Tremont street.

Coal Chutes.—Schoolhouse Commission, Girls' High School, Pembroke street.

Bulkhead Opening.—John T. Kennedy, 44 Warren street.

APPROVAL OF SCHOOLHOUSE PLANS.

The Mayor has approved the following plans for schoolhouse construction: Building plans, heating and ventilating plans for the Wyman School addition prepared by the Architectural Division of the Schoolhouse Department. Building plans, and heating and ventilating plans for the boiler house in the Prescott District, prepared by Messrs. Brainerd & Leeds, architects. Plumbing plans for the Trade School for Girls, prepared by the Architectural Division.

APPROVAL OF LEASES.

The Mayor has approved the renewal for the term of five years of the lease of building corner Washington and Ashland streets, West Roxbury, owned by Horace Lindall, for use as the Roslindale sub-station of the Police Department, at an annual rental of \$480.

The Mayor has approved the extension for a term of six months ending January 31, 1911, of the lease of the second floor in the building corner of Hyde Park avenue and Tower street, for use as a wardrobe, from Thomas Minton at a yearly rental of \$600.

PAYMENTS TO DISABLED EMPLOYEES.

STREET DEPARTMENT.

The following allowances have been made by the superintendent and approved by the Mayor:

David Punch, Sanitary Division, 29 days at \$2.50, \$72.50.

SCHEDULE OF BAND CONCERTS
ARRANGED BY MUSIC DEPARTMENT, SEASON 1910.

The following schedule of band concerts has been prepared by the Music Commission for the season of 1910:

Boston Common. Sunday afternoons at 3.30 p. m., July 17 to September 4, inclusive. Kanrich's Band, Albert M. Kanrich, leader.

Marine Park.

July 31, 3.30 p. m., E. G. Bates' Band, E. G. Bates, leader.

August 7, 3.30 p. m., Ernest S. Williams' Band, E. S. Williams, leader.

August 14, 3.30 p. m., First Corps Coast Artillery Band, W. A. Cushing, leader.

August 21, 3.30 p. m., Teel's Military Band, B. F. Teel, leader.

August 28, 3.30 p. m., Ninth Regiment Band, W. A. Barrington-Sargent, leader.

September 4, 3.30 p. m., Ives' Military Band, D. A. Ives, leader.

Pine Bank, Jamaica Pond. Sunday afternoons.

July 31, 3.30 p. m., Teel's Military Band, B. F. Teel, leader.

August 7, 3.30 p. m., E. G. Bates' Band, E. G. Bates, leader.

August 14, 3.30 p. m., Ernest S. Williams' Band, E. S. Williams, leader.

August 21, 3.30 p. m., First Corps Coast Artillery Band, W. A. Cushing, leader.

August 28, 3.30 p. m., Banda Rossa, A. D'Avino, leader.

September 4, 3.30 p. m., First Corps Cadets Band, J. B. Fielding, leader.

Wood Island Park. Sunday afternoons.

July 31, 3.30 p. m., Banda Rossa, A. D'Avino, leader.

August 14, 3.30 p. m., Stone's Military Band, George B. Stone, leader.

August 28, 3.30 p. m., Ives' Military Band, D. A. Ives, leader.

Abbottswood, Franklin Park. Saturday afternoons, 3.30 p. m.

July 23 to September 3, 1910, inclusive, Municipal Band, Albert M. Kanrich, leader.

School playgrounds and institution concerts.

August 3, 10 a. m., Emerson School, East Boston.

August 5, 3 p. m., Long Island.

August 10, Franklin Park (special).

August 12, Long Island, 3 p. m.

August 17, 10 a. m., Cyrus Alger School, South Boston.

August 18, Long Island, 3 p. m.

August 24, 10 a. m., Frothingham School, Charlestown.

August 30, 10 a. m., Hancock School, city.

District concerts, given in different sections of the city by the Municipal Band, Albert M. Kanrich, leader. Concerts to be from 8 to 10 p. m.

August 1, Pierce square, Dorchester.

August 2, Rogers' Park, Brighton.

August 3, St. Alphonsus and Calumet streets, Roxbury.

August 4, Sumner and Jeffries streets, East Boston.

August 5, near 100 Savin Hill avenue, Dorchester.

August 8, Codman square, Dorchester.

August 9, Washington park, Roxbury.

August 10, Roslindale Playground.

August 11, Eaton square, Dorchester.

August 12, Ashley avenue and Breed street, East Boston.

August 15, Albany and Dearborn streets, Roxbury.

August 16, Emerald and Compton streets, city.

August 17, Edward Everett square, Dorchester.

August 18, Billings Field, West Roxbury.

August 19, Charlesbank.

August 22, Central square, East Boston.

August 23, Columbus Avenue Playground.

August 24, Talbot and Welles avenues, Dorchester.

August 25, Hayes square, Charlestown.

August 26, Christopher Gibson Playground.

August 29, Hyde Park avenue and Mt. Hope street.

August 30, Blue Hill avenue and Walk Hill street.

August 31, North square, city.

September 1, St. Alphonsus and Calumet streets, Roxbury.

September 2, North Brighton Playground.

All communications relating to the concerts should be addressed to the secretary of the Music Trustees, Carney Building, Room 905.

The regular series of winter concerts will start on or about December 1, 1910. Tickets are free on application. The concert is instructive, entertaining and recreative.

PROGRAMS FOR SUNDAY, JULY 31.

Municipal band concerts will be given Sunday, July 31, on Boston Common; Wood Island Park, East Boston; Pine

Bank, Jamaica Pond; and Marine Park, South Boston, at which the following programs will be rendered:

WOOD ISLAND PARK, SUNDAY, JULY 31,
AT 3.30 P. M.

Band Rossa, A. D'Avino, Leader.

Program.

- | | |

| Sanctus from "Messe Solemnelle." | <i>Gounod.</i> |
| Selection. "Cavalleria Rusticana." | <i>Mac-cagnu.</i> |
| March. "American Republic." | <i>Thiele.</i> |

APPOINTMENTS AND CONFIRMATIONS.

APPOINTMENT.

The following appointment has been made subject to confirmation by the Board of Civil Service Commissioners.

July 27, Aaron Yaffe to be a Children's Institutions Trustee.

LAND FOR SCHOOL PURPOSES.

On July 28 the Mayor approved votes of the Board of Schoolhouse Commissioners requesting the Board of Street Commissioners to take for the purpose of erecting schoolhouses in the Comins District, Roxbury, and the Phillips Brooks District, Dorchester, land on Parker street, Roxbury, and on Dacia street, Dorchester.

NOTICE TO SUBSCRIBERS.

Subscribers will find the expiring date of their subscription stamped upon the mailing wrapper. As payment must be made in advance, remittance should be made on or before that date.

STREET COMMISSIONERS.

On July 26 the Mayor approved an order of the Board of Street Commissioners taking, for the purpose of securing an easement for the construction of sewerage works comprising the relocation of Hewlett street brook, in land on Centre street supposed to belong to John B. McAleer and Michael J. Crowley.

The Board estimates that the above estates sustain damages by reason of the taking in the following amounts:

Michael J. Crowley, 1,250 square feet, \$275; John B. McAleer, 1,256 square feet, \$325.

FARMING NEAR CITIES.

In commendation of the "farm movement" for the Birmingham district, Mr. M. V. Richards, land and industrial agent of the Southern Railway, writes to President A. H. Ford of the Birmingham Chamber of Commerce telling something of his own experience and suggesting how the plan may develop. He says that within the past few weeks a colony of foreign-born people who have lived in Pennsylvania for several years have purchased farms on the Southern Railway about twenty miles north of Mobile, where it is expected there will be a settlement of from 150 to 200 farmers. Along the line between Richmond and Danville, Va., about 150 German families have settled during the past ten years, most of them coming from the North, and some directly from Germany. Mr. Richards sees many favorable opportunities for farmers in the territory adjacent to Birmingham, and he suggests:

"Interest the owners of lands suitable for farming purposes, situated near transportation facilities, in the subdivision and sale of their holdings. The farms should be subdivided into practical-size places and offered for sale at reasonable prices and upon easy terms to bona fide settlers. A careful study of the merits and possibilities of the land should be made before being offered to the public. Plats showing the subdivisions and carefully prepared descriptions of the soil, its capabilities, cost of improvements necessary, the price of building material, the price of farm equipment, information regarding crops and markets should be included in the prospectus. These offerings should be advertised, and it would be well to interest agencies handling such properties in selling to the class of people it is desired to reach. We probably may be in position to place the information regarding the properties when ready for sale before agents or colonizers handling foreigners. It seems to me you will meet with the best success in interesting people in the properties by placing the facts before people formerly from Europe, especially farmers now located in the congested centers, such as Chicago, New York, Buffalo, Boston and Philadelphia. Heretofore the movement of these people has largely been to the Central West and the West for the reason that they found people of their own nationality in those sections. After these people are located on lands in your section it can be expected that immigrants direct from Europe will be attracted to these settlements, and in time the movement of foreign immigration to the South will be fully as great as it is now to the West, Northwest and Southwest."

These suggestions are the more practical because they come from a man who has had many years' experience in attracting settlers to several states in the South. His emphasis of the detail work necessary to make a success of the Birmingham movement is timely, and should be given all the consideration that it deserves. It may be suggested, however, that great care should be exercised in looking to the congested centers of this country for farm material. If there are farmers in such centers who desire to resume the country life they had in their native lands, and are qualified to become good citizens of Alabama, it would be well to give them attention. The *Manufacturers' Record*, though, has for several years been warning the South against giving encouragement to plans turning upon the relief of congestion in certain Eastern cities, or to immigration schemes likely to induce similar congestion in Southern cities.—*Manufacturers' Record*.

PROFITS FROM CHICAGO HYDRO-ELECTRIC PLANT.

The central station business carried on by the Sanitary District of Chicago during the year ending March 31 is the subject of a voluminous report recently made by the comptroller of the district, Mr. D. M. Deininger. Current is generated at a 24,000-kw. hydro-electric plant at Lockport and transmitted to the Chicago district, where it is supplied to 811 consumers, 695 of whom are classified as commercial light, 103 as commercial power, and 13 as municipal bodies. The City of Chicago is the largest consumer. The average income per kilowatt hour for commercial lamp circuits is 4.65 cents and for commercial motor circuits 2.15 cents. A little over half of the total output is taken by Chicago for street lighting. The figures of earnings and operating expenses are given in great detail and afford some useful information concerning the cost of operating such a system under municipal conditions. The report is accompanied by a statement that owing to some confusion resulting from changes in methods of bookkeeping, the classification of the accounts and the distribution of the sums under the different items are not entirely satisfactory, but the figures are made public in the belief that, even as they stand, they will prove of public interest. As a matter of fact they are apparently far more detailed than most municipal accounts of this character. The total cost of the plant and equipment is given as \$4,036,599, and \$40,216 has been charged up for depreciation. The cost of the plant, which is carried as a capital liability, is somewhat less than the actual investment, being \$3,883,495. No allowance is made for taxes, but there is an interest charge of \$144,620. During the year the operating and maintenance expenses amounted to \$18,514, the transmission expenses to \$32,422 and the distribution expenses to \$20,286. There were various other expenses, given in detail in the report, but enough has been mentioned to indicate that, in all probability, the system is proving a good investment financially, as well as a useful regulator of the rates for current in the Chicago district.—*Engineering Record*.

FINANCE COMMISSION.

BOSTON, July 18, 1910.

To the Finance Commission:

GENTLEMEN,—I beg leave to submit herewith the following information regarding the problem of gas lighting in this city and the means that may be taken to secure a reduction of price in the near future, together with efficient service.

It appears that the first attempt to light the streets in Boston by gas was made in 1834, prior to which time oil lamps had been used, first put in in 1773, by subscription. Oil and gas were used exclusively for street lighting until 1881, when six experimental electric lights were installed.

During the greater portion of the period between 1834 and 1888 such gas lamps as were in service were maintained and operated by the gas company and city labor, acting jointly.

At various times in the last twenty-two years contracts have been made with the Rising Sun Street Lighting Company.

On November 3, 1888, a three-year contract was made with this company for furnishing naphtha lamps and caring for them. It appears that this contract was for furnishing a proprietary attachment, owned by the Rising Sun Street Lighting Company, or by its parent company, the Welsbach Street Lighting Company, consisting of burners and reservoirs for naphtha and fitting the same to the square street lanterns then in existence, thereby adapting them to the use of naphtha as an illuminant; \$4,500 was paid for remodeling lamps and 12 cents per month for the care of each lamp, but the city did not furnish naphtha nor light the lamps.

This contract expired November 30, 1891, and a second contract was made March 19, 1892, with the same company, for a period of three years for naphtha lighting at a price of \$21 per lamp year, including care, lighting, etc.

This contract expired March 19, 1895, and a third contract for a period of one year was made for naphtha lighting at a price of \$20.44 per lamp year, under the same conditions as for the previous contract.

A fourth contract was made March 18, 1896, for a period of three years for naphtha lighting, under similar conditions, at a price of \$22.81 per lamp year, the increase of price presumably being due to the advance in the price of naphtha.

October 31, 1898, contract No. 4 was canceled and contract No. 5, for naphtha lighting for a period of five years, was made, at a price of \$22.81 for ordinary lamps and \$22.81½ for naphtha lamps with incandescent mantles, introducing for the first time the incandescent mantle.

May 31, 1899, a sixth contract was made with the Rising Sun Street Lighting Company for a period of seven years for gas lighting with boulevard lanterns, the company to furnish gas, etc., and to do all the work for repairs, lighting, etc., at a price of \$30 per lamp year.

A seventh contract, for naphtha lighting for a period of five years, was made, dated November 9, 1903, at a price of \$22.81 for open flame lamps and \$29.20 for boulevard lanterns.

Contract No. 6, for gas lighting, expired July 1, 1906, and was renewed for a period of seven months at the same price by contract No. 8. January 1, 1907, by contract No. 9, it was further renewed for three months, at a price of \$30 per lamp year. On June 1, 1907, contract No. 10 was executed for a period of one year. This contract was to furnish lan-

terns, burners and other apparatus for a rental of \$2 per year for each lantern, and in addition the company received 2 cents per night for single burner lamps, 3.27 cents per night for double burner lamps and 4.35 cents per night for triple burner lamps, the city to furnish all labor for lighting and also to pay for the gas. By a special agreement under this contract the contract of 1903 for naphtha lighting was suspended and the city assumed the charge of the naphtha lamps under the same conditions as for gas lamps. The cost to the city for gas lighting under this arrangement was \$29 per lamp year, and the cost for naphtha lamps \$30.31 per lamp year.

The lamps rented according to the provisions of the contract, No. 10, were those installed under the contract of 1899 and earlier contracts. Their first cost installed on the streets probably did not exceed \$9 per lamp, allowing a profit on their manufacture by the Welsbach Company. The \$2 rental paid yearly was, therefore, in excess of 22 per cent on the first cost of the lamp. The additional charge of 2 cents per night for furnishing mantles, broken parts, and painting etc., amounting to \$7.30 per lamp year, entailed an estimated expense to the Rising Sun Company of not more than \$2.50 per lamp year, a profit from that source of approximately \$4.80 per lamp year, which, added to the \$2 per year rental, gave a total profit to the company per lamp year of \$6.80, or in excess of 75 per cent of the original cost of the plant yearly.

The cost to the city under contract No. 10 of \$29 per lamp year for single mantle lamps was 80 cents per lamp year more than was paid to the Rising Sun Company under previous contracts, notwithstanding the fact that the city received reductions in the price of gas amounting to 84 cents per lamp year.

When contract No. 10 expired on June 1, 1908, competitive bids for street lighting were called for by the Superintendent of Streets. Three bids were received, at prices varying from \$24.90 to \$27 for single mantle gas lamps. The prices were all considered to be too high and all bids were rejected. In order that the question might be more fully considered, a contract for a period of one year was given to the Rising Sun Street Lighting Company at a price of \$15.60 per lamp year. (Contract No. 11.) This price was arrived at by deducting from the price bid by them, \$25.20, the price which they would be obliged to pay the Consolidated Gas Company for gas each year, or \$9.60. As the price to the city for gas was 24 cents per year lower than it could be secured by the Rising Sun Company, the city furnished the gas under this contract.

Competitive bids were again called for and three bids were received on June 28, 1909, the lowest bidder being the Greater Boston Illuminating Company, at a price of \$20.49 for single mantle burners, the lamp understood to be of the inverted mantle type. This company did not prove to be a responsible one and was unable to furnish bonds, and during the delay occasioned by them the period in which the city could make a contract for more than one year for gas lighting expired, under the provisions of the amendments to the city charter. Contract No. 12 was therefore made with the Rising Sun Street Lighting Company for a period of four and a half months at the price bid by them, \$23.60 per lamp year, the company to furnish all the equipment, including the gas and labor for lighting. This contract was extended for a period of six months

from February 1, 1910, and has again been extended until February 1, 1911.

Beginning in 1905 successive rebates were made by the Rising Sun Company to the city, according to the terms of the contract, following reductions in the price of gas. These rebates brought the net price down from \$30 to \$29.40 on July 1, 1905; to \$28.80 on December 10, 1905, and \$28.20 on July 1, 1906.

It will be noted that the principal reason for the first contracts with the Rising Sun Street Lighting Company was on account of their possessing exclusive rights to superior apparatus. During the last few years the manufacture of approved apparatus for gas lighting has advanced rapidly and this reason for reawarding the contract to a particular company does not now exist. It is probable, however, that the Welsbach Company, of which the Rising Sun Lighting Company is a subsidiary company, possesses a practical monopoly of the most improved form of burners for upright mantle lamps now manufactured in this country. It is possible, however, to secure the most improved form of lantern from independent manufacturers, and a suitable burner can also be obtained in this country or in foreign countries.

The inverted mantle lamp, which has been developed largely in foreign countries, and to some extent in this country during recent years, furnishes a superior light, being less expensive in the matter of maintenance than the upright mantle lamp, and also giving a better distribution of light for the purpose of street illumination, as shown by experimental lamps installed by the Street Department.

Advances have also been made in the use of automatic devices for lighting and extinguishing gas lamps, and such devices are in operation in many cities of Europe and also in several of our neighboring smaller cities.

Under the present conditions it would seem advisable that some definite policy for gas lighting should be adopted, that the profit of the middleman should be eliminated and the work of maintenance and operation done either by the city authorities directly or by the authorities of the gas company, who must of necessity furnish the gas, or by the two parties acting jointly.

It does not seem likely that any competition between the Rising Sun Company and other street lighting companies will enable the city to obtain a material reduction from the prices now paid to the Rising Sun Company if we retain the present methods of lighting and extinguishing the lamps, either by labor employed by a lighting company or by the city directly. If, however, existing methods are abandoned and automatic lighting and extinguishing devices are installed, a very material reduction from present prices can be effected.

In general two forms of such devices are in satisfactory operation: one by which a form of clock mechanism is placed upon individual lamps; the second by which the lighting is done through a mechanism operated by waves, or impulses, in the gas main, inaugurated from the central stations of the gas company. Each system seems to be in about equal favor, the advantage of the clock system being that it is absolutely automatic in its operation and requires no labor beyond the winding of the clock, which is to be done about once a week. The advantages of the impulse system are that less labor is required for winding the clock, the maximum attention being given only once in six months. Its disadvantages, however,

in case other than the gas company were to do the work of lighting, are that it places the responsibility for the proper operation of the system upon the gas company. This, however, does not seem to furnish an insuperable obstacle.

Several such devices have been tested by the authorities of the Street Department during the present year and others have been tested by the officials of the Consolidated Gas Company. The clock system is in successful operation in the city of Newton, and the impulse system has been in successful operation for a considerable period in the city of Springfield. Such devices are common in European cities also. While it may be possible that the ultimate degree of efficiency has not been reached for such devices, or perfection obtained in mechanical operation, yet such a degree of perfection has been obtained as to warrant their installation with the practical certainty of reducing the cost per lamp now paid, and with efficient service.

Any of the following alternative plans, if adopted, will furnish efficient gas lighting at a lower price than at present:

First, for the city to purchase an installation of inverted mantle lamps complete, with automatic devices; investment required, \$310,000; city labor to be employed in operation; cost per lamp year, \$19; saving, \$4.60; total annual saving, \$55,200.

Second, for the city to purchase an installation of upright mantle lamps complete, with automatic lighting device; investment required, \$235,000; price per lamp year, \$19; total annual saving, \$55,200.

The cost per lamp year with operation by city labor, estimating sinking fund and interest charges on a fifteen-year basis, will amount to practically the same price, whether upright mantles or inverted mantle lamps are used. The greater amount of interest and sinking fund charges and increased cost of fixtures for the inverted mantle lamp over the upright mantle is balanced by the less cost for maintenance and operation.

Third, to accept the offer of the Consolidated Gas Company, with which you are familiar, to furnish service at a figure not to exceed \$20.51 per lamp year, the city to furnish the plant. This would require for an inverted mantle lamp equipment an investment by the city of \$185,000, and would result in a price of \$21.33 per lamp year, a saving of \$2.27 per lamp year and a total saving of \$27,240 per year. If upright lamps were used an investment of \$114,000 would be necessary, the cost per lamp year would be \$21.85, and a saving of \$1.75 per lamp year, or a total saving of \$21,000 per year, would be effected.

Considering the advantages of the inverted mantle lamps it would seem the better policy that they be purchased, even at a higher first cost.

No radical improvements in low pressure street lighting have been made since the introduction of the incandescent mantle, and there seems little likelihood that changes not adaptable to the present styles of street lamps will be made during the fifteen-year period assumed as a basis for reckoning interest and sinking fund charges. It is probable rather that the proposed plant at the end of such period will be in condition for efficient service for a considerably longer period.

The figures given above must be understood to be approximate estimates only, although many of the items, such as the cost of gas, cost of lamps and the cost of care and operation, are closely fixed by

present prices and from experimental data. With efficient supervision the price per lamp year should not exceed the figures given.

The estimates for inverted mantle lamps contemplate the installation of the higher price automatic lighters experimented with and ornamental post extensions similar to those now installed in the Jamaica Plain district.

As at least six months' time must be allowed for the satisfactory installation of a new outfit of street lamps a definite policy should be adopted in the immediate future.

Very respectfully,

GUY C. EMERSON,
Consulting Engineer.

July, 22, 1910.

To the Honorable the Mayor and City Council:

GENTLEMEN,—The Finance Commission respectfully calls attention to the necessity of providing better and cheaper means of lighting the streets with gas than the present contract between the city and the Rising Sun Street Lighting Company affords. The former Finance Commission and the present Finance Commission have recommended changes in the contract relations between this company and the city at various times, both commissions believing that the rates in existence at the time such recommendations were made were excessive. (Finance Commission Reports, Vol. 1, p. 385; Vol. 5, p. 49; see, also, report of the Finance Commission dated May 3, 1910.)

The Rising Sun Company received its first contract from the city on November 3, 1888, after public competition; but though it has since performed street lighting service continuously under successive contracts, so far as the records show, it had no further competition until June of 1908, a period of nearly twenty years. In June, 1908, bids were solicited by public advertisement and the company then made an offer of \$25.20 for each single mantle gas lamp per year, which was \$4.80 lower than the price it had previously received under noncompetitive conditions. One-half of this reduction may be attributed to the reduced price of gas. It was given a contract for one year, and upon its expiration bids were again solicited by advertisement, and again the company offered the city a lower price under competition, namely, \$23.60 per lamp year. A lower bid, \$20.49, was submitted by another company which was not believed by the Superintendent of Streets to be responsible, and the contract was ultimately given to the Rising Sun Company, the only other bidder. This contract expired on January 31, 1910, and soon thereafter bids were again solicited, but there was no competition this time and the bid of the Rising Sun Company was \$23.60, the same as that of the preceding year. The contract has twice since been extended, each time for six months and at the rate of \$23.60 per lamp per year.

This brief history of the relations of the city and the company show that the latter's prices have fallen under competition and have remained stationary when there was no competition.

Former Superintendent of Streets Guy C. Emerson, now consulting engineer of the Finance Commission, has made a report to the commission reviewing the contracts made between the city and the company and suggesting means for procuring for the city a more efficient service at reduced cost. A copy of his report is

hereto appended. He is of the opinion that there is little likelihood that the city will obtain material reductions in price as the result of competition between the Rising Sun Company and other street lighting companies in the future; and the commission believes that it is time for the city to free itself from the monopoly which has existed for nearly a quarter of a century. Mr. Emerson believes that either the city or the Consolidated Gas Company should furnish and maintain the street gas lamps or perform the service jointly, in which latter case the city would furnish the lamps and the gas company would provide the means of lighting, extinguishing and caring for them. In this opinion the Finance Commission concurs. There is no reason why a middleman's profits should be paid any longer.

Mr. Emerson suggests three plans for lighting the streets with gas, any of which would give the city cheaper service than is now rendered by the Rising Sun Company. They are as follows:

1. Appropriate \$310,000 for the purchase and installation of 12,000 inverted mantle lamps complete, with automatic devices for lighting and extinguishing.

2. Appropriate \$235,000 for the purchase and installation of upright mantle lamps complete, with automatic devices for lighting and extinguishing.

3. Accept the offer of the Consolidated Gas Company, dated July 23, 1909, to furnish and care for lights on a five-year contract for \$20.51 per lamp per year, providing the city shall furnish the lamps and equipment. This would require an appropriation of \$185,000 for inverted or \$114,000 for upright lamps.

The loan issued to provide money for the lamps and automatic devices should be for a term of fifteen years, which is less than the estimated life of the equipment.

Under either the first or second of these plans the city would furnish the labor employed in lighting, extinguishing and caring for the lamps; but, by reason of the use of the automatic devices, the force needed would be only about one-half of the force at present employed by the Rising Sun Company. Mr. Emerson estimates that the cost under either of these plans would be approximately \$19 per lamp year, the greater cost for fixtures and interest and sinking fund charges for inverted lamps being balanced by the lesser cost for their maintenance and operation. The saving would be about \$4.60 on each lamp, or a total annual saving of about \$55,200 for the 12,000 lamps in use.

Under the third plan the Consolidated Gas Company would furnish the labor and the city, as already stated, would furnish the equipment. Either \$27,240 or \$21,000 would be saved by the city annually, according as inverted or upright lamps were used.

The Finance Commission recommends that the first of these plans be adopted by the city. While it involves an appropriation of \$125,000 for automatic lighting devices, in addition to the \$185,000 for inverted lamps recommended by the commission in its communication of May 2, 1910, the use of such automatic devices will enable the city to save over existing prices about \$330,000 in six years, or more than the entire amount invested in equipment. Moreover, it is probable that automatic lighting devices will be obtainable at considerably lower figures than those upon which the estimate of \$125,000 is based, in which case a still greater saving will be made.

If the first of these plans be adopted, as

recommended, the city will secure the following advantages:

1. It will save over present prices in the next fifteen years, that is, during the term of the loan issued to buy the equipment, about \$825,000, or about \$500,000 more than enough to pay for the equipment.

2. It will have at the end of the fifteen years a plant, free of debt, which will probably be serviceable for several years longer.

3. The streets will be lighted better under the new system.

In the opinion of Mr. Emerson there is little likelihood that changes not adaptable to the present styles of street lamps will be made during the next fifteen years.

The necessity for early action cannot be emphasized too strongly, as the experience of the last two years has shown that if matters are permitted to drift until near the time of the expiration of the contract with the Rising Sun Company it will necessarily be given a renewal of its contract because of its ownership of the only existing gas lighting equipment available for immediate use. In the opinion of the commission it is time that the makeshift policy of former years should be abandoned and a definite policy, calculated to produce economy and efficiency in the service, be established.

The commission respectfully suggests that the Mayor call a special meeting of the City Council to consider the street lighting question, as the next regular meeting of the Council is August 29, which is so near the date of the expiration of the existing contract between the city and the company (February 1, 1911) as to make it possible that the city will again be compelled by force of circumstances to renew this disadvantageous contract.

Respectfully submitted,

THE FINANCE COMMISSION,
by JOHN A. SULLIVAN,
Chairman.

BEET SUGAR REFUSE FOR ROADS.

Billings, Mont.—A scheme for improving the roads of the state by coating them with refuse from the manufactories of granulated sugar from sugar beets is being generally discussed in this section and will be submitted to the Good Roads Convention. The idea grew out of an experiment made by one of the tennis clubs at Billings. When its court was laid out the dust occasioned considerable annoyance, also the fact that after each rain the soil clung to the shoes of the tennis players. In looking about for a cheap binder, one of the members suggested the refuse syrup. It answered the purpose admirably when mixed with salt and poured over the court to a depth of several inches. The ground was rendered almost impervious to water and the dust was entirely eliminated. It worked almost as well without salt.—*Municipal Journal and Engineer.*

WILL ADOPT TIME LIMIT FOR CONTRACTS.

Lansing, Mich.—In the future all bids for public improvements must contain an agreement by the bidder to finish his work by a specified time. The cost of inspection for days in excess of this time will be charged to the contractor. City Engineer Spark in looking over the records found cases where the cost of inspection on a \$200 sewer job cost more than on a similar piece of work costing \$800.—*Municipal Journal and Engineer.*

PROCEEDINGS OF CITY COUNCIL.

Friday, July 22, 1910.

A special meeting of the City Council, held in the Council Chamber, City Hall, at four o'clock p. m., President BALLANTYNE in the chair. Absent, Coun. Brand.

The Council voted, on motion of Coun. HALE, to dispense with the reading of the records of the last meeting.

The Clerk read the call for the meeting, as follows:

City of Boston,
Office of the Mayor, July 21, 1910.

To the Members of the City Council:

You are hereby requested to assemble in the City Council Chamber, City Hall, on Friday, July 22, 1910, at 4 p. m., to take suitable action upon an order transferring \$15,000 from the Reserve Fund to an appropriation for the rebuilding of Eastern Avenue Wharf, and to transact such other business as may come before the meeting.

Respectfully,

JOHN F. FITZGERALD, Mayor.

Placed on file.

RECONSTRUCTION OF EASTERN AVENUE WHARF.

The following was received:

City of Boston,
Office of the Mayor, July 22, 1910.

To the City Council:

In reply to the order passed by your honorable body at its meeting of July 18, "that his Honor Mayor Fitzgerald be requested to transfer the sum of fifteen thousand dollars (\$15,000) from the Reserve Fund, said sum to be expended by the Engineering Department in the reconstruction of Eastern Avenue Wharf," permit me to refer you to section 3 of chapter 486 of the Acts of the General Court for 1909, which states that "the city auditor may, with the approval in each instance of the mayor, at any time make transfers . . . from the reserve fund to any appropriation for the current expenses of a department." It does not appear certain that the reconstruction of Eastern Avenue Wharf is a current expense of the Engineering Department or of the Penal Institutions Department. While I recognize the imminent need of the improvement recommended and had already, in a previous communication to your honorable body, recommended that this sum be appropriated, it would seem to be necessary to adopt another form of appropriation. Acting, therefore, under the authority granted by chapter 261 of the Acts of 1893, I respectfully recommend that the inclosed order be passed by your honorable body.

Respectfully,

JOHN F. FITZGERALD, Mayor.

Ordered, That the City Auditor be and hereby is authorized to transfer the sum of fifteen thousand dollars (\$15,000) from the appropriation for Reserve Fund to an appropriation for reconstruction of Eastern Avenue Wharf.

The question came on the passage of the order. The order was passed, yeas 8, nays 0.

NIGHT SERVICE, SOUTH FERRY.

The following was received:

City of Boston,
Office of the Mayor, July 22, 1910.

To the City Council:

I beg to inclose a report of the Superintendent of Streets, inclosing a statement by the Deputy Superintendent of Ferries, bearing upon the resolve passed by your honorable body at its meeting of June 20, "that it is the opinion of the City Council that night service on the South Ferry to and from East Boston should be resumed, as in event of a serious conflagration in East Boston we believe that lack of transportation facilities for fire apparatus from the city proper might lead to serious results."

Respectfully,

JOHN F. FITZGERALD, Mayor.

Street Department,
City Hall, Boston, July 20, 1910.

To the Honorable the Mayor:

Re inclosed order of the City Council, requesting resumption of the night service on the South Ferry, attached report of the Deputy Superintendent in charge of the Ferry Division is respectfully forwarded for your consideration.

Respectfully,

L. K. ROURKE,
Superintendent of Streets.

City of Boston,
Street Department, Ferry Division,
Boston, July 19, 1910.

To the Superintendent of Streets:

In reference to inclosed order of City Council, asking that the night service on the South Ferry be resumed, I beg to say that in my opinion this service is less necessary than it was before, on account of the new fireboat now located at the

South Ferry, East Boston side, and for the further reason that it will cost \$12,000 extra per year to do it.

Yours truly,

H. P. CHRISTIERNIN,
Deputy Superintendent.

Referred to the Executive Committee.

CLOSING OF PIKE ALLEY.

The following was received:

City of Boston,
Office of the Mayor, July 20, 1910.

To the City Council:

I beg to transmit a communication from the secretary of the Board of Health, in reply to an order passed by your honorable body at its meeting of June 13, to the effect that the Board of Health be requested to report to the City Council as to the conditions now existing in Pike alley, and as to the possibility and advisability of closing said alley.

A copy of a letter from the Corporation Counsel is appended to the communication from the secretary of the Board of Health.

Respectfully,

JOHN F. FITZGERALD, Mayor.

Health Department,
Old Court House, Boston, July 18, 1910.
Hon. John F. Fitzgerald,
Mayor of Boston:

Dear Sir,—I am directed by the Board of Health, in returning the inclosed communication from the City Council respecting Pike alley, to state that directions were at once given to have said alley cleaned. The Law Department was consulted with respect to closing it, and a copy of the Corporation Counsel's opinion is herewith attached.

I have the honor to be,

Very respectfully,

C. E. DAVIS, Jr., Secretary.

City of Boston,
Law Department, Boston, July 13, 1910.
Board of Health,
Old Court House, Boston, Mass.:

Dear Sirs,—I know of no authority under the city charter existing in the City Council to pass the order sent to you. I would recommend that you reply, stating what the Board has done in relation to cleaning up Pike alley, and stating that you are informed and believe that Pike alley is not a public street of the City of Boston and therefore cannot be discontinued by the Street Commissioners.

Yours truly,

THOMAS M. BABSON,
Corporation Counsel.

Placed on file.

ASSESSMENT OF VAULTS, ETC.

The following was received:

City of Boston,
Office of the Mayor, July 22, 1910.

To the City Council:

I transmit herewith a communication from the Assessing Department containing a reply to your order requesting a report as to the policy adopted in regard to assessing vaults, bay windows, mar- quises, etc.

Respectfully,

JOHN F. FITZGERALD, Mayor.

City of Boston,
Assessing Department, City Hall,
July 12, 1910.

Hon. John F. Fitzgerald, Mayor of Boston:

Sir,—In reply to the order of the City Council passed June 27, returned herewith, which you referred to this department, that the Board of Assessors be requested, through your Honor, to report to the City Council as to the policy adopted by the Board in regard to assessing vaults, bay windows, mar- quises, etc., would say that vaults, bay windows, mar- quises, etc., are assessed as part of the real estate.

Respectfully,

CHARLES E. FOLSOM, Secretary.

Placed on file.

ASSESSMENT OF SOUTH END PROPERTY.

The following was received:

City of Boston,
Office of the Mayor, July 22, 1910.

To the City Council:

I transmit herewith a communication from the Assessing Department containing a reply to your order requesting a report as to the system of assessment of property in the South End.

Respectfully,

JOHN F. FITZGERALD, Mayor.

City of Boston,
Assessing Department, City Hall,
July 21, 1910.

Hon. John F. Fitzgerald, Mayor:

Sir,—In reply to the order of the City Council passed June 27, returned herewith, which you referred to this department, that the Board of Assessors be requested, through your Honor, to report to the City Council as to the alleged system

in assessment of property in the South End, we would say that property all over the City of Boston is assessed as the law requires, at the full and fair cash value.

Respectfully,
CHARLES E. FOLSON, Secretary.
Placed on file.

PURCHASE OF DOCK PROPERTY.

The following was received:

City of Boston,
Office of the Mayor, July 22, 1910.
To the City Council:
At the meeting of your honorable body held July 18, 1910, an order was passed to the effect that his Honor the Mayor and the Corporation Counsel be requested to take up the subject of the purchase by the city of the harbor front property known as the Commonwealth Dock, and adjacent land, and that the chief executive of the Commonwealth, his Excellency Governor Draper, be immediately requested to suspend further negotiations with the New York, New Haven & Hartford Railroad Company in reference to the lease of said property until the city shall first be given an opportunity to purchase.

I beg to inform you that I have conferred with the Corporation Counsel, and he states that there is no appropriation for the purchase of this land by the City of Boston, and no legislative authority for such purchase. Under the circumstances it seems to me that it would be unprofitable to carry the discussion any further.

Respectfully,
JOHN F. FITZGERALD, Mayor.
Placed on file.

GRADING, ETC., WELLESLEY PARK.

The following was received:

City of Boston,
Office of the Mayor, July 22, 1910.
To the City Council:
In compliance with the request contained in your order of June 27, that I authorize the transfer of seven hundred dollars (\$700) from the Reserve Fund, to be expended by the Superintendent of Public Grounds for the loaming and grading of Wellesley Park, Ward 20, for the planting of shrubs, etc., and for such other improvements as the superintendent may deem necessary, I have approved the transfer of the sum designated. A letter from the Superintendent of Public Grounds bearing upon this subject is appended herewith.

Respectfully,
JOHN F. FITZGERALD, Mayor.
City of Boston,
Public Grounds Department, July 12, 1910.
Hon. John F. Fitzgerald,
Mayor of the City of Boston:
Dear Sir,—In regard to the inclosed order of the City Council, dated June 27, 1910, "that his Honor the Mayor be requested to transfer the sum of \$700 from the Reserve Fund, said sum to be expended by the Superintendent of Public Grounds for the loaming and grading of Wellesley Park, Ward 20, for the planting of shrubs, etc., and for such other improvements as the superintendent may deem necessary," I would state that a small public area in Wellesley Park, Ward 20, was transferred from the Street Department to the Public Grounds Department last fall, without any provision being made for transforming it into a public park. To make it productive as such I have estimated that the amount of \$700 will be required for grading, loaming and planting, after which it will be included under the appropriation for general care and maintenance.
I would therefore recommend the approval of the inclosed order.

Respectfully yours,
D. H. SULLIVAN, Superintendent.
Placed on file.

PURCHASE OF PLAYGROUND, BRIGHTON.

The following was received:

City of Boston,
Office of the Mayor, July 22, 1910.
To the City Council:
At the meeting of your honorable body held June 27 I recommended for passage an order appropriating fifteen thousand dollars (\$15,000) for the purchase of a playground in Ward 25. This order was referred to the Committee on Finance and no report has yet been made by that committee. Since then an option has been secured from the S. H. Bennett heirs to purchase their land in the rear of No. 54 Market street, running through to Portsmouth street, for fifteen thousand dollars (\$15,000). This option will hold until October 1, 1910. I beg to recommend, therefore, for passage by your honorable body the appended order in place of that which was considered at the meeting of June 27.

Yours respectfully,
JOHN F. FITZGERALD, Mayor.

Ordered, That under the authority of chapter 292 of the Acts of 1892, and other acts or parts of acts in conformity therewith, the sum of fifteen thousand dollars (\$15,000) be appropriated, to be expended by the Board of Commissioners of Parks for the purchase of an estate in the rear of No.

54 Market street, running through to Portsmouth street, belonging to the heirs of S. H. Bennett, said estate to be used by the Board of Commissioners of Parks as a playground, and that to meet said appropriation the City Treasurer be authorized to issue, from time to time, on the request of the Mayor, bonds or certificates of indebtedness of the city to said amount.

Referred to the Committee on Finance.

STREET LIGHTING QUESTION.

The following was received:

City of Boston,
Office of the Mayor, July 22, 1910.
To the City Council:
In accordance with the suggestion contained in a communication from the Boston Finance Commission, dated July 22, 1910, a copy of which has been forwarded to you, that "the Mayor call a special meeting of the City Council to consider the street lighting question," I beg to suggest that the opportunity is afforded at to-day's session to consider the propositions contained in the above-mentioned letter, and to invite your earnest attention not only to the communication itself but to the appended report prepared by Mr. Guy C. Emerson, formerly Superintendent of Streets for the city and now consulting engineer to the Boston Finance Commission.

Respectfully,
JOHN F. FITZGERALD, Mayor.
Referred to the Executive Committee.

PETITIONS REFERRED.

The following petitions were received and referred to the committees named, viz.:

Claims.
Samuel Degel, for compensation for damage to property 9 Hull street by overflow of water.
James J. Brock, to be paid for extra gravel furnished on Rutherford avenue, Charlestown.

Faneuil Hall.
Petitions for use of Faneuil Hall, viz.:
Massachusetts Division, Sons of Veterans, October 31, 1910.
Parents and Teachers' Protective Association, daytime, July 28.

COAL AND COKE LICENSE.

A copy of coal and coke license granted by the Secretary of the Commonwealth was received.
Placed on file.

APPROVAL OF APPOINTMENT.

Notice was received from the Civil Service Commission of approval of appointment of Charles Bruen Perkins as Schoolhouse Commissioner of the City of Boston.
Placed on file.

APPROVAL OF PLANS.

Notice was received from the Board of Railroad Commissioners of approval of plans 26885, 26886, 26887 and 26888, said plans being railway stations of Boston Elevated Railway Company in Causeway street.
Placed on file.

ERECTION AND REMOVAL OF POLES.

Copies of orders were received from the Street Commissioners as follows:
Removal of four poles of New England Telephone and Telegraph Company of Massachusetts on Chelsea street, north from Scott's court, Ward 3.
Erection and removal of one pole of said company from Woodward street, Ward 15.
Removal of one pole of Edison Electric Light Company of Boston from Renfrew street, Ward 17.
Removal of poles of same company on Washington street, Ward 23, near the Arborway and Asticou road.
Transfer of two poles of same company on Ruggles street from the New England Telephone and Telegraph Company.
Placed on file.

STREET LIGHTING QUESTION.

A report was received from the Finance Commission in regard to the question of street lighting and referred to the Executive Committee.

FINANCE.

Coun. KENNY, for the Committee on Finance, submitted a report on message of Mayor, communications and order (referred May 27) for \$320,000 for the reconstruction of the Chelsea Bridge South (temporary bridge), Meridian Street Bridge and Broadway Bridge, rebuilding draw span—that the order ought to pass.

Report accepted; order read once and passed, yeas 8, nays 0.
Assigned for fourteen days for final action.

INSPECTION OF MILK.

Coun. COLLINS offered an order—That the Board of Health be requested to report to the City Council at its next regular meeting its opinion as to the inspection of milk at the source of supply.
Passed.

COST OF MILK INSPECTION.

Coun. COLLINS offered an order—That the Board of Health be requested to report to the City Council at its next regular meeting as to the cost of maintaining an adequate inspection of milk at the source of supply.

The order was read a second time and the question came on its passage.
The order was passed.

USE OF FANEUIL HALL.

Coun. CURLEY, for the Committee on Faneuil Hall, etc., submitted a report on petitions (referred to-day) for the use of Faneuil Hall—that leave be granted, viz.:

Parents and Teachers' Protective Association, daytime, Thursday, July 28.
Massachusetts Division, Sons of Veterans, October 31.

Reports accepted; leave granted on the usual conditions.

ADJOURNMENT.

Coun. KENNY—Mr. President, I move that we do now adjourn.

Coun. HALE—Mr. President, I would like to suggest that we have not taken up the Chelsea Bridge North matter. We should go into executive session and consider that. That is one bridge in regard to which the national government has given orders, and we should take action upon it.

Coun. KENNY—Mr. President, I think I shall have to urge my motion to adjourn.

The motion to adjourn was declared carried.
Coun. HALE doubted the vote and asked for the yeas and nays.

The motion to adjourn was carried, yeas 6, nays 2, Coun. BUCKLEY and HALE voting nay.

Adjourned at 4.45 p. m., to meet on Monday, August 29, at 3 p. m.

A PLAYGROUND STUDY.

On May 27, 1909, Mayor Reyburn of Philadelphia appointed a public playgrounds commission of five persons, whom he charged with the duty of investigating municipal recreation facilities in Philadelphia and other cities, and preparing for submission to councils a plan for the creation of such facilities on a comprehensive and adequate scale in Philadelphia. The city made an appropriation, and the members of the commission made visits to Boston, Chicago, Cleveland, Detroit, Buffalo, Rochester and New York to study what those cities had done. They have submitted their report which has been published in an illustrated pamphlet. This naturally makes an important contribution to playground literature. In addition to the excellent photographs of playgrounds and recreation centers, there are many folded-in maps and plans. Among the photographs those of Chicago play centers greatly predominate; but as they are partly familiar, perhaps the most interesting picture is that of Bamberger Park Playground in Dayton, showing how elaborately a small city has developed swimming and wading pools. The very practical recommendations of the report include legislative and financial plans, describe the various types of centers that should be created, and their location. The secretary of the commission is Otto T. Mallery. It should be said that shortly after the receipt of the report councils authorized the transfer of \$100,000 from the Department of Public Safety to the mayor, and then to this sum added an appropriation of \$25,000, these funds to be used for the salaries and expenses of the suggested playground commission.—*The Survey*.

CITY OF BOSTON.

PROPOSAL FOR THE RECONSTRUCTION OF EASTERN AVENUE WHARF.

The Commissioner of Penal Institutions Department of Boston invites bids for the reconstruction of Eastern Avenue Wharf, according to plans to be seen at the office of the City Engineer, 60 City Hall, Boston, and giving bond of a surety company approved by the Commissioner in the sum of \$3,000. Only bids made on forms obtained at the above office, 60 City Hall, and signed by bidder and left at the Commissioner's office, 32 Tremont street, on or before 12 m. Tuesday, August 9, 1910, with a certified check for \$500, payable to and to be the property of the city if the bid after acceptance is not carried out, will then and there be publicly opened and read. Duplicate bids, without check, must also be delivered to the City Auditor before the time specified for opening the bids. The Commissioner reserves the right to reject any or all bids and to give preference to bidders paying the trade unions' rate of wages. The bid should be inclosed in an envelope, sealed and marked "Bid for Eastern Avenue Wharf."

FRED S. GORE, Commissioner,
Penal Institutions Department.
July 29, 1910. (July 30-Aug. 6.)

CITY OF BOSTON.

PROPOSALS FOR FURNISHING AND DRIVING PILES.

The Superintendent of Streets of the City of Boston, office 47 City Hall, invites proposals for furnishing and driving spruce piles for sewerage works in Windsor street, between Cabot street and Shawmut avenue, Roxbury, and giving bond therefor of a surety company approved by the superintendent. Only proposals obtained at said office, filled out, signed by the bidder, and left at said office before 12 o'clock m. of Thursday, August 4, 1910, with a certified check for \$200, payable to and to be the property of the city if the proposal is not carried out, will at said hour and place be publicly opened and read. The proposals must be made in duplicate, the duplicate without check to be deposited by the bidder with the City Auditor previous to the time named for opening the bids. The undersigned reserves the right to give preference to the proposals of bidders agreeing to pay the trade unions' rate of wages and the right to reject any or all proposals. The proposals should be inclosed in an envelope, sealed and marked "Proposal for Pile Driving in Windsor Street."

LOUIS K. ROURKE,
Superintendent of Streets.
Boston, July 28, 1910. (July 30.)

CITY OF BOSTON.

PROPOSALS FOR BRICK BLOCK PAVEMENT.

The Superintendent of Streets of the City of Boston, office 47 City Hall, invites proposals for brick block pavement and regulating Damrell street, between Dorchester and Old Colony avenues, South Boston, and giving bond therefor of a surety company approved by the superintendent. Only proposals obtained at said office, filled out, signed by the bidder, and left at said office before 12 o'clock m. of Monday, August 8, 1910, with a certified check for \$1,000, payable to and to be the property of the city if the proposal is not carried out, will at said hour and place be publicly opened and read. The proposals must be made in duplicate, the duplicate without check to be deposited by the bidder with the City Auditor previous to the time named for opening the bids. The undersigned reserves the right to give preference to the proposals of bidders agreeing to pay the trade unions' rate of wages and the right to reject any or all proposals, and no proposal will be accepted unless a fair, reasonable price is bid for each item. The proposal should be inclosed in an envelope, sealed and marked "Proposal for Brick Block Pavement, Damrell street."

LOUIS K. ROURKE,
Superintendent of Streets.
Boston, July 28, 1910. (July 30.)

CITY OF BOSTON.

TO GENERAL CONTRACTORS.

The Schoolhouse Commissioners of the City of Boston invite sealed proposals for building addition to Polk Street School, Charlestown, Mass., and giving bond of a surety company therefor in the sum of \$7,000. Only proposals obtained at the office of the commissioners, 120 Boylston street, signed by the bidder and left before 12 o'clock m. of Monday, August 8, 1910, at said office, with a certified check for \$1,000 payable to the city if the proposal is not carried out, will then and there be publicly opened and read. The bid must be made in duplicate, the one with the check to be sent as above, the other to be sent to the City Auditor, City Hall. The commissioners reserve the right to reject any and all proposals and to give preference to bidders paying the trade unions' rate of wages.

CHARLES LOGUE,
JOHN F. KENNEDY,
CHARLES B. PERKINS,
Commissioners.
(July 30.)

CITY OF BOSTON.

PROPOSALS FOR CAST-IRON WATER PIPES AND SPECIAL CASTINGS.

The Water Commissioner of the City of Boston invites proposals for furnishing six hundred and fifteen (615) tons of 30-inch and 24-inch cast-iron water pipes, and twenty-five (25) tons of special castings, and giving bond of an approved surety company doing business in Massachusetts, in the sum of five thousand (5,000) dollars, therefor. Only proposals obtained at the office of the Water Commissioner, Room 58, City Hall, Boston, signed by the bidder and there left before 12 o'clock, noon, of Monday, August 8, 1910, with a certified check for five hundred (500) dollars, payable to and to be the property of the City of Boston if the proposal is not carried out, will then and there be publicly opened and read. A duplicate sealed bid, without check, must be deposited with the City Auditor before the time above specified. The commissioner reserves the right to reject any or all proposals, and to give preference to bidders paying the trades unions' rate of wages.

WILLIAM E. HANNAN,
Water Commissioner.
(July 30.)

CITY OF BOSTON.

PROPOSALS FOR REPAIRING WARREN BRIDGE.

The Superintendent of Streets of the City of Boston, office 47 City Hall, invites proposals for repairing the faces of the draw piers at Warren Bridge according to plans to be seen at the office of the City Engineer, Room 60, City Hall, and giving bond therefor of a surety company approved by the superintendent, to secure the due performance of the contract and the full protection of the city. Forms of bids may be obtained at the said office of the Superintendent of Streets. Each bid should be inclosed in an envelope, sealed, marked "Bid for Repairing Warren Bridge," and left at the said office of the Superintendent of Streets before 12 m. on Wednesday, August 10, 1910, with a certified check for two hundred dollars (\$200), payable to and to become the property of the city if the bid after acceptance is not carried out. The bids will then and there be publicly opened and read. Bids must be made in duplicate, the duplicate without check to be deposited by the bidder with the City Auditor previous to the time named for opening the bids. The undersigned reserves the right to give preference to the proposals of bidders agreeing to pay the trade unions' rate of wages and the right to reject any or all proposals.

LOUIS K. ROURKE,
Superintendent of Streets.
Boston, July 28, 1910. (July 30.)

CITY OF BOSTON.

PROPOSALS FOR ASPHALT PAVEMENT.

The Superintendent of Streets of the City of Boston, office 47 City Hall, invites proposals for asphalt pavement and regulating Parkman street, between North Russell and Blossom streets, City Proper, and giving bond therefor of a surety company approved by the superintendent. Only proposals obtained at said office, filled out, signed by the bidder and left at said office before 12 o'clock m. of Monday, August 8, 1910, with a certified check for \$500, payable to and to be the property of the city if the proposal is not carried out, will at said hour and place be publicly opened and read. The proposals must be made in duplicate, the duplicate without check, to be deposited by the bidder with the City Auditor previous to the time named for opening the bids. The undersigned reserves the right to give preference to the proposals of bidders agreeing to pay the trades unions' rate of wages, and the right to reject any or all proposals, and no proposals will be accepted unless a fair, reasonable price is bid for each item. The proposals should be inclosed in an envelope, sealed and marked: "Proposal for Asphaltizing Parkman Street."

LOUIS K. ROURKE,
Superintendent of Streets.
Boston, July 28, 1910. (July 30.)

CITY OF BOSTON.

PROPOSALS FOR LAND IN WARD 7.

The Park Commissioners of Boston invite proposals for the sale to the city of suitable land for a playground in Ward 7, the proposals to state location, area (from $\frac{1}{4}$ to $\frac{1}{2}$ of an acre) and price per square foot of the land offered, to be marked "Proposals for Land for Playground," and sent by mail, or otherwise, to the office of the Board, Olmsted Park, Jamaica Plain, on or before 12 m. of August 6, 1910. Proposals which are more than 25 per cent higher than the average assessed valuation of the property during the previous three years cannot be considered. The Board reserves the right to reject any or all proposals.

ROBERT S. PEABODY,
JAMES M. PRENDERGAST,
DANIEL H. COAKLEY,
Commissioners.
(July 30.)

CITY OF BOSTON.

PROPOSALS FOR SEWERAGE WORKS.

The Superintendent of Streets of the City of Boston, office 47 City Hall, invites proposals for building sewerage works in Geneva avenue, from Blue Hill avenue to Columbia road, Dorchester, and giving bond therefor of a surety company approved by the superintendent in the sum of three thousand dollars (\$3,000), to secure the due performance of the contract and the full protection of the city. Forms of bids may be obtained at the said office of the Superintendent of Streets. Each bid should be inclosed in an envelope, sealed, marked "Bid for Building Sewerage Works in Geneva Avenue," and left at the said office of the Superintendent of Streets before 12 m. on Tuesday, August 9, 1910, with a certified check for six hundred dollars (\$600), payable to and to become the property of the city if the bid after acceptance is not carried out. The bids will then and there be publicly opened and read. Bids must be made in duplicate, the duplicate without check to be deposited by the bidder with the City Auditor previous to the time named for opening the bids. The undersigned reserves the right to give preference to the proposals of bidders agreeing to pay the trade unions' rate of wages and the right to reject any or all proposals.

LOUIS K. ROURKE,
Superintendent of Streets.
Boston, July 28, 1910. (July 30.)

CITY OF BOSTON.

PROPOSALS FOR MACADAM ROADWAY.

The Superintendent of Streets of the City of Boston, office 47 City Hall, invites proposals for constructing a macadam roadway in Bucknam street, between Lawn street and Fisher avenue, Roxbury, and giving bond therefor of a surety company approved by the superintendent. Only proposals obtained at said office, filled out, signed by the bidder, and left at said office before 12 o'clock m. of Monday, August 8, 1910, with a certified check for \$300, payable to and to be the property of the city if the proposal is not carried out, will at said hour and place be publicly opened and read. The proposals must be made in duplicate, the duplicate without check to be deposited by the bidder with the City Auditor previous to the time named for opening the bids. The undersigned reserves the right to give preference to the proposals of bidders agreeing to pay the trade unions' rate of wages and the right to reject any or all proposals, and no proposal will be accepted unless a fair, reasonable price is bid for each item. The proposals should be inclosed in an envelope, sealed and marked "Proposal for Macadam Roadway in Bucknam Street."

LOUIS K. ROURKE,
Superintendent of Streets.
Boston, July 28, 1910. (July 30.)

CITY OF BOSTON.

TO HEATING CONTRACTORS.

The Schoolhouse Commissioners of the City of Boston invite sealed proposals for making repairs to the steam heating apparatus in miscellaneous schoolhouses and doing other work incidental thereto, and giving bond of a surety company therefor in the sum of \$2,000. Only proposals obtained at the office of the commissioners, 120 Boylston street, signed by the bidder and left before 12 o'clock m. of Thursday, August 11, 1910, at said office, with a certified check for \$500, payable to the city if the proposal is not carried out, will then and there be publicly opened and read. The bid must be made in duplicate, the one with the check to be sent as above, the other to be sent to the City Auditor, City Hall. The commissioners reserve the right to reject any and all proposals and to give preference to bidders paying the trade unions' rate of wages.

CHARLES LOGUE,
JOHN F. KENNEDY,
CHARLES B. PERKINS,
Commissioners.
(July 30.)

CITY OF BOSTON.

PROPOSALS FOR COAL.

The Supply Department of the City of Boston solicits proposals for furnishing the Parental School, Spring street, West Roxbury, with 900 tons semi-bituminous steaming coal of the best quality, either New River, Pocahontas or Georges Creek; must be free from excessive sulphur, slate, moisture or dirt. Proposals will be received at the office of the superintendent until 12 o'clock, Wednesday, August 3, at which time and place the bids will be publicly opened and read. A bid in duplicate must be filed with the City Auditor prior to that time. The successful bidder must deposit a certified check for one-quarter the amount of the contract, as surety that the terms of the contract will be carried out. The superintendent reserves the right to reject or accept bids.

J. EDWARD MULLEN,
Superintendent of Supplies.

CITY RECORD

OFFICIAL PUBLICATION OF THE CITY OF BOSTON.

VOL. 2.

SATURDAY, AUGUST 6, 1910.

No. 32

City of Boston.

CITY RECORD.

Published weekly under legislative act by the
City of Boston, Mass.

By SUBSCRIPTION . . . \$1.00 Per Year.
SINGLE COPIES . . . 5 Cents.
IN ADVANCE.

ADVERTISING.

A rate of 10 cents per agate line has been established for such advertisements as under the law must be printed in the *City Record*. Advertising and other copy must be in hand by Thursday of each week to insure its publication in the Saturday issue.

Copies for sale at the Mayor's Office, Room 27, City Hall.

MUNICIPAL SERVICE.

Complaints, inquiries or suggestions regarding the work of municipal departments should be made in writing to the officials directly in charge. The failure of such officials to make reply within a reasonable length of time should be brought to the attention of the Mayor. Communications should be directed as follows:

TO THE BOARD OF STREET COMMISSIONERS, Room 41, City Hall, for information relative to the laying out, relocation, widening and discontinuance of highways; the taking of real property for municipal purposes; the assessments of betterments for streets and sewers; the plotting of undeveloped areas for streets and the opening of private ways; the granting of licenses for the storage or sale of merchandise in public streets; the regulation of street traffic; the making of specific repairs in public streets; the naming of public streets; the planting and removal of trees in public ways; the issuing of licenses for the storage of gasoline, oil and other inflammable substances or explosive compounds; the use of the public ways for any permanent or temporary obstruction or projection in, under or over the same, including the location of conduits, poles and posts for telephone, telegraph, street railway or illuminating purposes, signs, marquis, bay windows, coal holes and vaults.

TO THE SUPERINTENDENT OF STREETS, Room 44, City Hall, for information as to

Sullivan, teamster, ¾ day at \$2.25, \$1.69; Thomas Bowen, teamster, ¾ day at \$2.25, \$1.41; Michael F. Burke, teamster, ½ day at \$2.50, \$1.25; Raffaele Curcio, teamster, 1½ days at \$2.25, \$3.94; Daniel J. Heffernan, teamster, ¾ day at \$2.25, \$1.69; David Leo, teamster, ¾ day at \$2.25, \$1.69; Thomas Magee, teamster, ¾ day at \$2.25, \$1.69; Jeremiah J. McLaughlin, teamster, 2½ days at \$2.50, \$5.63; Mathew I. Nolan, teamster, 1 day at \$2.50, \$2.50; Timothy Noonan, teamster, 1 day at \$2.25, \$2.25; James J. O'Brien, teamster, ¾ day at \$2.25, \$1.69; John J. O'Brien, teamster, ¾ day at \$2.25, \$1.69; Edward A. Pyne, teamster, ¾ day at \$2.25, \$1.69; Michael Ronan, teamster, ¾ day at \$2.25, \$1.69; John C. Thompson, teamster, ¾ day at \$2.25, \$1.69; Thomas Williams, teamster, 1½ days at \$2.25, \$2.74; Timothy J. O'Leary, laborer, 1 day at \$2.25, \$2.25; Isaac Saperstein, repairer, ½ day at \$2.50, \$0.63; Michael Mulloy, laborer, ¼ day at \$2.25, \$0.56; William Smyrle, laborer, ¼ day at \$2.25, \$0.56; Robert J. Doyle, plumber, 1½ days at \$3, \$3.75; John J. Welch, plumber's helper, 1½ days at \$2.25, \$0.98; Jeremiah Fenton, laborer, ½ day at \$2.25, \$1.13; John Cronin, laborer, ½ day at \$2.25, \$1.13; James McMahon, laborer, ½ day at \$2.25, \$0.28; George Greer, repairer, ½ day at \$2.75, \$0.34; Mathew Brennan, inspector, ¼ day at \$3, \$0.75; Daniel Shields, laborer, ¼ day at \$2.25,

\$0.56; John McLaughlin, laborer, $\frac{1}{2}$ day at \$2.25, \$0.56; Salvatore LoPilato, laborer, $\frac{1}{2}$ day at \$2.25, \$0.56; Patrick J. Kelly, inspector, $2\frac{1}{2}$ days at \$2.95, \$7.38; Joseph T. Ryan, plumber, $\frac{1}{2}$ day at \$3, \$1.50; Patrick Lawless, plumber's helper, $\frac{1}{2}$ day at \$2.25, \$1.13; Patrick Gorham, laborer, $\frac{1}{2}$ day at \$2.25, \$0.28; Thomas J. Toolin, laborer, $\frac{1}{2}$ day at \$2.25, \$0.56; Hugh Campbell, repairer, $1\frac{1}{2}$ days at \$2.50, \$3.75; Cornelius Sullivan, 2d, laborer, $1\frac{1}{2}$ days at \$2.25, \$3.38; Michael F. Daly, 2d, laborer, $1\frac{1}{2}$ days at \$2.25, \$3.38; John Sheehan, laborer, $1\frac{1}{2}$ days at \$2.25, \$3.38; Michael McLaughlin, repairer, $1\frac{1}{2}$ days at \$2.50, \$3.75; Richard P. Collins, inspector, $1\frac{1}{2}$ days at \$2.75, \$4.13; John Ganley, pipe layer, $\frac{3}{4}$ day at \$2.75, \$2.06; John Mahan, laborer, 2 days at \$2.25, \$4.50; Michael Galvin, watchman, 1 day at \$2.25, \$2.25; John McCormick, 2d, watchman, 1 day at \$2.25, \$2.25; John Rogers, watchman, 1 day at \$2.25, \$2.25; Patrick Joyce, watchman, 1 day at \$2.25, \$2.25; Eugene T. Shea, watchman, 1 day at \$2.25, \$2.25; Jeremiah Sullivan, watchman, 1 day at \$2.25, \$2.25.

CONTRACTS AWARDED.

The following contracts for work, materials and supplies have been awarded with the approval of the Mayor. Those awarded without public advertisement are specially indicated. Week ending August 4, 1910:

HOSPITAL DEPARTMENT.

On August 3 the Mayor approved a contract with the Staples Coal Company for furnishing the hospital with 5,300 tons of semi-bituminous coal. Bids for furnishing this material, opened July 20, 1910, were as follows:

Staples Coal Company, \$3.52 per ton; E. B. Townsend Coal Company, \$3.77 per ton; New England Coal and Coke Company, \$3.95 per ton.

SCHOOLHOUSE DEPARTMENT.

On August 1 the Mayor approved a contract with Edwin C. Lewis, Inc., for electric work in the Public Latin and English High School. Bids on this work, opened July 26, 1910, were as follows:

E. C. Lewis, Inc., \$2,645; Alfred J. Hixon, \$2,730; M. B. Foster Electric Company, \$2,791; Wood-Allis Company, \$2,875.20.

On August 3 the Mayor approved a contract with James P. Dwyer for setting and piping up boilers in the Atherton and Walnut Street Schoolhouses. Bids on this work, opened July 27, 1910, were as follows:

	Atherton Street.	Walnut Street.
James P. Dwyer.....	\$2,193 00	\$722 00
J. J. Hurley & Co.....	2,364 00	763 00
Huey Brothers Company..	2,327 00	777 00
Laskey & McMurrer.....	2,211 00	795 00
Smith-Alden Company....	2,496 00	753 00
F. W. Zemeir & Co.....	2,397 00	764 00

On August 3 the Mayor approved a contract with J. J. Hurley & Co. for setting and piping up boilers in the Francis Parkman Schoolhouse. Bids on this work, opened July 27, 1910, were as follows:

J. J. Hurley & Co., \$1,265; James P.

Dwyer, \$1,358; Huey Brothers Company, \$1,387; Laskey & McMurrer, \$1,357; Smith-Alden Company, \$1,435; F. W. Zemeir & Co., \$1,342.

On August 3 the Mayor approved a contract with C. D. Redmond for fitting up physical laboratory of the Girls' High School. Bids on this work, opened July 29, 1910, were as follows:

C. D. Redmond, \$1,996, and J. F. Flaherty, \$2,565.

STREET DEPARTMENT (Sewer Division).

On July 29 the Mayor approved a contract with John McCourt & Co. for building pipe sewers in Warwick street, Roxbury. Bids on this work, opened July 26, 1910, were as follows:

John McCourt & Co., \$5,376.39; Commonwealth Construction Company, \$5,550.60; John A. Costello & Co., \$5,600.95; E. F. Kennelly, \$5,713.45; Antony Cefalo, \$6,029.05; Commonwealth Construction and Supply Company, \$6,066.35; A. M. Cusack, \$6,163; J. C. Coleman & Sons Company, \$7,109.

On July 29 the Mayor approved a contract with A. M. Cusack for building pipe sewers in Downer avenue, Dorchester. Bids on this work, opened July 26, 1910, were as follows:

Bianco Brothers Company (informal) \$399; A. M. Cusack, \$465.11; Charles J. Jacobs Company, \$487.02; Commonwealth Construction Company, \$504.30; John McCourt & Co., \$540.20; J. B. O'Rourke & Co., \$596.50; J. C. Coleman & Sons Company, \$667.

On July 29 the Mayor approved a contract with McCarthy & Walsh for building sewerage works in Corey road, Brighton. Bids on this work, opened July 25, 1910, were as follows:

McCarthy & Walsh, \$2,928.45; J. C. Coleman & Sons Company, \$2,982; John McCourt & Co., \$3,107; J. B. O'Rourke

& Co., \$3,483.30; H. M. McBride, \$3,875.

On July 29 the Mayor approved a contract with Antony Cefalo for building sewerage works in Centre street, West Roxbury. Bids on this work, opened July 25, 1910, were as follows:

Antony Cefalo, \$3,150.15; Commonwealth Construction Company, \$4,152.40; Murphy & Dolan, \$4,267.80; A. M. Cusack, \$4,700.40; McCarthy & Walsh, \$4,919; J. B. O'Rourke & Co., \$5,535.35.

On August 1 the Mayor approved a contract with the J. C. Coleman & Sons Company for building pipe sewer in Beacon street, Brighton. Bids on this work, opened August 1, 1910, were as follows:

J. C. Coleman & Sons Company, \$1,888.75; John A. Costello & Co., \$2,039.17; E. F. Kennelly, \$2,258.75; A. M. Cusack, \$2,284.75; Bianco, Stututi & Cavnararo, \$2,379.70; Commonwealth Construction Company, \$2,467.05; Commonwealth Construction and Supply Company, \$2,498.75.

SUPPLY DEPARTMENT.

On August 1 the Mayor approved a contract with Hosmer, Robinson & Co. for No. 1 hay and straw in the districts named. Bids for supplying these goods, opened July 27, were as follows:

	No. 1 Hay.	Straw.
SOUTH BOSTON.		
Hosmer, Robinson & Co.....	\$24 25	\$14 50
EAST BOSTON.		
Hosmer, Robinson & Co.....	24 25	14 50

WITHOUT ADVERTISING.

ELECTION DEPARTMENT.

On August 3 the Mayor, in view of the following representations, approved a contract, awarded without advertising, with Thomas McMann for maintaining lanterns on the voting booths throughout the city.

"When voting booths are placed in public highways it becomes incumbent upon the Election Board to cause the same to be lighted for the protection of travelers on said highways. We shall have to light approximately sixty-eight booths each night after the same have been placed on the highways. We held a

conference with a committee of the lamp-lighters of Boston who offered to do this work for the sum of ten cents per lantern per night.

"For the past two years this work has been performed by Thomas McMann at the price of seven cents per lantern per night. He is now familiar with this work and in the past has properly safeguarded the interests of the city. He did all that was required of him under his contract in a proper manner. He is willing to do the work this year for the same price, which we consider reasonable. We respectfully request your consent to give this work to Thomas McMann at the price above stated, namely, seven cents per lantern per night.

"Respectfully,
"BOARD OF ELECTION COMMISSIONERS,
"(Signed) JOHN M. MINTON,
"Chairman."

On July 28 the Mayor, in view of the following representation, approved a contract, awarded without advertising, with the John Cavanagh & Son Building Moving Company for the transportation of voting booths during the year, at an estimated cost of \$730.

"The number of booths that will be placed on public highways and lots of Boston this year will be about seventy-three. Since 1898 these booths have been moved out and in by the firm of John Cavanagh & Son Building Moving Company, at a price of \$10 per booth each way, and said firm is willing to do the work this year for the same price. This firm has trucks which were specially constructed for moving voting booths and its method of moving the booths has been entirely satisfactory to this department.

"We respectfully request, therefore, that the Mayor give his consent to this department to give this work to the firm of John Cavanagh & Son Building Moving Company at the price above stated.

"Respectfully,
"BOARD OF ELECTION COMMISSIONERS,
"(Signed) JOHN M. MINTON,
"Chairman."

SCHOOLHOUSE DEPARTMENT.

On August 3 the Mayor, in view of the following representation, approved a contract, awarded without advertising, with John Quin & Son for furnishing, delivering and setting up benches and cases in the Mechanic Arts High School, at an estimated cost of \$1,494.

"In explanation of the accompanying papers asking your permission to award a contract without advertising to the Otis Wood Works (John Quin & Son) in the sum of \$1,494, for benches, cases, etc., I would say that Dr. Parmenter, principal of the Mechanic Arts High School, called upon me and permission was given him to obtain competitive figures without advertising and with the following result:

"Otis Wood Works, \$1,494; Ira G. Hersey, \$1,697; Joseph F. Paul Company, \$1,988.

"If the work were advertised I doubt if more than the above firms would figure and it can be safely said that they are the representative concerns for this sort of work. It is also essential that the work be finished and installed before school opens in September next.

"(Signed) CHARLES LOGUE,
"Chairman Schoolhouse Commission."

SUPPLY DEPARTMENT.

On August 1 the Mayor approved a contract with J. H. MacAlman for one second-hand "Columbia" 9090 motor

car at \$1,800 to be delivered to the Street Department. The authority for awarding this contract was approved by the Mayor on July 28, 1910.

ADDITIONS AND ALLOWANCES TO CONTRACTS.

BATH DEPARTMENT.

The Mayor has approved three additions to the contract with Mack & Moore for erecting the East Boston Gymnasium and public baths, as follows: \$200 on account of filling in automobile entrance; \$240 on account of changes in the electrical work; \$175 on account of change in sidewalk construction. Original contract, \$64,650; total additions, \$3,970; total deductions, \$1,192; contract as standing, \$67,428.60.

SCHOOLHOUSE DEPARTMENT.

The Mayor has approved the following additions to contracts:

Addition, amounting to \$134.53, to the contract with Robert F. Brown on the Dorchester High School addition, on account of excess cost of drinking fountains, excess cost of finish for water-closet seats, changing location of supply pipe risers and clean-out on soil pipe and installing floor wash in basement corridor. Original contract, \$5,709; total additions, \$471.53; contract as standing, \$6,180.53.

Addition, amounting to \$1,171.80, to the contract with John F. Griffin Company on the Peter Faneuil Schoolhouse, for paving driveway with vitrified paving brick on concrete base. Original contract, \$90,781; total additions, \$1,852.65; total deductions, \$1,272.60; contract as standing, \$91,041.90.

SCHEDULE OF BAND CONCERTS ARRANGED BY MUSIC DEPARTMENT, SEASON 1910.

The following schedule of band concerts has been prepared by the Music Commission for the season of 1910:

Boston Common, Sunday afternoons at 3.30 p. m., July 17 to September 4, inclusive. Kanrich's Band, Albert M. Kanrich, leader.

Marine Park.
August 7, 3.30 p. m., Ernest S. Williams' Band, E. S. Williams, leader.
August 14, 3.30 p. m., First Corps Coast Artillery Band, W. A. Cushing, leader.
August 21, 3.30 p. m., Teel's Military Band, B. F. Teel, leader.
August 28, 3.30 p. m., Ninth Regiment Band, W. A. Barrington-Sargent, leader.
September 4, 3.30 p. m., Ives' Military Band, D. A. Ives, leader.

Pine Bank, Jamaica Pond. Sunday afternoons.
August 7, 3.30 p. m., E. G. Bates' Band, E. G. Bates, leader.
August 14, 3.30 p. m., Ernest S. Williams' Band, E. S. Williams, leader.
August 21, 3.30 p. m., First Corps Coast Artillery Band, W. A. Cushing, leader.
August 28, 3.30 p. m., Banda Rossa, A. D'Avino, leader.
September 4, 3.30 p. m., First Corps Cadets Band, J. B. Fielding, leader.

Wood Island Park. Sunday afternoons.
August 14, 3.30 p. m., Stone's Military Band, George B. Stone, leader.
August 28, 3.30 p. m., Ives' Military Band, D. A. Ives, leader.

Abbottswood, Franklin Park. Saturday afternoons, 3.30 p. m.
July 23 to September 3, 1910, inclusive, Municipal Band, Albert M. Kanrich, leader.

School playgrounds and institution concerts.
August 10, Franklin Park (special).
August 12, Long Island, 3 p. m.
August 17, 10 a. m., Cyrus Alger School, South Boston.
August 18, Long Island, 3 p. m.
August 24, 10 a. m., Frothingham School, Charlestown.
August 30, 10 a. m., Hancock School, city.

District concerts, given in different sections of the city by the Municipal Band, Albert M. Kanrich, leader. Concerts to be from 8 to 10 p. m.
August 8, Codman square, Dorchester.
August 9, Washington park, Roxbury.
August 10, Roslindale Playground.

August 11, Eaton square, Dorchester.
August 12, Ashley avenue and Breed street, East Boston.
August 15, Albany and Dearborn streets, Roxbury.
August 16, Emerald and Compton streets, city.
August 17, Edward Everett square, Dorchester.
August 18, Billings Field, West Roxbury.
August 19, Charlesbank.
August 22, Central square, East Boston.
August 23, Columbus Avenue Playground.
August 24, Talbot and Welles avenues, Dorchester.
August 25, Hayes square, Charlestown.
August 26, Christopher Gibson Playground.
August 29, Hyde Park avenue and Mt. Hope street.
August 30, Blue Hill avenue and Walk Hill street.
August 31, North square, city.
September 1, St. Alphonsus and Calumet streets, Roxbury.
September 2, North Brighton Playground.

All communications relating to the concerts should be addressed to the secretary of the Music Trustees, Carney Building, Room 905.

The regular series of winter concerts will start on or about December 1, 1910. Tickets are free on application. The concert is instructive, entertaining and recreative.

AUTHORITY TO DO WORK WITH DIVISION FORCES.

STREET DEPARTMENT (Highway Division).

On July 29 the Mayor authorized the Superintendent of Streets to resurface, with the division force, Foster street, between Washington street and Commonwealth avenue.

On August 1 the Mayor authorized the Superintendent to resurface (macadam), with the division force, George street, from Shirley street to Hampden street; Englewood avenue; Cambridge street, from Warren street to Washington street; Clifton street, from Dudley street to Shirley street.

On August 4 the Mayor authorized the Superintendent to resurface, with the division force, Norfolk street, from Walk Hill street to Blue Hill avenue.

STREET DEPARTMENT (Sewer Division).

On July 29 the Mayor authorized the Superintendent to build, with the department force, surface drains in Harvard avenue, between Washington street and Harvard street, Dorchester, and in Haskins street, between Ruggles street and Vernon street, Roxbury; also a sanitary sewer in Pitts street, between Merrimac street and Pitts court, city proper.

On August 4 the Mayor authorized the Superintendent to build, with the department force, a sanitary sewer in Addison street, between Saratoga street and Pope street, East Boston.

LAND TAKING FOR SCHOOL.

On August 4 the Mayor approved the vote of the Schoolhouse Commissioners to request the Board of Street Commissioners to take for the purpose of increasing the size of the yards of the Polk Street and Medford Street Schools a certain piece or parcel of land situate in the Prescott District, Charlestown, and bounded and described as follows:

Beginning at a point the intersection of the northwesterly line of Polk street and the southwesterly line of Medford street; thence turning and running northwesterly by the line of Medford street to land of the City of Boston, 94 feet; thence turning and running by land of said city to other land of said city, 85 feet; thence turning and running southeasterly by land of said city to line of Polk street, 94 feet; thence turning and running northeasterly by line of Polk street to point of beginning 85 feet and containing 7,560 square feet of land, be all said measurements more or less.

SETTLEMENT FOR SCHOOL- TAKING.

On August 4 the Mayor approved a vote of the Street Commissioners awarding Bertha M. Eichler \$9,100 for damages occasioned her estate corner of Ferdinand and Melrose streets by taking made for schoolhouse purposes; the said settlement being made on the advice of the Law Department.

LICENSE TO MAINTAIN BUILDING OVER EASEMENT.

On August 3 the Mayor approved an instrument giving Timothy A. Keliher a license to maintain a bay window within a strip of land near Malta street, Dorchester, in which the city holds an easement for sewerage purposes.

PETITIONS GRANTED.

The following petitions granted by the Board of Street Commissioners have been approved by the Mayor:

Street Railway Locations.—West End Street Railway Company, Geneva avenue, Bowdoin street to Park street; Dudley street, Harrison avenue to Magazine street; Devonshire street, Washington street and Adams square; junction of Tremont and Northampton streets; Longwood avenue, Huntington avenue to Brookline avenue.

Pole Locations.—New England Telephone and Telegraph Company, to erect three poles on Elmira street, Ward 25; to attach wires to pole of the West End Street Railway Company and Postal Telegraph Cable Company on Washington street, near Grove street, West Roxbury; to erect and remove one pole on Sleeper street, near Congress street; to erect and remove one pole on Topliff street, corner Draper road. West End Street Railway Company, to erect and remove one pole on Dorchester avenue, north of West Fourth street. Edison Electric Illuminating Company, to remove poles on Granby, Sherborn, Deerfield and Back streets.

PERMISSION TO SELL.

STREET DEPARTMENT.

On August 1 the Mayor granted the Superintendent of Streets permission to sell a lot of junk and old material, the property of the Highway Division of the Street Department, the estimated value being \$250.

On August 1 the Mayor granted to the superintendent permission to sell lot of junk and old material, the property of the Sanitary Division of this department, the estimated value being \$325.

On August 1 the Mayor granted to the superintendent permission to sell lot of junk and old material, the property of the Sewer Division of this department, the estimated value being \$425.

WATER COMMISSIONER.

On August 4 the Mayor granted to the Water Commissioner authority to sell a lot of old cast-iron junk, to an amount not exceeding five hundred (500) dollars.

STREET COMMISSIONERS.

On August 3 the Mayor approved orders of the commissioners providing for the widening and construction of Dartmouth street, from St. James avenue to Stuart street; for the widening and construction of Trinity place, from St. James avenue to Stuart street; for the widening and construction of Stuart street, from Trinity place to Dartmouth street; and for the widening and construction of St. James avenue, from Trinity place to Dartmouth street. In each case the Board determined that no one sustained damages on account of said widening and no benefits are to be assessed on the abutting estates.

CLAIMS.

On August 4 the Mayor approved an award of \$250, made by the Committee on Claims of the City Council, to the estate of Herbert D. Hale, for services of Mr. Hale in adjusting a claim made on account of the construction of the Cabot Street Bath House, the said award having been approved by the Bath Trustees and the Corporation Counsel.

ADJUSTMENT OF LAND INTER- ESTS OF OLD ART MUSEUM.

In connection with the above widenings the Trustees of the Copley Square Trust decided to the city the lands taken for the widening of said streets and agreed to construct the same free of cost to the city in a manner satisfactory to the Superintendent of Streets; and the Mayor, in connection with this transaction, executed to the said trustees a release of the restrictions upon the remaining land owned by the city.

AMERICANS LOSE AN OPPORTUNITY.

Financial Engineering of the European sort has scored another great contract in South America, according to our consul at Buenos Ayres. The Argentine Government has approved a contract with the Port Argentine Great Central Railways Company by which the latter agrees to construct within five years a deep-water harbor for vessels of 30 feet draft nearly opposite Montevideo. The work comprises the construction of wharves, bulkheads and sheds, with railway connections, electrically operated dock equipment and all the facilities necessary for an important shipping point. A large amount of dredging will also be done. One of the features of the port will be a dry dock of sufficient size to accommodate the large warships now being built for the Argentine navy in the United States. The city which will be built up about the new port has already attracted the attention of investors in the packing industry, the grain business and other fields for which excellent shipping facilities are desirable, and the report furnished by our consul indicates that the prospects of the new port may properly be termed very promising. The whole undertaking, except in certain minor details for which concessions have been granted to private parties, is in the hands of French bankers, among whom the firm which is building the Loetschberg tunnel in Switzerland is prominent. It is impossible for an American acquainted with the progressive character and financial responsibility of the Argentine people to view with equanimity the award of such a contract to a European syndicate. The successful prosecution of the undertaking will give the French syndicate a strong hold in the Argentine Republic and make it so much the more difficult for Americans to gain a good position among competitors for the trade of the country when the time comes for our export business to receive more attention than is now paid to it. Moreover, the delay of our financial people in entering this special line of engineering finance is keeping them from a field of investment which European capitalists have found very profitable.

— *Engineering Record.*

FIRST TRIAL OF RAPID TRANSIT BUILD- ING BY ASSESSMENT.

Brooklyn, N. Y.—Steps for building the first subway on the assessment plan, which the new law permits, were taken when the Public Service Commission adopted a resolution laying out a rapid transit route in Utica avenue, Brooklyn, south from the Eastern Parkway to a place in Flatbush avenue, near to Jamaica Bay. The action was the result of a petition signed by a majority of the property owners along the proposed route and who have announced their willingness to have the road built by assessing the cost on the territory benefited.— *Municipal Journal and Engineer.*

PROCEEDINGS OF CITY COUNCIL.

Monday, August 1, 1910.

Special meeting of the City Council, held in the Council Chamber, City Hall, at three o'clock p. m., President BALLANTYNE in the chair and all the members present.

The Council voted, on motion of Coun. BRAND, to dispense with the reading of the records of the last meeting.

The Clerk read the call of the meeting, as follows:

City of Boston,

Office of the Mayor, July 28, 1910.

To the Members of the City Council:

You are hereby requested to assemble in the City Council Chamber on Monday, August 1, 1910, at 4 p. m., to take suitable action upon an order provided for additional ferryboats and to transact such other business as may legally come before the meeting.

Respectfully,

JOHN F. FITZGERALD, Mayor.

Placed on file.

City of Boston,

Office of the Mayor, July 29, 1910.

To the Members of the City Council:

It has been deemed desirable to change the hour of meeting on Monday next, and you are therefore requested to assemble in the City Council Chamber at three o'clock instead of four o'clock, which was the hour designated in the previous notice.

Respectfully,

JOHN F. FITZGERALD, Mayor.

Placed on file.

INSPECTION OF MILK.

The following was received:

City of Boston,

Office of the Mayor, August 1, 1910.

To the City Council:

I beg to transmit the inclosed communication from the chairman of the Board of Health in reply to an order passed by your honorable body at its meeting of July 22, to the effect "that the Board of Health be requested to report to the City Council at its next regular meeting its opinion as to the inspection of milk at the source of supply."

Respectfully,

JOHN F. FITZGERALD, Mayor.

Health Department, Old Court House,
Boston, August 1, 1910.

To His Honor the Mayor and City Council:

Gentlemen,—The Board of Health is in receipt of an order from the City Council, through his Honor the Mayor, requesting the Board of Health to report to the City Council at its next regular meeting its opinion as to the inspection of milk at the sources of supply and as to the cost of maintaining an adequate inspection of said sources of supply. The Board of Health begs to say in reply that it regards an inspection of all milk dairies furnishing milk to Boston as very desirable and of great advantage in promoting the production of clean and safe milk. The Board would also say that it already requires a complete inspection of such dairies to be made and reported to the Board of Health by its licensees who are now bringing milk into Boston for sale. This inspection service by the licensees will be reported hereafter on uniform cards already prepared by this Board for such use and for the proposed inspection service to be done at the expense of the city. The Board earnestly desires to start its own corps of inspectors as a check upon the inspection now being done by the licensees and respectfully asks for an extra appropriation of \$12,000 with which to install and maintain such inspection for the remainder of the present fiscal year.

Very respectfully,

SAMUEL H. DURGIN, Chairman.

Placed on file.

SIDEWALK, WELD HILL STREET—VETO.

The following was received:

City of Boston,

Office of the Mayor, August 1, 1910.

To the City Council:

I return herewith without my approval your order directing the Superintendent of Streets to "make an artificial stone sidewalk along Weld Hill street, from Hyde Park avenue to the cemetery fence, Ward 23."

The officials of the Street Department report that the present walk is of gravel, that its general condition is very good, that to carry out the provisions of the order would entail an expenditure of some \$4,500, and that this amount cannot be spared at this time.

Respectfully,

JOHN F. FITZGERALD, Mayor.

Street Department,

City Hall, Boston, July 28, 1910.

To the Honorable the Mayor:

Re inclosed order of the City Council, that artificial stone sidewalk be built on Weld Hill street, West Roxbury, kindly note attached report of deputy superintendent with regard to the same.

Respectfully,

L. K. ROURKE,
Superintendent of Streets.

City of Boston,
Street Department, Highway Division,
July 27, 1910.

Mr. Louis K. Rourke,
Superintendent of Streets:

Sir,—I return herewith an order of the City Council that a sidewalk of artificial stone be built on Weld Hill street, West Roxbury. The present walk is gravel, supported by a dish gutter of cobble stones and some edgestones, its general condition being very good.

To construct an artificial walk it will be necessary to furnish and set 1,660 feet of new edgestone and pave about 600 square yards of gutters,—the estimated cost of which is \$4,500.

As the division has not this amount of money to spare at this time, I would recommend the order be not approved.

Yours respectfully,

JAMES H. SULLIVAN,
Deputy Superintendent.

Placed on file.

NEW FERRYBOATS.

The following was received:

City of Boston,

Office of the Mayor, August 1, 1910.

To the City Council:

On February 16 I addressed a communication to your honorable body, representing the urgent need of an appropriation for a new ferryboat, and submitted therewith a loan order for one hundred twenty-five thousand dollars (\$125,000) to provide for a large ferry steamer of the most approved modern type. This order was rejected at your meeting of March 28. On July 20 the local inspectors attached to the Steamboat Inspection Service of the Department of Commerce and Labor notified the Superintendent of Streets that the boilers of the ferry steamers "D. D. Kelly" and "Revere," which are thirty-one and thirty-four years old respectively, had almost outlived their usefulness and would probably soon have to be condemned. Acting upon this notice, the Superintendent of Streets gave careful consideration to the present capacity of the ferry fleet and the demands of traffic and travel, and he has recommended that the city prepare to construct two new boats, for which he estimates the sum of two hundred thousand dollars (\$200,000) will be required. I desire to indorse his recommendation, believing that the ferry fleet should at least be maintained at its present strength if adequate service is to be rendered, and to submit the accompanying order, upon which I trust immediate action will be taken by your honorable body.

Letters from the Superintendent of Streets and the Deputy Superintendent of the Ferry Division, together with a copy of the communication of the inspectors of the Steamboat Inspection Service of the Department of Commerce and Labor, are appended herewith for your information.

Respectfully,

JOHN F. FITZGERALD, Mayor.

Street Department,

City Hall, Boston, July 27, 1910.

To the Honorable the Mayor:

Kindly note attached report of United States Steamboat Inspectors Savage and Carlton and report of Deputy Superintendent Christiernin.

If we are to maintain our ferry service and give increased accommodations as asked for by the East Boston people, it will be necessary to lay down a new boat at once and also prepare for building another.

Respectfully,

LOUIS K. ROURKE,
Superintendent of Streets.

[Copy.]

Department of Commerce and Labor,
Steamboat Inspection Service,
Office of Local Inspectors, Boston, Mass.,
July 20, 1910.

Mr. Louis K. Rourke,
Superintendent of Streets,
City Hall, Boston, Mass.:

Dear Sir,—On the 28th ult. we inspected the ferry steamer "D. D. Kelly," drilling and gauging the boiler shell and carefully looking over the same. After deliberation we concluded that we would issue a certificate once more for twenty-five pounds of working steam pressure, but we deem it proper to notify you that at the end of six months from time of last inspection we shall call for reinspection of the boiler, applying the regular test, and as we cannot well reduce the working pressure below twenty-five pounds without rendering the steamer unsafe to handle quickly on entering the slips or crossing this crowded channel, we may have to take some action that will interfere with the navigation of this steamer to the detriment of public travel. The boiler in this steamer is now about thirty-one years old.

The boiler in the ferry steamer "Revere" is now about thirty-four years old. Her inspection is due September 4 next, and although the shell had not, at the last inspection, depreciated in thickness quite to the same point as the "Kelly," yet there is a strong probability that some action may have to be taken as to the further use of this boiler.

This notice is given you at this time so that a proper and timely understanding of the situation may be had.

Respectfully,

(Signed) ANDREW J. SAVAGE,
WILLIAM A. CARLTON,
Local Inspectors.

City of Boston,

Street Department, Ferry Division,
July 26, 1910.

To the Superintendent of Streets:

Having read the inclosed letter of the United States Steamboat inspectors, I am of the opinion that only two ways are open to settle the difficulty.

First, new boilers. This appears unsatisfactory because the old engines remain and the combination of old engines and new boilers is bad.

Second, two new boats, one to be started within a short time. The second conclusion I have reached after talking with the inspector, who informed me that the "Kelly" will probably be condemned at the next inspection or rendered useless by reduction of steam power.

The "Revere" is about in the same condition and cannot be expected to survive one or two more inspections. With these facts in mind and the increasing demand for a three-boat service at both ferries I believe that immediate action should be taken to provide against the curtailing of the efficiency of this division.

Yours very truly,

H. P. CHRISTIERNIN,
Deputy Superintendent.

Ordered, That the sum of two hundred thousand dollars (\$200,000) be appropriated to be expended by the Superintendent of Streets for the purpose of constructing and equipping two new ferryboats; and that to meet said appropriation the City Treasurer be authorized to issue, from time to time, on the request of the Mayor, bonds or certificates of indebtedness of the city to said amount.

Referred to the Committee on Finance.

TEMPORARY BRIDGE, MYSTIC RIVER.

The following was received:

City of Boston,

Office of the Mayor, August 1, 1910.

To the City Council:

Under date of June 3, 1910, a notice was received from the Assistant Secretary of War that the bridge across the north channel of the Mystic River constitutes in its present form an obstruction to navigation and must be enlarged and relocated in accordance with certain specific instructions before July 1, 1911. Estimates were made by the City Engineer of the cost of the proposed new structure and it was found that Boston's share would be about one million three hundred fifty thousand dollars (\$1,350,000), the remainder of the expense falling upon the city of Chelsea. This burden cannot easily be borne by the city at the present time, in view of its limited borrowing capacity and the many demands upon it.

After various conferences between the late City Engineer Jackson and myself, representing the city, and the engineers and officials of the United States Government, it was agreed that a temporary pile bridge, guaranteed to last at least fifteen years, would be approved by the latter upon the presentation of satisfactory plans. On July 30 acting City Engineer and Superintendent of Streets Rourke, representing the city, presented plans, which had been prepared by the Engineering Department, to Colonel Frederic V. Abbott of the United States Engineers Office, and these were approved by him subject to slight future modifications. A formal approval from the office of the Secretary of War is expected in due course.

Boston's share of the estimated expense of the temporary bridge is about two hundred fifty thousand dollars (\$250,000), or less than one-fifth of the share of the cost of the permanent structure. Moreover, as the draw is so designed as to be available for the permanent bridge when the latter shall be built, about one-half of the proposed expenditure will be for permanent construction.

It is understood that the original order, signed by the Assistant Secretary of War, was issued in response to the demands of commerce on the Mystic river above the bridge, and that the near future will witness a notable development of manufactures along the water front in this region. In other words, the proposed expenditures, besides being compulsory,—since the cities of Boston and Chelsea cannot place themselves in contempt of the United States Government—represents an investment in commercial facilities from which both may expect to receive directly or indirectly a profitable return. I beg to recommend therefore that your honorable body accept and pass the accompanying order providing for an appropriation of two hundred fifty thousand dollars (\$250,000) for "Chelsea Bridge North."

A copy of the notification from the Assistant Secretary of War, dated June 3, 1910, and an estimate of the cost of the temporary bridge, prepared by the Engineering Department of the city, together with plans for the same are appended hereto.

It is reasonable to suppose that the city of

Chelsea will act in entire harmony with the city of Boston in this matter, since its interests are identical with ours.

Respectfully,
JOHN F. FITZGERALD, Mayor.

War Department,
Washington, D. C., June 3, 1910.
To the City of Boston, Massachusetts:

Take notice that—
Whereas, The Secretary of War has good reason to believe that the bridge jointly owned and controlled by the cities of Boston and Chelsea, and known as the "Chelsea Bridge," across the main or north channel of Mystic river, and connecting the cities of Chelsea and Charlestown, Mass., is an unreasonable obstruction to the free navigation of the said Mystic river (which is one of the navigable waterways of the United States) on account of insufficient width of draw opening and unsatisfactory location of the draw span;

And whereas, The following alterations, which have been recommended by the chief of engineers, are required to render navigation through or under it reasonably free, easy and unobstructed, to wit: Increase the clear width of the draw opening to not less than one hundred (100) feet (and as much more as is practicable without interference with the existing tunnel or conduit of the Metropolitan Water and Sewerage Board under the present draw opening); and provide such draw piers and fenders as may be necessary for the safe and prompt passage of vessels through the draw opening;

And whereas, To June 30, 1911, is a reasonable time in which to alter the said bridge as described above;

Now therefore, In obedience to, and by virtue of, section eighteen of an act of the Congress of the United States entitled, "An act making appropriations for the construction, repair and preservation of certain public works on rivers and harbors, and for other purposes," approved March 3, 1899, the Secretary of War does hereby notify the said City of Boston, Massachusetts, to alter said bridge as described above, and prescribes that said alterations shall be made and completed on or before June 30, 1911.

(Signed) ROBERT SHAW OLIVER,
Assistant Secretary of War.

Chelsea Bridge North—Temporary Bridge.

Estimate of cost of Boston's portion of temporary bridge to and including draw span:

630 linear feet pile bridge (47 feet wide) at \$106.....	\$66,780
180 linear feet fender pier (20 feet wide) at \$45.....	8,100
810 linear feet fender guard at \$9.....	7,290
400 linear feet planked waterway at \$20.....	8,000
2,000 square feet wharf at \$1.....	2,000
	\$92,170

Draw span complete (providing for 125-foot channel), including foundation, superstructure, operating machinery, drawtenders' house and roadway gates	135,000
	\$227,170

Ten per cent engineering and contingencies	22,717
	\$249,887

Say \$250,000.

Note.—The temporary bridge will have the same capacity for traffic as the present bridge and will last at least fifteen years. The superstructure of the draw span, including machinery, will be of permanent construction and may be moved to and form part of the permanent bridge when the latter is built some ten or twenty years hence.

FREDERIC H. FAY,
Assistant Engineer,
Engineering Department.

July 30, 1910.

Ordered, That the sum of two hundred fifty thousand dollars (\$250,000) be appropriated, to be expended by the City Engineer for the construction of a temporary bridge across the north channel of the Mystic River between the cities of Boston and Chelsea, said bridge to be built in conjunction with the City of Chelsea under the statutes governing said joint construction, and to serve in place of the present structure, known as "Chelsea Bridge North"; and that to meet said appropriation the City Treasurer be authorized, with the approval of the Mayor, to issue bonds or certificates of indebtedness of the city to said amount.

Referred to the Committee on Finance.

APPROPRIATION ORDERED.

The following was received:

City of Boston,
Office of the Mayor, July 30, 1910.
To the City Council:

Before the tax rate is declared and further appropriations from the tax levy become impracticable, I desire to submit the accompanying order and to recommend its immediate passage.

Of the three items which make up the total appropriation of ninety-five thousand five hundred dollars (\$95,500) the first, which appropriates sixty

thousand dollars (\$60,000) for fireproofing various buildings at the City Hospital, was fully discussed during the visit of your honorable body to the City Hospital about a month ago, and was made the subject of an order passed at your meeting of July 6. I apprehend that there will be little objection to providing this amount from additional taxation instead of from the Reserve Fund, as requested in the order passed at the aforesaid meeting.

In fact, the second item of the accompanying order proposes an increase rather than a reduction of the Reserve Fund, which now amounts to less than one hundred and sixty-four thousand dollars (\$164,000). Of this amount it is reasonable to anticipate that between seventy thousand and one hundred thousand dollars will be required to settle claims against the city, leaving a remainder which might conceivably be quite insufficient for emergencies in the departments. It is for this reason that I have included an item of twenty-five thousand dollars (\$25,000) for the Reserve Fund.

The necessity of the last item, which appropriates ten thousand five hundred dollars (\$10,500) for the Ferry Division of the Street Department, is clearly explained in the appended communications from the Superintendent of Streets and the Deputy Superintendent of the Ferry Division.

Respectfully yours,
JOHN F. FITZGERALD, Mayor.

City of Boston,
Street Department, July 28, 1910.

To the Honorable the Mayor:

Re request for better ferry accommodations, kindly note recommendations in inclosed report of Deputy Superintendent Christiennin. If these recommendations are carried out it will necessitate an increase of our ferry appropriation of \$10,500 per year.

Respectfully,
L. K. ROURKE,
Superintendent of Streets.

City of Boston,
Street Department, Ferry Division,
July 28, 1910.

To the Superintendent of Streets:

I respectfully recommend as soon as practicable: First. A day boat at the South Ferry which will run from 8 a. m. to 11 a. m. and from 2 p. m. to 7 p. m. (eight hours); cost \$10,000.

Second. A change of time of the day boat at the North Ferry, to run from 7.30 a. m. to 11 a. m. and from 2 p. m. to 6.30 p. m. (eight hours).

Third. To keep the north slip, North Ferry, East Boston side, clear of coal barges at all times by (a) using the South Ferry coal pocket to supply all boats; (b) by receiving coal barges with coal for the North Ferry coal pocket at Staples Coal Company's wharf. The cost being about the same in either case, about \$500 per year.

By having this slip clear the danger of having the running boats delayed in time of emergency, as fire, fog or accident to the other slip, is eliminated.

Yours very truly,
H. P. CHRISTIENNIN,
Deputy Superintendent.

P.S.—The above recommendations will necessitate an increase of our appropriation of \$10,500.

Ordered, That to provide additional means to meet the current expenses payable during the financial year beginning with the first day of February, 1910, of performing the duties devolving by statute upon the City of Boston or upon the departments or officers thereof, the sums of money hereinafter specified be, and the same are, hereby appropriated for the object and purposes hereinafter stated, that said sums be met by taxes to the amount so appropriated, and be raised by tax upon the polls and estates taxable in the City of Boston, and that all orders heretofore passed relating to taxes and the interest thereon apply to the taxes herein provided for.

City Hospital, fireproofing.....	\$60,000
Reserve Fund.....	25,000
Street Department, Ferry Division.....	10,500
	\$95,500

Referred to the Executive Committee.

REPAIR OF BRIDGES.

The following was received:

City of Boston,
Office of the Mayor, August 1, 1910.
To the City Council:

Supplementing my previous communication, which recommends an appropriation of ninety-five thousand five hundred dollars (\$95,500) for various items, I desire to recommend the passage of the accompanying order providing an appropriation of fifty-six thousand dollars (\$56,000) for the repair of bridges.

Itemized statements setting forth the needs of the various bridge structures of the city, signed by the Deputy Superintendent of the Highway Division and by Assistant Engineer Frederic H. Fay, together with detailed explanations regarding four of the bridges requiring repairs, are appended.

Respectfully,
JOHN F. FITZGERALD, Mayor.

Street Department,

City Hall, Boston, August 1, 1910.

Mr. Louis K. Rourke,
Superintendent of Streets:

Sir,—In addition to the appropriations which you now have under consideration, providing additional money for the care and maintenance of bridges, I wish to call your attention to the necessity of further appropriating a sufficient amount to cover repairs on the following bridges:

Dorchester Avenue (Federal street).....	\$3,500
Summer Street.....	10,000
Warren Bridge.....	10,000

The necessity for this money at the present time is very urgent and if these repairs are allowed to go another year it is just possible that the expense will be considerably larger.

Respectfully,
JAMES H. SULLIVAN,
Deputy Superintendent.

Chelsea North, Broadway, Columbus Avenue,
Dover Street and Neponset Bridges.
July 30, 1910.

Mr. L. K. Rourke,
Superintendent of Streets:

Dear Sir,—I send herewith an estimate for the Chelsea North Temporary Bridge, for \$250,000, the expense of which should be met by loan.

The sum of \$32,500 should be made available at once for urgent repairs on bridges, as follows:

Broadway Bridge over Boston & Albany Railroad.....	\$12,000
Columbus Avenue Bridge over Boston & Albany Railroad.....	1,500
Dover Street Bridge, over Fort Point channel.....	9,000
Neponset Bridge, Dorchester to Quincy.....	10,000
	\$32,500

A statement of the work on each of the above four bridges is inclosed.

Yours truly,
(Signed) FREDERIC H. FAY,
Assistant Engineer.

Broadway Bridge (over Boston & Albany Railroad).

This bridge was built in 1900. During the ten years of its existence the steel beneath the floor, exposed constantly to the locomotive gases, has corroded rapidly. That beneath the sidewalks was cleaned and painted in 1908.

The condition of the steel work beneath the roadways cannot be determined in detail until the roadway flooring is removed and the metal thoroughly examined; it is certain, however, that the steel is in need of cleaning and repainting, and undoubtedly some parts are already so badly corroded as to require repairs or renewal. None of this work can be done with the flooring in place. Furthermore, the under planking of the roadway is in very poor condition and for the past three years the City Engineer has recommended its renewal. The following work should be done at once: Remove roadway flooring, thoroughly clean lower steel work with sand blast, paint lower steel work at least two coats and the remaining steel work one coat, lay new roadway flooring, protect truss chords from further corrosion by gases, provide new railings at trusses, repair the sidewalk railing; the estimated cost of this work being \$7,000.

In addition to the above an appropriation of at least \$5,000 should be made available to cover repairs to steel work, the extent of which cannot be determined until the flooring is removed, making the total amount necessary for this bridge \$12,000.

If this work is done at once the life of the bridge may be prolonged for a number of years. If it is not done the structure will soon become unsafe and beyond repair.

Columbus Avenue Bridge (over Boston & Albany Railroad).

The ironwork beneath the sidewalks is in dangerous condition. One sidewalk has already been closed to travel, the flooring removed, the metal work cleaned and its condition carefully determined. The other sidewalk is probably in equally bad condition and must be closed as soon as the former can be repaired. To replace the rusted ironwork and relay the flooring on the sidewalk already closed will cost approximately \$700. Undoubtedly as much more will be required for the other sidewalk, and an appropriation of \$1,500 should be made for the whole work.

Dover Street Bridge (over Fort Point Channel).

In the draw span the cast iron track and wheels of the turntable, upon which the draw revolves, are already worn an excessive amount, causing a settlement of the draw and throwing the operating machinery out of adjustment and repair. If this action is allowed to continue the draw will soon be in such condition that it cannot be operated, and the bridge will have to be closed to travel until the necessary repairs are made. The draw should be raised to grade, the turntable track renewed, the wheels and the turning mechanism repaired, and the four sets of wedges at the ends renewed. This work should be done at once.

The steelwork of the whole bridge should be

cleaned and painted; some of the metal work is already corroded to such an extent as to make repairs necessary.

The concrete face of the center pier supporting the draw is being constantly disintegrated by the action of the salt water. Already the concrete has been eaten away to a maximum depth of 16 inches from the face. This action cannot continue indefinitely without seriously weakening the pier, and the pier should be repaired this fall. The pointing of the masonry of the other piers has been eaten away to a considerable extent and they should be repointed.

One asphalt sidewalk should be resurfaced and repairs made to the draw fender pier.

The estimated cost of the work is as follows:

Raising draw span to grade, repairing turntable, and machinery.....	\$5,000
Cleaning and painting metal superstructure, including repairs to rusted metal work....	2,000
Repairing concrete center pier and repointing masonry of piers.....	1,200
Resurfacing one sidewalk and draw fender pier.....	800
Total.....	\$9,000

Neponset Bridge. (Dorchester to Quincy.)

The superstructure of the draw has just been reconstructed and should be good for many years service. The wooden draw piers are in bad condition, one is in such position as to interfere with navigation, and the piers in their present condition and location do not afford adequate protection to the draw superstructure. Furthermore the piers are so rotten that they have recently been seriously damaged during the work of dredging the Neponset River above the bridge by the United States Government.

One wooden draw pier should be rebuilt and the other repaired and repairs made to the pile bridge on the Boston end. Estimated cost \$10,000. The work should be done at once unless it is the intention to immediately replace the bridge by a new structure.

Ordered, That to provide additional means to meet the current expenses payable during the financial year beginning with the first day of February, 1910, of performing the duties devolving by statute upon the City of Boston or upon the departments or officers thereof, the sums of money hereinafter specified be, and the same are, hereby appropriated for the object and purposes herein-after stated, that said sums be met by taxes to the amount so appropriated, and be raised by tax upon the polls and estates taxable in the City of Boston, and that all orders heretofore passed relating to taxes and the interest thereon apply to the taxes herein provided for.

Street Department, Highway Division:	
Broadway Bridge, over Boston & Albany Railroad tracks.....	\$12,000
Neponset Bridge.....	10,000
Summer Street Bridge.....	10,000
Warren Bridge.....	10,000
Dover Street Bridge.....	9,000
Dorchester Avenue (Federal Street) Bridge.....	3,500
Columbus Avenue Bridge, over Boston & Albany Railroad tracks.....	1,500
	\$56,000

Referred to the Executive Committee.

APPROPRIATION FOR PUBLIC CELEBRATIONS.

The following was received:

City of Boston,
Office of the Mayor, August 1, 1910.
To the City Council:

I transmit herewith draft of order appropriating five thousand and one dollars for "Mayor, Public Celebrations," the passage of which I earnestly recommend. On July 18, I recommended the passage of an order appropriating a similar amount for this purpose, and I pointed out that the visit of the President and a new form of celebration on July Fourth made it necessary to authorize larger payments than formerly. I therefore trust that your honorable body will indorse my policy in this respect and appropriate this amount, in order that the public holidays yet to come may be suitably celebrated.

Respectfully,
JOHN F. FITZGERALD, Mayor.

City of Boston, in City Council.
Ordered, That to provide additional means to meet the current expenses payable during the financial year beginning with the first day of February, 1910, of performing the duties devolving by statute upon the City of Boston or upon the departments or officers thereof, the sums of money hereinafter specified be, and the same are, hereby appropriated for the object and purpose herein-after stated, that said sums be met by taxes to the amount so appropriated, and be raised by tax upon the polls and estates taxable in the City of Boston, and that all orders heretofore passed relating to taxes and the interest thereon apply to the taxes herein provided for.

Mayor, Public Celebrations,
Five thousand one dollars..... \$5,001
Referred to Committee on Finance.

PETITIONS REFERRED.

The following petitions were received and referred to the committees named, viz:

Claims.

Metropolitan Coal Company, to be paid for damage to their lighter, No. 11, at Northern avenue bridge.

Mrs. Eliza Burns, for compensation for damage to property at 507 E. Sixth street, caused by backing up of sewage.

Susie Canua *et al.*, for compensation for damage to clothing by a watering cart on Commercial street.

Ross Towboat Company, for compensation for damage to schooner caused by defect in Warren bridge.

David W. Simpson, to be paid for damage to schooner "Laura C. Hall" received while passing through the draw of Broadway Extension bridge.

Coleman Bros., for compensation for expense incurred on account of nonfulfillment of contract for wood block paving on Merchants' Row, Exchange and State streets.

Edward B. Swett, for compensation for damage to automobile caused by projecting edgestone corner Norfolk and Clarkwood streets.

Executive.

Petitions for sidewalks, viz.:

Brick.

Bella Gorrie, 37 Romsey street, Ward 20.
Thomas E. Green, 23 Evergreen street, Ward 22.

Artificial.

J. E. Dowling, corner Commonwealth avenue and Harvard street, Ward 25.
New England Construction Company, 73-75 Astor street, Ward 10.

Morris Bernstein, 51-53 Howard avenue, corner 6 Dean street, Ward 16.

W. H. Lynch, 361 Atlantic avenue and 22 Purchase street, Ward 7.

Walter Baker Company, Ltd., 1221 Washington street, Ward 24.

Robert G. Jones, 95-97 Franklin street, Ward 25.

Albert Geiger, 56 Kenwood road, Ward 19.

D. H. Jacobs & Son, 317 Dartmouth street, Ward 11.

Dorchester Awning Company, 1548-1558 Dorchester avenue, Ward 20.

C. M. Mowatt, 19-21 Wainwright street, Ward 20.

William E. Wight, 200-204 Kilton street, Ward 20.

Thomas F. Mahan, 86-88 Harrishof street, Ward 21.

Simon Mazur, 72 Humboldt avenue, Ward 21.

P. G. Henderson, 31 Edson street, Ward 24.

City of Boston, 166 Devonshire street, Ward 7.

ERECTION AND REMOVAL OF POLES.

Copies of orders were received from the Street Commissioners, as follows:

Erection and removal of one pole each of New England Telephone and Telegraph Company of Massachusetts on Washington street and Dorchester avenue, Ward 24.

Erection and removal of one pole of same company on Charles street, Ward 20.

Erection and removal of one pole of same company on Savin Hill avenue, Ward 20.

Placed on file.

TRACK LOCATION.

A copy of order of Street Commissioners granting location 319 to West End Street Railway Company for additional curved tracks on P street, South Boston, was received.

Placed on file and ordered printed.

NOTICE OF HEARING.

Notice was received from the Harbor and Land Commissioners of hearing on July 27 on petition of Frank B. Newton for license to rebuild wharf in Neponset river.
Placed on file.

RAILROAD POLICE.

Notice was received from the Boston, Revere Beach & Lynn Railroad that William R. Blaisdell was no longer employed as a railroad policeman.
Placed on file.

NOTICE OF APPOINTMENT.

Notice was received of the appointment of Aaron Yaffe as Children's Institutions Trustee, a certified

copy of same having been delivered to the Civil Service Commission on July 27.
Placed on file.

NOTICE OF WORK.

Notice was received from Thomas Sproules, as specified by law, that he was doing work for the Schoolhouse Commission.
Placed on file.

CONSTABLE'S BOND.

The City Treasurer, after having duly approved of the same, submitted the constable's bond of John A. Duggan, Jr.
Approved by the Council.

MINORS' LICENSES.

President BALLANTYNE submitted reports on petitions for minors' licenses for 22 newboys and 6 venders and asked the approval of the Council on the same.

The licenses were severally granted on the usual conditions.

CONFIRMATION OF APPOINTMENTS.

The Council proceeded to consider Nos. 1, 2 and 3, unfinished business, viz.:

Appointments by the Mayor, viz.:

1. Robert H. Triggs, 28 Edson street, Ward 24, a Constable of the City of Boston for the term ending April 30, 1911.

2. Fred Fougere, 36 Bennington street, Ward 1, and Alexander Modell, 17 Lawrence park, Ward 20, Weighers of Coal and Weighers of Boilers and Heavy Machinery for the term ending April 30, 1911.

3. Paul R. Wild, 136 Highland avenue, Somerville, a Weigher of Coal for the term ending April 30, 1911.

The question came on confirmation. Committee—Coun. Kenny and Attridge. Whole number of ballots cast 8, yeas 8, and the several appointments were confirmed.

EXTENSION OF NORFOLK STREET CAR LINE.

Coun. BRAND offered an order—That the Boston Elevated Railway Company, through his Honor the Mayor, be requested to extend the Norfolk street line of cars to Morton street and thence through Morton street to Blue Hill avenue, connecting with the car lines at that point.

Passed.

POLICING OF PUBLIC PARKS.

Coun. CURLEY offered the following:

Whereas, It appears that it is within the power of the Police Commissioner to afford adequate protection to the citizens of Boston, and especially those who use the Boston Common and other public parks, by increasing the number of police officers on duty in those places; and

Whereas, The Police Commissioner's attention has been called by the newspapers of Boston and many prominent citizens to the deplorable conditions existing in the public parks, which render it almost impossible for self-respecting women to enjoy the privileges of those public places; therefore be it

Resolved by the City Council, That in its opinion these conditions are disgraceful; that they reflect discredit on one of the largest cities in the United States; that Police Commissioner Stephen O'Meara has been negligent in the performance of his sworn public duty in permitting these conditions to continue in the face of public sentiment, and that he should at once take such steps as may be necessary to render the public parks safe places for women and children to gather in, or see the wisdom of tendering his resignation to the Governor of the Commonwealth, by whom he was appointed.

The preambles and resolution were declared referred to the Executive Committee.

Reconsideration of reference to the Executive Committee was declared lost. Coun. BUCKLEY doubted the vote and asked for the yeas and nays. Reconsideration was refused, yeas 2, nays 6:

Yeas—Coun. Buckley, Curley—2.
Nays—Coun. Attridge, Ballantyne, Brand, Collins, Hale, Kenny, McDonald—7.

PUBLIC LANDS.

Coun. COLLINS, for the Committee on Public Lands, submitted a report on the order (referred May 16), to investigate and report on condition of land corner Cambridge and Allston streets, Allston, property owned by the city—that no further action is necessary.
Accepted.

RULES.

Coun. COLLINS, for the Committee on Rules, submitted the following:

(1.) Report on order (referred May 9), that

Rule 16 be amended by adding at the end of the third line the words "provided, however, that all orders for the expenditure of money presented to, or reported upon by a committee of, the council, unless rejected, shall lie over for one week before final action thereon,"—that the order ought to pass.

Report accepted; rule adopted.

(2.) Report on order (referred May 16, that Rule 16 of the Rules of the City Council be amended by adding at the end of said rule the following words "Any member offering an order which is referred to a committee shall be given an opportunity of being heard on the same before a report is made thereon,"—that the order ought to pass.

Report accepted; rule adopted.

(3.) Report on order (referred May 9) that Rule 26 be amended relative to spectators so no one but heads of departments and reporters shall be allowed in the anteroom or upon the floor of the Council Chamber while the Council is in session, spectators to occupy the gallery—that the order ought to pass.

The report was accepted, and the question came on the adoption of the rule as reported.

The rule as reported was amended by inserting after the words "Heads of departments" the words "Officials connected with the City Council," and the question came on the adoption of the rule as amended.

The order was passed and the rule as amended, adopted.

BRIDGE, WARD 23.

Coun. CURLEY offered an order—That the Superintendent of Streets through his Honor the Mayor be requested to confer with the officials of the New York, New Haven & Hartford Railroad with a view to securing their co-operation in the matter of construction of bridge from Hyde Park avenue to Washington street known as new Forest Hills footbridge, Ward 23.

The order was passed.

BATH HOUSE, WARD 24.

Coun. CURLEY presented the following:

Resolved, That in the opinion of the City Council public safety and necessity require that a bath house be located at Voses Grove, Ward 24: be it further

Resolved, That in the opinion of this Council the Metropolitan Park Commission should take action at once.

Passed.

RECESS.

On motion of Coun. KENNY the City Council voted, at 4.04 p. m., to take a recess subject to the call of the Chair.

The members reassembled in the Council Chamber and were called to order by President Ballantyne at 5.12 p. m.

EXECUTIVE REPORTS.

Coun. HALE, for the Executive Committee, submitted the following:

(1.) Report on message of Mayor, communications and order (referred to-day) that \$55,000 be appropriated for the Street Department, Highway Division, for bridges—that the order ought to pass.

Report accepted; order passed, yeas 9.

(2.) Report on message of Mayor and order (referred to-day) that \$5,001 be appropriated for "Mayor, Public Celebrations"—that the order ought to pass.

Report accepted; order passed, yeas 9.

(3.) Report on message of Mayor, communications and order (referred to-day) that \$95,500 be appropriated for various purposes—recommending passage of order in following new draft:

Ordered, That to provide additional means to meet the current expenses payable during the financial year beginning with the first day of February, 1910, of performing the duties devolving by statute upon the City of Boston or upon the departments or officers thereof, the sums of money hereinafter specified be, and the same are, hereby appropriated for the object and purposes hereinafter stated, that said sums be met by taxes to the amount so appropriated, and be raised by tax upon the polls and estates taxable in the City of Boston, and that all orders heretofore passed relating to taxes and the interest thereon apply to the taxes herein provided for.

City Hospital, fireproofing..... \$60,000
Reserve Fund..... 25,000
Street Department, Ferry Division..... 5,250

\$90,250

Report accepted; order passed, yeas 9.

(4.) Reports on petitions (severally referred to-day) recommending the passage of orders that the Superintendent of Streets make sidewalks along the following named streets in front of the herein-after named estates; said sidewalks to be from 3 to 10 inches above the gutter adjoining, to be from 5 to 12 feet in width, and to be built as specified, the owners to furnish the material, viz.:

Brick.

Bella Gorrie, 37 Romsey street, Ward 20.

Thomas E. Green, 23 Evergreen street, Ward 22.

Artificial.

J. E. Dowling, corner Commonwealth avenue and Harvard street, Ward 25.

New England Construction Company, 73-75 Astor street, Ward 10.

Morris Bernstein, 51-53 Howard avenue, corner 6 Deane street, Ward 16.

W. H. Lynch, 361 Atlantic avenue and 22 Purchase street, Ward 7.

Walter Baker Company, Limited, 1221 Washington street, Ward 24.

Robert G. Jones, 95-97 Franklin street, Ward 25.

Albert Geiger, 56 Kenwood road, Ward 19.

D. H. Jacobs & Son, 317 Dartmouth street, Ward 11.

Dorchester Awning Company, 1548-1558 Dorchester avenue, Ward 20.

C. M. Mowatt, 19-21 Wainwright street, Ward 20.

William E. Wight, 200-204 Kilton street, Ward 20.

Thomas F. Mahan, 86-88 Harrihof street, Ward 21.

Simon Mazur, 72 Humboldt avenue, Ward 21.

P. G. Henderson, 31 Edson street, Ward 24.

City of Boston, 166 Devonshire street, Ward 7.

Reports severally accepted; orders passed.

FINANCE.

Coun. KENNY, for the Committee on Finance, submitted the following:

(1.) Report on message of Mayor and order (referred June 27) appropriating \$60,000 to be expended by the Superintendent of Public Buildings for reconstruction of Curtis Hall—that the order ought to pass.

The report was accepted and the order rejected.

(2.) Report on message of Mayor, communications and order (referred to-day) for \$200,000 for construction and equipping of two new ferryboats—that the order ought not to pass.

The report was given its first reading in passage, yeas 9, nays 0.

(3.) Report on message of Mayor and order (referred July 18) for loan of \$95,000 for widening of Union Park street, between Washington street and Harrison avenue—that the order ought not to pass.

Report accepted; order rejected.

(4.) Report on message of Mayor and order (referred July 22) for loan of \$15,000 for playground, Ward 25—that the order ought not to pass.

Report accepted; order rejected.

WIDENING OF UNION PARK STREET.

Coun. ATTRIDGE offered an order—That the sum of \$95,000 be appropriated, to be expended by the Board of Street Commissioners for the widening of Union Park street, between Washington street and Harrison avenue, from its present mean width of approximately thirty-five feet to an approximate mean width of seventy-one feet; and that the City Treasurer be authorized to issue, from time to time, on the request of the Mayor, bonds or certificates of indebtedness of the city of Boston to said amount.

Referred to the Committee on Finance.

PLAYGROUND, WARD 25.

Coun. BRAND offered an order—That the Committee on Finance provide in the first loan bill the sum of \$15,000 for a playground in Ward 25.

Referred to the Committee on Finance.

GENERAL RECONSIDERATION.

On motion of Coun. HALE the Board refused a general reconsideration of all action taken to-day.

Adjourned, on motion of Coun. HALE, at 5.21 p. m., to meet on Monday, August 29, at 3 p. m.

Wednesday, August 3, 1910.

Special meeting of the City Council, held in the room of the President of the City Council, City Hall, at one o'clock p. m., President BALLANTYNE in the chair.

Absent, Coun. Attridge, Collins, Hale and Kenny.

Mayor Fitzgerald was present.

On motion of Coun. CURLEY, the reading of the record of the last meeting was dispensed with.

The call for the meeting was read, as follows:

City of Boston.

Office of the Mayor, August 3, 1910.

To the Members of the City Council:

You are hereby requested to assemble in the City Council Chamber, City Hall, on Wednesday, August 3, 1910, at 1 p. m., for the purpose of taking suitable action upon an order appropriating funds for the construction of a new ferryboat, and of transacting such other business as may come before the meeting.

Respectfully,

JOHN F. FITZGERALD, Mayor.
The call was placed on file.

The following was received:

August 3, 1910.

To the City Council:

In view of the rejection of the loan order for two hundred thousand dollars (\$200,000) for two new ferry steamers, which was submitted to your honorable body at its meeting on August 1, I beg to recommend the passage of the accompanying order for one hundred thousand dollars (\$100,000) for one such steamer, the funds to be provided from the tax levy.

The urgent need of this improvement is my justification for a second recommendation, following so soon after adverse action by your honorable body. I am advised moreover that the financial condition of the city is so favorable that this action may be taken without exerting an unduly prejudicial influence upon the tax rate.

Respectfully,

JOHN F. FITZGERALD, Mayor.

Ordered, That to provide additional means to meet the current expenses payable during the financial year beginning with the first day of February, 1910, of performing the duties devolving by statute upon the City of Boston or upon the departments or officers thereof, the sum of money hereinafter specified be, and the same is, hereby appropriated for the object and purpose hereinafter stated; that said sum be met by taxes to the amount so appropriated, and be raised by tax on the polls and estates taxable in the City of Boston, and that all orders heretofore passed relating to taxes and the interest thereon apply to the taxes herein provided for.

Street Department, Ferry Division, \$100,000.

The order was declared by the President referred to the Committee on Appropriations.

Mayor FITZGERALD—Gentlemen, I have deemed it advisable to call your body together to consider with me the passage of very important appropriations. One is to provide for the construction of a new ferry steamer. The ferry service as you know, has been freely criticised, and the citizens have demanded additional accommodations. This demand cannot possibly be met with the facilities at hand. In addition, two of our boats have been practically condemned by the United States Steamboat Inspection Service. At the meeting held on Monday last I transmitted and recommended the passage of an order providing for the building of two new ferryboats, at a cost of \$200,000, the money to be raised by loan. That order was rejected on that day, and I have been informed by several members of the body that the course I recommend to-day meets with the general approval of the members. The tax rate is about to be declared, and we find ourselves in excellent financial condition; so it seems to me to be good business judgment to urge the adoption of an appropriation order for \$100,000 with which to construct one new steamer. If your body passes this order the work can go forward at once, and we will be in a position to at least continue the ferry service as it exists to-day. If this is not done, and two of our boats are ordered out of commission, the service must necessarily suffer. I therefore, sincerely hope that you will meet my views in this respect and pass this order.

On motion of Coun. CURLEY, reference of the order to the Committee on Appropriations was reconsidered, and the order was declared passed, yeas 5, nays 0. [See reconsideration later.]

The following was also received:

City of Boston.

Office of the Mayor, August 3, 1910.

To the City Council:

I beg to recommend to your honorable body the passage of the accompanying order providing fifty thousand dollars (\$50,000) for various improvements in the Hospital Department, in accordance with the following schedule:

Fireproofing engine room building.....	\$25,000
New electrical machines.....	10,500
New wiring.....	14,500
	\$50,000

These improvements have been recommended by the chairman of the Board of Hospital Trustees in a letter under date of June 24, and are, in my opinion, of an urgent character.

Respectfully,

JOHN F. FITZGERALD, Mayor.

City of Boston.

In City Council, August 3, 1910.

Ordered, That to provide additional means to meet the current expenses payable during the financial year beginning with the first day of February, 1910, of performing the duties devolving by statute upon the City of Boston or upon the departments or officers thereof, the sum of money hereinafter specified be, and the same is, hereby appropriated for the object and purpose hereinafter stated; that the said sum be met by taxes to the amount so appropriated, and be raised by tax on the polls and estates taxable in the City of Boston, and that all orders heretofore passed relating to taxes and the interest thereon apply to the taxes herein provided for.

City Hospital, various improvements, \$50,000.

Mayor FITZGERALD—Gentlemen, at the meeting of your body on August 1 an additional appropriation order was passed which contained

an item for general fireproofing at the City Hospital. The hospital trustees, however, still urge strongly that the engine room building should be properly fireproofed and state that \$25,000 is necessary for the purpose. They also state that new electrical machines and new wiring are imperatively needed, which will require an expenditure of \$25,000 more, making \$50,000 altogether. Several of the members of your body have conferred with me in regard to the improvements desired by the hospital authorities, and we have agreed that it would be very desirable to make provision for the work spoken of. I am willing to have this amount added to the Appropriation Bill, with the ferryboat item, and I sincerely trust that the members will make it possible for these needed improvements to be pushed forward to completion. Speaking of the tax rate in this connection I will say that, with these amounts voted, it will be possible to establish the tax rate at a lower figure than that of last year. The tax rate is about to be declared, and, taking the splendid showing made by the assessors, it appears that we can well afford to take out of the tax money \$100,000 for the new ferryboat and the \$50,000 for improvements at the hospital deemed absolutely essential by the trustees. I feel that every effort should be made to provide for improvements of this character out of the tax levy rather than by loan, where possible.

On motion of Coun. CURLEY the passage of the \$100,000 ferry steamer order was reconsidered. Mayor Fitzgerald submitted to the City Council an appropriation order containing the items of the appropriations above referred to, as follows:

Ordered, That to provide additional means to meet the current expenses payable during the financial year beginning with the first day of February, 1910, of performing the duties devolving by statute upon the City of Boston or upon the departments or officers thereof, the sums of money hereinafter specified be, and the same are, hereby appropriated for the objects and purposes herein-after stated; that said sums be met by taxes to the amount so appropriated, and be raised by tax on the polls and estates taxable in the City of Boston, and that all orders heretofore passed relating to taxes and the interest thereon apply to the taxes herein provided for.

Street Department, Ferry Division, New Ferryboat	\$100,000
Hospital Department:	
Fireproofing engine room building	\$25,000
New electrical machine	10,500
New wiring	14,500
	50,000
	<u>\$150,000</u>

On motion of Coun. CURLEY, the order was declared referred to the Committee on Appropriations; but subsequently, on Coun. Curley's motion, said reference was reconsidered and the order was passed, yeas 5, nays 0.

On motion of Coun. CURLEY, general reconsideration of the action taken to-day was refused.

Adjourned, on motion of Coun. BRAND, at 1.29 p. m., to meet on Monday, August 29, at 3 p. m.

MUNICIPAL CADETS CORPS ESTABLISHED.

Oakland, Cal.—The establishment of a municipal cadets corps as part of the playground system is now an accomplished fact. Forty boys between the ages of fourteen and twenty years have been organized into a company and, under the direction of Col. Raymond Campbell, of the State Militia and the United States Army, and director of the Bushrod playground, Albert Vail, have already commenced drilling. They have been equipped with regulation uniforms and guns and are showing marked progress. It is the intention of those interested to enlist at least 1,000 boys. The age limit will be sixteen years and over, although at the present time there are a number of boys of fewer years in the company. Army officers at the Presidio have been interested in the movement and will help with advice and practical assistance. On July 4 the newly-formed company gave an exhibition drill at the celebration at Bushrod Park. The company will go on a four days' excursion to the base of Mt. Diablo, where they will be given practical experience in military tactics under the supervision of army men. It is the ultimate intention of providing target practice for the embryo warriors.—*Municipal Journal and Engineer.*

MONTHLY CONFERENCE.

Boston, August 1, 1910.

Monthly conference between the Mayor, City Council and heads of city departments, in the Mayor's hearing chamber, City Hall, at three o'clock p. m.

Mayor Fitzgerald presided, and in calling the meeting to order said:

Gentlemen, please come to order and the Clerk will read the records of the last meeting. [The records were read.] If there is no objection to the records as read, they stand approved. There being no objection, the records are approved. What is the first business before the meeting? Are there any communications to be read; any committees to report? Is there any unfinished business? New business. I will read a communication which was sent out from our office under date of July 15:

City of Boston,
Office of the Mayor, July 15, 1910.

Dear Sir,—Your are respectfully informed that at the next monthly conference between the Mayor, the City Council and the heads of departments the question of "a great parade of all the organized forces of the city's workmen" will be considered. This parade has been suggested by the Executive Secretary of Boston-1915 as a feature of the Civic Advance Campaign to be conducted by that organization in this city in November. The date suggested is Thursday, November 10, and it is believed by the promoters of the plan that such a parade would be of great educational value to the citizens of Boston.

Would you kindly be prepared to consider the feasibility, the advantage and the cost of such a parade, as well as the likelihood of its interfering with necessary public work on account of the absence of a large number of city employees.

Yours very truly,
JOHN F. FITZGERALD, Mayor.

Mr. Sewall, perhaps you had better state your proposition. Mr. Sewall represents the Boston-1915 Committee.

Mr. JOHN L. SEWALL.—The matter of showing to the citizens the work that is done by different organizations is a plan which was carried out very successfully in Baltimore some three or four years ago, and it has since been adopted by the City of Denver. The plan does not contemplate, necessarily, that every employee of the city shall be in the parade, but simply that there shall be a sufficient number of men, that floats from every department of the city's organized activities shall be shown in the parade, and that there shall be revealed the progress made in carrying on the business of a city. Boston is a great business corporation, it is doing a great many different kinds of work, and most of the citizens are absolutely ignorant of the way in which that work is being done and regarding many of the individuals doing the work. The plan would be,—for instance taking the Fire Department—to have perhaps a platoon of men dressed in Colonial garb, with the old ladder and the sand buckets, showing the first methods of fighting fire in the City of Boston; then some of the Veteran Firemen's Association, with the old tubs; and thus coming down to the modern apparatus, the water tower, the automobile, chemical engine—taking simply enough of the apparatus of the city to illustrate the present methods of doing this part of the city's work. And so in other departments. There could be illustrations given of the way in which the work is carried on, by the use of floats, and in that way we think a complete exposition might be made of every department of the city's work. In connection with this Boston-1915 movement it is proposed to invite a conference of all New England Mayors and city officials for November 10 and 11. We hope to have this parade, if the city departments find it possible to co-operate in it, on the afternoon of Wednesday or Thursday. In the evening we want the mayors and visiting officials to be our guests at the great dramatic pageant on the "Making of the perfect city" which Boston-1915 is planning to hold in the Arena for three successive evenings. On Friday we hope to have in Lorimer Hall morning and afternoon discussions of the practical problems in managing a city; and in the evening we hope to have Mayor Gaynor from New York address the conference and the general public. I believe it will be exceedingly interesting to the representatives of these other cities to be present and see a parade of the kind proposed; but our thought, as interested in the Boston-1915 movement, is that the real value of it,—the reason why we are ready to co-operate in having it,—is the educational value it will have to the citizens, and the fact that it will result in more appreciation of the services of the men who are actually doing the work of the city. We feel that it would be conferring honor upon them; that, their work being shown by a parade of this kind, they will be honored by those who shall review them and by their fellow citizens. I have talked with some of the heads of departments, including Mr. Rourke of the Street Department. He has made some inquiries and perhaps he can give you some light on the possibilities of that parade.

Mayor FITZGERALD.—Mr. Rourke, we would like to hear from you as the head of the principal department here. I would like to say in connection with this matter that during the Old Home Week parade of two years ago the exhibit made by the city was a surprisingly good one, and was a source of great gratification, pleasure and pride to the citizens

of Boston, who lined the streets of the city at that time. I recall very vividly the language of Governor Guild when the Street Department and the water system of the city were displayed. The character of the horses and their fine appearance, and the ensemble, made a very gratifying impression upon the Governor, and he spoke to me repeatedly about it. It seems to me that the idea is an excellent one if it can be carried out in a practical manner at that time of the year, and without great expense to the city.

Mayor FITZGERALD.—Doctor Durgin, of the Board of Health.

Dr. S. H. DURGIN.—We might have a few carriages, and we might display by means of large photographs matter representing portions of the work. As to the number of men who could be taken off, I am not quite certain that we could take a large number. Many of the men employed by us are professional men, and we occupy but a small portion of their time. Two years ago we made a moderate display, largely by means of photographs. We could do something for a few hundred dollars. I couldn't just say how much, perhaps two or three hundred dollars would patch up the work so that—

Mayor FITZGERALD.—Do you think your department could in a street display like that give a practical demonstration of increased efficiency in the Health Department during a period of five, ten, fifteen or twenty years?

Doctor DURGIN.—Yes, sir. I hope between this and that time we would be able to show something new.

Mayor FITZGERALD.—Mr. McSweeney of the Consumptive Department.

Mr. E. F. MCSWEENEY.—Mr. Mayor, I think that our department could have the most startling exhibit that was ever known in the history of parades. I can in imagination see our department showing 40,000 coffins, representing the people of the City of Boston who have been buried from consumption in the last twenty-five years. I can picture our department showing the dray loads of five dollar gold pieces that have been wasted as a result of the loss from this preventable disease. But I don't think that we ought to have the parade, or that the city ought to engage in any such parade. I have here in my hand the first copy, as far as I know, of the report of the Cost of Living Commission appointed by the city. You not only expend, as Mr. Rourke has said, the \$10,000 or \$5,000 of the Street Department, \$1,500 of the Water Department, \$500 of this or that department, in an appeal to the most elementary instinct in man, an appeal to the barbaric idea of display, which will do absolutely no good and will be forgotten in a week; you will not only expend all of those thousands of dollars, but you will take away from the productive forces of this city a whole day's work. I think, looking at it from the standpoint of the political economists, it would be a much better advertisement for Boston to say that on a certain day it had secured an additional factory or additional line of steamships, than all the parades you might have of this kind that lasted for a month and cost ten times as much and were a hundred times more splendid. I think this is a waste of the productive force of the community in an attempt to appeal to their barbaric instincts, which is depraving and taking away from production and is costing altogether more than it can ever be made worth, considered from any aspect.

Mayor FITZGERALD.—The Schoolhouse Department, Mr. Logue.

Mr. CHARLES LOGUE.—Mr. Mayor, we have not given any consideration to the circular, so far. We have been busy. I imagine though from what I have heard here, that we could give some sort of exhibit at a very small cost, and probably show the advance in schoolhouse construction for the last fifty years, and perhaps be able to make a very creditable showing. I rather differ with Mr. McSweeney in regard to the display. I think that it would be a pretty good factor in advertising the progress made by Boston, and would show just what it is possible to do. I think we need something of that kind to awaken the citizens of Boston. It may do some good, and perhaps pay for the money that is spent in producing the display.

Mayor FITZGERALD.—Mr. Everett, of the Building Department.

Mr. A. G. EVERETT.—Mr. Mayor, I don't know what sort of display the Building Department could make. I don't see how it would be possible very easily to show the inspection work. I have no great desire to walk in a parade myself, but I should be glad to do so, and I think the men of my department would be glad to show themselves and show what sort of a force we have. There would be about thirty, taking the inspectors available for such a display, and if it was going to be educational, I think we would all be glad to join in the enterprise.

Mayor FITZGERALD.—Mr. Woolley, the Sealer of Weights and Measures.

Mr. C. B. WOOLLEY.—Mr. Mayor, if such a display should be made, if it is agreed upon that such a display should take place, the Weights and Measures Department would be very much pleased to join in that parade. We have old, antique scales that we have had in our department for years, from Charlestown, Roxbury and Brighton, and we also have the up-to-date scale now in our possession which the City of Boston owns,—which it has recently acquired. The probable cost of our exhibit might amount to \$150, quite likely less. I don't think the service of the department would be impaired in the slightest degree,

as quite likely all of our men would not have to attend. Should we see fit to put our six teams in, which I hardly think would be as well as a float, I think we could make a good representation, and I would be pleased to have the citizens of Boston and the tax-paying public understand the great importance of the Weights and Measures Department of the City of Boston to-day. It is one of the most important, in my opinion. It is taking a great stride in advance all over the United States, and we would like to show the citizens of Boston what we are doing, and how we are protecting the purchasing public of this city. Whether or not it would be of any educational value to the citizens of Boston I can't say. There might be other ways that we could reach them. But if it could be done so that we could bring our department into prominence, so that they would understand it was the department of the City of Boston, it would please me very much indeed. I will do all I can, if you so desire.

Mayor FITZGERALD—Mr. Smyth of the Printing Department.

Supt. J. H. SMYTH—It is difficult for me to see, Mr. Mayor, how the Printing Department could make an acceptable exhibit on an occasion like that. We certainly would not be able to demonstrate printing as it is done for the city in any way to add to anybody's knowledge of the printing business. I wouldn't like to spare the services of as many men for the day as would be necessary to make an acceptable showing at that time. In view of the fact that so many of our employees are women, I don't believe that as many people as we could spare would give an idea of the size of our force, or the manner in which it works, or anything of that sort.

Supt. L. K. ROURKE.—As regards the expense, I think the Street Department can carry on its work without any especial objection from the citizens, and at the same time make a pretty good showing in the parade. It would probably cost the Street Department eight thousand to ten thousand dollars. I have not yet gone into details sufficiently to give a definite opinion, but I should say that it would possibly cost us \$10,000 to put up what I would consider an acceptable exhibit, at the same time not allowing the routine work of the city to suffer. Of course, the departments have had some experience in connection with the Old Home Week parade, and I think a great many of the old exhibits could be touched up again, re-used, and improved upon.

Mayor FITZGERALD—You might give a little idea about what the expense would be for?

Supt. L. K. ROURKE—Well, there would be the men who would take part in the parade, and there would be the preparation of the floats. I suppose you would want floats, and that you would want a body of the men to parade. For instance, there is the Paving Division—there might be something showing the work of that Division. Then, there is the street lighting work. There might be, for instance, flambeaux and torches, showing the early method of lighting, with the succeeding methods, carrying it down to the present methods of lighting the city. And so with the other divisions. Of course, the cost all depends on how much or how deeply you want to go into this thing. The principal item of cost would be allowing the men their time, the tip-cart parade, and so on.

Mayor FITZGERALD—Have you investigated so that you know for how long a time the men would be wanted in the parade,—how long the parade would be?

Mr. SEWELL—Only practically half a day. The parade would possibly be from two o'clock to four o'clock—perhaps two or three hours in the afternoon.

Mayor FITZGERALD—Don't you suppose, Mr. Superintendent, that a parade which would be worth seeing could be arranged, with a limited number of men, with the expenditure of a much less amount of money than that? I don't think it cost us any such sum for the Old Home Week parade.

Supt. ROURKE—Yes, it could be arranged for a less sum. On the basis I have suggested I should expect to have about one-third of the men parade. That would mean about a thousand men. We could cut it down just as much as was desired.

Mayor FITZGERALD—Having a representation of a small number from each department.

Supt. ROURKE—Having what you would call a platoon—say, just men enough to accompany the floats. Perhaps we might be able to make a good showing, not going into the thing quite so deeply, for five thousand dollars. But, as I say, I want to look into the matter more closely to see what can be done.

Mayor FITZGERALD—Have you got any thoughts on the subject that you would like to express, Mr. Hannan,—for instance, relating to the expense to the Water Department?

Water Supt. W. E. HANNAN—I should say that in our department we could make a good showing for a reasonable amount. We could have a line of floats, and our teams and horses are in pretty shape. I think for \$1,500 the Water Department would make a good showing.

Mayor FITZGERALD—What could you give for that?

Supt. W. E. HANNAN—Well, we might have one hundred men off for the day or half day, and then there would be the expense necessary in connection with the materials to make the floats.

Mayor FITZGERALD—Is any of the apparatus used in Old Home Week available now, do you know? Have you made any inquiries as to that?

Supt. HANNAN—No, I did not inquire into that.

Mayor FITZGERALD—I see Doctor McCollom of the City Hospital here. Doctor McCollom, what do you think the City Hospital could do in connection with a parade of this kind?

Dr. J. H. MCCOLLOM—Well, so far as the expense is concerned, it would not be a very great amount. It is a question of advisability,—that is to say, for instance, taking the nurses away from their duties. My idea was to have four or five ambulances in line, a certain number of nurses, and a certain number of modern instruments. That would have to be in a float. It would not be very satisfactory, as far as the instruments are concerned, but a certain number of ambulances, a certain number of nurses and orderlies, could be in the parade without any very great expense,—perhaps four or five hundred dollars at the outside.

Mayor FITZGERALD—Mr. Carroll of the Fire Department, have you considered this matter? You were not here, I believe, when the letter which was sent by the Mayor's office to the heads of departments was read, referring to the parade of the organized forces of the city's workmen. Have you any figures in mind?

Fire Com. CARROLL—Nothing very definite as to cost, but I should think that such an exhibit as the Fire Department could afford to furnish would not be a very expensive one. That is to say, the number of men who would participate would be men who would have their day off, whom we might invite to come in, to the extent of 150 or 160, and such men as might be absent on sick leave, so as to bring the representation up high without reducing the available force. It would not be an easy thing to pull off apparatus, although we might have a sample of the different styles of apparatus,—a ladder, and an engine and a hose wagon—perhaps without causing us any detriment. But the thing that I had in mind particularly was that we could furnish you with a number of men in the parade without injuring the department for that day, and not have it an expensive undertaking.

Mayor FITZGERALD—Mr. Cole of the Wire Department.

Mr. J. E. COLE—From a financial standpoint our department cannot afford to spend any great sum of money. But I feel that the changes in the last ten, fifteen and twenty years have been such that we could give a reasonable and an instructive exhibit at a reasonable price. I think we could give an exhibit, considering the extent of our means, that would be of interest and that would be of value. I think we could convince the citizens of certain points which would be of value necessarily to the departments and the city and to themselves. Personally I feel that in a parade of that kind there are many features which would be of great value to the city and our department, and that we could make a reasonably good exhibit, I think, for a reasonable sum of money.

Mayor FITZGERALD—Mr. Gore of the Institutions Department.

Mr. FRED S. GORE—Mr. Mayor, our department could make a very reasonable exhibit for probably a thousand dollars,—five hundred dollars, maybe. We do all of that work ourselves, of every kind. The number of men we could put in line would be only about fifteen,—the officers of the institution. We could exhibit what we are carrying on in the institutions in different lines, and if we could display the improvements and things of that sort, we could show something interesting,—the old style of cell, and a modern cell of to-day, one of the old cells, about 6 by 4, such as they had to live in, and then a cell about 10 by 8 with all electric lights and running water and all modern improvements of every style. But I question the advisability of our department entering into a parade with anything more than a few men and possibly an exhibition of the industries that we have in the department. It would not cost over \$500.

Mayor FITZGERALD—Doctor Putnam of the Children's Institutions Department.

Dr. C. P. PUTNAM—We have a few employees who could join such a procession. The majority of them, of course, would have to stay at work, because there is so little elasticity there. It would be possible that we could have children march in the procession. Whether that would be quite legal or not I don't know. Otherwise certain educational subjects might be represented, such as the School Committee represent. It would not be a very great expense, I think.

Mayor FITZGERALD—Mr. F. E. Atteaux of the Cemetery Department.

Mr. F. E. ATTEAUX—Mr. Mayor, we have looked into the matter of expenses, as requested by your circular, and in our department we could spare possibly sixty men out of our corps, which would involve an expense for the time of about \$135. We don't see what instructive exhibit we could make of the department. That is, the amount stated is simply for the loss of time. I suppose the men would have to be in uniform or something of that sort, which would be an additional expense. We could spare for that space of time sixty men without any great drawback to the department.

Mayor FITZGERALD—Well, gentlemen, I

think I have about gone over the list of the departments concerned. Those remaining heads that are here, are from departments where the work is personal and where no exhibition could be given that would be worth the expense or fruitful of results. There has been some little difference of opinion here as to the advisability of the scheme being carried out, and I would like each head of department to think the matter over during the next couple of weeks and consult with his subordinate officials and write to the Mayor's office and tell what he could do, what he would like to do, and what could be done with the amount of money. And then we will determine whether we shall go ahead with this proposition or not. Of course, it is not designed or desired that we should have an exhibition of the men who are on the pay roll of the City of Boston, because that would not accomplish the purpose which actuates the gentlemen who brought this matter out. I know, as I said a moment ago myself, that the parade during the Old Home Week time did a great deal of good, that the people saw the city service in a light they had never seen it in before. People are too apt to get a poor opinion of the city service,—their particular section may not be as good as it might be, and people have no idea of the activities of the city,—and by an exhibition of the city's activities, showing the highest forms of efficiency which, we believe, would be shown in practically every department, I think considerable can be done. It might be worth the expense. However, I have got no opinion upon the matter. My mind is open, and I want to be governed by what I believe to be the judgment of the men who are associated with me in the government of the city, and after the different propositions are submitted to the Mayor's office, I shall call a meeting or a conference of the members of the City Council and submit the plan to them, and, with the Mayor's office, determine what shall be our action.

Chairman Logue of the Schoolhouse Commission brought up the question of adopting a standard scale for day labor and for repair work, saying that the Master Builders' Association and other organizations had adopted scales.

Supt. M. J. Fish, of the Public Buildings Department, said he had found a difference in the price per hour charged him for certain work as compared with the price charged another department (62¢ and 60 cents, respectively), and that he believed the price should be uniform.

Penal Institutions Commissioner Fred S. Gore said it did not affect his department.

On motion of Mr. LOGUE the Mayor appointed Superintendent of Streets Rourke, Building Commissioner Everett, Penal Institutions Commissioner Gore, Chairman Logue of the Schoolhouse Commission and Superintendent Fish of the Public Buildings Department a committee to draft a standard scale and present it at the next conference.

Is there any further business before the meeting?

There being no further business before the conference, it was adjourned.

WASHINGTON'S MUNICIPAL MARKETS.

Under the charge and maintenance of the Commissioners of the District of Columbia are a large outdoor market and a market building; the former, known as the Farmers' Produce Market, being assigned as a place where farmers may sell the produce of their own raising; and the building, known as the Eastern market, being occupied largely by those selling meat and fish, and dealing in groceries. They are under the direct supervision of Mr. W. C. Haskell, Superintendent of Weights, Measures and Markets of the District.

The farmers' market, which is in the downtown section of the city, is a large open space occupying two blocks, from Tenth to Twelfth streets and from B to Little B streets. This is furnished with brick walks running the entire length of the area, against which farmers back their teams or in some cases erect stands under canvas shelters. Permits for space of eight feet are issued and a fee of ten cents per day per wagon is charged to cover the cost of taking care of the space so occupied. During the busy season as many as 500 teams are accommodated on this space daily.—*Municipal Journal and Engineer.*

TEACHING GOOD HEALTH.

The Board of Health of Columbus, Ohio, holds that it is part of their function to instruct people in the best ways to keep well. They issue bulletins of advice on sleeping and eating and such every day matters.

NOTICE TO SUBSCRIBERS.

Subscribers will find the expiring date of their subscription stamped upon the mailing wrapper. As payment must be made in advance, remittance should be made on or before that date.

CITY OF BOSTON.

PROPOSALS FOR SEWERAGE WORKS.

The Superintendent of Streets of the City of Boston, office 47 City Hall, invites proposals for building sewerage works in Augustus Avenue and Ethel Street, between Vista and Edna streets, West Roxbury, and giving bond therefor of a surety company approved by the superintendent in the sum of four hundred dollars (\$400), to secure the due performance of the contract and the full protection of the city. Forms of bids may be obtained at the said office of the Superintendent of Streets. Each bid should be inclosed in an envelope, sealed, marked "Bid for Building Sewerage Works in Augustus Avenue and Ethel Street," and left at the said office of the Superintendent of Streets before 12 m. on Monday, August 15, 1910, with a certified check for two hundred dollars (\$200), payable to and to become the property of the city if the bid after acceptance is not carried out. The bids will then and there be publicly opened and read. Bids must be made in duplicate, the duplicate without check to be deposited by the bidder with the City Auditor previous to the time named for opening the bids. The undersigned reserves the right to give preference to the proposals of bidders agreeing to pay the trade unions' rate of wages and the right to reject any or all proposals.

LOUIS K. ROURKE,
Superintendent of Streets.
Boston, August 4, 1910. (Aug. 6.)

CITY OF BOSTON.

PROPOSALS FOR TWO STEAM TURBINE-DRIVEN CENTRIFUGAL PUMPS.

The Superintendent of Streets of the City of Boston, office 47 City Hall, invites proposals for furnishing, delivering and erecting complete two main steam turbine-driven centrifugal pumping units, at the Calf Pasture Pumping Station, Dorchester, Mass., on foundations already in place, and giving bond therefor of a surety company approved by the Superintendent in the sum of ten thousand dollars (\$10,000), to secure the due performance of the contract and the full protection of the City. Forms of bid may be obtained at the said office of the Superintendent of Streets, August 6, 1910. Each bid should be inclosed in an envelope, sealed, marked "Bid for Two Steam Turbine-Driven Centrifugal Pumps," and left at the said office of the Superintendent of Streets before 12 m. on Thursday, September 1, 1910, with a certified check for five thousand dollars (\$5,000), payable to and to become the property of the City if the bid after acceptance is not carried out. The bids will then and there be publicly opened and read. Bids must be made in duplicate, the duplicate without check to be deposited by the bidder with the City Auditor previous to the time named for opening the bids. The undersigned reserves the right to give preference to the proposals of bidders agreeing to pay the trade unions' rate of wages and the right to reject any or all proposals.

L. K. ROURKE,
Superintendent of Streets.
Boston, August 4, 1910. (Aug. 6.)

CITY OF BOSTON.

PROPOSALS FOR EXCAVATING CANTERBURY BRANCH STONY BROOK AND BUILDING CULVERTS.

The Superintendent of Streets of the City of Boston, office 47 City Hall, invites proposals for excavating the Canterbury branch of Stony Brook, from Asylum road to Harvard street, and building culverts in Farm road and Morton street, West Roxbury, and giving bond therefor of a surety company approved by the superintendent in the sum of five thousand dollars (\$5,000), to secure the due performance of the contract and the full protection of the city. Forms of bids may be obtained at the said office of the Superintendent of Streets. Each bid should be inclosed in an envelope, sealed, marked "Bid for Excavating Canterbury Branch etc.," and left at the said office of the Superintendent of Streets before 12 m. on Wednesday, August 17, 1910, with a certified check for eight hundred dollars (\$800), payable to and to become the property of the city if the bid after acceptance is not carried out. The bids will then and there be publicly opened and read. Bids must be made in duplicate, the duplicate without check to be deposited by the bidder with the City Auditor previous to the time named for opening the bids. The undersigned reserves the right to give preference to the proposals of bidders agreeing to pay the trade unions' rate of wages and the right to reject any or all proposals.

LOUIS K. ROURKE,
Superintendent of Streets.
Boston, August 4, 1910. (Aug. 6.)

TO ELECTRICAL CONTRACTORS.

The Schoolhouse Commissioners of the City of Boston invite sealed proposals for electric work in Prescott School, Elm street, Charlestown, Boston, Mass., and giving bond of a surety company therefor in the sum of \$500. Only proposals obtained at the office of the commissioners, 120 Boylston street, signed by the bidder and left before 12 o'clock m. of Friday, Aug. 12, 1910, at said office, with a certified check for \$250, payable to the city if the proposal is not carried out, will then and there be publicly opened and read. The bid must be made in duplicate, the one with the check to be sent as above, the other to be sent to the City Auditor, City Hall. The commissioners reserve the right to reject any and all proposals and to give preference to bidders paying the trade unions' rate of wages.

(Aug. 6.)

CHARLES LOGUE,
JOHN F. KENNEDY,
CHARLES B. PERKINS,
Commissioners.

PROPOSALS FOR WALL AND CURB ON FRANKLIN FIELD.

The Park Commissioners of Boston invite proposals for building a wall and curb on Franklin Field, and giving bond of a surety company therefor in \$1,000. Only proposals obtained at the engineer's office, Franklin Park, signed by bidder and left before three o'clock of August 11, 1910, at the office of the commissioners, Pine Bank, Olmsted Park, Boston, will then and there be publicly opened and read. A duplicate proposal, without the check, must be deposited with the City Auditor previous to the time named for opening the bids. The commissioners reserve the right to reject any or all proposals and to give preference to bidders paying the trade unions' rate of wages.

(Aug. 6.)

ROBERT S. PEABODY,
JAMES M. PRENDERGAST,
DANIEL H. COAKLEY,
Commissioners.

PROPOSALS FOR CLEANING SEWERS.

The Superintendent of Streets of the City of Boston, office 47 City Hall, invites proposals for cleaning sewers in the following streets, viz.: Canterbury branch of Stony Brook in Hansborough street and private land, between Harvard and Don streets, Dorchester; Market street, between Portland and Canal streets, Canal street, between Market street and Canal street relief sewer, and Canal street relief sewer, between Canal street and Hanover street, City Proper, and giving bond therefor of a surety company approved by the superintendent. Only proposals obtained at said office, filled out, signed by the bidder and left at said office before 12 o'clock m. of Monday, August 15, 1910, with a certified check for \$300, payable to and to be the property of the city if the proposal is not carried out, will, at said hour and place, be publicly opened and read. The proposals must be made in duplicate, the duplicate, without check, to be deposited by the bidder with the City Auditor previous to the time named for opening the bids. The undersigned reserves the right to give preference to the proposals of bidders agreeing to pay the trade unions' rate of wages, and the right to reject any or all proposals. The proposals should be inclosed in an envelope, sealed, and marked "Proposal for Cleaning Sewers."

LOUIS K. ROURKE,
Superintendent of Streets.
Boston, August 4, 1910. (Aug. 6.)

PROPOSAL FOR THE RECONSTRUCTION OF EASTERN AVENUE WHARF.

The Commissioner of Penal Institutions Department of Boston invites bids for the reconstruction of Eastern Avenue Wharf, according to plans to be seen at the office of the City Engineer, 60 City Hall, Boston, and giving bond of a surety company approved by the Commissioner in the sum of \$3,000. Only bids made on forms obtained at the above office, 60 City Hall, and signed by bidder and left at the Commissioner's office, 32 Tremont street, on or before 12 m. Tuesday, August 9, 1910, with a certified check for \$500, payable to and to be the property of the city if the bid after acceptance is not carried out, will then and there be publicly opened and read. Duplicate bids, without check, must also be delivered to the City Auditor before the time specified for opening the bids. The Commissioner reserves the right to reject any or all bids and to give preference to bidders paying the trade unions' rate of wages. The bid should be inclosed in an envelope, sealed and marked "Bid for Eastern Avenue Wharf."

FRED S. GORE, Commissioner,
Penal Institutions Department.
July 29, 1910. (Aug. 6.)

READVERTISEMENT.

RECONSTRUCTION OF CURTIS HALL BUILDING JAMAICA PLAIN, WARD 22.

The Superintendent of Public Buildings of Boston, Massachusetts, invites proposals for the reconstruction of the Curtis Hall Building, Jamaica Plain, Ward 22 (excepting plumbing, heating and electric work) according to plans and specifications, and giving a bond of a surety company therefor, satisfactory to the Superintendent, in the sum of \$15,000. Only proposals obtained at the office of the Superintendent of Public Buildings, Room No. 30, Old Court House, Boston, filled out, signed by the bidder and left before 12 o'clock m. on Monday, August 22, 1910, at said office, with a certified check on a Boston bank for \$1,500, payable to and to be the property of the City of Boston if the proposal is not carried out, will then and there be publicly opened and read. The bid must be made in duplicate, the one with the check to be sent as above, the duplicate to be sent to the City Auditor, City Hall, previous to the time named for opening bids. The contractor will be required to submit a list of names of the sub-bidders. The undersigned reserves the right to reject any and all proposals and to give preference to the bidders paying the trade unions' rate of wages.

MANUS J. FISH,
Superintendent of Public Buildings.
(Aug. 6-13.)

PROPOSALS FOR SEWERAGE WORKS.

The Superintendent of Streets of the City of Boston, office 47 City Hall, invites proposals for building pipe sewer and appurtenances in Park street, from Waldeck street to Greenbrier street, Dorchester, and giving bond therefor of a surety company approved by the Superintendent in the sum of eight hundred dollars (\$800), to secure the due performance of the contract and the full protection of the City. Forms of bids may be obtained at the said office of the Superintendent of Streets. Each bid should be inclosed in an envelope, sealed, marked "Bid for Building Sewer in Park street, Dorchester," and left at the said office of the Superintendent of Streets before 12 m. on Tuesday, August 16, 1910, with a certified check for three hundred dollars (\$300), payable to and to become the property of the City if the bid after acceptance is not carried out. The bids will then and there be publicly opened and read. Bids must be made in duplicate, the duplicate, without check, to be deposited by the bidder with the City Auditor previous to the time named for opening the bids. The undersigned reserves the right to give preference to the proposals of bidders agreeing to pay the trade unions' rate of wages and the right to reject any or all proposals.

LOUIS K. ROURKE,
Superintendent of Streets.
Boston, August 4, 1910. (Aug. 6.)

TO GENERAL CONTRACTORS.

The Schoolhouse Commissioners of the City of Boston invite sealed proposals for erecting and completing (all trades) elementary school, lower grades, Edward Everett District, Savin Hill Avenue, Dorchester, Boston, Mass., and giving bond of a surety company therefor in the sum of \$10,000. Only proposals obtained at the office of the commissioners, 120 Boylston street, signed by the bidder and left before 12 o'clock m. of Tuesday, August 16, 1910, at said office, with a certified check for \$1,000, payable to the city if the proposal is not carried out, will then and there be publicly opened and read. The bid must be made in duplicate, the one with the check to be sent as above, the other to be sent to the City Auditor, City Hall. The commissioners reserve the right to reject any and all proposals and to give preference to bidders paying the trade unions' rate of wages.

CHARLES LOGUE,
JOHN F. KENNEDY,
CHARLES B. PERKINS,
Commissioners.
(Aug. 6.)

AUCTIONEER'S SALE.

Land on Public Alley No. 444, City Proper.

On Monday, August 15, 1910, at 12 o'clock m. will be sold at public auction on the premises a parcel of land the property of the City of Boston now in the custody of the Street Department and bounded as follows: Southwesterly by land of Flora A. Ginty thirty-one and $\frac{3}{4}$ feet; northwesterly by Public Alley No. 444 thirty-four feet; northeasterly by land of the City of Boston by a line parallel with and thirty-four feet distant northeasterly from the northeasterly boundary line of said land of said Ginty forty-three and $\frac{1}{4}$ feet; southeasterly by the location of the Boston & Albany Railroad thirty-six and $\frac{1}{4}$ feet; containing 1,273 square feet of land, the same to be sold at a price not less than \$2,800, terms cash on delivery of deed, \$500 to be paid in cash or certified check at time and place of sale.

L. K. ROURKE,
Superintendent of Streets.
Boston, August 4, 1910. (Aug. 6.)

HYDRO-ELECTRIC POWER IN MASSACHUSETTS.

Considerable engineering interest attaches to the opening last week by the Massachusetts Gas and Electric Light Commission of an investigation by order of the last Legislature into conditions attending the transmission of electric power of high voltage over considerable distances within the state. For many years the gas and electric lighting companies in Massachusetts have been under the supervision of the commission. A large amount of engineering discussion has taken place before the Board in connection with the issue of new capital, changes of rates, appeals of consumers against companies concerning prices and service, and physical consolidation of public utilities coming within the scope of the commission's powers. Up to the last year or two the work of the Board in the electric central station field has been confined largely to the consideration of matters within single towns and cities, or inside a comparatively limited group of municipalities. The entrance of high voltage electric transmission some months ago from the Vernon plant of the Connecticut River Transmission Company carried before it many new and interesting problems. Among the most important of these were the relations which should be permitted between established companies and the new organization regarding the division of territory between them. Following appeals by the central station organizations in Fitchburg and Worcester against the entrance of Connecticut River power for supplying small consumers, the Board issued an order limiting the transmission company to supplying installation of 300 horse-power capacity, having an annual consumption of not less than 450,000 horse-power hours. These two decisions have done much to clear the air for further development.

At the hearing given by the commission last week it was shown that the Connecticut River Transmission Company is now delivering energy for power service at the rate of 60,000,000 kilowatt hours per year, which is not far from half the total sales of electricity maintained by all the companies in the state, including the Boston Edison organization. This large output is sold to only fourteen customers, and at rates to large users which run as low as from 1 cent to 1.5 cents per kilowatt-hour. The average capacity per customer is about 700 horse power. This business is clearly wholesale in character, and while it is limited as to its lower ranges of loads in its higher ranges it is openly in competition with the service of established central stations. The attitude of the smaller companies is now much more friendly toward the enterprise than at first, and at the hearing a prominent central station manager of the Blackstone Valley states that the less powerful companies should welcome the entrance of hydro-electric service on a large scale, since it introduces electricity to a class of industries which the small company can seldom reach, and which it could often ill afford to supply in view of the large investment required. A further benefit arises from the purchase of the hydro-electric service in certain instances by the smaller companies. Thus far the larger companies have preferred to stand upon their own feet in generating and distributing power, but as the amount of developed capacity extends, it is probable that the economies of co-operation will become better appreciated, provided the reliability of the service is properly maintained.

As the inquiry by the commission progressed, President Harriman of the transmission company stated that within 175 miles of Boston, Worcester and Springfield the undeveloped water power totals over 300,000 horse power at the present time, and pointed out the tendency towards power centralization which is so marked in different parts of the country. It is estimated that there is a saving of from 20 to 30 per cent in duplicated investment where a considerable area is supplied from a centralized source instead of from a number of small, scattered plants. Other engineers testified as to the value of centralization, and the Board was asked on behalf of the power interests present to recommend to the next Legislature the passage of a law giving the power companies the right of eminent domain in connection with the securing of transmission line rights of way. It was argued that this has been done in many other states, and that the highways are unsuited to the location of steel tower lines carrying very high voltage currents. The cost of purchasing rights of way is so great that in a number of instances the power companies have been obliged to curtail their developments, and at the present time the chief obstacle to hydro-electric power expansion in Massachusetts is the inadequacy of the laws bearing upon line locations through obstructing towns or the private lands of citizens desiring to mulct the companies in inordinate sums for pole or tower locations. In form till the general conception, together with those details which affect the general design, is completely thought out. The conception of the structure is then a product of the imagination, and hence it is that the young engineer should develop his imaginative powers; should train himself to see in his mind's eye that which is yet to have material existence. It must not be supposed that this faculty is to be used solely for the creation of engineering works. For although in their creation this power is essential, yet the imagination must reach out to higher things. It must enable the engineer to see the good which others will receive as the result of his efforts, and thus it is that he subordinates self to the welfare and happiness of others. It is difficult to make young men realize what an important power this is in the design of engineering works. When the students of our technical schools are put through a course, such as descriptive geometry, which is planned to improve the power of imagination, they frequently fail not only to grasp the subject itself but to realize the purpose for which the course is given. Recently an architect while passing through a drawing room of a leading technical school where a class in descriptive geometry was being held, remarked that more time and attention than is common was given to that subject.

— *Engineering Record.*

BETTER ILLUMINATION FOR PHILADELPHIA.

Philadelphia, Pa.—Chief McLaughlin's plans for the better illumination of the city include the erection of electric light standards and pedestrian safety and rest platforms in the center of Broad street at all street intersections between Spruce and Vine streets, similar to the experimental standard of this order erected at Walnut and Broad streets for public criticism. The plan embraces two such standards, one either side of the car tracks at each street intersection. Laurence McCormick, of the Bellevue-Stratford Hotel, was one of the first to send to Mr.

McLaughlin a letter commending the innovation. Mr. McCormick said that apart from providing for the safety of pedestrians, particularly women and children, crossing Broad street, and the improved illumination of the intersection of Board and Walnut streets at night, it was the best system for the regulation of traffic, possibly, that could be devised. With such a fixed center for making turns in any direction at street intersections, he said, drivers of any kind of vehicle were stopped from making dangerous short cuts, and, moreover, in the case of automobiles especially, were obliged to slow up to a reasonable speed. Mr. McLaughlin said that he had received also many other commendations of the scheme. Mr. McLaughlin said the erection of the new Broad street lights would not cost the city anything beyond maintenance, as, in the case of the new lights in Market street, the Philadelphia Electric Company had agreed to erect the standards, as well as the raised concrete platforms, for pedestrians at its own expense. That company, also, he said, would affix to each standard street signs, which at night are brilliantly illuminated, and would also affix such street signs on the light standards, at each street intersection in Market street free of expense to the city. Each of these street signs, he said, cost about \$15, while the cost of each of the new Broad street electric standards would be about \$125. Among other arrangements made with the Philadelphia Electric Company to perform work in consideration of its franchise, Mr. McLaughlin said that the company had agreed to lay a new electric cable in Broad street, between City Hall and Spruce street, to replace the city's worn-out cable, and also to lay electric light service pipes under the sidewalks in front of all new building operations with connections with each building, to obviate sidewalks hereafter being torn up where electric lighting is wanted. "There will be no more unsightly electric light poles erected in front of houses," the chief said, "nor will sidewalks be torn up from time to time for such connections."—*Municipal Journal and Engineer.*

WANTS TO BUY CITY SEWAGE.

Denver, Col.—A bill for an ordinance is pending in the City Council which provides for the sale by the city to the Denver Irrigation and Fertilizing Company of the waste water and sewage from the city sewer system. The company states that it will build conduits connecting the mouths of the sewers with a plant it is to erect in Adams County. There the sewage will be converted into fertilizer and the water sold for irrigation. For the right the company offers the city \$5,000 a year until the population increases to 250,000, when the rate would be \$6,250, and for every 50,000 increase in population thereafter \$1,250 additional annually.—*Municipal Journal and Engineer.*

CITY SOLICITOR MUST PREPARE BOND ORDINANCES.

Pittsburg, Pa.—The recent decision of the Supreme Court in declaring illegal the bond issue of \$6,775,000 has caused Mayor Magee to issue an order putting into effect the charter provision that the city solicitor shall prepare all ordinances. City Solicitor O'Brien said he was not consulted about the proceedings in councils preparatory to the 1909 bond issue, and never saw the bond ordinance until he met it in litigation.—*Municipal Journal and Engineer.*

CITY RECORD

OFFICIAL PUBLICATION OF THE CITY OF BOSTON.

VOL. 2.

SATURDAY, AUGUST 13, 1910.

No. 33

City of Boston.

CITY RECORD.

Published weekly under legislative act by the
City of Boston, Mass.

BY SUBSCRIPTION . . . \$1.00 Per Year.
SINGLE COPIES . . . 5 Cents.
IN ADVANCE.

ADVERTISING.

A rate of 10 cents per agate line has been established for such advertisements as under the law must be printed in the *City Record*. Advertising and other copy must be in hand by Thursday of each week to insure its publication in the Saturday issue.

Copies for sale at the Mayor's Office, Room 27, City Hall.

MUNICIPAL SERVICE.

Complaints, inquiries or suggestions regarding the work of municipal departments should be made in writing to the officials directly in charge. The failure of such officials to make reply within a reasonable length of time should be brought to the attention of the Mayor. Communications should be directed as follows:

TO THE BOARD OF STREET COMMISSIONERS, Room 41, City Hall, for information relative to the laying out, relocation, widening and discontinuance of highways; the taking of real property for municipal purposes; the assessments of betterments for streets and sewers; the plotting of undeveloped areas for streets and the opening of private ways; the granting of licenses for the storage or sale of merchandise in public streets; the regulation of street traffic; the making of specific repairs in public streets; the naming of public streets; the planting and removal of trees in public ways; the issuing of licenses for the storage of gasoline, oil and other inflammable substances or explosive compounds; the use of the public ways for any permanent or temporary obstruction or projection in, under or over the same, including the location of conduits, poles and posts for telephone, telegraph, street railway or illuminating purposes, signs, marqueses, bay windows, coal holes and vaults.

TO THE SUPERINTENDENT OF STREETS, Room 44, City Hall, for information as to

the watering, cleaning, lighting and repairing of streets, the construction and care of sewers and catch-basins, the operation of the ferries, the maintenance of bridges and drawbridges and the removal of ashes and offal.

TO THE BOARD OF HEALTH, Room 11, Old Court House (rear of City Hall), for information relative to the inspection of milk, vinegar, meat, fish and vegetables, the issuance of permits for stables, slaughter houses, etc., smoke nuisances, the existence of contagious diseases or public health nuisances.

TO THE WATER COMMISSIONER, Room 58, City Hall, for information relative to the supplying or metering of water and the water charges of the city.

TO THE SUPERINTENDENT OF PUBLIC GROUNDS, 154 East Cottage street, for information as to the care of the Common, Public Garden, and the small parks throughout the city other than playgrounds, and the extermination of the gypsy moth and the charges made for the same.

TO THE PARK COMMISSIONERS, Pinebank, Jamaica Plain, for information as to Franklin Park and Field, Commonwealth avenue, the Back Bay Fens, Marine Park and playgrounds in general throughout the city.

TO THE SCHOOL COMMITTEE, Mason street, for information relative to the operation of the schools of the city.

TO THE SCHOOLHOUSE COMMISSIONERS, 120 Boylston street, for information as to the construction and repair of school buildings.

MUNICIPAL CALENDAR.

Meeting of City Council, Monday, August 29, at 3 p. m.

Meetings of the Boston Transit Commission are held Tuesday and Thursday of each week at 10.30 a. m.

HEARING.

A hearing will be held on the petition of A. Grimes & Son for leave to occupy and enlarge a wooden building for eight additional horses, making a total of twenty-five horses, at 185 Second street, Ward 13, on Thursday, August 18, at 10 a. m., in the office of the Board of Health, 11 Old Court House.

PROPOSALS ADVERTISED.

Bids have been asked for by advertisements in the *City Record* by the following departments. The attention of contractors and others is specially called to the closing time for the receipt of such proposals. This will be published weekly.

BOSTON TRANSIT COMMISSION.

Advertises for proposals for building Section 2, Beacon Hill Tunnel for the

Cambridge connection, including a three-platform station located under a portion of the existing Park Street Subway station and Boston Common. Proposals to be filed at the office of the Transit Commission, 15 Beacon street.

Bids close Tuesday, August 30, at 12 m.

COMMISSION ON ENLARGEMENT OF THE COURT HOUSE.

Advertises for proposals for furnishing chairs, tables and settees. Blank forms for proposals may be obtained at the office of the commissioners in the Court House. Bids to be filed at Room 75, Ames Building.

Bids close Saturday, August 20, at 12 m.

PARK DEPARTMENT.

Advertises for filling, to be dumped at the Neponset Playground.

PENAL INSTITUTIONS DEPARTMENT.

Advertises for proposals for supplying the House of Correction, Deer Island, with 300 barrels of flour. Blank forms for proposals may be obtained at the office of the Penal Institutions Commissioner, 32 Tremont street. Bids to be filed at same office.

Mullen, inspector, 1½ days at \$2.75, \$4.38; Peter M. Brown, laborer, 2 days at \$2.25, \$4.50; John Rogers, watchman, 1 day at \$2.25, \$2.25; Patrick Joyce, watchman, 1 day at \$2.25, \$2.25; Michael Galvin, watchman, 1 day at \$2.25, \$2.25; Eugene T. Shea, watchman, 1 day at \$2.25, \$2.25; Owen Lynch, laborer, 1 day at \$2.25, \$2.25; John J. Gallagher, pipe layer, 1 day at \$2.50, \$2.50; Timothy J. Kelleher, chauffeur, 1 day at \$2.75, \$2.75.

CONTRACTS AWARDED.

The following contracts for work, materials and supplies have been awarded with the approval of the Mayor. Those awarded without public advertisement are specially indicated. Week ending August 11, 1910:

SUPPLY DEPARTMENT.

On August 8 the Mayor approved a contract with the Staples Coal Company for supplying 900 tons steaming coal under Plan 2, to the Parental School, West Roxbury. Proposals for supplying this coal, opened August 3, were as follows:

	Plan 1.	Plan 2.
Staples Coal Company.....	\$4 45*	\$3 97†
Metropolitan Coal Company....	4 50*	4 60*

* Gross ton. † Short ton.

WITHOUT ADVERTISING.

SCHOOLHOUSE DEPARTMENT.

On August 11 the Mayor, in view of the following representations, approved a contract with W. J. Maguire, awarded without public advertisement, for roofing the Paul Jones Schoolhouse, Horace and Byron streets, East Boston:

"In explanation of the attached request to award a contract to W. J. Maguire, in the sum of \$1,216, for the roofing of the Paul Jones Schoolhouse without advertising, I would say that private competition was had, with the following result:

W. J. Maguire, \$1,216; W. A. Murtfeldt Company, \$1,344; Warren Brothers Company, \$1,298; Thomas J. Hind Company, \$1,600.

"The roof on this building has caused the department no end of trouble and expense. The former Chairman of this Board, Mr. Sturgis, in his endeavor to properly repair this roof allowed a concern to experiment with a material that had been successful elsewhere; they to be paid \$250 and to furnish a guarantee. It did not prove successful, although the concern expended a great deal more money than what they received to make good their guarantee. The roof is now in a worse condition than ever and to save further damage to the interior of the building, a new roof entire is absolutely necessary.

"To have advertised the work would have attracted undesirable men to compete, and the Board decided that the interests of the city would be more fully protected by the course pursued.

"If possible, the Board are anxious to have this work completed before the opening of the schools, hence your Honor's prompt attention is respectfully requested.

"Very respectfully yours,

"CHARLES LOGUE, Chairman."

ADDITIONS AND ALLOWANCES TO CONTRACTS.

FIRE DEPARTMENT.

The Mayor has approved a deduction of \$100 and an addition of \$400 on the contract with McGahey & O'Connor for the erection of the fire station at Callender and Lyons streets, the items ordered being (deduction) to omit sheathing on partitions and ceiling of second floor, except in toilet and shower room, and (addition) plaster two coats on all walls and ceiling of second story except in toilet and shower room, plastering directly on the brick walls and on wood lath on stud

partitions. Original contract, \$13,300; addition, \$400; deduction, \$100; contract, as standing, \$13,600.

STREET DEPARTMENT.

The Mayor has approved an extension of contract with the Barber Asphalt Paving Company, for repairing with asphalt the asphalt pavement in any street in Boston upon which the maintenance guarantee has expired, dated February 4, 1910, upon the representation of the Superintendent of Streets that as the original contract was limited to an expenditure of \$15,000 and as there are about 2,000 square yards additional which should be repaired, the extension is made necessary. Labor and materials to be furnished by the contractor under the extension not to exceed \$3,000.

PAYMENTS TO DISABLED EMPLOYEES.

STREET DEPARTMENT.

The following allowances have been made by the superintendent and approved by the Mayor:

Thomas F. Good, Sanitary Division, 15 days at \$2.25, \$33.75; William E. Love, Sewer Division, 22 days at \$2.25, \$49.50; John Dolan, Sewer Division, 8 days at \$2.25, \$18.

SCHEDULE OF BAND CONCERTS
ARRANGED BY MUSIC DEPARTMENT, SEASON 1910.

The following schedule of band concerts has been prepared by the Music Commission for the season of 1910:

Boston Common. Sunday afternoons at 3.30 p. m., July 17 to September 4, inclusive. Kanrich's Band, Albert M. Kanrich, leader.

Marine Park.

August 14, 3.30 p. m., First Corps Coast Artillery Band, W. A. Cushing, leader.

August 21, 3.30 p. m., Teel's Military Band, B. F. Teel, leader.

August 28, 3.30 p. m., Ninth Regiment Band, W. A. Barrington-Sargent, leader.

September 4, 3.30 p. m., Ives' Military Band, D. A. Ives, leader.

Pine Bank, Jamaica Pond. Sunday afternoons.

August 14, 3.30 p. m., Ernest S. Williams' Band, E. S. Williams, leader.

August 21, 3.30 p. m., First Corps Coast Artillery Band, W. A. Cushing, leader.

August 28, 3.30 p. m., Banda Rossa, A. D'Avino, leader.

September 4, 3.30 p. m., First Corps Cadets Band, J. B. Fielding, leader.

Wood Island Park. Sunday afternoons.

August 14, 3.30 p. m., Stone's Military Band, George B. Stone, leader.

August 28, 3.30 p. m., Ives' Military Band, D. A. Ives, leader.

Abbottswood, Franklin Park. Saturday afternoons, 3.30 p. m.

July 23 to September 3, 1910, inclusive, Municipal Band, Albert M. Kanrich, leader.

School playgrounds and institution concerts.

August 17, 10 a. m., Cyrus Alger School, South Boston.

August 18, Long Island, 3 p. m.

August 24, 10 a. m., Frothingham School, Charlestown.

August 30, 10 a. m., Hancock School, city.

District concerts, given in different sections of the city by the Municipal Band, Albert M. Kanrich, leader. Concerts to be from 8 to 10 p. m.

August 15, Albany and Dearborn streets, Roxbury.

August 16, Emerald and Compton streets, city.

August 17, Edward Everett square, Dorchester.

August 18, Billings Field, West Roxbury.

August 19, Charlesbank.

August 22, Central square, East Boston.

August 23, Columbus Avenue Playground.

August 24, Talbot and Welles avenues, Dorchester.

August 25, Hayes square, Charlestown.

August 26, Christopher Gibson Playground.

August 29, Hyde Park avenue and Mt. Hope street.

August 30, Blue Hill avenue and Walk Hill street.

August 31, North square, city.

September 1, St. Alphonsus and Calumet streets, Roxbury.

September 2, North Brighton Playground.

All communications relating to the concerts should be addressed to the secretary of the Music Trustees, Carney Building, Room 905.

The regular series of winter concerts will start on or about December 1, 1910. Tickets are free on application. The concert is instructive, entertaining and recreative.

PROGRAM FOR SATURDAY, AUGUST 13, 1910.

FRANKLIN PARK, AT 3.30 P. M.

Municipal Band, Albert M. Kanrich, Conductor.

March. "Second Connecticut." Reeves.
Overture. "Zampa." Herold.
Waltz. "Española." Waldeufel.
Selection from the "Goddess of Liberty." Howard.
Popular Song Medley.
Three Dances from "Henry VIII." German.
a. Morris Dance. b. Shepherd's Dance.
c. Torchlight Dance.
Selection from "Martha." Flotow.
Narcissus. Nevin.
Cavalry Charge. Luders.
March. "Hearts of Gold." L'Albert.
(By special request.)

PROGRAMS FOR SUNDAY, AUGUST 14, 1910.

BOSTON COMMON, AT 3.30 P. M.

Kanrich's Band, Albert M. Kanrich, Conductor.

Grand March and Cortege from "The Queen of Sheba." Gounod.
Overture. "Zampa." Herold.
Waltz. "Española." Waldeufel.
Selection from the "Goddess of Liberty." Howard.
Xylophone Solo. Selected.
Mr. F. A. Snow.

Narcissus. Nevin.
Three Dances from "Henry VIII." German.
a. Morris Dance. b. Shepherd's Dance.
c. Torchlight Dance.
Trauerelei. Schumann.
Selection from "Martha." Flotow.
March. "Second Connecticut." Reeves.

MARINE PARK, AT 3.30 P. M.

Ninth Regiment Band, W. A. Barrington-Sargent, Leader.

1. March. "Aida." Verdi.
2. Concert Mazurka. "La Czarine." Ganne.
3. Overture. "Orpheus." Offenbach.
4. a. Cavatina. Raff.
b. Presto. Ramsdell.
5. Fantasia. "Old Kentucky Home." Dalbey.
(Variations for various instruments.)
6. Excerpt. "Mlle. Modiste." Herbert.
7. Intermezzo. "Silver Bell." Lampe.
8. Selection from "The Merry Widow." Lehar.
9. Waltz. "Aime mon Amour." Caryll.
10. Descriptive. "Old Times Coach Galop." Crowe.

Finale. "Star Spangled Banner."

WOOD ISLAND PARK, AT 3.30 P. M.

First Coast Artillery Corps Band, W. A. Cushing, Leader.

La Reine De Sava. Gounod.
Overture. "Fest." Leutner.
"Amina." Lincke.
Selection from "Mlle. Modiste." Herbert.
"The Nightingale." (Piccolo Solo.) Mayour.
Mr. H. J. Harding.
Concert Waltz. "Artist's Life." Strauss.
Intermezzo from "The Rustic Wedding." Mascagni.
Selections from "The Three Twins." Hoschna.
Descriptive. "A Hunting Scene." Bucalosso.
Selection from "The Chocolate Soldier." Strauss.
March. "Colonel Lombard." Hosmer.

PINE BANK, JAMAICA POND, AT 3.30 P. M.

Ernest S. Williams' Band, E. S. Williams, Conductor.

March. "Flag of Victory." Von Blon.
Overture. "Raymond." Thomas.
Sextet from "Lucia." Donizetti.
Messrs. Bailey, Williams, Bass, Spring, Ripley, Kingman.
Fantasia on Southern Songs. Langey.
Intermezzo from "Tales of Hoffman." Offenbach.
Operatic Melange. "Creme de la Creme." Tobani.
Cornet Solo. "The Crystal Cascade." Williams.
Reminiscences of Verdi. Godfrey.
E. S. Williams.
Characteristic. "The Mill in the Forest." Edenburg.
Grand Potpourri. "Albion." Bactens.
"The Star Spangled Banner." Key.

STREET LAYING-OUT DEPARTMENT.

On August 4 the Mayor approved orders of the Street Commissioners for widening, relocating and ordering the construction of Morton street, Dorchester, as a highway, from Blue Hill avenue to beyond Leslie street, making the followings awards to owners of estates damaged and assessing the following betterments to owners of estates benefited thereby:

Awards.—Joseph Amia, \$1,756.88; Josephine A. Tweed, \$2,076.88; West End Street Railway Company, \$172.98; Joseph J. Donahue, \$41.53; Joseph Engel, \$389.82; Mary M. McCauley, \$2,272; James I. Connors, \$198.13; Fred N. Russell, \$1,324.69; Edward C. Connors, \$2,845.63; Ellen J. Shaw, \$53.25; J. M. Kenney and M. H. Curley, \$7.13.

Betterments.—Catherine M. Breslin, \$80.60; Little L. Foley, \$165.60; Joseph Amia, \$438.60; Josephine A. Tweed, \$325; West End Street Railway Company, \$1,800; Albert Matthews, \$120; Joseph J. Donahue, 3 lots, \$467.75; Joseph Engel, \$702.30; Mary M. McCauley, \$755.80; James I. Connors, \$358.90; Fred N. Russell, \$1,342.70; Edward C. Connors, \$402.20; Ellen J. Shaw, \$291.52; J. W. Kenney and M. H. Curley, \$100.

On August 9 the Mayor affixed his signature to the approval by the Street Commissioners of the location, direction, width and grade of the following private ways: Dexter place, Dorchester, owned by Patrick J. Hurley; and St. William street, Dorchester, owned by the heirs of William Worthington *et al.*

On August 9 the Mayor approved the following votes of the Street Commissioners, both of which were passed after consultation with the Law Department:

Fixing assessment on estate of Wallace H. Pendle for improvement of Columbia road at \$347.10 without interest.

Award of \$800 to Frederic C. Bowditch *et al.*, for damages occasioned to estate corner Ferdinand and Knox streets by taking made for schoolhouse purposes.

On August 9 the Mayor approved a vote of the Street Commissioners taking, under the right of eminent domain, in fee for school purposes a parcel of land bounded and described as follows:

A parcel of land supposed to belong to Frank S. Mason, bounded southeast by Pearl street, by three measurements, 38 $\frac{1}{10}$ feet, 34 $\frac{1}{10}$ feet, and 71 $\frac{1}{10}$ feet; southwest by Wesley street, 65 $\frac{1}{10}$ feet; northwest by Holden row, 128 $\frac{1}{10}$ feet; and northeast by Salem Hill court, 79 $\frac{1}{10}$ feet; containing 10,723 square feet, more or less.

PETITIONS GRANTED.

The following petitions granted by the Board of Street Commissioners have been approved by the Mayor:

Pole Locations.—Edison Electric Illuminating Company, to remove three poles from Charter street, between Hanover and Unity streets, Ward 6. New England Telephone and Telegraph Company, to erect and remove one pole on corner of Park street and Alpha road, Ward 20.

Trees.—Mrs. Frederick T. Lord and others, for permission to plant trees on Beacon street. Superintendent of Streets, to remove tree at 21 Corbet street.

Closing of Streets.—Charles M. Callahan, to close Brighton street, between Leverett and Allen streets, and Chambers

street, between Charles and Brighton streets. Superintendent of Streets, to close roadway on Park street, from Beacon street to Tremont street.

Marquise.—Eugene N. Foss, at 660 Beacon street.

Signs.—S. Robinson & Co., 51 Washington street.

Gas Main.—Charlestown Gas and Electric Company, to lay a 4-inch gas main in Middlesex street, between Lyndeboro and Essex streets, Charlestown.

Street Closing.—Superintendent of Streets, to close South Margin street, between Pitts and Hale streets, Ward 8.

CLAIMS.

On August 9 the Mayor approved an award of \$100 to Martin B. McLauthlin, trustee, for damages to his estate on Deaconess road, caused by the laying out of said road.

On August 9 the Mayor approved a vote of the Committee on Claims, which had been approved by the Corporation Counsel, directing that judgment be entered against the city in the sum of \$2,835 in the case of D. F. O'Connell Company *vs.* Boston, an action to recover for balance due under contract for sewerage work at Standish, Harvard and Greenwood streets, Dorchester.

LAND FOR SCHOOL PURPOSES.

On August 8 the Mayor approved votes of the Schoolhouse Commissioners requesting the Street Commissioners to take for the purpose of increasing the size of the yard of the Prescott School land on Elm street in Charlestown.

PERMISSION TO SELL.

On August 8 the Mayor authorized the Acting Fire Commissioner to sell old horses to an amount not to exceed \$500, the same to be in part payment for new horses.

MUNICIPAL WATER FRONT IMPROVEMENTS AT OAKLAND.

The city of Oakland, Cal., has undertaken the first part of an extensive water front improvement scheme for which an issue of \$2,503,000 of bonds was voted in November, 1909. Oakland is on the east shore of San Francisco Bay, the business section of the city being on a flat area only a few feet above the maximum high tide. The bottom of the bay extends out from the shore line on a very flat slope, with the result that 30 feet of water does not occur until at a distance of from 2 to 2½ miles out. The normal variation in the tide is about 5 feet, so that a wide strip of flat mud bottom of the bay is exposed during the low tide.

The natural conditions along the shore line and litigation regarding the municipal control of wharfing-out rights have long retarded the development of the water front of the city. The Southern Pacific and the Western Pacific railroads have constructed long moles across the mud flat out to deep water, and over these a large volume of freight and passenger traffic is handled in connection with ferries and vessels operating in the bay. The San Francisco, Oakland & San Jose Railroad, an interurban electric line, also operates a fleet of passenger ferries from a similar mole. The bay front has

not been otherwise improved for harbor facilities. An estuary extending inland across the mud flat has been dredged by the federal government to a depth of 25 feet for a distance of about 2½ miles from deep water in the bay, thus providing that depth up to the business and manufacturing districts of the city. The water front along this harbor has been developed to a limited extent by private enterprise, but the facilities are inadequate for ocean-going vessels.

A recent court decision confirmed the right of the city to build wharves out into the bay from the low-tide line as it existed in 1852, and this decision also gave the city control of practically all of the water frontage. Of the bonds voted in 1909, \$530,000 are to be expended on the bay shore. A bulkhead is to be constructed along the United States bulkhead line throughout the entire length of the frontage of the city, except where the railroad terminals are located. A street 200 feet wide will be constructed in the rear of this bulkhead, with a system of streets connecting it with those already opened back of the present shore line. A wharf 2,000 feet long will be built along this bulkhead, and a channel dredged through the mud flat out to deep water in the bay. This improvement is intended only as the preliminary work on an extensive system of piers, but will accommodate considerable commerce.

The larger immediate development has been undertaken along Oakland Harbor, where \$1,798,000 of the money raised by bonds will be used in improving the harbor frontage for a distance of 2,750 feet from the foot of Broadway, which is the principal business thoroughfare of the city. This improvement is in a district close to the business and manufacturing centers of the city, and is where good railroad facilities are immediately available. The purchase of additional lands will entail an expenditure of \$767,000 of the total, and the remaining \$1,031,000 will be spent for improvements. A gravity-section concrete quay wall will be built along the bulkhead line, with a 30-foot depth of water in front of it. To accommodate a rapidly developing manufacturing center near the eastern end of the harbor, a reinforced concrete pier, 300 feet long, also is to be built at a cost of \$175,000. A board consisting of members of the Corps of Engineers, U. S. A., has reported in favor of a 30-foot depth of water in the estuary, and there is considered to be no doubt that the necessary funds will be appropriated by Congress to dredge to the additional depth and to maintain the channel afterwards.

The municipal improvements now in course of construction will provide 5,350 lineal feet of berth space, over which it has been estimated it will be possible to handle nearly 1,000,000 tons of freight, in addition to the 3,000,000 tons that are handled each year by the railroads, the 1,500,000 tons that pass over privately operated wharves and some movement over several existing small municipal piers. As the commerce of the harbor increases so that more berth space will be required than is to be provided, piers are to be built from the quay wall out into the harbor formed by the improved estuary. At present a public area 150 feet wide will be graded and improved along the rear of the quay wall to facilitate the handling of traffic with wagons and trucks. A 30-foot strip of this area will first be set aside for freight, buildings and railroad tracks, and back of it a 60-foot roadway, beyond which will be a 10-foot sidewalk.—*Engineering Record.*

PROCEEDINGS OF CITY COUNCIL.

Monday, August 8, 1910.

Special meeting of the City Council, held in the Council Chamber, City Hall, at one o'clock p. m., President BALLANTYNE in the chair. Absent—Coun. Collins and Kenny.

The Clerk read the call for the meeting, as follows:

City of Boston,
Office of the Mayor, August 4, 1910.

To the Members of the City Council:

In view of the opinion of the Corporation Counsel that the special meeting called on August 3 was of doubtful legality because of my inability to give notice to every member of the Council who was in the city, I hereby request you to assemble in the City Council Chamber, City Hall, on Monday, August 8, 1910, at 1 p. m., for the purpose of taking action upon an order appropriating funds for the construction of a new ferry steamer and for hospital improvements, and for transacting such other business as may legally come before the meeting.

Respectfully,
JOHN F. FITZGERALD, Mayor.

Placed on file.

NEW FERRYBOAT, ETC.

The following was received:

City of Boston,
Office of the Mayor, August 8, 1910.

To the City Council:

Serious question has been raised by a member of your honorable body as to the legality of the call for a special meeting issued by me on Wednesday, August 3. This meeting was called for the transaction of urgent business, namely, the passage of an order appropriating \$100,000 for a new ferry steamer and \$50,000 for various hospital improvements, each recommended by the head of the department interested. It was my judgment that these necessities might properly be provided by means of a tax appropriation rather than by loans, and in this view a majority of your honorable body concurred.

Diligent effort was made to communicate with the seven members of the City Council, then in Boston, and it was supposed that the assembling of a quorum constituted a legal meeting of the Council. The Corporation Counsel, however, rules in the appended letter that notice must have been actually received by all of the members within the city limits at the time of issuing the call. Though a diligent and impartial search was made for every member, such notice failed to reach two of your honorable body, and the meeting, therefore, can hardly be considered to have been held in response to a valid call.

I recommend that action be taken declaring the meeting itself null and void and rescinding all its transactions as to form, but confirming them in fact by the passage of the appended orders.

The amount to be expended for the ferry steamer has been raised to \$125,000, in accordance with the recommendations of the Superintendent of Streets and the Consulting Engineer of the Finance Commission as set forth and explained in the appended communication from Superintendent Rourke.

Respectfully,
JOHN F. FITZGERALD, Mayor.

The opinion of the Corporation Counsel, referred to, was as follows:

City of Boston, Law Department,
73 Tremont Street, Boston, August 5, 1910.

Hon. John F. Fitzgerald, Mayor,
City Hall, Boston:

Dear Sir,—In reply to your inquiry as to the equality of the special meeting of the City Council this week and the validity of the appropriation orders passed by it at that time, I would say that although by the city charter the Mayor when he summons meetings of the Board of Aldermen or Common Council or either of them shall cause suitable notice in writing of such meetings to be given to the respective members of said Board, and such notices in writing were given only to the members who came to City Hall the day of the meeting, yet under the decision of the Supreme Court in *Russell v. Wellington*, 157 Mass. 100, it is not necessary to the legality of a meeting of the City Council that this requirement of the charter should be literally complied with. It is sufficient under that decision if all the members of the City Council in the city at that time received actual notice of the meeting.

The case of *Damon v. Selectmen of Framingham*, 195 Mass. 72, does not overrule the above cited case. The legality therefore of the action of the City Council at the special meeting depends upon the question of fact. I understand that two of the members were absent from the city at the time. Did the other seven receive actual notice by telephone, or otherwise, of the meeting? If they did the meeting in my opinion was a legal one and the appropriation orders properly passed. If only the five members present received actual notice of the meeting, then the meeting was not a legal one.

Yours respectfully,
THOMAS M. BABSON,
Corporation Counsel.

Following is the communication from Superintendent Rourke:

Street Department, City Hall,
Boston, August 8, 1910.

To the Honorable the Mayor:

Mr. Guy C. Emerson, Consulting Engineer of the Finance Commission, has called my attention to the fact that eight years ago the ferryboat "General Sumner" cost \$95,300, and with some extras the final price was close to \$100,000. The price of labor and materials has greatly increased during the past eight years. Of course, methods of construction have also been improved, and it is a question whether the increased cost of labor and materials will balance the improvements in construction or not. Moreover, the United States regulations of 1908 require that ferryboats of over 75 tons burden shall be constructed with watertight compartments, which will materially increase the cost. It therefore seems to me safer to ask the City Council for an appropriation of \$125,000 for the new ferryboat.

Respectfully,
L. K. ROURKE,
Superintendent of Streets.

Ordered, That to provide additional means to meet the current expenses payable during the financial year beginning with the first day of February, 1910, of performing the duties devolving by statute upon the City of Boston, or upon the departments or officers thereof, the sums of money hereinafter specified be, and the same are, hereby appropriated for the objects and purposes hereinafter stated; that said sums be met by taxes to the amount so appropriated, and be raised by tax on the polls and estates taxable in the City of Boston, and that all orders heretofore passed relating to taxes and the interest thereon apply to the taxes herein provided for.

Street Department, Ferry Division, new ferryboat.....	\$125,000
Hospital Department:	
Fireproofing engine-room building.....	\$25,000
New electrical machines.....	10,500
New wiring.....	14,500
	<u>50,000</u>
	<u>\$175,000</u>

Ordered, That the special meeting of the City Council held on August 3, 1910, be declared null and void because of the lack of suitable notice by the Mayor to the respective members, as required by law, and that all its transactions be considered as rescinded.

Referred to the Executive Committee. (Orders passed later. See Executive Reports.)

CLOSING OF STREETS FOR PARADES.

The following was received:

City of Boston,
Office of the Mayor, August 8, 1910.

To the City Council:

I beg to recommend the passage of the appended order, directing the City Messenger to rope off the streets along the route of the parade of the Catholic Total Abstinence Union of America, on the evening of Wednesday, August 10.

Respectfully,
JOHN F. FITZGERALD, Mayor.

Ordered, That the Police Commissioner be authorized to close to travel by vehicles, except fire, police, hospital and mail wagons, such of the streets designated in section 1 of chapter 6 of the Ordinances of 1910 as may be necessary for the formation and passage of the parade of the Catholic Total Abstinence Union of America on Wednesday, August 10; such streets to be closed during and for not more than ten minutes preceding the passage of said parade; and the City Messenger is hereby authorized to rope off any of said streets at such points as may be designated by the Police Commissioner; the expense of said roping to be charged to the appropriation for City Council, incidental expenses.

Passed.

RULES CONCERNING COMMON.

The following was received:

City of Boston,
Office of the Mayor, August 8, 1910.

To the City Council:

In a communication addressed to me under date of August 5, the Police Commissioner, after discussing in detail certain points of difference between the rules governing the parks under the jurisdiction of the Park Department and those governing the Common and other public grounds under the jurisdiction of the Public Grounds Department, recommends that "in the respects mentioned and in all others which may be found desirable, the ordinance governing the conduct of persons on the Common and other public grounds shall be so amended as to conform to the park rules."

He recommends further that "the ordinance relative to obstructing sidewalks or loitering upon them . . . be so extended as to include the Lafayette Mall."

He also calls attention to the provision contained in section 66, chapter 47, of the ordinances that "no person shall walk, stand or lie on the grass on any of the public grounds except in accordance with a permit from the Mayor" and expresses the opinion that "either this ordinance should be amended to conform to the public practice or the practice ought to be made to conform to the ordinance."

As the City Council under the charter has authority to enact new ordinances and no ordinance can become effective without its concurrence, I beg to lay this communication before you for such action as may seem to you to be in the public interest.

Respectfully,
JOHN F. FITZGERALD, Mayor.

City of Boston, Police Department,
Office of the Commissioner, August 5, 1910.

Hon. John F. Fitzgerald, Mayor.

Dear Sir,—In the public interest I beg to call your attention to the following facts and conditions:

The city parks are under the control of three commissioners appointed by the Mayor. The Common, the Public Garden and the other public grounds and squares are under the control of a Superintendent of Public Grounds, also appointed by the Mayor.

The city parks on the one hand and the Common and other public grounds on the other hand are open at all times to all persons, and because the public grounds are nearer to the centres of population they are used much more freely in proportion to their size.

As parks and grounds are alike owned and managed by the City and are used by the same persons for the same purposes, the rules which govern them ought to be substantially the same, with a leaning, in case of variance, to greater strictness in the more frequented places.

The exact reverse is the case. The parks have rules designed for the safety and comfort of the people and the preservation of property, which represent the watchful experience of twenty-five years. The Common and other public grounds have only sections 66, 67 and 68, chapter 47, of the ordinances, which overlook altogether many of the most objectionable incidents of life in such places.

Here are certain illustrations:

In the city parks it is an offense punishable by fine to stand or lie on a seat; on the Common it is not.

In the parks it is an offense to sleep on a seat or elsewhere; on the Common it is not an offense to sleep on a seat or to sleep in any other place except in so far as the sleeper might trespass on the grass.

In the parks it is an offense to drink intoxicating liquor; on the Common it is not.

In the parks it is an offense to be "under the influence of intoxicating liquor"; on the Common it is only the general law as to actual drunkenness, applicable to all places, which is in effect.

In the parks it is an offense to "utter abusive or indecent language"; on the Common the language must be addressed to another person and must be "obscene or profane" in order to come under section 50, chapter 47, of the ordinances, which applies to all public places. There is a large opportunity for nastiness between profane or obscene language addressed to another person and indecent language merely uttered.

In the parks it is an offense to "annoy another"; the Common has only the general law as to assault, the use of profane or indecent language, etc. This distinction is more important than it may seem to be. A man, for instance, might accost a woman in language that was neither profane nor obscene, or might follow her from place to place without speaking, and according to the laws applicable to the Common he could not be punished unless his acts amounted to that vague offense known as "disorderly conduct." Such actions in the parks would be a breach of the rule which forbids him to "annoy another" and would be legally punishable. Moreover a policeman in uniform or in plain clothes might well secure through his own observation evidence of annoyance sufficient to convict without the appearance of the woman as complainant or witness in court or elsewhere. On the other hand, when the offense is the use of obscene language, as on the Common, no prosecution is possible unless the policeman has actually heard the language, which practically would never happen, or the offender having been caught, the woman is willing to appear against him and in open court repeat the very words which she accuses him of having addressed to her.

The absurdity of the present situation becomes clear when it may be truthfully said that a man at the easterly end of Commonwealth avenue, which is a part of the city parks, might be prosecuted for a dozen different violations of wholesome rules and yet by simply crossing Arlington street might commit in the Public Garden exactly the same offences without a possibility of legal punishment.

I beg to recommend that in the respects mentioned and in all others which may be found desirable the ordinance governing the conduct of persons on the Common and other public grounds shall be so amended as to conform to the park rules. If the rules were those of a body inde-

pendent of the city I should hesitate to point to them as models to be imitated, but as they have been established by a city commission for use in city parks, there can be no offence.

I beg to call your attention further to the Lafayette Mall of the Common. It is the westerly sidewalk of Tremont street between Park and Boylston streets; many subway exits and entrances open upon it; and immense numbers of persons pass over it wholly or in part without any desire to linger. There are no seats on the mall and the persons who idle upon it, especially near the Park and Boylston street ends, are often an obstruction or worse; but unless they commit a specific offence against the law their right to be in that place as a part of the Common cannot be disputed. I recommend that the ordinance relative to obstructing sidewalks or loitering upon them, with an amendment which I shall presently explain, be so extended as to include the Lafayette Mall.

The ordinance in question is section 34 of chapter 47, and in so far as it applies to the present case it provides that

"No person shall, in a street, wilfully, maliciously and wantonly obstruct the free passage of foot travelers, nor shall any person in a street wilfully, maliciously and wantonly saunter and loiter for more than five minutes after being directed by a police officer to move on."

The words "wantonly" and "maliciously" were inserted in both clauses of this ordinance in the year 1903, the amendments becoming effective without the approval of Mayor Collins. The change practically put an end to prosecutions for such offences, for proof sufficient for a court that the obstruction or the loitering was wanton and malicious can rarely be produced. I believe that in the interest of the whole city the ordinance should be restored to its original form, and so restored it would be of great public service in the Lafayette Mall as well as elsewhere.

I ask attention also to the provision contained in section 66, chapter 47, of the ordinances, that "No persons shall walk, stand or lie on the grass of any of the public grounds, except in accordance with a permit from the mayor."

In consequence of customs which have long existed it is impossible for the police either to enforce or not to enforce this ordinance without arousing public criticism. Their strict duty would be to enforce it, but on holidays, on the occasion of band concerts, and numerous public celebrations, and on warm summer nights the city practically invites thousands of persons to go upon the grass. The police ought not to be expected to discriminate on their own responsibility between times or persons. It seems to me that either the ordinance should be amended to conform to the popular practice or the practice ought to be made to conform to the ordinance. I feel sure that if the city authorities apply themselves to the question they will find a reasonable solution.

The police enforce the park rules in the parks not only by their presence but by means of hundreds of prosecutions yearly. They cannot enforce those rules on the Common and other public grounds for the simple reason that in those places the rules do not exist. It is not surprising that the public which knows and values the park rules and is not aware that they are without effect on the Common and other public grounds, should some times express indignation because of the supposed neglect of the police in the latter places. The police will do their duty if they have behind them laws or ordinances without which in any specific instance, the authority of a policeman is no greater than that of any other citizen.

I am,
Respectfully yours,
STEPHEN O'MEARA,
Police Commissioner for the City of Boston.
Referred to the Committee on Ordinances.

AMENDED PETITION.

Florence Woods submitted an amendment to her petition of May 23, 1910, asking that release be granted to Margaret E. Foley of title on property No. 73 Fuller street, Dorchester, instead of to herself.

Referred to the Committee on Public Lands.

WORLD'S EXPOSITION.

A communication was received from Francis Tracy Tobin of Philadelphia concerning proposed World's Exposition on completion of Panama Canal, suggesting that New Orleans be favored as the place for the exposition.

In connection with the above President BALLANTYNE submitted the following:

Whereas, Congress of the United States is considering the celebration of the completion of the Panama Canal by the holding of a World's Exposition; therefore be it

Resolved, That the Boston City Council places itself on record as favoring the City of New Orleans, Louisiana, as the ideal place for the holding of said exposition, it being the mart of the import and export commerce of the countries south of us.

Resolved, That a copy of these resolutions be forwarded to the Governor of Louisiana, the Mayor of the City of New Orleans, the United States Sena-

tors from Massachusetts and the members of the National House of Representatives from Massachusetts.

Referred to the Executive Committee.

STREET LOITERING.

President BALLANTYNE offered the following:

City of Boston.
In the Year Nineteen Hundred and Ten.

An Ordinance.

Be it ordained by the City Council of Boston, as follows:

Section 34 of chapter 47 of the Revised Ordinances of 1898, relating to Prohibitions and Penalties, as amended by chapter 1 of the Ordinances of 1903, is hereby amended so said section will read as follows:

"No person shall, in a street, obstruct the free passage of foot travelers, nor shall any person in a street, except in that part of Otis street between Franklin street and Summer street, during the part of the day between the hours of 11 a. m. and 2 p. m., saunter and loiter for more than five minutes after being directed by a police officer to move on."

Referred to the Committee on Ordinances.

MINORS' LICENSES.

President BALLANTYNE submitted reports recommending that minors' licenses be granted to 7 newsboys, 1 bootblack and 2 vendors.

The licenses were granted on the usual conditions.

RECESS TAKEN.

The Council voted at 1.23 p. m., on motion of Coun. BRAND, to take a recess subject to the call of the President.

The members of the Council reassembled in the Council Chamber and were called to order by the President at 1.30 p. m.

ENGINE HOUSE, PARKER HILL.

Coun. CURLEY offered an order—That his Honor the Mayor be requested to take such action as may be necessary to provide for the immediate issuing of the balance of the loan for, and for the construction of, the engine house at Parker Hill, Ward 19.

The order was passed.

LABOR CONDITIONS, BOAT BUILDING.

Coun. CURLEY offered the following:

Resolved, That it is the opinion of the City Council that the work at present being done for the Infirmary Department, namely, the building of a new boat for said department under conditions unfair to organized labor should be suspended until such time as the present labor troubles affecting the machinists are adjusted.

Coun. HALE—Mr. President, I think this is a matter that should be referred to the Executive Committee for consideration, and I so move.

The motion to refer to the Executive Committee was declared carried. Coun. CURLEY doubted the vote and asked for the yeas and nays.

Reference was lost, yeas 3, nays 4.

Yeas—Coun. Ballantyne, Brand, Hale—3.

Nays—Coun. Attridge, Buckley, Curley, McDonald—4.

The resolution was adopted.

EXECUTIVE REPORTS.

Coun. HALE, for the Executive Committee, submitted the following:

(1) Report on message of Mayor, communications and order (referred today), appropriating \$175,000 for Ferry Division and Hospital Department—that the order ought to pass.

Report accepted; order passed, yeas 7, nays 0.

(2) Report on order (referred to day), that the special meeting of the Council held on August 3, 1910, be declared null and void—that the order ought to pass.

Report accepted; order passed.

PAYMENT FOR MILITIAMEN.

Coun. ATTRIDGE offered an order—That his Honor the Mayor be requested to direct all heads of departments to pay employees in said departments who are members of the Massachusetts Volunteer Militia for time spent by said employees at the annual maneuvers.

Passed.

COLUMBUS DAY CELEBRATION.

Coun. ATTRIDGE offered an order—That his Honor the Mayor be requested to communicate with the Italian Ambassador at Washington, D. C.,

as to the expediency of the Italian Government sending war vessels to join in the celebration of Columbus Day in Boston on October 12, 1910.

Passed.

WATER FOUNTAIN, BLUE HILL AVENUE.

Coun. CURLEY offered an order—That the Water Commissioner, through his Honor the Mayor, be requested to install ice water fountain at Blue Hill avenue near Savin street.

Passed.

STATUS OF CONSTABLES.

Coun. CURLEY offered an order—That the Corporation Counsel submit an opinion relative to status of constables connected with Animal Rescue League.

The order was passed.

MILK INSPECTION SERVICE.

The following was received:

City of Boston,

Office of the Mayor, August 8, 1910.

To the City Council:

In accordance with the recommendations made by the Board of Health in its communication addressed to your honorable body under date of August 1, I beg to recommend the passage of the appended order, appropriating \$12,000 for the improved milk inspection service of the Health Department.

Respectfully,
JOHN F. FITZGERALD, Mayor.

Ordered, That to provide additional means to meet the current expenses payable during the financial year beginning with the first day of February, 1910, of performing the duties devolving by statute upon the City of Boston, or upon the departments or officers thereof, the sum of money hereinafter specified be, and the same is, hereby appropriated for the object and purpose herein-after stated; that said sum be met by taxes to the amount so appropriated, and be raised by tax on the polls and estates taxable in the City of Boston, and that all orders heretofore passed relating to taxes and the interest thereon apply to the taxes herein provided for.

Health Department..... \$12,000

Coun. HALE—Mr. President, I would like to hear that communication from the Board of Health read before we pass on this—the one of August 1 that the Mayor refers to.

President BALLANTYNE—The Clerk is not in possession of that communication. Perhaps the Mayor's office can furnish it.

(On motion of Coun. HALE the Council took a recess of five minutes, from 1.48 p. m. to 1.53 p. m., during which time the communication referred to was produced and was read by Coun. HALE.)

Coun. HALE—Mr. President, I move a suspension of the rule, that the order appended to the communication submitted by the Mayor be passed.

The rule was suspended and the order above submitted by the Mayor was passed, yeas 6, nays 0.

GENERAL RECONSIDERATION.

On motion of Coun. BRAND, the Council refused to reconsider all action taken to-day.

Adjourned, on motion of Coun. BRAND, at 1.55 p. m., to meet on Monday, August 29, at 3 p. m.

OFFER \$150 FOR CITY DOCK PLAN.

Tacoma, Wash.—A prize of \$150 has been posted by the Municipal Commission to the Tacoma architect who shall submit the most pleasing design, from both the artistic and utility standpoints, for the proposed city dock on the city waterway. The first unit of the dock is to be 300x80 feet in size, three stories high. The materials are not specified in the resolution authorizing the prize, nor is the time within which the competition closes. The award is left solely to the judgment of the commission. The first floor of the building will be for the handling of freight; the second story will be devoted to passenger service and the third to public market and other purposes that the city may see fit to designate. Special elevator systems will be installed to facilitate the movement of people and freight.—*Municipal Journal and Engineer.*

A PORTABLE PAVEMENT FLUSHING RIG.

The street department of the city of Seattle employs to a considerable extent a portable street pavement flushing rig which has been evolved by extensive experience in work of this character under the conditions presented in that city. The rig is used chiefly on streets in residential sections and on steep grades, since a number of wagon flushing machines are operated in the congested business district.

The rig consists essentially of several 15-foot lengths of 2-inch pipe, each length being mounted near both ends on a pair of broad-tired castor wheels; and the several lengths joined together by 4-foot pieces of extra heavy fire hose. The sections of pipe are threaded on both ends so the hose forming the connection between them may be attached with standard couplings. The bases of the broad-tired castor wheels are screwed to a 2-inch by 6-inch plank, 2.5 feet long, which is fastened rigidly to the pipe by means of a pair of U-bolts that take bearing on a plate against the underside of the plank. One of the pipe sections has a gooseneck at one end that is supported by a bracket on the corresponding truck. This gooseneck brings the nozzle connection up to a convenient height for the men to handle.

The rigs are kept in a storehouse of the street department and are delivered on a one-horse wagon to the locality where the flushing is to be done. The pipe sections then are assembled and the horse taken from the wagon to drag the rig from place to place. Since the rig is light, an old horse that is scarcely good for other purposes is employed. The ease with which the rig is moved enables a crew of three men to cover a large area of street surface in a day. The scheme usually followed is to start from a hydrant and work both ways to the full length of the assembled pipe section, which is about 200 feet. In making the necessary turns one of the men keeps the line straight by using a hook to jerk the sections around. The extra heavy hose employed almost eliminates difficulties from breaks, but to guard against the latter the pipe sections are connected by a chain.

The expense of one of these rigs is quite nominal, since they can be built up out of materials in stock. The amount of street surface that can be flushed with one of them in a day depends largely on the experience of the crew, the character of the paving and the street grade involved. On the average three men will clean about 18,000 square yards of stone or brick pavement in eight hours, at a cost of about 50 cents per 1,000 square yards.

The rig was originated by Mr. A. L. Walters, superintendent of streets of Seattle, using 2-inch fire hose strapped to the trucks. Mr. B. E. Thomas, general foreman of the street department, since has made various changes, such as the substitution of pipe for the hose.—*Engineering Record.*

CITY OF BOSTON.**TO CONTRACTORS FOR FILLING.**

The Park Commissioners of Boston will receive good clean filling, either gravel, clay or loam, in large or small lots up to 14,000 cubic yards, but a reasonable amount of cinders or ashes free from refuse or decomposable material may be included, dumped where directed at Neponset Playground, and will pay therefor \$0.40 per cubic yard measured in the carts.

ROBERT S. PEABODY,
JAMES M. PRINDLE-GAST,
DANIEL H. COAKLEY,
Commissioners

(Aug. 13.)

NOTICE TO SUBSCRIBERS.

Subscribers will find the expiring date of their subscription stamped upon the mailing wrapper. As payment must be made in advance, remittance should be made on or before that date.

SUFFOLK COUNTY COURTHOUSE.**TO FURNITURE CONTRACTORS.**

The Commissioners for the Enlargement and Alteration of the Suffolk County Courthouse, appointed and acting under the provisions of chapter 534 of the Acts of the year 1906, invite proposals for furnishing (1) chair, (2) tables, (3) settees, of the styles and kinds indicated in the proposal, and giving bond of a surety company therefor in the sum of five hundred (500) dollars. Prices are to include the furnishing and delivery of said furniture in such rooms of said courthouse as the commissioners may direct, on or before the first day of October, 1910. Only proposals obtained at the office of the commissioners in said Courthouse in Pemberton square, signed by the bidder and left before 12 o'clock m. of Saturday, August 20, 1910, at the office of James R. Dunbar, one of the commissioners, Room 75, Ames Building, 1 Court street, Boston, with a certified check for one hundred (100) dollars payable to the Commonwealth of Massachusetts, will then and there be publicly opened and read. The proposals and certified checks are to be inclosed in an envelope, sealed, and marked, according to the work figured on, "Proposal for (Chairs), (Tables), (Settees), for the Suffolk County Courthouse." The commissioners reserve the right to reject any or all proposals.

JAMES R. DUNBAR,
JOSEPH J. CORBETT,
WILLIAM H. WELLINGTON,
Commissioners.

(Aug. 13.)

CITY OF BOSTON.**NOTICE TO CONTRACTORS.**

Scaled bids for building Section 2, Beacon Hill Tunnel for the Cambridge connection, including a three-platform station located under a portion of the existing Park street subway station and Boston Common, will be received by the undersigned until 12 o'clock m. of Tuesday, August 30, 1910. Specifications and forms of contract can be obtained at 15 Beacon street, ninth floor. The right to reject any and all bids, and to award the contract as is deemed to be for the best interest of the City of Boston is reserved. By order of the Boston Transit Commission.

(Aug. 13, 20, 27.)

B. LEIGHTON BEAL,
Secretary.

PROPOSALS FOR FLOUR.

The Penal Institutions Commissioner invites proposals to supply the House of Correction, Deer Island, with 300 barrels, more or less, of hard wheat flour, and to furnish a bond in a surety company of \$500, if required by the commissioner. Said flour to be delivered on or before September 10, 1910, on board the steamer "Monitor" at Eastern Avenue Wharf, Boston, Mass. Specifications and sample of the grade as the standard may be obtained at office of the Penal Institutions Commissioner, 32 Tremont street. Proposals will be received until August 18, 1910, at 12 m., when the same will be publicly opened. The commissioner reserves the right to reject any or all bids. A duplicate of bid must be filed with City Auditor at or before same time.

(Aug. 13.) FRED S. GORE, Commissioner.

PROPOSALS FOR RECONSTRUCTING ALBANY STREET BRIDGE.

The Superintendent of Streets of the City of Boston, office 47 City Hall, invites proposals for reconstructing Albany Street Bridge over the Boston and Albany Railroad freight tracks, and giving bond therefor of a surety company approved by the superintendent in the sum of ten thousand dollars (\$10,000), to secure the due performance of the contract and the full protection of the city. Forms of bids may be obtained at the said office of the Superintendent of Streets. Each bid should be inclosed in an envelope, sealed, marked "Bid for Albany Street Bridge," and left at the said office of the Superintendent of Streets before 12 m. on Tuesday, August 23, 1910, with a certified check for one thousand dollars (\$1,000), payable to and to become the property of the city if the bid after acceptance is not carried out. The bids will then and there be publicly opened and read. Bids must be made in duplicate, the duplicate, without check, to be deposited by the bidder with the City Auditor previous to the time named for opening the bids. The undersigned reserves the right to give preference to the proposals of bidders agreeing to pay the trade unions' rate of wages and the right to reject any or all proposals.

LOUIS K. ROURKE,
Superintendent of Streets.

Boston, August 11, 1910.

(Aug. 13.)

CITY OF BOSTON.**PROPOSALS FOR LAYING WATER PIPES.**

The Water Commissioner of the City of Boston invites proposals for laying about 2,100 feet of 12-inch water pipe in Milton; Reddy, Hill Top and Hallet-Davis streets, Dorchester, and giving bond of a surety company doing business in Massachusetts in the sum of two thousand (2,000) dollars on the contract. Only proposals obtained at the Water Commissioner's office, Room 58, City Hall, Boston, signed by the bidder and there left before 12 o'clock noon of Thursday, August 18, 1910, with a certified check for the sum of five hundred (500) dollars, will then and there be publicly opened and read. A duplicate sealed proposal, without check, must be deposited with the City Auditor before the time above specified. The commissioner reserves the right to reject any or all proposals should he deem it to be for the interest of the city so to do.

WILLIAM E. HANNAN,
Water Commissioner.

(Aug. 13.)

CITY OF BOSTON.**PROPOSALS FOR COLLECTING AND REMOVING ASHES, ETC., IN THE NORTH DORCHESTER DISTRICT.**

The Superintendent of Streets of the City of Boston, office No. 47 City Hall, invites proposals for collecting and removing the store dirt, house dirt, ashes, refuse, etc., in the North Dorchester District, and giving bond therefor of a surety company approved by the superintendent. The bidder must furnish his own proposal and leave same at said office before 12 o'clock m. of Monday, August 22, 1910, with a certified check for \$100, payable to and to be the property of the city if the proposal is not carried out. The bid will, at said hour and place, be publicly opened and read; said bid to state the terms for collection and removal. The ashes, etc., are to be collected and removed at least once each week, or oftener if the superintendent may deem necessary, and are to be delivered at dumps to be provided by the contractor; the contractor will furnish the carts and the necessary horses and men. The contract is to be made for five months from September 1, 1910, with the privilege on the part of the city of extending until January 31, 1912, providing sufficient appropriation is made by the city government, or unless a different method of disposing of the ashes is adopted, in which case a sixty days' notice in writing will be given the contractor. The proposals must be made in duplicate, the duplicate, without check, to be deposited by the bidder with the City Auditor previous to the time named for opening the bids. The undersigned reserves the right to give preference to the proposals of bidders agreeing to pay the trade unions' rate of wages, and the right to reject any or all proposals. The proposals should be inclosed in an envelope, sealed, and marked "Proposal for Collecting and Removing Ashes, etc., in the North Dorchester District."

LOUIS K. ROURKE,
Superintendent of Streets.

Boston, August 11, 1910.

(Aug. 13.)

READVERTISEMENT.**RECONSTRUCTION OF CURTIS HALL BUILDING, JAMAICA PLAIN, WARD 22.**

The Superintendent of Public Buildings of Boston, Massachusetts, invites proposals for the reconstruction of the Curtis Hall Building, Jamaica Plain, Ward 22 (excepting plumbing, heating and electric work), according to plans and specifications, and giving a bond of a surety company therefor, satisfactory to the Superintendent, in the sum of \$15,000. Only proposals obtained at the office of the Superintendent of Public Buildings, Room No. 30, Old Court House, Boston, filled out, signed by the bidder and left before 12 o'clock m. on Monday, August 22, 1910, at said office, with a certified check on a Boston bank for \$1,500, payable to and to be the property of the City of Boston if the proposal is not carried out, will then and there be publicly opened and read. The bid must be made in duplicate, the one with the check to be sent as above, the duplicate to be sent to the City Auditor, City Hall, previous to the time named for opening bids. The contractor will be required to submit a list of names of the sub-bidders. The undersigned reserves the right to reject any and all proposals and to give preference to the bidders paying the trade unions' rate of wages.

MANUS J. FISH,
Superintendent of Public Buildings.

(Aug. 13.)

CITY RECORD

OFFICIAL PUBLICATION OF THE CITY OF BOSTON.

VOL. 2.

SATURDAY, AUGUST 20, 1910.

No. 34

City of Boston.

CITY RECORD.

Published weekly under legislative act by the
City of Boston, Mass.

By SUBSCRIPTION . . . \$1.00 Per Year.
SINGLE COPIES . . . 5 Cents.
IN ADVANCE.

ADVERTISING.

A rate of 10 cents per agate line has been established for such advertisements as under the law must be printed in the *City Record*. Advertising and other copy must be in hand by Thursday of each week to insure its publication in the Saturday issue.

Copies for sale at the Mayor's Office, Room 27, City Hall.

MUNICIPAL SERVICE.

Complaints, inquiries or suggestions regarding the work of municipal departments should be made in writing to the officials directly in charge. The failure of such officials to make reply within a reasonable length of time should be brought to the attention of the Mayor. Communications should be directed as follows:

TO THE BOARD OF STREET COMMISSIONERS, Room 41, City Hall, for information relative to the laying out, relocation, widening and discontinuance of highways; the taking of real property for municipal purposes; the assessments of betterments for streets and sewers; the plotting of undeveloped areas for streets and the opening of private ways; the granting of licenses for the storage or sale of merchandise in public streets; the regulation of street traffic; the making of specific repairs in public streets; the naming of public streets; the planting and removal of trees in public ways; the issuing of licenses for the storage of gasoline, oil and other inflammable substances or explosive compounds; the use of the public ways for any permanent or temporary obstruction or projection in, under or over the same, including the location of conduits, poles and posts for telephone, telegraph, street railway or illuminating purposes, signs, marqueses, bay windows, coal holes and vaults.

TO THE SUPERINTENDENT OF STREETS, Room 44, City Hall, for information as to

the watering, cleaning, lighting and repairing of streets, the construction and care of sewers and catch-basins, the operation of the ferries, the maintenance of bridges and drawbridges and the removal of ashes and offal.

TO THE BOARD OF HEALTH, Room 11, Old Court House (rear of City Hall), for information relative to the inspection of milk, vinegar, meat, fish and vegetables, the issuance of permits for stables, slaughter houses, etc., smoke nuisances, the existence of contagious diseases or public health nuisances.

TO THE WATER COMMISSIONER, Room 58, City Hall, for information relative to the supplying or metering of water and the water charges of the city.

TO THE SUPERINTENDENT OF PUBLIC GROUNDS, 154 East Cottage street, for information as to the care of the Common, Public Garden, and the small parks throughout the city other than playgrounds, and the extermination of the gypsy moth and the charges made for the same.

TO THE PARK COMMISSIONERS, Pinebank, Jamaica Plain, for information as to Franklin Park and Field, Commonwealth avenue, the Back Bay Fens, Marine Park and playgrounds in general throughout the city.

TO THE SCHOOL COMMITTEE, Mason street, for information relative to the operation of the schools of the city.

TO THE SCHOOLHOUSE COMMISSIONERS, 120 Boylston street, for information as to the construction and repair of school buildings.

MUNICIPAL CALENDAR.

Meeting of City Council, Monday, August 29, at 3 p. m.

Meetings of the Boston Transit Commission are held Tuesday and Thursday of each week at 10.30 a. m.

HEARING.

The Board of Health will give a hearing on Thursday, September 1, on the petition of Arthur Orpin for a stable for six horses on premises, 121 Medford street, Ward 3.

PROPOSALS ADVERTISED.

Denis J. Swanson, life guard and helper, $\frac{1}{2}$ day at \$2.25, \$1.13.

Park Department.

For the week ending Thursday, August 11, 1910:

William H. Allen, foreman, $1\frac{1}{2}$ days at \$3.25, \$5.69; George W. H. Timson, time-keeper, $\frac{1}{2}$ day at \$2.50, \$0.63; John F. Carlin, plumber, $\frac{1}{2}$ day at \$3, \$0.38; Bernard J. Conley, machinist, $\frac{1}{2}$ day at \$3, \$1.88; Robert Hindle, machinist, $\frac{1}{2}$ day at \$3, \$2.63; Malachi Kenney, iron-worker, $\frac{1}{2}$ day at \$2.50, \$0.31; William E. Fischer, gardener, 1 day at \$3, \$3; Robert Coulesey, gardener, $1\frac{1}{2}$ days at \$2.75, \$3.09; Thomas Dillon, driver and chauffeur, 1 day at \$3, \$3; Charles A. Hogan, clerk, 1 day at \$2.50, \$2.50; John T. Conboy, gardener, 1 day at \$3, \$3; Peter M. McManus, gardener, 1 day at \$3, \$3; John J. Tatten, Jr., fireman, $\frac{1}{2}$ day at

\$2.50, \$2.19; Julius Weidner, subforeman, 1 day at \$3.25, \$3.25; Mrs. William Campbell, matron, $\frac{1}{4}$ week at \$10, \$0.71; Peter Barker, gardener, 1 day at \$3, \$3; Thomas J. Delaney, watchman, 1 day at \$2.50, \$2.50; Alice Timmins, matron, 1 day at \$1.50, \$1.50; Ann I. Loftus, instructor, $\frac{1}{4}$ week at \$13.80, \$1.97; Margaret Mulhern, matron, 1 day at \$1.50, \$1.50; Thomas A. Callahan, laborer and assistant in care of building, $\frac{1}{2}$ day at \$2.50, \$1.25; William L. Tuttle, subforeman, 1 day at \$3.25, \$3.25; John Younie, watchman, 1 day at \$2.50, \$2.50; 67 laborers, 69 days at \$2.25, \$155.32.

Street Department (Highway Division).

For the week ending Thursday, August 11, 1910:

Andrew T. Roach, weigher, 1 day at \$2.50, \$2.50; John T. Sweeney, subforeman, 1 day at \$3.50, \$3.50; William L. Carty, inspector, 1 day at \$3, \$3; James T. Whouley, inspector, 2 days at \$2.50, \$5; John H. Murphy, inspector, 1 day at \$3, \$3; Robert J. Mason, messenger, 1 day at \$2.50, \$2.50; William J. Donahue, paver, $1\frac{1}{2}$ days at \$3, \$4.50; James J. Sullivan, messenger, 2 days at \$3, \$6; Ralph E. Reardon, inspector, 2 days at \$3, \$6; Patrick H. Connelly, inspector, $\frac{1}{2}$ day at \$3, \$2.25; Edmund J. Fitzgerald, inspector, $1\frac{1}{2}$ days at \$3, \$5.25; James D. Gorman, inspector, 1 day at \$3, \$3; George W. Jepson, inspector, 1 day at \$3, \$3; T. W. H. Kelley, inspector, 2 days at \$4, \$8; John J. Hayes, inspector, $\frac{1}{2}$ day at \$3, \$1.50; Michael F. O'Brien, inspector, 1 day at \$3, \$3; Martin J. Griffin, drawtender, 1 day at \$900 per year, \$2.46; John F. Morrison, drawtender, 2 days at \$900 per year, \$4.93; John J. Graham, drawtender, 1 day at \$900 per year, \$2.46; 69 laborers, \$158.38; 25 assistant drawtenders at \$800 per year, 28 days, \$61.32; Joseph V. Maddock, electrician, 2 days at \$3.60, \$7.20.

Street Department (Sanitary Division).

For the week ending Thursday, August 11, 1910:

James Barry, scowman, 1 day at \$2.50, \$2.50; Edmund Hardy, scowman, 1 day at \$2.50, \$2.50; John A. Dillon, foreman, 1 day at \$3.50, \$3.50, and 8 laborers, \$13.52.

Hugh J. Barry, driver, 1 day at \$2.50, \$2.50; Albert H. Brown, driver, 1 day at \$2.50, \$2.50; Joseph A. Brown, driver, 1 day at \$2.50, \$2.50; John Dillon, inspector, 1 day at \$2.50, \$2.50; Dennis J. Griffin, inspector, $1\frac{1}{2}$ days at \$2.50, \$3.75; Charles P. Hobbs, stableman, 1 day at \$2.50, \$2.50; John P. Kelley, inspector, 1 day at \$3, \$3; Peter King, driver, 1 day at \$2.50, \$2.50; Michael Mullen, stableman, 1 day at \$2.50, \$2.50; Humphrey J. McCarron, watchman, 2 days at \$2.50, \$5; Patrick F. McCormick, driver, 1 day at \$2.50, \$2.50; John Norton, teamster, $\frac{1}{2}$ day at \$2.50, \$1.25; Patrick Norton, teamster, 1 day at \$2.50, \$2.50; William V. Quinn, inspector, 1 day at \$2.50, \$2.50; Thomas Rice, driver, 1 day at \$2.50, \$2.50; James J. Shea, driver, 1 day at \$2.50, \$2.50; Patrick Sweeney, driver, 1 day at \$2.50, \$2.50; Cornelius J. Scanlan, inspector, $1\frac{1}{2}$ days at \$2.50, \$3.75; Daniel J. Sullivan, driver, 1 day at \$2.50, \$2.50, and 68 laborers, \$168.13.

Street Department (Sewer Division).

For the week ending Thursday, August 11, 1910:

James A. Bell, rodman, $\frac{1}{2}$ day at \$2.50, \$1.25; John J. Bradley, rodman, $\frac{1}{2}$ day at \$2.50, \$1.25; Daniel P. Kelley, junior engineer, $\frac{1}{2}$ day at \$3.50, \$1.75; Mark E.

Pitman, junior engineer, $\frac{1}{2}$ day at \$3, \$1.50; William Warren, instrumentman, $\frac{1}{2}$ day at \$3.50, \$1.75; James A. Mitchell, inspector, 1 day at \$3, \$3; John Connor, inspector, back time 4 days at \$3.50, \$14; Thomas McDonald, yardman, 1 day, at \$2.50, \$2.50; Nathan F. O'Neil, teamster, $1\frac{1}{2}$ days at \$2.50, \$3.75; Thomas Glennon, inspector, $\frac{1}{4}$ day at \$3.50, \$0.88; Bernard Gibbons, pipelayer, $\frac{1}{4}$ day at \$2.50, \$0.63; Thomas Hughes, laborer, 1 day at \$2.50, \$2.50; John Flaherty, yardman, 1 day at \$2.50, \$2.50; James Braydon, subforeman, $\frac{1}{2}$ day at \$3, \$1.50; Humphrey J. Moynihan, subforeman, $\frac{1}{2}$ day at \$3.50, \$1.75; 29 laborers, $24\frac{1}{2}$ days at \$2.25, \$55.13.

Water Department.

For the week ending Thursday, August 11, 1910:

Thomas Douglass, emergency man, 1 day at \$3, \$3; Thomas A. Gorman, foreman, 1 day at \$2.75, \$2.75; P. J. Feeney, inspector, 1 day at \$2.75, \$2.75; D. Regan, foreman, 1 day at \$3.50, \$3.50; John Cummings, plumber, 1 day at \$2.75, \$2.75; J. Doherty, 2d, laborer, 1 day at \$2.50, \$2.50; P. Douglass, 2d, laborer, 1 day at \$2.50, \$2.50.

Water Department (Distribution Division).

For the week ending Thursday, August 11, 1910:

Thomas Douglas, emergency man, $\frac{1}{2}$ day at \$3, \$0.38; Morgan Donahue, emergency man, $\frac{1}{2}$ day at \$2.25, \$0.28; Timothy J. Kelleher, chauffeur, $\frac{1}{2}$ day at \$2.75, \$0.34; George F. W. Stevens, chauffeur, $\frac{1}{2}$ day at \$3, \$1.50; Thomas A. Gorman, foreman, $\frac{2}{3}$ day at \$2.75, \$2.06; William A. O'Connor, inspector, $1\frac{1}{2}$ days at \$2.75, \$4.13; James J. Connors, stableman, $\frac{5}{8}$ day at \$2.75, \$1.72; Thomas Lavery, stableman, 1 day at \$2.25, \$2.25; Thomas Bowen, teamster, $\frac{3}{4}$ day at \$2.25, \$1.41; Michael F. Burke, teamster, $1\frac{1}{2}$ days at \$2.50, \$3.98; Raffaele Curcio, teamster, $\frac{1}{2}$ day at \$2.25, \$1.69; Daniel J. Heffernan, teamster, $\frac{3}{4}$ day at \$2.25, \$0.84; David Leo, teamster, $\frac{5}{8}$ day at \$2.25, \$1.41; Thomas Magee, teamster, $\frac{3}{4}$ day at \$2.25, \$1.41; Jeremiah J. McLaughlin, teamster, $1\frac{3}{4}$ days at \$2.50, \$2.73; Mathew I. Nolan, teamster, $\frac{1}{2}$ day at \$2.50, \$1.56; Timothy Noonan, teamster, $\frac{5}{8}$ day at \$2.25, \$1.41; James J. O'Brien, teamster, $\frac{5}{8}$ day at \$2.25, \$1.41; John J. O'Brien, teamster, $\frac{5}{8}$ day at \$2.25, \$1.41; Edward A. Pyne, teamster, $\frac{1}{2}$ day at \$2.25, \$1.13; Michael Ronan, teamster, $\frac{5}{8}$ day at \$2.25, \$1.41; John C. Thompson, teamster, $\frac{5}{8}$ day at \$2.25, \$1.41; Thomas Williams, teamster, $\frac{1}{2}$ day at \$2.25, \$1.69; Michael Hines, teamster, $\frac{1}{2}$ day at \$2.25, \$0.28; Peter M. Brown, teamster, $\frac{1}{4}$ day at \$2.25, \$0.56; Francis T. Ware, laborer, 5 days at \$2.25, \$11.25; James P. McKenney, teamster, $\frac{5}{8}$ day at \$2.25, \$1.41; Edward M. Houghton, teamster, $\frac{5}{8}$ day at \$2.25, \$1.41; John McCormick, 1st, teamster, $\frac{5}{8}$ day at \$2.25, \$1.41; James Murphy, teamster, $\frac{1}{2}$ day at \$2.25, \$1.13; Edward P. Sullivan, teamster, $\frac{3}{4}$ day at \$2.25, \$1.41; Bernard Flanagan, plumber, $\frac{1}{4}$ day at \$3, \$1.88; Patrick Coleman, laborer, $1\frac{3}{4}$ days at \$2.25, \$4.29; James F. Black, repairer, $\frac{1}{4}$ day at \$2.50, \$0.63; Thomas Lyden, laborer, $\frac{1}{4}$ day at \$2.25, \$0.56; Patrick Walsh, laborer, $\frac{1}{4}$ day at \$2.25, \$0.56; John Egan, teamster, $\frac{1}{4}$ day at \$2.25, \$1.97; Patrick McLaughlin, 3d, laborer, $\frac{1}{4}$ day at \$2.25, \$0.56; John Riley, laborer, $\frac{1}{4}$ day at \$2.25, \$0.56; George Greer, repairer, $\frac{1}{2}$ day at \$2.75, \$1.38; Thomas J. McKenney, laborer, $\frac{3}{4}$ day at \$2.25, \$1.62; Patrick F. Mullen, inspector, $\frac{1}{8}$ day at \$2.75, \$0.52; Isaac Saperstein, repairer, $\frac{1}{4}$ day at

\$2.50, \$0.63; Michael Mulloy, laborer, $\frac{1}{4}$ day at \$2.25, \$0.56; William Lonergan, laborer, $\frac{1}{4}$ day at \$2.25, \$0.56; Robert J. Doyle, plumber, $1\frac{1}{2}$ days at \$3, \$5.44; John J. Welch, plumber's helper, $1\frac{1}{2}$ days at \$2.25, \$4.08; John Sullivan, 1st, machinist, $\frac{3}{4}$ day at \$2.75, \$1.03; Matthew Brennan, inspector, $3\frac{3}{4}$ days at \$3, \$9.56; Michael C. Sullivan, plumber, $\frac{1}{2}$ day at \$2.50, \$1.25; Martin Dunlap, plumber's helper, $\frac{1}{2}$ day at \$2.25, \$1.13; Richard P. Collins, inspector, $\frac{1}{4}$ day at \$2.75, \$2.06; Reuben Overton, laborer, $\frac{1}{4}$ day at \$2.25, \$0.56; Patrick J. Kelly, inspector, $2\frac{1}{4}$ days at \$2.95, \$7.56; Joseph T. Ryan, plumber, $1\frac{1}{8}$ days at \$3, \$3.19; Michael Healey, laborer, $\frac{1}{8}$ day at \$2.25, \$0.28; Patrick J. Lawless, laborer, $1\frac{1}{8}$ days at \$2.25, \$2.39; Edward Dittmus, laborer, 1 day at \$2.25, \$2.25; William H. McKenna, laborer, 1 day at \$2.25, \$2.25.

Water Department (Income Division).

For the week ending Thursday, August 11, 1910:

P. J. Clougherty, laborer, $3\frac{3}{4}$ days at \$2.25, \$8.65; R. J. Connorton, tester, $1\frac{1}{2}$ days at \$2.50, \$3.75; J. Cullen, plumber, $\frac{1}{4}$ day at \$3, \$0.75; M. J. Dinneen, laborer, $1\frac{1}{8}$ days at \$2.25, \$2.39; T. J. Dolan, plumber, $1\frac{1}{8}$ days at \$3, \$3.19; P. F. Gateley, plumber, $1\frac{1}{8}$ days at \$2.75, \$3.61; E. H. Gilmore, tester, $1\frac{1}{4}$ days at \$2.50, \$2.81; O. J. Gilloon, plumber, $1\frac{1}{2}$ days at \$3, \$3.66; M. M. Kenney, laborer, $1\frac{1}{8}$ days at \$2.25, \$2.95; E. Mahoney, laborer, $1\frac{3}{4}$ days at \$2.25, \$4.29; J. J. Mahoney, laborer, $\frac{1}{4}$ day at \$2.25, \$0.56; T. McAuliffe, laborer, $\frac{3}{4}$ day at \$2.25, \$1.90; F. McCarthy, laborer, $1\frac{1}{4}$ days at \$2.50, \$2.81; P. J. McCarthy, plumber, $\frac{1}{8}$ day at \$2.75, \$0.52; G. A. Murphy, laborer, $\frac{1}{4}$ day at \$2.25, \$0.56; M. Mulkern, laborer, 2 days at \$2.25, \$4.50; J. H. O'Brien, laborer, $\frac{1}{8}$ day at \$2.25, \$0.42; T. J. Ratchford, laborer, $1\frac{1}{8}$ days at \$2.50, \$3.28; J. Rice, tester, $1\frac{1}{2}$ days at \$2.50, \$3.75; J. J. Roche, laborer, $1\frac{1}{2}$ days at \$2.25, \$2.73; D. J. Rull, plumber, $\frac{1}{4}$ day at \$3, \$0.75; J. J. Shea, laborer, $\frac{1}{8}$ day at \$2.25, \$0.42; D. Sullivan, laborer, 2 days at \$2.25, \$5.06; J. Sullivan, laborer, $1\frac{1}{2}$ days at \$2.25, \$3.45; T. J. Sullivan, plumber, $\frac{3}{8}$ day at \$3, \$0.56; M. P. Welch, plumber, $2\frac{1}{4}$ days at \$2.75, \$6.19.

CONTRACTS AWARDED.

The following contracts for work, materials and supplies have been awarded with the approval of the Mayor. Those awarded without public advertisement are specially indicated. Week ending August 18, 1910:

PENAL INSTITUTIONS DEPARTMENT.

On August 18 the Mayor approved a contract with Rendle & Stoddard for the reconstruction of Eastern Avenue Wharf. Bids on this work, opened August 9, were as follows:

Rendle & Stoddard, \$8,457; W. H. Ellis, \$8,565; George T. Rendle, \$8,704.92; Lawler Brothers, \$9,335; W. S. Rendle, \$9,496; J. T. Scully Foundation and Transportation Company, \$9,645.

STREET DEPARTMENT (Highway Division).

On August 17 the Mayor approved a contract with W. S. Rendle for repairing the faces of the draw piers at Warren Bridge. Bids on this work, opened August 10, were as follows:

W. S. Rendle, \$1,711; Lawler Bros., \$1,955; William H. Ellis, \$2,115; George T. Rendle, \$2,355.50; John T. Scully Foundation and Transportation Company, \$2,640.

On August 17 the Mayor approved a contract with the J. C. Coleman & Sons Company for constructing a macadam roadway in Bucknam street, Dorchester. Bids on this work, opened August 8, were as follows:

J. C. Coleman & Sons Company, \$2,814.50. Only bid received.

On August 17 the Mayor approved a contract with Warren Bros. Company for asphalt pavement in Parkman street, city proper. Bids on this work, opened August 8, were as follows:

Warren Bros. Company, \$1,425.50; Barber Asphalt Paving Company, \$1,504.30; Jones & Meehan, \$1,807.

STREET DEPARTMENT (Sewer Division).

On August 17 the Mayor approved a contract with Murphy & Dolan for building sewerage works in Geneva avenue, Dorchester. Bids on this work, opened August 9, were as follows:

Murphy & Dolan, \$6,744.25; J. H. Ferguson, \$6,884.33; Commonwealth Construction Company, \$7,278.56; Bryne Construction Company, \$7,405.10; J. J. Falvey, \$7,930.50; J. J. Coleman & Sons, \$8,039.70; A. M. Cusack, \$8,227.50; J. A. Costello & Co., \$8,245.23; Commonwealth Construction and Supply Company, \$8,350.10; C. J. Jacobs Company, \$8,461.90; G. M. Bryne Company, \$8,794.80.

WITHOUT ADVERTISING.

CEMETERY DEPARTMENT.

On August 17 the Mayor approved a contract, without advertising, for the purchase of one Flanders, "20" automobile, model 8, for use of the general superintendent. The cost with accessories, delivered, to be \$865.

"The Board has carefully inspected the various makes of machines and we are satisfied that the machine named will answer all the purposes required.

"CHARLES E. PHIPPS, *Chairman.*"

SUPPLY DEPARTMENT.

On August 17 the Mayor approved a contract, without advertising, with the Cornelius Callahan Company for 2,500 feet of 2 $\frac{1}{2}$ -inch hose at 82 cents per foot, to be delivered at the Bristol street headquarters of the Fire Department, the estimated amount of the contract being \$2,050.

"This is an emergency.

"J. EDWARD MULLEN,
"Superintendent of Supplies."

PETITIONS GRANTED.

The following petitions, granted by the Board of Street Commissioners, have been approved by the Mayor:

Sign.—William Morris, Inc., 415 Washington street, Ward 7.

Steam Pipe.—Edison Electric Illuminating Company, to lay an 8-inch steam pipe from the Blake Building to the Jordan Marsh Building, Washington street.

Closing Streets.—Superintendent of Streets, to close Sarsfield street, between Columbus avenue and Tremont street, Roxbury. On petition, Clarkwood street, between Blue Hill avenue and Norfolk street, Dorchester; Hewlett street, between Selwyn and Centre streets, West Roxbury.

Building Moving.—T. J. Billings, to move building from 492 River street to 4 River street.

Guy Wires.—J. M. and C. J. Buckley, to erect wires and ropes across Summer street, from No. 336 to No. 345, Ward 13.

FINANCE COMMISSION.

BOSTON, August 17, 1910.

To the Honorable the Mayor and City Council:

GENTLEMEN,—The Finance Commission respectfully submits herewith a report upon one of the methods of administration affecting the City of Boston and its financial interests, namely, the manner in which heads of departments and subordinate officers have been appointed during the first six months of the present fiscal year.

I. APPOINTMENTS OF HEADS OF DEPARTMENTS AND MEMBERS OF MUNICIPAL BOARDS.

Sufficient time has now elapsed since the charter amendments went into effect to show the Mayor's attitude toward those provisions of the charter which define the kinds of appointments which the Mayor should make. The issue involved has been befogged by drawing undue attention to certain individuals whose appointments have not been approved by the Civil Service Commission. The real issue is far more important than any merely personal matter involved in the rejection of individuals. In fact, the character of the city government depends upon the proper understanding and decision of the real issue, which is whether the merit system or the spoils system shall be applied in the administration of the city's business.

Briefly summarized, the charter amendments require that the Mayor shall make appointments "solely in the interests of the city," of recognized experts in such work as may devolve upon them, or of persons specially fitted therefor by education, training or experience; and that, except in the case of the Election Commission, which under the law is a bipartisan board, the appointments shall be made without regard to party affiliations or residence.

The amendments were designed to accomplish four objects.

1. To strengthen the hands of the Mayor by requiring appointments to be made without regard to political affiliations or geographical limitations, both of which considerations had in the past operated to limit the field from which selections were made.

2. To remove the restrictions which had frequently been imposed on the Mayor's power of appointment by members of the Board of Aldermen who, by the use of their confirming power, or by withholding their support of necessary appropriations, could compel the Mayor to appoint persons agreeable to them.

3. To place a check upon the Mayor's power to appoint incompetents to important offices, by requiring the Civil Service Commission, a board independent of the Mayor and with no power over appropriations, to pass upon the qualifications of the appointees and to refuse to approve those who were not shown to be competent persons with the requisite qualifications; thus preventing a recurrence of the wasteful methods which in the past caused enormous financial losses to the city.

4. To enable the Mayor to confine his attention to the larger and more important problems of administration, by relieving him of the frequently self-imposed but unnecessary task of personally superintending the management of a multitude of petty departmental details; a task which the law requires to be and which should be performed by competent heads of departments.

These amendments are based upon the sound principle that only trained and capable officials should be intrusted with the expenditure of the public funds. It was intended that the appointing power should cease to be a proprietary right of the Mayor, to be exercised in favor of those who had rendered him political or personal service, and that his power should be used "solely in the interests of the city." The inherent right of the people as a whole to able and honest government was recognized in these amendments, as being superior to the demands of particular individuals for office. It was sought to safeguard the entire community against both favoritism and incompetency, which usually go hand in hand, causing a diversion of the public funds from necessary to unnecessary objects, and resulting in poorer streets, fewer playgrounds, and less protection to life, health and property.

When the Legislature provided for the substitution of the merit system for the spoils system of appointments in the City of Boston, the public had the right to assume that the Mayor elected under the provisions of the charter amendments would avail himself of the opportunity afforded him to raise the appointments to a higher level than had ever been attained in any American city. The first six months' experience under the charter amendments shows, however, that the Mayor has either failed to realize his great opportunity or has deliberately chosen to reject it.

Though the reappointments, with a single exception, and many of the appointments to unpaid boards, are commendable, and the appointment, without regard to political considerations or local prejudices against nonresidents, of a trained and experienced civil engineer as superintendent of streets tempers the feeling of loss caused by the unexplained failure to reappoint an official of great demonstrated worth, these creditable appointments should not conceal the fact that there have been a large number which have not been made "solely in the interests of the city." Many appear to have been made largely, some wholly, in consideration of personal support given to the Mayor, or for purely political purposes. The political character of these appointments is a matter of common knowledge, nearly all having been accompanied by newspaper statements reciting the service rendered by the appointees. In many cases the appointees had no previous special training for or experience in the offices, and in other cases the appointees' records in office disqualified them.

The Mayor has made sixty-two appointments to paid and unpaid positions as heads of departments and to members of municipal boards since the charter amendments went into effect; thirty-seven to paid and twenty-five to unpaid positions. Of the appointments to paid positions twenty-three have been approved by the Civil Service Commission and fourteen have not been approved; of the appointments to unpaid positions twenty-one have been approved, three have not been approved, and one is pending.

Of the twenty-two new appointments to paid positions as heads of important departments, fifteen appear to have been made, and seven appear not to have been made, as rewards for political support given to the Mayor. Of these fifteen political appointments three were approved and twelve were not approved; of the seven appointments which appear

not to have been made as rewards for political service five were approved and two were not approved.

However the friends of individual appointees may differ in opinion as to the action of the Civil Service Commission in particular cases, all disinterested persons will agree that the decisions of that commission have been made in good faith for the best interests of the city, and that the wisdom of the law under which they acted has been demonstrated. The Finance Commission believes that the city has not suffered a loss in any instance of rejection, that a much higher standard of selection was intended by the charter amendments, and that persons better qualified for the offices in question could and should have been found.

II. APPOINTMENTS TO SUBORDINATE OFFICES IN THE DEPARTMENT.

The political purpose underlying appointments of heads of departments and members of municipal boards has been manifested also in the removal and appointment of subordinates in several departments. The chairman of the Board of Bath Trustees has resigned recently because he found his views respecting the appointment of subordinates irreconcilable with those of the Mayor. He stated to the Finance Commission that he found a man at McKenzie Beach acting as constable, for whom there was no need, but who had been put to work by the Mayor without consultation with the chairman, and whom he, the chairman, thereupon dismissed. He stated that he was later called on the telephone by the Mayor, who informed him that he was Mayor of the City of Boston and that he felt he had a right to make such appointments. The chairman said in reply that he would not permit anyone to be employed there without consulting him. Finding his views on the matter were not in harmony with those of the Mayor he thereupon sent in his resignation, which has since been accepted. In a letter written to the Mayor he says "I do not believe that you should appoint men to positions within the department without consultation with the trustees. Such proceeding is wholly subversive of all discipline within the department and is making us responsible for the conduct of persons over whom we virtually have no control." A copy of his letter containing a statement of the reasons for his resignation is submitted herewith. The chairman also stated that he received repeated requests from the Mayor's office for the appointment of women employees who are not under civil service rules, and that although he informed the Mayor's office that the corps of women in the department was full and that he could find no more places, he was constantly pressed to add to the force. He stated that his mind was being disturbed by such interference and that he chose not to remain in office.

The Water Department has been undergoing a similar process of disorganization. Upon the failure of the Civil Service Commission to approve the Mayor's first appointment as Water Commissioner, Water Commissioner Hannan, in accordance with the Mayor's wishes, sought to create the new office of general superintendent of the department, in order to provide a place for the rejected appointee. The Civil Service Commission refused to permit the office of general superintendent to be filled without a competitive examination, as it seemed to be an evasion of section 15 of chapter 486 of the Acts of 1909. This attempt was thereupon

abandoned and a new plan was evolved. Mr. Hannan stated that later he received orders from the Mayor to reduce to the rank and pay of clerk the Superintendent of the Distribution Division, and to appoint as superintendent in his place the person who had failed to obtain the Civil Service Commission's approval for the office of Water Commissioner. These instructions have been followed. When asked by the Finance Commission whether the former superintendent was as competent to manage the Distribution Division as the new appointee, Mr. Hannan answered "Yes." When asked whether he would have made the change if he had been given a free hand by the Mayor to do what he thought best for the city, he declined to answer. Being questioned further he stated, "At the present time I am looking out for myself." "It is a case of livelihood with me as it is with everybody down there." This answer makes it manifest that the Water Commissioner made the change in obedience to the desire of the Mayor, in order to protect himself for the time being; and that neither the Mayor nor the Water Commissioner considered either the injustice of degrading an admittedly competent superintendent, who had won his office by meritorious service, or the resulting demoralization of the department.

The office of City Collector is being exploited for political purposes by the Mayor with the entire acquiescence of the collector, who, himself appointed as a reward for political service, is now engaged in discharging his obligations to the Mayor by removing experienced officials and appointing in their places political supporters of the Mayor. The collector is not really, but only nominally the head of the department, so far as removals from or appointments to office are concerned. He assumed the duties of collector on the thirteenth of June and within two days, the cashier, who held the office since 1902 and performed his duties acceptably, was forced under threat of removal to resign, and a favorite of the Mayor's was appointed in his place. Without the knowledge of the collector, an employee of the Mayor's office asked the cashier in behalf of the Mayor to tender his resignation, to take effect on the fifteenth. The resignation was tendered and the new cashier was appointed on the next day, the fifteenth of June. In the removal of the former cashier and the appointment of the new one the collector was a mere instrument in the execution of the Mayor's plan to remove from office one who has been opposed to him politically and to appoint in his place a political supporter. No consideration was given to the evil effects of this palpable application to an important city department of the theory "to the victors belong the spoils."

Several other changes which have recently taken place in the Collecting Department present further evidence of the pliancy of the collector in the hands of the Mayor. It is apparent that in some cases the collector has not learned whom the Mayor wishes to remove or appoint as soon as the representatives of the newspapers. When examined by the chairman of the Finance Commission on the 29th of July last, he was asked whether the newspaper notice of the contemplated removal of two clerks in the department was authentic, and he answered that he did not understand that either of the two men named were selected to be removed, but that it was "rather anticipated that they might go." When asked whether he contemplated

filling their places, he said he had not considered that. When asked if a certain individual was about to be appointed to the department, as stated in the newspapers, he answered, "I do not know if I should know him. I have never seen him."

Question. You do not know anything about it?

Answer. No.

Since these statements were made by the collector, the two men reported in the newspapers as slated for removal have been removed, and the person reported in the newspapers as about to be appointed has been appointed. Four others have been removed, and five others appointed, all for political reasons. One of the new appointees the collector had never met, except once during the recent municipal election while he was acting as assistant campaign manager for the Mayor. The other appointees the collector did not know at all until they were brought into his office shortly before their appointment.

The examination made by the Finance Commission, both of the appointments of heads of departments and of subordinate officials shows that politics has been almost invariably the moving cause of the changes that have been accomplished, and that the usual result of the changes has been the substitution of the inexperienced for the experienced in office. The more important offices have been given to those who performed the greater, and the minor offices to those who rendered the lesser, political services. The continued application of this principle to the administration of the city's business cannot fail to be of disadvantage to the citizens as a whole. If unchecked it will lead inevitably to the restoration of the spoils system, as applied to the municipal offices, with its attendant losses. The service will become demoralized because appointments, tenure and promotion will again depend upon political influence, and not upon merit. Subordinates will cease to hope for advancement through merit, and will consequently lose respect for their superiors and interest in their work. In the lax discipline inevitably resulting public funds will be wasted which are needed for useful purposes.

The Finance Commission commends the following statements in the Mayor's inaugural address of February 7, 1910:

"Whatever views the citizens of Boston have entertained as to the merits of the various new features now incorporated into the charter, the plain duty that now lies before us is to give each and all of the new provisions a fair trial according to the intent of the Legislature.

"Now the Mayor is obliged, in the first place, to sign a certificate declaring that he makes the appointment 'solely in the interests of the city'; this clearly excludes such partisan or personal considerations as have in the past often influenced appointments at City Hall, under all administrations."

The commission respectfully recommends:

1. That the words of the inaugural above quoted, as well as the letter and spirit of the charter amendments, be observed hereafter in the making of appointments.

2. That the Mayor appoint a competent permanent head of the Fire Department, thus relieving the present untrained temporary appointee of his position, and preventing the demoralization which must inevitably result from the continuance of the present uncertainty as to the head of

the department. The city is entitled to permanent heads of departments, approved in accordance with law by the Civil Service Commission, and the statute should no longer be evaded under color of temporary appointments.

3. That the Mayor consult the Boston Society of Engineers, or some other competent body, for the purpose of obtaining the names of persons eligible for the office of Water Commissioner, and that a competent person be appointed to that office.

4. That the Mayor consult physicians and sanitary engineers of high standing in their profession, who are familiar with modern scientific public health administration, for the purpose of obtaining names of persons eligible for the office of Health Commissioner, and that a competent person be appointed to that office.

5. That the Mayor, before making another appointment to the office of Penal Institutions Commissioner, consult with persons recognized as authorities on the subject of the management of penal institutions, for the purpose of obtaining names of persons qualified for the office.

6. That the Mayor confine himself to the larger and more important administrative problems and cease to interfere with the heads of department in the appointment or removal of petty officials.

Respectfully submitted,

THE FINANCE COMMISSION,

by JOHN A. SULLIVAN,

Chairman.

BOSTON, July 30, 1910.

HON. JOHN F. FITZGERALD,

City Hall, Boston, Mass.:

DEAR SIR,—After tendering you my resignation as chairman of the Board of Bath Trustees yesterday, two of my colleagues, I understand, called to see you, obtained the resignation from you, and have asked me to reconsider it. I told them it was impossible for me to do this, but that I did not wish to embarrass either your administration or the conduct of the department, and would therefore continue to serve until such time as you had secured a satisfactory successor, not exceeding a period of three weeks. I therefore return you the resignation which I trust you will accept as soon as possible.

I have no feeling in this matter, and no desire to give it any publicity. I understand that you are Mayor and responsible for all the departments. I should hesitate to appoint any person whom you thought would not carry out any policy which you might have or who personally was objectionable to you. I do not, however, believe that you should appoint men to positions within the department without consultation with the trustees. Such proceeding is wholly subversive of all discipline within the department, and is making us responsible for the conduct of persons over whom we virtually have no control.

While I have enjoyed the work of the department, it is as you know a labor of love, and I am very much occupied with my own business.

You ought to have as chairman of your board of bath trustees one who is in accord with your policies, and I am therefore forwarding you my resignation because I do not feel that I can change the point of view I now have with reference to the performance of my duty as chairman of the board.

With best wishes for a successful administration, I am,

Yours very truly,

WALTER R. MANSFIELD.

PROCEEDINGS OF SCHOOL COMMITTEE.

AUG. 13, 1910.

A special meeting of the School Committee of the City of Boston was held in the School Committee Chamber, Mason-street Building, at 12.35 o'clock P.M., the Chairman presiding.

Present: Messrs. Brock, Ellis, Lee, Magenis and Scannell.

APPROVAL OF RECORDS.

The reading of the records of the last meeting was omitted, the Board approving them as printed.

OPENING OF PLAYGROUNDS ON SATURDAY AND SUNDAY AFTERNOONS DURING THE SUMMER.

The following communication was received:—

City of Boston,
Office of the City Clerk,
City Hall, July 15, 1910.

To the School Committee,

Gentlemen:—At a conference meeting of the Mayor, City Council and Heads of Departments held at City Hall on July 11, 1910, it was

VOTED, That the School Committee be requested to open the children's playgrounds throughout the city for use on Saturday afternoons and Sunday afternoons during the summer months, and to submit a report to this body on or before August 1 as to any action that may be taken in relation to this request.

Attest: John T. Priest,
City Clerk.

Placed on file.

DISPOSITION OF FUNDS FOR THE ERECTION OF SCHOOL BUILDINGS.

The following communication was received from Chairman Logue of the Board of Schoolhouse Commissioners, under date of July 16, 1910:—

I desire to acquaint your Board of the action taken by the Board of Schoolhouse Commissioners today in connection with the disposition of the funds placed at our disposal by vote of your Board, May 3, 1910, amounting to \$529,557, from the tax levy; further reference being had to your list of May 16, 1910:—

Item 8. Warren District, Charlestown, elementary school, lower grades, land and building.....	\$15,000
Item 4. Lewis District, Roxbury, elementary school, upper grades, land and building.....	158,000
Item 6. Roger Wolcott District, Dorchester, elementary school, upper grades, building.....	66,000
Item 2. Lyman District, East Boston, elementary school, upper grades, land and building.....	85,557
Comins District, elementary school, lower grades, land and building.....	105,000
Phillips Brooks District, elementary school, upper grades, land and building.....	100,000
	\$529,557

To complete Item 2, Lyman District, elementary school, upper grades, additional funds will be required, and your Board has been asked to agree to the transfer of the sum of \$53,075, from the list for the year 1910 bond issue.

In explanation of the foregoing items, I would say that it is the intention of the Board to do the following work:—

Warren District, Charlestown, the purchase of what is known as the Doane estate on Pearl st., Charlestown; this building was formerly used for school purposes and will be ready for occupancy September, 1910.

Lewis District, Roxbury, it is the intention to build an upper elementary school, 16 rooms and hall.

Roger Wolcott District, Dorchester, an upper elementary school of 16 rooms and hall; of this item, but eight rooms will be erected at this time, the plans being so drawn as to allow for an eight-room addition with hall at some future time.

Lyman District, East Boston, it is the intention to build an upper elementary school and hall; even with the amount set aside out of the tax levy appropriation, and the amount to be transferred to this item from the bond issue, it may be that additional money will be required. This, however, can be taken care of next year. The amount required for the purchase of land for the building is rather indefinite.

Comins District. It is the intention to erect a twelve-room lower elementary school.

Phillips Brooks District, it is the intention to build an upper elementary school and hall; at this time, however, but twelve rooms will be erected, the plans being so drawn as to allow for a future extension of four or six additional rooms and hall.

All of the above items have been gone over carefully with Superintendent Brooks, both as to location and accommodation, and we have obtained his sanction in a letter to this Board dated July 7, 1910.

Placed on file.

CHANGES IN THE LIST OF ITEMS OF ADDITIONAL SCHOOL ACCOMMODATIONS.

The following communication was received from the Board of Schoolhouse Commissioners, under date of July 16, 1910:—

The Board of Schoolhouse Commissioners respectfully suggests that the following changes be made in the list of items of additional school accommodations to be provided this year under Chapter 450 or the Acts of 1907, as adopted by the School Committee on March 7 and March 14, 1910:

Strike out Item 4, viz: Bennett District, elementary school, lower grades, land only, 176 pupils, and substitute in place thereof:—

Item 4—Lyman District, elementary school, upper grades, 704 pupils, land and building.

Strike out Item 7, viz: Phillips Brooks District, upper grades, land and building, 704 pupils, and substitute in place thereof:—

Item 7—Prescott District, erection and completion of an isolated boiler plant, addition to the Polk Street Schoolhouse, 132 pupils, and enlarging yard.

Strike out Item 8, viz: Comins District, elementary school, lower grades, land only, 523 pupils, and substitute in place thereof:—

Item 8—Lowell District, elementary school, lower grades, addition to Wyman Street Schoolhouse, 132 pupils.

If the School Committee adopts the changes hereinbefore recommended, the Board of Schoolhouse Commissioners hereby returns said items, setting against each item the amount which in the opinion of this Board will be required to meet the cost thereof, viz:—

Item 4—Lyman District, elementary school, upper grades, 704 pupils, land and building.....	\$53,075.00
Item 7—Prescott District, erection and completion of an isolated boiler plant, addition to Polk Street Schoolhouse, 132 pupils, and enlarging yard.....	77,000.00
Item 8—Lowell District, elementary school, lower grades, 132 pupils, addition to Wyman Street Schoolhouse.....	25,000.00

Placed on file.

Also a further communication was received from the Board of Schoolhouse Commissioners, under date of July 16, 1910, in explanation of the foregoing votes and requests stating that it is the intention of that Board to take care of the Phillips Brooks item out of the tax levy appropriation.

The Prescott problem is to be handled as follows: An isolated boiler plant is to be erected on land taken adjoining the yard of the Prescott school; additional land is to be taken at the front of the Prescott school making a better approach to the school; after the boiler plant is erected, it is the intention to tie in the Prescott and Polk street schools, altering over the heating systems in both buildings to meet the new conditions, adding an additional story on the Polk street school, thereby obtaining three additional rooms, and taking land adjoining the Polk street school on the corner. The city will then own the entire square, there will be ample playground space, the buildings will be completely renovated, properly heated and ventilated, and when finished will certainly take care of the poor conditions at present existing in that district. The handling of the problem in this manner, effects a saving thereby allowing money to become available for the Lyman school problem. This matter was gone over with Mr. Brooks and the members of the school committee who were present at the mayor's office on July 1st, and it met with their approval. The other votes are self-explanatory.

Placed on file.

On motion it was
ORDERED, That the order originally passed at the meeting of Mar. 7, 1910 (see

p. 32) and amended at the meetings of Mar. 14 and June 6, 1910 (see pp. 43, 111), designating, in accordance with Chapter 450 of the Acts of 1907, certain school districts in which additional school accommodations are necessary, be further amended as follows:—

Strike out Item 7, viz., "Phillips Brooks District: Elementary school, upper grades, land and building, 523 pupils," and substitute in place thereof the following:—

7. Prescott District: Erection and completion of an isolated boiler plant, addition to Polk st. schoolhouse and enlarging yard—132 pupils.

Strike out Item 8, viz., "Comins District: Elementary school, lower grades, 523 pupils," and substitute in place thereof the following:—

8. Lowell District: Elementary school, lower grades, addition to Wyman st. schoolhouse—132 pupils.

RESIGNATION OF ASSISTANT, OFFICE OF THE SECRETARY.

A communication was received from the Secretary, under date of Aug. 11, 1910, reporting the resignation of Mary L. Morris, an assistant in his office, to date from Aug. 20, 1910.

Placed on file, and the resignation accepted.

COMPENSATION FOR JANITORS OF PLAYGROUNDS.

A communication was received from the Business Agent, under date of Aug. 13, 1910, stating that no provision has been made on the schedule of salaries for janitors of playgrounds for the current season, adopted May 9, 1910, for the use of halls, and recommending that they be paid for the use of halls at the rate for three class rooms.

Placed on file.

On motion it was
ORDERED, That when an assembly hall is used in connection with the playgrounds it shall be reckoned as the equivalent of three class rooms.

APPROPRIATIONS AND EXPENDITURES TO JULY 1, 1910, AND AUGUST 1, 1910.

A communication was received from the Business Agent, under date of July 1, 1910, submitting a statement showing the appropriations, expenditures and balances of the first six months of the current financial year, the total expenditures and expenditures for the corresponding six months of the financial year 1909-10, with the increases and decreases in the several items; also a similar statement, under date of Aug. 1, 1910, containing the same information for the first seven months of the current financial year.

Placed on file.

APPROPRIATIONS AND EXPENDITURES, SUPPLIES AND INCIDENTALS.

A communication was received from the Business Agent, under date of July 1, 1910, submitting a statement of the appropriations, expenditures and balances for each of the items of the appropriation for supplies and incidentals up to and including the July 1st draft; also a similar statement, under date of August 1, 1910, up to and including the August 1st draft.

Placed on file.

TERMINATION OF SERVICES OF JAMES FOUNTAIN.

A communication was received from the Schoolhouse Custodian, under date of July 2, 1910, reporting that the employment of James Fountain, provisional janitor of the premises occupied by the Continuation Classes at 91 Bedford street, ceased on June 16, 1910.

Placed on file.

EXAMINATION OF CHILDREN IN ROXBURY DISTRICT.

A communication was received from Maurice Gerstein, M. D., under date of July 18, 1910, suggesting that the examination of children in the Brighton schools, which was made at the beginning of the last school year for the purpose of reducing the number of cases of contagious

diseases, be extended into the Roxbury District this year; that the Chairman of the Board of Health and the Director of the Municipal Laboratory have promised their co-operation; that many physicians in the Roxbury District have promised their services gratis; and that a few philanthropic citizens of the District have promised to defray the small expenses in connection with it.

Referred to the Board of Health.

SITE OF NEW HIGH SCHOOL OF COMMERCE AND SCHOOL ADMINISTRATION BUILDING.

A communication was received from William Peel, under date of August 8, 1910, in favor of the selection of the Warrenton Street lot as a site for the new High School of Commerce and Administration Building.

Placed on file.

SALARY DUE ESTATE OF THE LATE ROBERT E. BURKE.

Communications were received from the Business Agent, under date of July 27, 1910, and from Leo H. Leary, under date of Aug. 9, 1910, with reference to the amount of salary due the estate of the late Robert E. Burke, Assistant Superintendent, who died June 27, 1910.

Referred to the Secretary, to obtain the opinion of the Corporation Counsel with regard to the amount to which Mr. Burke's estate is legally entitled from the city.

LEAVE OF ABSENCE TO JANITORS ATTENDING NATIONAL ENCAMPMENT, G. A. R.

On motion it was

ORDERED, That leave of absence, without loss of pay, be granted janitors of school buildings who may desire to attend the National Encampment of the G. A. R. at Atlantic City during the week of Sept. 19-23, 1910; provided, that such janitors furnish substitutes satisfactory to the Schoolhouse Custodian to perform their duties during such period without expense to the city.

APPOINTMENT OF AN ITALIAN-SPEAKING TRUANT OFFICER.

The Chairman presented a communication addressed to him by Chairman Warren of the Civil Service Commission, under date of July 22, 1910, with reference to the appointment of an Italian-speaking truant officer.

Placed on file.

ELECTION OF ASSISTANT SUPERINTENDENT.

The Board proceeded to the election of an assistant superintendent to fill the vacancy created by the death of the late Robert E. Burke, the term of service to date from Sept. 1, 1910, and to expire Aug. 31, 1913.

The members as their names were called respectively stated that they voted as follows:—

For FRANK V. THOMPSON: Messrs. Brock, Ellis, Lee, Magenis and Scannell—5. The Chairman declared Frank V. Thompson duly elected assistant superintendent for the term specified.

ELECTION OF HEAD-MASTER, HIGH SCHOOL OF COMMERCE.

The following appointment by the Superintendent was submitted for the approval of the Board:—

ON PROBATION.

(By Promotion.)

High School of Commerce—James E. Downey, head-master (from master, head of a department), from Sept. 14, 1910.

The rules were unanimously suspended, and the appointment approved by the following vote:—

Yeas:—Messrs. Brock, Ellis, Lee, Magenis and Scannell—5.

ADJOURNMENT.

The Board adjourned at 1.00 o'clock P.M.
Attest:—

THORNTON D. APOLLONIO,

Secretary.

NEW YORK STREET CLEANING.

In his annual report Commissioner William H. Edwards gives an excellent and concise statement of the general work of the department. The report is as follows:

The department of street cleaning serves four and one-quarter millions of people in the boroughs of Manhattan, the Bronx and Brooklyn—from Riverdale in the Bronx to the Battery in Manhattan, and from Newton Creek to Coney Island and Sea Gate in Brooklyn, covering an area of 138½ square miles, or 97,735 acres; 2,017 miles of streets, 1,321 miles of which are paved or macadamized, to clean which means an area of 24,200,000 square yards; and the wastes to be removed from approximately 850,000 families.

In 1909 the materials handled were approximately 481,560 tons of street sweepings, 1,926,243 tons of ashes, 320,212 tons of garbage, and 160,132 tons of light refuse and rubbish. Former experience shows that these wastes increase by about 3 per cent per annum.

For the performance of this work the commissioner of street cleaning has at his command a force consisting of three deputies (one in each borough); a private secretary; a general superintendent and assistant, under whom are 21 district superintendents and 105 foremen with assistant foremen; a superintendent of final disposition and assistant, with 43 dump inspectors and 43 assistant dump inspectors; a full force of stablemen, hostlers, drivers and sweepers; and a mechanical bureau under a master mechanic.

The business end is handled by a clerical division, consisting of 70 clerks under the direction of a chief clerk.

All the members of this force with the exception of the private secretary and the three deputies are under the provisions of the civil service act. For the purposes of the department the three boroughs—Manhattan, the Bronx and Brooklyn—are divided into districts, and these districts are subdivided into sections. Manhattan has twelve districts and fifty-nine sections; the Bronx, two districts and five sections; Brooklyn, eight districts and forty sections. Each district has a stable, and each section an office, or section station.

At 6.30 a. m. daily the 6,500 men of the working force report at the stables and section stations for roll-call, and then proceed to their various duties, which under the law means for an eight-hour tour. The sweepers are given routes to clean varying in extent according to the kind of pavement, character of the neighborhood, and conditions of traffic. The pavements consist principally of asphalt, wood block, brick and granite, but small areas also are found of nearly every known kind of paving material. The areas covered by each sweeper vary from 8,000 square yards in Manhattan and the Bronx to 14,000 square yards in Brooklyn. Each sweeper, outfitted with a broom, scraper, shovel and can carrier, covers his tour and picks up litter and removes accumulations, which he deposits in cans and leaves for collection later by the carts. In winter the sweeper cleans the crosswalks and keeps catch-basin inlets open.

The drivers receive a slip showing the horse and cart they are to take, and as a rule the driver has the same horse each day, so that he may become accustomed to it, and may grow to care for it, and treat it as though it were his personal property. The driver is supposed to be on

his route at 6.45 a. m. and begin his collection. He collects ashes for one or two trips, as the habits of the people served may require, then collects the household garbage until his route is cleaned of this material, and then returns to the collection of ashes. Rubbish is collected by a corps of drivers with special carts for the purpose, and they continue this collection all day.

The average number of horses owned by the department in the three boroughs for the year 1909 was 2,025.

The drivers take the materials to the various dumps and there deposit them, and at the end of the day they are given slips on which is the record of their day's work. The materials are collected separately, as it was found some fifteen years ago after considerable experiment that the separate disposition of ashes, garbage and refuse would be more economical for the city, because of their being utilized when so separated. In Manhattan and the Bronx the materials are received on board scows at thirteen water front dumps situated as conveniently as possible with relation to the haul. There are a few inland dumps in the Bronx where land fill is made directly from the carts.

The final disposition of the ashes and rubbish is made by a contract for towing and unloading. This contract is divided into two agreements, one for the North river dumps and Clinton street dump on the East river, the other for the East and Harlem river dumps, exclusive of Clinton street in the East river. The work is done for a price per scow, and averages about 17 cents per cubic yard. Under the contract the city is entitled to have from 50 to 60 per cent of the material placed in fill at Riker's Island without extra expense, and the remainder becomes the property of the contractor.

The borough of Brooklyn has to be treated differently in regard to this work on account of its geographic layout, and because this city does not control any large amount of water front. The dumps here are located: 7 on the water front, 6 on railroad lines, and 3 inland, from which the material is relayed. The final disposition is performed under a contract in which the contractor furnishes these dumps and receives the material at them, and the whole becomes the property of the contractor. The cost of this service is 34½ cents per cubic yard.

The garbage of the three boroughs, though under separate contract, is taken from the dumps of the department and towed to a plant in Jamaica bay, where it is reduced by the Arnold-Edgerton process and the contractor reclaims grease and a fertilizer base. The grease goes to a soapmaker's and pomade manufacturer's abroad, and the fertilizer goes to enrich the southern lands.

The disposal of dead animals does not come under the charge of this department, although this is not generally understood. All such are under the control of the Board of Health, and the police are supposed to report their presence to that Board. The contractor then removes them, and finally disposes of them at his plant in Barren Island.

Riker's Island, which is situated in the East river opposite 138th street, is being enlarged under a plan adopted by former Commissioner Major John McGaw Woodbury, and the department has already made an addition to the island of 63 acres, and is at present engaged in adding 173 acres to the area, which should be finished in about six years. This plan met with opposition from the inhabitants of the

Bronx on account of the possible stench from the materials, but this is overcome by the use of disinfectants, and the methods of fill. The island was estimated to be worth at least \$10,000 per acre, and the final worth will therefore be over \$2,000,000. The city has already authorized the construction of buildings to cost \$1,500,000 on this island, and it is expected that eventually all the city's penal institutions and hospitals will be removed to it from Blackwell's Island, which will permit of that island becoming a public park and playground.

The department has twenty-three stables; 12 in Manhattan, 3 in the Bronx, and 8 in Brooklyn. Each stable is under the supervision of a stable foreman, who directs the care of the horses, the upkeep of the carts, and the uses of forage, etc. The horses cost the department at the last purchase \$325 each, and the contracts provide for a fifteen days' trial. The horses weigh not less than 1,500 pounds each. The work of the department causes a great strain upon the animals, and their average life in the department is seven years. When worn out they are sold at public auction, and bring an average price of \$65 each. The health department has this year taken over for antitoxin purposes, thirteen condemned horses.

Forage and supplies are bought under contract by competitive bidding. These bids are received every three months, as it is impossible to receive bids by the year with economical results owing to the market fluctuations of the various items, *i. e.*, oats, hay, straw, oil meal, coarse, fine and rock salt. Last year a firm bidding was forced to pay in the market \$2.12 per 100 pounds for oats on a bid of \$1.59; and when we remember that the department uses 15,000,000 pounds of oats alone annually, the impossibility of fair bidding is evident; and when the law compels the acceptance of the lowest bid, the commissioner is completely shackled in his purchase power.

The shoeing of the horses is done by contract, the present price in all three boroughs being \$1.45 per horse per month for which the horse must be kept in proper condition in this regard.

The clerical force is engaged in keeping the records of contract prices, expenditures, payrolls, and itemized records of the collection and disposition of waste materials. One clerk is employed to receive, investigate and settle all complaints as to the service. Another is engaged in registering all violations of the incumbrance ordinance and collecting charges for such violations, whether they be for vehicles or other objects left in the streets which are taken up by the department and held at incumbrance yards for redemption.

The mechanical bureau is engaged in repairs of plant, vehicles and other articles used in the work.

Snow is an extra item, which, being indefinite, is never estimated on, but is removed by emergency provisions and appropriations made to meet the particular case and expense.

For all the work, exclusive of snow, the commissioner is allowed about \$7,500,000, or about \$1.70 per person served.

Open order business has been done away with as much as possible, as it was not only uneconomical, but was an evasion of the evident intent of the charter provisions. Thus far about \$110,000 has been saved, and I believe this system will result in a general reduction of expense for these items of 33½ per cent. In the matter of forage, the allowance has been

reduced from 23 to 20 pounds per horse per day, and when 2,000 horses are considered it may be seen this is a large item.

In the snow work great difficulties have been found, for reasons which may be considered as peculiar to the department's force. The system formerly in vogue was to pay on the basis of cubic yards removed by measurements of the vehicles. These measurements were made by our employees and recorded on tickets issued to the drivers. The charter provision that the contract must be let to the lowest bidders has forced the commissioner to take men whether competent financially or practically. The measurements were performed by men in the department who were not expected by their regular duties to be competent to measure and calculate with any degree of accuracy. The experience of the last two seasons under this system led me to formulate a contract on a system formerly tried, that known as the area system, by which a contractor was to be paid by the amount of snow removed on a theoretical basis by multiplying the actual area cleaned by the actual snowfall. The area was obtained from area maps made from survey and with areas calculated by competent men; the snowfall was taken from the reports of observations by governmental bureaus wherein the snowfall was measured by competent observers.

The objection to this system has always been that contractors are paid for work done by the sun and rain; but this criticism is unfair, as the bids show that the contractors have taken into account and given credit for the past performances of sun and rain to the extent of a shrinkage from these causes of 66⅔ per cent. After taking this matter up carefully with the chief engineers of the board of estimate and apportionment, and the chief engineer of the finance department, a contract was drawn which was so revised as to meet these objections, even to the extent of giving a flat rate of shrinkage in piling of 25 per cent and in removal of 66⅔ per cent. Opposition is still met with on this point, but at the meeting of the board of estimate and apportionment on December 17 the form of contract was finally approved as to terms and conditions, and was immediately advertised.

I am strongly in favor of this area system, and my opinion is strengthened by finding that such a system was operated and approved by former Commissioner Waring, and was operated and approved by former Commissioner Woodbury. My opposition to the measured yardage basis is the result of careful examination of the two systems. The measured yardage system offers large opportunities for fraud. On account of incompetency on the part of some of the contractors, hired trucks were put to work in several of the districts, and a more satisfactory system of snow removal was established.

Snow plows were introduced upon the streets last winter with very good results. It was found that after a heavy snowfall the streets could be opened for traffic in a reasonably short time by the use of these plows. This innovation proved so successful that the board of aldermen have granted an appropriation of \$10,000 for the purchase of snow plows, which will be operated in all storms this winter.

In common with all street cleaners everywhere, I have found myself confronted with the hard problem of thoroughly removing the dirt, and of doing so without sending up clouds of it to the discomfort of the pedestrians and shop

owners or householders, and to that end a bill was drafted and passed to allow the commissioner to enter into a long term contract to sprinkle, clean and wash with machines. Sprinkling carts were taken over from private contractors and added to the equipment of the department.

In conformity with the legislation above mentioned a contract was prepared and submitted to the board of estimate and apportionment, which contemplated frequent cleansing of the streets with machines which deliver water scientifically and with much force onto the pavements. The area contemplated to be covered was about two-thirds of the total paved area of the three boroughs, part of this area to be washed every other day, part twice a week, and part once a week, according to the needs of the various localities. As the facts upon which to base an estimate of the cost of such work were meagre, the board allowed the sum of \$100,000 with which to experiment and test machines in a general way, to arrive at definite information. Six different types of machines were tried in a test covering over three months. A representative of the department also visited other large cities where machines of this type are in use, in this manner and by correspondence gathering considerable data.

This test has convinced me that this work can be done effectively and economically, and that it is the best possible method of street cleaning. It will cost about \$500,000 per annum to do the work, but the result which will be obtained is of far greater value to the health and comfort of all concerned.

I have long been convinced that the carting system in use is not only antiquated, but is the source of much nuisance in the loading and transportation, through the action of the wind spreading the ash dust, and I am actively investigating the possibilities of a change to a trucking system with the trucks equipped with practical covers to prevent nuisance. Auto trucks are my ambition, but I have not yet seen one which exactly meets the requirements.

The matter of the removal and final disposition of "trade waste" is one which appeals to me as an expense to the department which is incurred under questionable circumstances. This matter was taken up in Major Woodbury's time, and he was upheld by the courts in refusing a part of this service, that is to say, collection by department carts. The producers of this trade waste, however, were permitted to dispose of it on the department scows. To bring the matter to a head, I stopped the whole system and discontinued receiving this material on department scows. This step met with such active opposition from the various merchants' associations that the matter was forced into the board of estimate and apportionment and the board of aldermen to find out whether this work should be performed by this department. These boards resolved that the service should be given, and authorized the issue of bonds to the amount of \$150,000 to meet the expense. On account of other economies in the bureau of final disposition, it has been found unnecessary to use any of this amount.

In the work of final disposition of the ashes and rubbish on board of the scows, it is necessary to employ a large number of laborers, who pick over the materials and level them off so that the scows will ride on even keels. Incidental to this it has been customary to make an agreement with a competent contractor by

which he furnishes the necessary labor at his own expense and pays a fixed sum per week for the privilege. The privilege consists in his being allowed to reclaim from among the ashes and rubbish such saleable materials as he may deem merchantable. The saleable articles are paper, rags, tin cans, metals, leather, wood, bottles, broken glass and crockery, or any number of other cast-off refuse for which he finds a market. The agreement had been for some time in such an unsettled state that it was never known exactly where the city stood, but this work has now been put on a firm basis by making a long term agreement. This agreement extends over three years, with the privilege on the part of the city to extend it to five years if such an extension would be to the city's interest. By the terms of the agreement the city receives about \$4,000 worth of labor weekly free, and in addition a weekly cash payment of \$1,717.

By the introduction of a new system of accounting it is now possible to keep an absolute check on the detailed expenditures for the different items of the budget, and the items can be balanced monthly, so that there is no danger of exceeding the allowance for the year, and it is also easier to see methods for saving.

I am particularly anxious to bring about a saving in the department by erecting stables on public property instead of renting, as we do now in all but three cases, and I feel that a substantial sum could be taken from the debit side by such a method. I am convinced that a saving of 25 per cent of the present expenditures could be thereby effected.

In order to promote efficiency and create an *esprit de corps* in the working force, I ordered a parade of the department forces on June 3, when the men were paraded before the citizens in such a way as to show the people a fine body of able men and well cared for animals and plant. The result was to raise the reputation of the department and its operation, and to astonish the general public by the exhibition. The men enjoyed a holiday, and by the awarding of a cup and banners a healthy spirit of rivalry was created, which has been of benefit to the service.

The Juvenile Leagues which were instituted under Colonel Waring have been revived. These leagues consist of clubs of children in various parts of the city. They are officered and have captains who report to the commissioner, under the tuition of a foreman of the department, who has become blind in the service, and who has been allowed by the Civil Service Commission to take up this as his regular work. This master instructs the children as to the details of the department work, and the vital necessity for the rules being carried out, and they carry the teachings home, and the general result is for the betterment of conditions. Last summer there was a parade and picnic for the leagues at Dexter Park, Brooklyn, when 15,000 children marched under a banner inscribed "Clean Streets."

An effort was made last winter to have a bill passed in the Legislature providing for a pension fund for department employees. I am very much interested on the establishment of this fund, so as to repay faithful service and to allow of retirement for age, thus keeping the force at an average active age.

The bureau of medical examination is administered by three physicians. For the division of the work the territory over which the department of street cleaning has jurisdiction is divided into three districts. District No. 1 covers an area of

49½ square miles, District No. 2, 18 square miles, and District No. 3, 79 square miles. The men reporting sick are examined by the physicians, such examinations being made at the office when possible, but at the homes when necessary. The rules provide that men reporting sick must immediately submit to an examination, and the record of each examination is made and filed on the office of the general superintendent. When men are found ailing, the physician recommends leave of absence, and the men must report for further examination when so ordered by the medical examiner. When men are found to be feigning illness, or are suffering from temporary or chronic alcoholism, charges are preferred to the general superintendent, and the case is tried by the deputy commissioner.

During the year 1909, 6,250 men were examined, of which 1,300 were home visits. The physicians estimate that the various causes of illness are divided as follows: Respiratory diseases, 50 per cent; internal diseases, 25 per cent, and surgical cases, 25 per cent. Of the surgical cases it is estimated that 75 per cent are for injuries sustained incident to the department duties. Rheumatism in its various forms is considered the most prevalent disease. The percentage of cases where the men are found to be feigning illness is estimated at 25 per cent. In addition to the examinations the medical examiners have to attend hearings of men on trial for shamming or for intoxication, and are frequently called to appear in the courts in negligence cases. It is proposed to improve the present system by inaugurating a more thorough examination of applicants for positions and a strict enforcement of the provisions for half pay to men reported sick with reference to their title to such consideration. The elimination of the large percentage of "feigning," by some system to be agreed upon by the physicians and approved by the commissioner, and a strict enforcement of the rule that changes of residence must be reported immediately to the general superintendent. The territory covered by the examiners is very large for each to cover, and improvement in methods is being formulated by them for the benefit of the service. The services rendered by this corps have been worthy of great praise, and I take pleasure in commending the efficiency, zeal and faithfulness of the members of this bureau.

The veterinary service of the department is performed by six veterinary surgeons. The total number of horses is 1,293 in Manhattan and The Bronx and 767 in Brooklyn.

The number of horses lost in 1909 was 88 in Manhattan and The Bronx and 91 in Brooklyn, which is 6½ per cent in Manhattan and The Bronx and 11½ per cent in Brooklyn. The prevalent troubles are caused from exposure in bad weather, accidents at dump, accidents of collision in the work, strain due to the use of carts, and colic from garbage consumption; the deaths are from various causes, principally injuries or internal disease. The work of the horses is extremely severe, as they work seven days in the week and have to go everywhere in bad weather, there being no choice to be made, as the service is general. The surgeons are subject to call at all hours of the day and night, and the chief surgeon adds to his other duties that of examination for purchase and trial of new horses, examination for condemnation, acclimatization of new horses, and also is consulting surgeon with all the others.

At the end of December, 1909, the

department force comprised 21 district superintendents, 106 section foremen, 220 acting assistants to section foremen, 90 sweepers detailed in section stations and incumbrance yards, 2,847 regular sweepers, 236 extra sweepers, 43 dump inspectors, 35 assistant dump inspectors, 41 boardmen, 57 scowmen and 2 wiremen; and, in addition, connected with the 22 stables, 20 foremen, 15 assistant foremen, 48 acting assistants to foremen, 221 hostlers, 1,351 regular drivers, 263 stablemen, 871 extra drivers, 1,874 cart horses, 92 driving horses and 70 horses on trial.

Of the total collection of 3,152,658½ loads, 1,741,405½ were dumped at sea and behind the bulkhead; 332,045 were taken to Barren Island; 158,343½ were disposed of on private dumps and 185,008½ at inland dumps; 23,974½ were burned in incinerators, and 57 at the 97th street dock; 400 capsized; and 718,040 were removed from Brooklyn by the Borough Development Company.—*Municipal Journal and Engineer*.

NEW YORK OPENS TUBERCULOSIS CLINICS IN ITALIAN QUARTERS.

Dr. Walter Bensel, city sanitary superintendent, last week told of the Board of Health's extensive plans to stamp out tuberculosis, particularly among the Italians, who have been shown among all aliens to be most subject to the disease. To direct the Board's efforts more effectively, he said, a three-story building at 339 East 109th street, in the heart of "Little Italy," has been leased and opened as a tuberculosis clinic. Two physicians are in charge. Doctor Bensel said that another clinic had been opened in the downtown Italian district. In this work among the Italians the Board of Health has the active co-operation of the society organized by prominent Italian citizens and headed by ex-Ambassador to Italy Lloyd C. Griscom, for the purpose of battling with the disease among Italians here. Doctor Bensel spoke also of the enlargement of general plans for fighting tuberculosis. In addition to the ferryboat clinic in the East river, at the foot of East Ninety-second street, and the clinic at headquarters, Sixth avenue and Fifty-fifth street, the Board of Health maintains a large branch at 426 First avenue. Another clinic is to be opened shortly in West Thirty-fourth street, which is to take the place of the headquarters clinic, then to be closed. The branch in First avenue will eventually become the general application bureau for all tuberculosis patients.—*Municipal Journal and Engineer*.

COLUMBUS GARBAGE DISPOSAL PLANT IN OPERATION.

The garbage reduction plant, the first in the United States to be built wholly new and operated by a city, has been placed in service. The city wagons take the garbage to a point on Mound street at the canal, from where the Hocking Valley Railroad then conveys the refuse to the new plant about a mile and a half south of the corporation line. The capacity of the new plant will be 80 tons daily. The present output of the city is 40 tons, which will be increased within the next few weeks because of annexation and the season to about 60 tons. The plant when in full swing will employ about 20 men. There was no formal opening of the big plant, but it was simply started to work.—*Municipal Journal and Engineer*.

CITY OF BOSTON.

PROPOSALS FOR LIGHTING STREETS WITH GAS.

The Superintendent of Streets of the City of Boston, office 47 City Hall, invites proposals for lighting with gas incandescent mantle burners such streets, parks and alleys as may from time to time be designated by the city for a period of two years from February 1, 1911, and giving bond therefor of a surety company, approved by the superintendent, in the sum of \$50,000 for work to be done under Item A, and \$5,000 under Item B, to secure the due performance of the contract and the full protection of the city. Forms of bids may be obtained at the said office of the Superintendent of Streets. Bids are to be based on furnishing approximately 10,000 lamps distributed in such separate districts as may be determined by the city. Bidders are invited to state a price per lamp per annum for each of the following lamps:

1. For lanterns with single burners of not less than 60 candle power;
2. For lanterns with two burners, each of not less than 60 candle power;
3. For two-foot open flame fire-alarm signal lamps (gas, lighting, and care only);

Item A is to include the furnishing of the gas as well as the furnishing, maintaining and lighting of the lamps.

Item B is to furnish and install all material and necessary equipment required for single or double mantle gas incandescent lamps and keeping same in repair. (The city to furnish labor and gas.)

Samples of the equipment, including lanterns, burners, etc., to be furnished under each item must be submitted with the same.

Each bid should be inclosed in an envelope, sealed, marked "Bid for Street Lighting" and left at the said office of the Superintendent of Streets before 12 o'clock m. of Monday, September 12, 1910, with a certified check for \$5,000 under Item A, and \$1,000 under Item B, payable to and to become the property of the city if the bid after acceptance is not carried out. The bids will then and there be publicly opened and read. Bids must be made in duplicate, the duplicate, without check, to be deposited by the bidder with the City Auditor previous to the time named for opening the bids. The undersigned reserves the right to give preference to the proposals of bidders agreeing to pay the trade unions' rate of wages and the right to reject any or all proposals.

L. K. ROURKE,
Superintendent of Streets.

Boston, August 18, 1910. (Aug. 20.)

CITY OF BOSTON.

REPAIRING BROADWAY BRIDGE.

The Superintendent of Streets of the City of Boston, office 47 City Hall, invites proposals for repairing Broadway Bridge over the tracks of the Boston & Albany Railroad, and giving bond therefor of a surety company approved by the superintendent in the sum of five thousand dollars (\$5,000), to secure the due performance of the contract and the full protection of the city. Forms of bids may be obtained at the said office of the Superintendent of Streets. Each bid should be inclosed in an envelope, sealed, marked, "Bid for Repairing Broadway Bridge," and left at the said office of the Superintendent of Streets before 12 m. on Thursday, September 1, 1910, with a certified check for one thousand dollars (\$1,000), payable to and to become the property of the city if the bid after acceptance is not carried out. The bids will then and there be publicly opened and read. Bids must be made in duplicate, the duplicate without check to be deposited by the bidder with the City Auditor previous to the time named for opening the bids. The undersigned reserves the right to give preference to the proposals of bidders agreeing to pay the trade unions' rate of wages and the right to reject any or all proposals.

LOUIS K. ROURKE,
Superintendent of Streets.

Boston, August 18, 1910. (Aug. 20-27.)

CITY OF BOSTON.

TO GENERAL CONTRACTORS.

The Public Grounds Department of the City of Boston invites sealed proposals for soil work and renovation on Boston Common, and giving bond of a surety company therefor in the sum of \$10,000. Only proposals obtained at the office of the superintendent, city greenhouses, East Cottage street, signed by the bidder and left there before 12 o'clock m. of Monday, August 29, 1910, at said office, with a certified check for \$1,000, payable to the city if the proposal is not carried out, will then and there be publicly opened and read. The bid must be made in duplicate, the one with the check to be sent as above, the other to be sent to the City Auditor, City Hall. The superintendent reserves the right to reject any and all proposals and to give preference to bidders paying the trade unions' rate of wages.

D. H. SULLIVAN,
Superintendent of Public Grounds.

Boston, August 19, 1910. (Aug. 20.)

NOTICE TO SUBSCRIBERS.

Subscribers will find the expiring date of their subscription stamped upon the mailing wrapper. As payment must be made in advance, remittance should be made on or before that date.

CITY OF BOSTON.

PROPOSALS FOR ARTIFICIAL STONE SIDEWALKS.

The Superintendent of Streets of the City of Boston, office 47 City Hall, invites proposals for constructing artificial stone sidewalks in Washington street (westerly side) between Williams and Marvin streets, Roxbury, and giving bond therefor of a surety company approved by the superintendent. Only proposals obtained at said office, filled out, signed by the bidder and left at said office before 12 o'clock m. of Monday, August 29, 1910, with a certified check for \$300, payable to and to be the property of the city if the proposal is not carried out, will at said hour and place be publicly opened and read. The proposals must be made in duplicate, the duplicate, without check, to be deposited by the bidder with the City Auditor previous to the time named for opening the bids. The undersigned reserves the right to give preference to the proposals of bidders agreeing to pay the trade unions' rate of wages and the right to reject any or all proposals. The proposals should be inclosed in an envelope, sealed and marked "Proposal for Artificial Stone Sidewalks in Washington Street."

JAMES M. PRENDERGAST,
DANIEL H. COAKLEY,
Commissioners.

(Aug. 20.)

CITY OF BOSTON.

NOTICE TO CONTRACTORS.

Sealed bids for building Section 2, Beacon Hill Tunnel for the Cambridge connection, including a three-platform station located under a portion of the existing Park street subway station and Boston Common, will be received by the undersigned until 12 o'clock m. of Tuesday, August 30, 1910. Specifications and forms of contract can be obtained at 15 Beacon street, ninth floor. The right to reject any and all bids, and to award the contract as is deemed to be for the best interest of the City of Boston is reserved. By order of the Boston Transit Commission.

B. LEIGHTON BEAL,
Secretary.

(Aug. 20-27.)

City of Boston — Street Department

NOTICE

The Board of Street Commissioners, in accordance with chapter 393 of the Acts of 1906, have passed orders for the laying out and construction of the following highways:

DORCHESTER.

- Morton street, from Blue Hill avenue easterly for a distance of about 700 feet.
- Wales street, between Harvard street and Talbot avenue.
- Westcott street, between Talbot avenue and West Park street.
- West Park street, between Bernard street and the New England railroad.

ROXBURY.

- Leon street, between Ruggles and Greenleaf streets.
- Rochdale street, northeasterly from Cobden street.

Notice is hereby given that the Street Department is about to do the work contemplated in said orders and that all work to be done in said highways by all persons or corporations having rights in the same to lay or repair either sewer, gas, water or other pipes must be done before MONDAY, September 19, 1910, as after that time no permits for openings will be granted until two years after said highways are completed.

LOUIS K. ROURKE,
Superintendent of Streets.

Boston, August 18, 1910. (Aug. 20-27, Sept. 3-10.)

CITY OF BOSTON.

PROPOSALS FOR MACADAM ROADWAY, BULKHEAD AND FENCE.

The Superintendent of Streets of the City of Boston, office 47 City Hall, invites proposals for constructing a macadam roadway, pile bulkhead and fence in Ralston street, between Dorchester avenue and Boston street, South Boston, and giving bond therefor of a surety company approved by the superintendent. Only proposals obtained at said office, filled out, signed by the bidder, and left at said office before 12 o'clock m. of Monday, August 29, 1910, with a certified check for \$300, payable to and to be the property of the city if the proposal is not carried out, will at said hour and place be publicly opened and read. The proposals must be made in duplicate, the duplicate without check to be deposited by the bidder with the City Auditor previous to the time named for opening the bids. The undersigned reserves the right to give preference to the proposals of bidders agreeing to pay the trade unions' rate of wages and the right to reject any or all proposals, and no proposal will be accepted unless a fair, reasonable price is bid for each item. The proposals should be inclosed in an envelope, sealed and marked "Proposal for Macadam Roadway, Bulkhead and Fence in Ralston Street."

CITY RECORD

OFFICIAL PUBLICATION OF THE CITY OF BOSTON.

VOL. 2.

SATURDAY, AUGUST 27, 1910.

No. 35

City of Boston.

CITY RECORD.

Published weekly under legislative act by the
City of Boston, Mass.

BY SUBSCRIPTION . . . \$1.00 Per Year.
SINGLE COPIES . . . 5 Cents.
IN ADVANCE.

ADVERTISING.

A rate of 10 cents per agate line has been established for such advertisements as under the law must be printed in the *City Record*. Advertising and other copy must be in hand by Thursday of each week to insure its publication in the Saturday issue.

Copies for sale at the Mayor's Office, Room 27, City Hall.

MUNICIPAL SERVICE.

Complaints, inquiries or suggestions regarding the work of municipal departments should be made in writing to the officials directly in charge. The failure of such officials to make reply within a reasonable length of time should be brought to the attention of the Mayor. Communications should be directed as follows:

TO THE BOARD OF STREET COMMISSIONERS, Room 41, City Hall, for information relative to the laying out, relocation, widening and discontinuance of highways; the taking of real property for municipal purposes; the assessments of betterments for streets and sewers; the plotting of undeveloped areas for streets and the opening of private ways; the granting of licenses for the storage or sale of merchandise in public streets; the regulation of street traffic; the making of specific repairs in public streets; the naming of public streets; the planting and removal of trees in public ways; the issuing of licenses for the storage of gasoline, oil and other inflammable substances or explosive compounds; the use of the public ways for any permanent or temporary obstruction or projection in, under or over the same, including the location of conduits, poles and posts for telephone, telegraph, street railway or illuminating purposes, signs, marqueses, bay windows, coal holes and vaults.

TO THE SUPERINTENDENT OF STREETS, Room 44, City Hall, for information as to

the watering, cleaning, lighting and repairing of streets, the construction and care of sewers and catch-basins, the operation of the ferries, the maintenance of bridges and drawbridges and the removal of ashes and offal.

TO THE BOARD OF HEALTH, Room 11, Old Court House (rear of City Hall), for information relative to the inspection of milk, vinegar, meat, fish and vegetables, the issuance of permits for stables, slaughter houses, etc., smoke nuisances, the existence of contagious diseases or public health nuisances.

TO THE WATER COMMISSIONER, Room 58, City Hall, for information relative to the supplying or metering of water and the water charges of the city.

TO THE SUPERINTENDENT OF PUBLIC GROUNDS, 154 East Cottage street, for information as to the care of the Common, Public Garden, and the small parks throughout the city other than playgrounds, and the extermination of the gypsy moth and the charges made for the same.

TO THE PARK COMMISSIONERS, Pinebank, Jamaica Plain, for information as to Franklin Park and Field, Commonwealth avenue, the Back Bay Fens, Marine Park and playgrounds in general throughout the city.

TO THE SCHOOL COMMITTEE, Mason street, for information relative to the operation of the schools of the city.

TO THE SCHOOLHOUSE COMMISSIONERS, 120 Boylston street, for information as to the construction and repair of school buildings.

MUNICIPAL CALENDAR.

Meeting of City Council, Monday, September 12, 3 p. m.

Meetings of the Boston Transit Commission are held Tuesday and Thursday of each week at 10.30 a. m.

HEARING.

The Board of Health will give a hearing on Thursday, September 1, on the petition of Arthur Orpin for a stable for six horses on premises, 121 Medford street, Ward 3.

WATER DEPARTMENT.

The following allowances have been made by the commissioner and approved by the Mayor:

Michael Durand, Distribution Division, 7 days at \$3, \$21.

TRANSFER.

The Mayor has approved a transfer of \$4,800 from the Reserve Fund to the Park Department.

MUNICIPAL FARM ALL RIGHT.

Kansas City has just finished its first year's experience with a municipal farm, a project which was undertaken for the improvement it promised over an expensive workhouse. The results, as summarized in the first annual report to the Board of Public Welfare, are interesting. A prisoner in the workhouse used to cost the city \$220 a year; a prisoner on the farm has been earning \$100 for the city. These figures, which are given as averages, show that the city has turned a loss of sixty cents a day for each prisoner into a gain of thirty cents for each prisoner. But that is not all, for the reformatory influence of the farm is marked. It is noted that the prisoners take an interest in the farm work that they did not take in the workhouse tasks, that few guards are necessary, for attempts to escape are infrequent. They plant and cultivate and harvest crops, care for live stock, build roads and fences and repair them, in all of which there is a variety of work with something suited to every ability. The city sells the products of the farm which are not needed for the living of prisoners.—*Municipal Journal and Engineer.*

MILWAUKEE MAYOR'S NOVEL IDEAS OF STREET CLEANING.

Prizes for children in connection with keeping the streets of Milwaukee clean and the elevation of the "white wings," giving trustworthy ones power to arrest for violation of health ordinances, are among the recommendations embraced in a special message of Mayor Emil Seidel (Social Democrat), which he will have printed and send to every member of the Common Council. "The place to begin is with the child," says the Mayor. "The boy and girl can be an auxiliary to our street cleaning force. Let us reward the child that adds to the greatest extent in removing litter from the streets, alleys or vacant lots." As prizes he suggests monthly outings, picnics, a souvenir medal or other recognition.—*Municipal Journal and Engineer.*

PROCEEDINGS OF CITY COUNCIL.

Monday, August 22, 1910.

Special meeting of the City Council, held in the Council Chamber, City Hall, at three o'clock p. m., President BALLANTYNE in the chair. Absent—Coun. Kenny.

The Council voted, on motion of Coun. BRAND, to dispense with the reading of the records of the last meeting.

The Clerk read the call for the meeting as follows:

City of Boston,

Office of the Mayor, August 17, 1910.

To the Members of the City Council:

You are hereby requested to assemble in the City Council Chamber, City Hall, on Monday, August 22, 1910, at three p. m., for the purpose of taking suitable action in regard to the granting of permission to veterans of the Civil War to attend their annual encampment without loss of pay, and of transacting such other business as may legally come before the meeting.

Respectfully,

JOHN F. FITZGERALD, Mayor.

Placed on file.

JURORS DRAWN.

Forty-one traverse jurors were drawn for the Superior Civil Court, to appear September 7, in accordance with the provisions of chapter 514, Acts of 1894 (the Mayor not being present), viz.:

Willard F. Scott, Ward 20; John J. Leary, Ward 17; John Poggi, jr., Ward 19; William F. O'Hara, Ward 3; George F. Damon, Ward 2; James P. Walsh, Ward 22; James M. Elliott, Ward 21; Martin H. Keogh, Ward 18; Thomas F. Coughlin, Ward 7; Charles Johnson, Ward 8; William F. Reed, Ward 8; Joseph A. Greene, Ward 6; Robert M. Dean, Ward 5; Charles Lehman, Ward 21; David S. Cox, Ward 5; Charles E. Preble, Ward 25; Cornelius Haley, Ward 24; Hugh O'Donnell, Ward 19; Ernest S. Bangs, Ward 24; Frank L. Whitcomb, Ward 25; Frederick J. C. Weniger, Ward 19; Everett J. Pitkin, Ward 10; Lorenz Schneider, Ward 23; Martin L. Doyle, Ward 14; Charles H. Joyce, Ward 12; John F. McLaughlin, Ward 16; Allen Clark, Ward 25; Daniel M. Kelley, Ward 23; William C. R. Woodside, Ward 1; Nicholas F. Daley, Ward 20; Francis M. Morgan, Ward 20; Frank C. Brady, Ward 23; Arthur F. McIntosh, Ward 24; Joseph Dondero, Ward 6; Albert L. Ryder, Ward 20; Irving A. Caswell, Ward 24; George T. Bennett, Ward 7; Frank J. Porter, Ward 16; Oliver Elliot, Ward 9; Fred Gebhardt, Ward 23; John J. Malloy, Ward 22.

REBUILDING OF REPAIR SHOP.

The following was received:

City of Boston,

Office of the Mayor, August 22, 1910.

To the City Council:

As a result of the damage done at the lumber wharf fire of August 9, it will be necessary for your honorable body to consider shortly the replacement of the apparatus injured or destroyed on that occasion, and the rebuilding of the repair shop of the Fire Department. I beg to request that a careful study of the cost of these items be made by your Committee on Finance, with a particular view to determining whether they would best be met by loan appropriation, or in some other way. It is my intention to submit a recommendation upon the subject as soon as definite estimates have been prepared.

Other problems relating to a high pressure water service for use at fires, to the installation of an auxiliary fire-signal system, to the augmentation of the fire-fighting force and to the strengthening of the building laws might well be considered in connection with this subject.

Respectfully,

JOHN F. FITZGERALD, Mayor.

Referred to the Committee on Finance.

SALE OF GRAVEL PIT.

The following was received:

City of Boston,

Office of the Mayor, August 20, 1910.

To the City Council:

I recommend the passage of the appended order, authorizing the Street Commissioners to sell at private sale a certain "old, disused and exhausted gravel pit on Summer and Pleasant streets in Everett." A letter of the Street Commissioners, recommending this sale, is appended hereto.

Respectfully,

JOHN F. FITZGERALD, Mayor.

City of Boston,

Street Laying-Out Department,

August 18, 1910.

Hon. John F. Fitzgerald, Mayor:

Dear Sir,—The Board of Street Commissioners respectfully recommends that the three lots of land on Summer and Pleasant streets, in the city of Everett, be sold at private sale. These lots have been in the possession of the City of Boston since the annexation of Charlestown, and are not being used for any public purpose. The three lots have a taxed value of \$1,000 which the Board thinks is a fair value.

In 1903 the City Council passed an order authorizing the sale of this property at public auction. Inquiry as to the possibility of getting a fair value for the property caused the Board to withhold the sale, as there did not seem to be any desire on the part of any one to pay a reasonable price for it. The Board understands that an offer of the assessed value has been made for the property, which, it thinks, ought to be accepted.

Very truly yours,

(Signed) J. J. O'CALLAGHAN, Secretary.

Ordered, That so much of an order passed by the City Council an approved by the Mayor May 16, 1903, authorizing the Board of Street Commissioners to sell by public auction certain lots of land belonging to the city, as relates to the sale of "an old, disused and exhausted gravel pit on Summer and Pleasant streets in Everett," be, and the same is, hereby rescinded, and the Street Commissioners are hereby authorized to sell the said lot on Summer and Pleasant streets at private sale. Referred to the Executive Committee.

VACATIONS FOR SOLDIERS.

The following was received:

City of Boston,

Office of the Mayor, August 20, 1910.

To the City Council:

I beg to inclose two communications from the Acting Corporation Counsel, relating to two orders passed by your honorable body, one at its meeting of June 20, and the other at its meeting of August 8, referring respectively to leave of absence without loss of pay for veterans of the Civil War who desire to attend their annual encampment, and the granting of pay to employees in the city departments who are members of the Massachusetts Volunteer Militia, for time spent at their annual maneuvers.

It is the opinion of the Acting Corporation Counsel that these orders in their present form would be illegal. He has suggested new forms of orders which I beg to transmit herewith and to recommend to your honorable body for passage. I have taken, for your information, a fairly complete census of the number of veterans of the Civil War employed in the various departments and find that it approximates four hundred. Of these less than one in ten has expressed a desire to attend the encampment and a considerable percentage of this number must be outside the class of per diem employees who alone require the sanction of the Mayor and the City Council, for vacations and holidays, in accordance with the statute quoted by the Acting Corporation Counsel. It seems to me that where the number of men affected is so small, and their services to the Nation have been of a character which can hardly be measured in material terms, this slight concession is merely such a mark of grateful recognition as our generation owes to the men of an earlier time who, in their youth, offered all they had for the salvation of their country, and now in their old age should not be deprived of the pleasure of an annual reunion with their comrades of long ago.

As to the payment for members of the militia, this seems to me in line with the most enlightened policy, which aims to encourage the enlistment of young men in the National Guard. The payment received by militia men is invariably turned in to the general treasury of the regiment or organization to which they belong, and if they are deprived of their regular stipend during the period of the annual maneuvers the total financial loss must be a considerable one. Many private employers are in the habit of paying the usual wages during this period and the city ought not to be behind them in its recognition of the value of these organizations which, in crisis and emergencies would be our best protection against internal forces of disorder, and in case of attack by foreign enemies would form the nucleus of an army of defence.

Respectfully,

JOHN F. FITZGERALD, Mayor.

City of Boston,

Law Department, 73 Tremont Street,

Boston, August 12, 1910.

Hon. John F. Fitzgerald, Mayor,

City Hall, Boston, Mass.:

Dear Sir,—My opinion is asked as to whether the Mayor can legally issue instructions to heads of departments in compliance with the following orders of the City Council:

"Ordered, That the heads of the various departments of the city be requested to allow all employees of the city who are veterans of the Civil War leave of absence, without loss of pay, to attend their annual encampment to be held the first week of September, 1910."

"Ordered, That his Honor the Mayor be requested to direct all heads of departments to pay employees in said departments who are members of the Massachusetts Volunteer Militia for time spent by said employees at the annual maneuvers."

These orders would seem to fall within the inhibition of section 8 of chapter 486 of the Acts of 1909 (Revision of the City Charter), the material parts of which are as follows:

"Neither the City Council nor any member or committee, officer, or employee therein shall . . . directly or indirectly, on behalf of the city or of the County of Suffolk, take any part in the

employment of labor; . . . nor in the conduct of the executive or administrative business of the city or county."

It may be contended, however, that they should be construed as authorizations on the part of the Council, under chapter 587 of the Acts of 1908 to heads of departments to grant vacations with pay to veterans of the Civil War or members of the militia. Said chapter provides that the Mayor and City Council may authorize the granting of holidays, half-holidays or vacations, with pay, to employees of the City of Boston. It seems to me, however, that neither of these orders purports to have been passed in the exercise of the rights thus conferred upon the Council, but should be construed rather as merely a request to the Mayor or to the heads of departments to grant leave of absence to certain employees for a specified period of time and for a specified purpose. Nor can leave of absence for the purposes mentioned fairly be considered as vacation within the meaning of the statute. The language of the orders does not permit that freedom of action which is ordinarily implied in that word, but restricts such action to attendance,—in the case of veterans of the Civil War, at their annual encampment, and in the case of the members of the militia, at the annual maneuvers. The observance of such civic duties is not so necessarily suggestive of rest and recreation that it can justly be termed vacation. I am of opinion, therefore, that the orders have no validity and that no action should be taken under them.

I would suggest the following forms of orders which, if adopted, would enable veterans and members of the militia to attend the encampment or maneuvers without loss of pay:

"Ordered, That the officer or board in charge of any department be hereby authorized to grant a vacation, without loss of pay, to all employees of the city in said department who are veterans of the Civil War, such vacation to be co-extensive in time with the annual encampment of 1910 of the Grand Army of the Republic."

"Ordered, That the officer or board in charge of any department be hereby authorized to grant a vacation, without loss of pay, to all employees of the city in said department who are members of the Massachusetts Volunteer Militia, such vacation to be co-extensive in time with the annual maneuvers of said militia."

Yours very truly,

JOHN D. McLAUGHLIN,
Acting Corporation Counsel.

City of Boston,

Law Department, 73 Tremont Street,

Boston, August 13, 1910.

Hon. John F. Fitzgerald, Mayor,

City Hall, Boston, Mass.:

Dear Sir,—Mr. Leahy telephoned me this morning that you had expressed some doubt as to whether as Mayor you have not the right to grant, or to direct heads of departments to grant, vacations with pay to employees of the city. I would say in regard to this matter that there is a difference in the legal status of men whose salary is fixed by the year and men whose wages are fixed by the day, so far as the granting of vacations with pay is concerned.

In this respect, the employees of the city can be divided into three classes: First, those who hold public office of some kind, as, *e. g.*, the head of a department. With such employees the salary is an incident to the office and is payable to the incumbent as long as he holds it, whether he is sick or well, engaged about his duties or absent on vacation. Second, subordinates: in which designation are included assistants, deputies, clerks and other officers who are appointed by an officer or board in charge of a department and are paid a yearly salary. The hours, time of service, etc., of subordinates are fixed by the head of the department, and he can give them vacations or not as he pleases. Third, all employees of the city who are neither office holders nor subordinates, viz., that class of employees whose wages are fixed by the day. Such employees cannot be granted vacations unless the Mayor and the City Council have so authorized, without loss of pay.

The act which provides for such authorization, chapter 587 of the Acts of 1908, is as follows:

"Chapter two hundred and ten of the acts of the year nineteen hundred and eight [the act providing for the certification by the Civil Service Commission of city pay rolls, bills and accounts and that heads of departments shall make oath to the nature of the work done, dates of employment, etc.] is hereby amended by adding thereto the following section: Section 5. Nothing in this act shall be construed as making it unlawful to certify as days of employment holidays, half-holidays or vacation, authorized by the Mayor and City Council, although no labor or services are performed thereon."

I am,

Yours very truly,

JOHN D. McLAUGHLIN,
Acting Corporation Counsel.

Ordered, That the officer or board in charge of any department be hereby authorized to grant a vacation, without loss of pay, to all employees of the city in said department who are veterans of the Civil War, such vacation to be coextensive in time with the annual encampment of 1910 of the Grand Army of the Republic.

Ordered, That the officer or board in charge of any department be hereby authorized to grant a vacation, without loss of pay, to all employees

of the city in said department who are members of the Massachusetts Volunteer Militia, such vacation to be coextensive in time with the annual maneuvers of said militia.

The orders were passed.

APPOINTMENTS BY THE MAYOR.

The Mayor submitted the following appointments, subject to confirmation by the Council, viz.:

- August 20, 1910.
- (1) William H. McNulty (166 Bunker Hill street, Ward 3), a Weigher of Coal, for the term ending April 30, 1911.
- (2) William E. Stewart (7 Church street, Somerville), a Weigher of Coal, a Measurer of Wood and Bark, a Measurer of Grain, a Weigher of Boilers and Heavy Machinery and a Weigher of Beef, for the term ending April 30, 1911.
- Laid over, under the law.

ENTERTAINMENT OF CANADIAN SOLDIERS.

The following was received:

City of Boston.
Office of the Mayor, August 18, 1910.

To the City Council:

I beg to recommend the passage of the appended order, transferring the sum of one thousand dollars (\$1,000) from the Reserve Fund to the appropriation for Mayor, Office Expenses, etc., in order that suitable entertainment may be provided for the Forty-third Regiment of Infantry, Duke of Cornwall's Own Rifles of Ottawa, Ontario, who are to visit Boston early in September. The appended letter from Retired Brigadier General Oakes, who is chairman of the reception committee, describes the courtesies extended to the Fifth Regiment of Infantry of this state on the occasion of the recent visit to Ottawa and Montreal, and gives what seem to be excellent reasons for reciprocating these courtesies. As the visiting regiment will be quartered in Boston, the city will regard them, in a measure, as its guests and may very properly set aside a portion of the public funds for the purpose of entertaining them.

Yours very truly,
JOHN F. FITZGERALD, Mayor.

Boston, August 9, 1910.

To His Honor Mayor John F. Fitzgerald,
City Hall, Boston, Mass.:

Dear Sir,—The Forty-third Regiment of Infantry, Duke of Cornwall's Own Rifles of Ottawa, Ontario, are to visit Boston, September 3, 4 and 5 next, as guests of the Fifth Regiment of Infantry, M. V. M. They are one of the representative militia regiments of their country, and will come under arms, permission having been granted through the Secretary of State at Washington, D. C.

When the Fifth Regiment of Infantry of this state visited both Ottawa and Montreal in August, 1906, both cities extended courtesies to the Regiment, and was reviewed by Earl Grey. I respectfully suggest that \$1,000 be appropriated for their entertainment as guests of the City of Boston on September 4, arrangements for the same to be submitted to you at a later date. This visit will be in a way an international affair, and I am sure any courtesies extended to them on behalf of the city will be greatly appreciated, not only by themselves, but by their fellow countrymen of Canada. I am,

Very respectfully,
(Signed) WILLIAM H. OAKES,
Brigadier General M. V. M. Retired,
Chairman of Committee.

Ordered, That in accordance with the provisions of chapter 261 of the Acts of 1893, the City Auditor be, and hereby is, authorized to transfer the sum of one thousand dollars (\$1,000) from the appropriation for Reserve Fund to the appropriation for Mayor, Office Expenses, etc.

Referred to the Executive Committee.

REPAVING OF STREETS.

The following was received:

City of Boston.
Office of the Mayor, August 16, 1910.

To the City Council:

I transmit herewith a communication from the Superintendent of Streets containing a reply to your order requesting report as to the advisability of repaving certain portions of Harrison avenue and Albany street.

Respectfully,
JOHN F. FITZGERALD, Mayor.

Street Department, City Hall,
Boston, August 8, 1910.

To the Honorable the Mayor:
Reinclosed order of the City Council, inclosed report of the Deputy Superintendent in charge of the Highway Division, relative to repaving

Harrison avenue, from Harvard street to Broadway and from Kneeland street to Harvard street, and also with reference to repaving Albany street, from Kneeland street to Oak street, is respectfully forwarded. The estimated cost of these improvements is as follows:

Harrison avenue, 21 feet south of Kneeland street to north side of Harvard street.... \$1,600
Harrison avenue, north side of Harvard street to Broadway..... 14,100
Albany street, Kneeland street, across Oak street..... 21,100

Respectfully,
(Signed) L. K. ROURKE,
Superintendent of Streets.

City of Boston,
Street Department, Highway Division,
Boston, August 5, 1910.

Mr. Louis K. Rourke,
Superintendent of Streets:

Sir,—I return herewith an order of the City Council as to the advisability of repaving Harrison avenue, from Kneeland to Harvard streets, asphalt section; also, from Harvard to Oak streets, granite block section.

There is a possibility that the asphalt section (between Kneeland and Harvard streets) can be resurfaced this season, but I am unable to give any

Hon. John F. Fitzgerald,
Mayor of the City of Boston:

Sir,—In response to an order of the City Council dated July 6, 1910, calling upon the Statistics Department for a "report as to the amounts of money expended during the past twenty years in Wards 8, 10 and 11 on parks, playgrounds, boulevards, street improvements, etc.," I beg to submit the following report:

Inasmuch as new ward lines were established in 1895, it is not possible to make a satisfactory statement regarding expenditures within the present wards for years prior to 1895, without an inordinate expenditure of labor and time.

The aggregate amount of expenditures, on capital account, from 1895 to 1909, inclusive, for the objects specified, in the several wards (as is shown by the records of the Street Department, and the reports of the Park Department and the City Auditor) is as follows:

Ward 8.....	\$467,494 92	15.00 per cent.
Ward 10.....	949,665 42	34.46 per cent.
Ward 11.....	1,700,141 61	54.54 per cent.
	<u>\$3,117,301 95</u>	<u>100.00 per cent.</u>

The foregoing aggregate is made up of two classes of expenditures, viz.: (1) Expenditures for parks and boulevards, and (2) expenditures for street improvements, as follows:

	Ward 8.	Ward 10.	Ward 11.
1. Parks and boulevards.....	\$31,240 01	\$31,305 21	\$354,176 27
2. Street improvements.....	436,254 91	918,360 21	1,345,965 34
Totals.....	<u>\$467,494 92</u>	<u>\$949,665 42</u>	<u>\$1,700,141 61</u>

Somewhat detailed statements of the expenditures embraced in the foregoing subtotals are set forth in the appended tables I. and II.

Placed on file.

HEIGHT LIMIT FOR FIREMEN.

The following was received:

City of Boston,
Office of the Mayor, August 16, 1910.

To the City Council:

I beg to transmit the appended communication from the Acting Fire Commissioner, bearing upon your order passed at the meeting of May 16, to the effect "that the Fire Commissioner, through his Honor, the Mayor, be requested to reduce the height limit for applicants for fire service to 5 feet 5 inches."

Respectfully,
JOHN F. FITZGERALD, Mayor.

City of Boston,
Fire Department, Boston, August 13, 1910.

Hon. John F. Fitzgerald, Mayor:

Sir,—On May 16th, the City Council passed the following resolution which was duly forwarded from the Mayor's office to the Fire Commissioner:

"Ordered, That the Fire Commissioner, through his Honor the Mayor, be requested to reduce the height limit for applicants for fire service to 5 feet 5 inches."

Under the present law the Fire Commissioner has the authority to fix the height regulation, and the minimum has been placed at 5 feet 7 inches. From this fact and from the further fact that the Civil Service Commissioners in examining applicants for the Fire Department do not reject candidates because of failure in height requirements, a heavy burden has been put upon this office to make explanation of our refusal to appoint men under 5 feet 7 inches in height who were on the civil service list. The commissioner has also received innumerable requests that the height limit be reduced.

It therefore becomes advisable, in order that there may be a satisfactory understanding of what the attitude of this department shall be, that a definite statement of policy in this regard should be made. Having this purpose in mind, I have investigated the requirements and tests to which the more important cities of the United States subject their candidates for the fire department, and as a result of this investigation, and of what I have myself observed, I have come to the conclusion

encouragement for the repairing of the granite block section, for the very important reason that our financial condition will not permit.

In the matter of the Albany street paving, the division force has made repairs, but the permanent work must go over till next year on account of the lack of funds.

Respectfully,
(Signed) JAMES H. SULLIVAN,
Deputy Superintendent.

Placed on file.

MONEY EXPENDED ON PARKS, ETC.

The following was received:

City of Boston,
Office of the Mayor, August 20, 1910.

To the City Council:

I beg to transmit the appended communication, in reply to an order passed by your honorable body at its meeting of July 6, requesting the Statistics Department to furnish a report as to the amount of money expended during the past twenty years in Wards 8, 10 and 11 on parks, playgrounds, street improvements, etc.

Respectfully,
JOHN F. FITZGERALD, Mayor.

Statistics Department, Boston, August 16, 1910.

Very respectfully,
EDWARD M. HARTWELL, Secretary.

that it would be imprudent and perhaps dangerous to change the present minimum requirement as to height for probationers in this department.

This decision is reached, not because I believe that there is any peculiar sanctity in this particular standard, for there may be better methods of examining the fitness of candidates than by the height test. While size and height may be very important qualifications in a police officer, whose physical appearance may have much to do with his efficiency, this is not necessarily true of firemen, with whom agility and brawn may be of much more importance than height.

In the absence, however, of a well worked out system based upon tests for brawn, speed and agility, the best practical results are obtained by setting a height standard and, if such a standard is set, it cannot wisely be set at less than 5 feet 7 inches, though some of our older and best men would not now be in the department if the present minimum had applied at the time of their admission.

In New York the minimum requirement is 5 feet 7½ inches for ordinary firemen, and Chief Crocker recently advised me that he was in favor of even larger men; and that for ladder service the rule of the New York department makes the minimum 5 feet 9 inches.

In Chicago the minimum limit is 5 feet 8 inches, while 5 feet 7 inches is the standard for St. Louis, Baltimore, Cleveland, Buffalo, Detroit, Cincinnati, Milwaukee and Washington. In fact, Philadelphia is the only large city in the country where a lower standard obtains. Appended hereto is a summary of the height and weight requirements in fourteen cities.

There are frequently met cases of hardship where men are one-fourth, one-eighth or even one-sixteenth of an inch under the height requirements. Of course, as a practical matter, such slight difference would not affect a man's efficiency for fire service. But while the rule obtains, it must be respected. Nor will a change in the present regulations eliminate this hardship; for at whatever arbitrary limit this minimum may be fixed, we shall always find the same sort of hard cases as we do at the present time. The standard for Boston should not be lower than for other great cities.

For these reasons I do not think it expedient to reduce the present height limit of 5 feet 7 inches, and therefore I am unable to comply with the request of the City Council.

Respectfully,
FRANCIS M. CARROLL,
Temporary Commissioner.

CITIES.	Height and Weight.	Remarks.
New York.....	Minimum, 5 feet 7 1/2 inches; 140 pounds. Maximum, 6 feet 5 inches; 185 pounds.	Age limit 21 and not more than 30 years at date of appointment. Chest expansion, minimum 36 1/2 inches.
Chicago.....	Minimum, 5 feet 8 inches; 150 pounds. Maximum, 6 feet 5 inches; 195 pounds.	Chest measurement, minimum 35 inches.
Philadelphia....	Minimum, 5 feet 5 inches.....	Weight regulated by examining physician. Opinion small men as good as large, if they can pass a good physical examination.
St. Louis.....	Minimum, 5 feet 7 inches; 135 pounds. Maximum, 6 feet 4 inches; 180 pounds, not under.	Chest measurement 33 inches. Department adheres strictly to height and weight regulations and rigid medical examination.
Newark.....	Minimum, 5 feet 5 1/2 inches; 130 pound..	Opinion that small men in proportion to weight are better adapted for fire service than what is termed "big men."
Baltimore.....	Minimum, 5 feet 7 inches; 140 pounds. Maximum, 6 feet 4 inches, and not less than 190 pounds.	Chest measurement 34 inches. Stress is laid with reference to <i>brawn</i> . Man might pass height and weight regulations, but is rejected for this reason. Engineer's height waived.
Buffalo.....	Minimum, 5 feet 7 inches; 133 pounds.	Chest measurement 35 inches. Physical examination by department surgeon.
Detroit.....	Minimum, 5 feet 7 inches; 145 pounds; 6 feet, 165 pounds. Maximum, 6 feet 4 inches; 175 pounds.	Age 21 to 30. Physical examination by surgeon.
Cincinnati.....	5 feet 7 inches; weight and other measurements in proportion.	Regulation has just been changed from 5 feet 6 inches to 5 feet 7 inches and opinion is that it is advantageous, eliminating light men who could not stand exposure and strain.
Milwaukee.....	5 feet 7 inches; 150 pounds; 4 pounds each additional inch.	Age limit 22 to 32 years. Opinion is that present regulations give good results for men in the line. Assistant engineers are accepted at 5 feet 6 inches.
New Orleans....	Minimum, 5 feet 5 inches.....	Would personally prefer height regulation 5 feet 7 inches and not less than 150 pounds.
San Francisco...	5 feet 9 inches for ladder men; 5 feet 7 inches for hose men.....	Minimum weight 140 pounds; maximum 220 pounds; waist measurement not to exceed chest. Considers height regulations essential.
Washington....	Minimum, 5 feet 7 inches; 145 pounds...	Opinion is that it is necessary to have height and weight limit, but examining board be allowed discretion if applicant is one-half inch short if physically qualified otherwise.

Placed on file.

TEMPORARY HEALTH COMMISSIONER.

The following was received:

City of Boston,
Office of the Mayor, August 8, 1910.
To the City Council:
You are hereby notified that I have this day designated P. Robert Greene, an Overseer of the Poor, to serve as a member of the Board of Health, pending a permanent appointment to this office.

Respectfully,

JOHN F. FITZGERALD, Mayor.

Placed on file.

BOSTON ELEVATED PLANS.

The following was received:

City of Boston,
Office of the Mayor, August 11, 1910.
To the City Council:
I transmit herewith, in order that they may be placed in the files of the City Clerk, the following plans showing proposed modifications and changes in the existing elevated structure of the Boston Elevated Railway Company and of its proposed elevated structure and station in Causeway street, between Haverhill street and Nashua street:

- (1) No. 26,885, showing elevated and subway construction, East Cambridge extension, proposed connection with subway and Washington Street Tunnel and modification of, and connection with, existing elevated lines, Causeway street, between Canal street and Charlestown Bridge.
- (2) No. 26,886, showing elevated and subway construction, East Cambridge extension, proposed elevated station Causeway street, opposite North Union Station, and modification of, and connection with, existing elevated lines, Causeway street, between Canal street and Charlestown Bridge.
- (3) No. 26,887, showing elevated and subway construction, modifications and changes Causeway street, Haverhill street to Charlestown Bridge.
- (4) No. 26,888, showing elevated and subway construction, East Cambridge Extension, proposed elevated station Causeway street, opposite North Union Station, and modification of, and connection with, existing elevated lines Causeway street, between Canal street and Charlestown Bridge.

The above plans have been approved by me, under the provisions of chapter 500 of the Acts of 1897, as to architectural appearance and obstruction to light and air.

Respectfully,

JOHN J. FITZGERALD, Mayor.

Placed on file.

CELEBRATION OF COLUMBUS DAY.

The following was received:

City of Boston,
Office of the Mayor, August 15, 1910.
To the City Council:
In compliance with the request contained in an order passed by your honorable body at its meeting of August 8, I communicated with the Italian Ambassador, extending, through him, an invitation to the Italian government to send one or more of its warships to Boston on Columbus Day, October 12, to take part in the celebration of that holiday, which is of particular interest to our fellow citizens of Italian origin. I beg to transmit the appended communication, which has been received from the Italian Charge d'Affaires.

Respectfully,

JOHN F. FITZGERALD, Mayor.

Regia Ambasciata D'Italia,
Manchester, Mass., August 14, 1910.
Sir,—I beg to acknowledge the receipt of your letter dated of the 11th instant, addressed to H. E. Baron Mayor des Planches, former Italian Ambassador to the United States, who since February last left this country for his new post at Constantinople. I wish to express to you this Embassy's hearty appreciation of the courteous and friendly sentiments which have prompted you and the City Council of Boston to request the presence of one or more Italian warships at the celebration of Columbus Day on October 12.

I have taken note of the assurances you give me concerning the welcome which would be extended to the ships of my country and I have no doubt that Boston and its citizens would receive my countrymen with their usual courtesy and with exquisite hospitality.

Accordingly, I take great pleasure in communicating to my government your very kind invitation, but I must at once tell you that I fear it will be unable to accept it, as no Italian warships are at present stationed in North American waters, nor does it seem likely that in the near future any of them will visit American ports.

Believe, sir, with assurances of very distinguished consideration,

Yours very truly,

(Signed) Montagliara,
Italian Charge d'Affaires.

Placed on file.

PETITIONS REFERRED.

The following petitions were received and referred to the committees named:

Claims.

Thomas M. Daley, for compensation for injury to son caused by being knocked down by city team on Atlantic avenue.

Agnes Erlanson, for compensation for injuries received from a fall on Jenkins street, on August 2, 1910.

Wesley H. Ellis, for compensation for damage to automobile by Sanitary Division wagon.

Mary H. McDonald, for compensation for damage to clothing.

Guy W. Jackson *et al.*, for compensation for damage to clothing while assisting city employees at Boynton Street Yard.

Boston American, for expense incurred on account of leak in water supply pipe.

Executive Committee.

The Linemen's Union of Boston, for an investigation relative to alleged dangerous wire construction on poles on Dorchester avenue, Adams street and Neponset avenue.

Petitions for sidewalks, viz.:

(Artificial.)

Thomas F. Hurley, 20 Elmo street, Ward 20.
J. M. Dowling, Harvard street, corner of Commonwealth avenue, Ward 25.

T. F. Mahan, 119-123 Humboldt avenue and on Harrishof street side, Ward 21.

W. W. Sherman, 58 Clarkwood street, Ward 24.

Charles P. Daly, 36 Rosclair street, Ward 16.

S. Finkelstein, 435-449 Geneva avenue, Ward 20.

W. H. Crosby, 416-418 Talbot avenue, Ward 24.

George H. Fuller Company, 535 Tremont street, and on the Warren avenue side, Ward 10.

James Mason Rothwell, 863 Boylston street, Ward 11.

W. Irving Atwood, 31 Mt. Everett street, Ward 20.

John L. Gleason, 286 South street, Ward 23.

St. Joseph's Church, Circuit street, Ward 21.

National Investment Company, 187-189 Oakland street, Ward 24.

Isabella E. Sharpe, 36 Draper street, Ward 20.

St. Ann's Parochial School, 237 Neponset avenue, Ward 24.

J. W. Sheehan, 24 Grant street, Ward 20.

H. A. Drehauf, 35-37 Mt. Everett street, Ward 20.

John Lally, 16 Allston street, Ward 20.

W. S. Riley, 34 Mayfield street, Ward 20.

A. Dudley Dowd, 1110-1118 Bay State road, Ward 11.

Granville F. Seaverns, 731-737 South street, Ward 23.

Maria B. Conboy, 17 Forbes street, Ward 22.

George F. Moser, 107 Howland street, Ward 21.

Mary J. Mogan, 19 Forbes street, Ward 22.

C. Weinacker, 44 Forbes street, Ward 22.

Faneuil Hall.

Petitions for the use of Faneuil Hall, viz.:

Clement G. Morgan, day and evening of January 6, 1911.

M. J. Konikow, evening of September 8, 1910.

Label League, I. M. C., afternoon of September 4.

MINORS' LICENSES.

President BALLANTYNE submitted reports on petitions for minors' licenses for twenty-four newsboys, one vender and one bootblack and asked the approval of the Council on the same.

The Council voted to grant the license on the usual conditions.

PAYMENT FOR DOG CATCHERS.

Coun. HALE presented the petition of Julian Codman, Huntington Smith and Frank J. Sullivan, constables of the City of Boston, asking for payment for services as dog catchers from May 1, 1910, to June 20, 1910, they not being constables of the city during said period.

Referred to the Executive Committee.

COAL AND COKE LICENSES.

Copies of coal and coke licenses granted by the Commonwealth were received.

Placed on file.

NOTIFICATION OF APPOINTMENT.

Notification was received of the appointment of Charles D. Daly as Fire Commissioner, and of the delivery of certified copy of same to the Civil Service Commission.

Placed on file.

APPROVAL OF APPOINTMENT.

Notice was received from the Civil Service Commission of approval of appointment of Phillip O'Brien as principal assessor.
Placed on file.

STORAGE OF EXPLOSIVES.

Notices were received of the keeping of explosives at the following locations, and of intention to use said premises for same purpose for the ensuing year, viz.:

William Endicott, Jr., 180 Beacon street, Ward 11.

Walter H. Collins, 51 Tonawanda street.
Henry L. Richmond, 511 East Fifth street.
Placed on file.

CONSTABLE'S BOND.

The Acting City Treasurer, after having duly approved of the same, submitted the Constable's bond of Paul R. Gast.
Approved by the Council.

PAY ROLLS OF REGISTRY OF DEEDS.

In accordance with the provisions of section 33, chapter 22, of the Revised Laws, the Register of Deeds submitted the following pay rolls, certifying that certain persons had been employed in his office and that work had been performed from June 20 to July 25 to the amount of \$3,871.49; also that work had been performed from July 25 to August 22 to the amount of \$3,171.20.

Referred to the Committee on County Accounts.

BENCHES ON ESPLANADE, CHARLES RIVER BASIN.

Communication was received from the Metropolitan Park Commissioners, in answer to order of City Council asking that settees and benches be placed on esplanade of Charles River Basin, stating that settees or benches would be placed on the portion of the embankment towards Cambridge Bridge, but none would be placed on the portion of the embankment parallel to Beacon street, as a subway is to be constructed there this fall.
Placed on file.

NOTICE OF HEARINGS.

Notices were received from the Board of Railroad Commissioners of hearings on petitions of West End Street Railway Company for approval of 314th, 315th, 316th, 317th, 318th and 319th locations, said hearings to be given on August 17.
Placed on file.

ALTERATION AND RELOCATION OF TRACKS.

Copies of orders were received from the Street Commissioners, as follows:

Alterations of tracks on Longwood avenue, between Huntington and Brookline avenues, 314th location.

Alteration of existing tracks at or near Tremont and Northampton streets, 315th location.

Relocation of tracks on Devonshire street, between State street and Adams square. In Adams square from Devonshire street to Washington street. In Washington street from Adams square to Hanover street, 316th location.

Relocation of tracks on Dudley street, between Harrison avenue and Magazine street, 317th location.

Alteration of tracks on Geneva avenue, between Bowdoin and Park streets, 318th location.

Placed on file.

GAS MAIN, MIDDLESEX STREET, CHARLESTOWN.

A copy of order of Street Commissioners granting permission to the Charlestown Gas Company to lay, maintain and use a gas main in Middlesex street, Charlestown district, was received.
Placed on file.

ERECTION AND REMOVAL OF POLES.

Copies of orders were received from the Street Commissioners as follows:

Erection and removal of one pole of West End Street Railway Company on Dorchester avenue, north of West Fourth street.

Removal of three poles of Edison Illuminating Company on Charter street, Ward 6.

Removal of pole of Edison Electric Illuminating Company on Granby and other streets.

Erection and removal of one pole of New England Telephone and Telegraph Company on Sleeper street, Ward 13.

Erection and removal of one pole of same company on Toplioff street, Ward 20.

Attaching of wires of same company to pole of West End Street Railway Company on Washington street, corner of Grove street, West Roxbury.

Attaching of wires of same company to pole jointly owned by the Postal Telegraph Cable Company and the Boston Elevated Railway Company on Washington street, near Grove street, West Roxbury.

Erection of three poles of said company on Elmira street, Ward 25.

Erection and removal of one pole of same company on Clark street, corner of Alpha road, Ward 20.
Placed on file.

APPOINTMENT OF DEPARTMENT HEADS.

The report of the Finance Commission on this matter, which was printed in the *Record* August 20, was placed on file.

RECONSTRUCTION OF CURTIS HALL BUILDING.

The Council proceeded to take up unfinished business, viz.:

Ordered, That the sum of \$60,000 be appropriated, to be expended by the Superintendent of Public Buildings, for the reconstruction of the building formerly known as Curtis Hall, and that to meet said appropriation the City Treasurer be authorized to issue, from time to time, on the request of the Mayor, bonds or certificates of indebtedness of the city, to said amount.

On August 1 the foregoing order was read once and passed, yeas 9.

The order was read a second time and again passed, yeas 8, nays 0.

SIDEWALK ORDERS.

President BALLANTYNE offered an order—That the Superintendent of Streets make a sidewalk along both sides of Round Hill street, between Gay Head and Walden streets, Ward 22, in front of the estates bordering thereon, said sidewalk to be from 3 to 10 inches above the gutter adjoining, to be from 5 to 12 feet in width, and to be built of brick under the provisions of chapter 437 of the Acts of 1893.

Passed.

Coun. BRAND offered an order—That the Superintendent of Streets make a sidewalk along both sides of Melville avenue, between Washington street and Dorchester avenue, Ward 20, in front of the estates bordering thereon, said sidewalk to be from 3 to 10 inches above the gutter adjoining, to be from 5 to 12 feet in width, and to be built of artificial stone, with granite edgestone, under the provisions of chapter 437 of the Acts of 1893.

Passed.

REMOVAL OF TREES.

Coun. McDONALD offered an order—That the Superintendent of Public Grounds be requested to remove trees in front of estates Nos. 38, 42, 46, 50, 54 and 58 Neponset avenue, Dorchester, as said trees interfere with building operations, the expense attending the same to be charged to the appropriation for Public Grounds Department.

Passed.

CLAIMS.

Coun. BUCKLEY, for the Committee on Claims, submitted reports on petitions for payment of balances remaining from tax sales of estates, viz.:

(1) Report on petition of Henry J. Bowen (referred 1909), recommending the passage of the following:

Ordered, That the City Treasurer be hereby authorized to pay to Henry J. Bowen, administrator of estate of William F. Tufts, the sum of \$155.67, being the amount held by the city under chapter 390, section 40, of the Acts of 1888, from the sale of an estate on Kittredge street, for unpaid taxes of the year 1896, by deed recorded with Suffolk Deeds, Lib. 2563, page 290.

Report accepted; order passed.

(2) Report on petition of Cornelius M. Doherty (referred June 3), recommending the passage of the following:

Ordered, That the City Treasurer be hereby authorized to pay to Cornelius M. Doherty the sum of \$58.15, being the amount held by the city under chapter 390, section 40, of the Acts of 1888, from the sale of an estate on 19-21 Bunker Hill street, for unpaid taxes of the year 1893, by deed recorded with Suffolk Deeds, Lib. , page .

Report accepted; order passed.

SOLDIERS' RELIEF.

Coun. HALE, for the Committee on Soldiers' Relief, submitted a report recommending the passage of an order for the payment of aid to soldiers and sailors and their families in the City of Boston for the month of August.

Report accepted; order passed.

RECESS TAKEN.

The Council voted at 3.45 o'clock p. m., on motion of Coun. HALE, to take a recess subject to the call of the President.

The members of the Council re-assembled in the Council Chamber and were called to order by the President at 4.22 o'clock p. m.

COUNTY ACCOUNTS.

Coun. ATTRIDGE, for the Committee on County Accounts, submitted the following:

(1) Report on pay roll of Registry of Deeds (referred to-day) for July, 1910, to the amount of \$3,871.49—that the same be approved and paid.

Report accepted; pay roll approved and ordered paid.

(2) Report on pay roll of Registry of Deeds (referred to-day) for August, 1910, to the amount of \$3,171.20—that the same be approved and paid.

Report accepted; pay roll approved and ordered paid.

EXECUTIVE REPORTS.

Coun. HALE, for the Executive Committee, submitted the following:

(1) Report on message of Mayor, and communication and order (referred to-day) that the sum of \$1,000 be transferred from the appropriation of Reserve Fund to the appropriation for Mayor, offices expenses, etc.—that the order ought to pass.

Report accepted; order passed, yeas 6, nays 0.

(2) Reports, recommending the passage of orders that the Superintendent of Streets make sidewalks on the following-named streets in front of the hereinafter named estates, said sidewalks to be from 3 to 10 inches above the gutter adjoining, to be from 5 to 12 feet in width, and to be built as specified, the owner to furnish the material, viz.:

Artificial.

Thomas F. Hurley, 20 Elmo street, Ward 20.
J. M. Dowling, Harvard street, corner of Commonwealth avenue, Ward 25.

T. F. Mahan, 119-123 Humboldt avenue and on Harrishof street side, Ward 21.

W. W. Sherman, 58 Clarkwood street, Ward 24.
Charles P. Daly, 36 Roseclair street, Ward 16.

S. Finklestein, 435-449 Geneva avenue, Ward 24.
W. H. Crosby, 416-418 Talbot avenue, Ward 24.

George H. Fuller Company, 535 Tremont street, and on the Warren avenue side, Ward 10.

James Mason Rothwell, 863 Boylston street, Ward 11.

W. Irving Atwood, 31 Mt. Everett street, Ward 20.

John L. Gleason, 286 South street, Ward 23.
St. Joseph's Church, Circuit street, Ward 21.

National Investment Company, 187-189 Oakland street, Ward 24.

Isabella E. Sharpe, 36 Draper street, Ward 20.
St. Ann's Parochial School, 237 Neponset avenue, Ward 24.

J. W. Sheehan, 24 Grant street, Ward 20.
H. A. Drehauf, 35-37 Mt. Everett street, Ward 20.

John Lally, 16 Allston street, Ward 20.
W. S. Riley, 34 Mayfield street, Ward 20.

A. Dudley Dowd, 1110-1118 Bay State road, Ward 11.

C. F. Whitehead, 90 Hancock street, Ward 20.
Robert G. Jones, 93 Easton street, Ward 25.

E. N. Foss, 642-648 Beacon street, Ward 11.
William A. Ryan, 73-77 Roseclair street, Ward 16.

Michael O'Donnell, 159 Boston street, Ward 16.
Agnes B. Pitts, 18 Bennett street, Ward 25.

Brick.

Woodbury & Leighton Company, 113 Bellevue street, Ward 23.

Catherine A. Gooding, 21 Forbes street, Ward 22.
Granville F. Seaverns, 731-737 South street, Ward 23.

Maria B. Conboy, 17 Forbes street, Ward 22.
George F. Moser, 107 Howland street, Ward 21.

Mary J. Mogan, 19 Forbes street, Ward 22.
C. Weinacker, 44 Forbes street, Ward 22.

Reports severally accepted; orders passed.

USE OF FANEUIL HALL.

Coun. CURLEY, for the Committee on Faneuil Hall, etc., submitted reports on petitions (severally referred to-day) for the use of Faneuil Hall—that leave be granted, viz.:

M. J. Konikow, evening of September 8.
Label League, Inc., afternoon of September 4.
Clement G. Morgan, day and evening of January 6, 1911.

NEXT MEETING.

Coun. HALE—Mr. Chairman, I move that when we adjourn we adjourn until September 7, two days after Labor Day.

Coun. BRAND—As that would be the meeting in the middle of the week, I would move to amend that we adjourn to the 12th of September, which will be the Monday following Labor Day.

Chairman BALLANTYNE—The question comes on the amendment, that when we adjourn we adjourn to the 12th of September.

Coun. HALE—Would it be any serious inconvenience for Mr. Brand to be there toward the end of that week? I expect to be away the next week.

Coun. BRAND—I don't care to have the meeting arranged for my special benefit. I intended to be away that week. If Coun. Hale intends to be away the week following, why, it seems to me we ought to meet on some middle ground. I would like to meet the views and wishes of all the members, if possible.

Coun. CURLEY—I trust the amendment to the 12th will prevail. I suppose it would be a great loss to the city to have Alderman Hale or Alderman Brand absent, but I don't feel the affairs of the city would stand still if those gentlemen were absent. I think they would go on just the same. I don't think there is any danger of the rest of the members walking away with the building or voting away something they should not. Although we are glad to have you here, I don't think we would suffer if you were absent.

Chairman BALLANTYNE—The motion is on the amendment of Coun. Brand to adjourn to the 12th.

The motion was carried.

LAMP ON SHERWOOD STREET.

Coun. CURLEY offered an order—That the Superintendent of Streets be requested to locate a gas mantle lamp on Sherwood street, near Shirley street, Ward 17.

Passed.

EXPENSE OF HEARINGS.

President BALLANTYNE offered an order—That the expense of the hearings given by the Mayor and City Council at the meetings held in the various districts of the city, the hearings given by the Committee on Appropriations and the hearings given relative to the fees and rentals for sidewalk space in the markets, be charged to the appropriation for City Council, incidental expenses.

Passed.

GENERAL RECONSIDERATION.

Coun. COLLINS—I move a general reconsideration, hoping that the same will not prevail. Lost.

On motion of Coun. CURLEY, the Council adjourned at 4.28 o'clock p. m., to meet on Monday, September 12, at 3 o'clock p. m.

1,500 GERMAN CITIES FREE FROM TAXATION.

"I know of no cities in the modern world which compare with those which have arisen in Germany during the past twenty years." Thus Frederic C. Howe begins a remarkable article on "City Building in Germany," in "Scribner's Magazine." The bigness of vision, boldness of execution and farsighted outlooks on the future of the Germans impressed him tremendously. The article is summarized in "Busy Man's Magazine" for June, and is an eye-opener for people in Canada, who are inclined to think they know all about city building, and a good many other things. Canada is a young country, and young countries, like young people, are prone to believe they "know it all."

Here you have the reason for that part of the British Budget which takes one-fifth of the unearned increment on land in cities. As can be seen, the German city builders have been wise in their generation. They take it all, and as a result the new German city is not an aggregation of slums and palaces.

The city dweller has privileges and conditions which make city life bearable even to the very poor.

The new German city is a thing of beauty, is economically cheap to do business in, is provided with everything which tends to build up a great center, is planned ahead, and the plan of the city is built up to. There is no such thing as a go-as-you-please. The public ends must be served. The result is the modern

German city is a great land owner and is a marvel of beauty and convenience.

That is the way Canadian cities should be built. That is the way New Glasgow should be built when it starts to grow, and provision for this growth should be made now, when it is possible.

Germany is building her cities as Bismarck perfected the army before Sadowa and Sedan; as the empire is building her warships and merchantmen; as she develops her waterways and educational systems. In city building, as in other matters, all science is the handmaiden of politics. The engineer and the architect, the artist and the expert in hygiene are alike called upon to contribute to the city's making. The German cities are thinking of to-morrow as well as of to-day, of the generation to follow, as well as the stage. Germany alone sees the city as the center of civilization of the future, and Germany alone is building her cities so as to make them contribute to the happiness, health and well-being of the people. This seems to be the primary consideration, and it is unique in the modern world.

In building the German city construction begins at the bottom. Believing that the land itself is the controlling influence on city life, the city controls it in the first place.

Streets, boulevards, parks, open spaces and sites for public buildings are laid out far in advance of the city's growth, and owners of land must conform to the city's plans. There can be no wildcat speculation, no cheap and narrow streets, no jerry-building.

The rectangular arrangement of streets has been generally abandoned and irregularity has been substituted. Curves and parabolas are favorite lines.

The sewer is in the center of the street, but the gas, water, electric light, telephone and other conduits are usually placed under the sidewalks close up to the building line. It is not necessary to block the streets and tear up the pavement in order to get across to them. Once completed the streets need never be disturbed. All this work is done by the city.

In America water fronts are dedicated to one thing or the other. If they are used for business purposes, they have no value for pleasure. Beauty is ignored. This is not true in Germany. Business is made to adjust itself to art, pleasure, recreation and use by the whole community. The harbor proper in Dusseldorf is more than a mile in length. It is divided into great basins for various kinds of freight. There is one for coal, another for lumber, another for grain, another for petroleum, another for general merchandise. There is no confusion and no dirt. Tracks are laid along the embankments in connection with the railways and the street railway systems. There are hoisting devices, equipped with the latest electrical and hydraulic machinery, for the expeditious handling of every kind of freight. This is all done by the city and owned by it. It all is complete and symmetrical as a machine, and the cost of transshipment is reduced to a minimum. Here are erected warehouses, elevators and storehouses, all connected with one another by rail. The docks of a German city are great terminal systems, equipped with every convenience for even the smallest shipper. By virtue of these works the trade of Dusseldorf increased three hundred per cent in ten years' time. And within a very short time the improvement will yield a profit from out the rentals of the enterprise.

The controlling influence of the land is the basis of all successful city building. Some cities have become great landlords.

Frankfort, with a population of less than four hundred thousand, owns 12,800 acres of land within its boundaries, and 3,800 acres without. Within the past ten years the city has expended \$50,000,000 in the purchase of land alone. The land which it owns is almost exactly equal to the area occupied by the cities of Pittsburg, or Baltimore, each of which has a considerably greater population. Cologne owns fifteen and a half square miles, exclusive of many open spaces. The town of Breslau, with a population about the size of Cleveland, Ohio, owns twenty square miles of land, or 12,800 acres. But Berlin is the greatest landlord of them all. That city owns 34,000 acres, mostly outside the city, while Munich owns 13,600 acres, and Strasburg 12,000 acres. German cities also possess great forests. They are constantly adding to their possessions. There are, in fact, 1,500 smaller towns and villages in Germany which derive so much revenue that they are free from all local taxes. Five hundred of these communities are not only free of all local taxes, but are able to declare a dividend of from \$25 to \$100 a year to each citizen as his share of the surplus earnings of the common lands.—*Municipal World*.

OUTSIDE OF CHICAGO CITY HALL FINISHED.

The outer structure of Chicago's new City Hall, which is to cost \$5,000,000, was finished July 14, and, unless unforeseen trouble occurs, the building will be ready for occupancy before Christmas. The Council chamber, which with the galleries and committee rooms occupies the north end of the second and third floors, is ornate in finishing. The last touches are now being put to the illuminated ceiling and a fire is kept constantly burning in the room to prevent the Chicago moisture warping the rare imported woods in which the room is trimmed. When completed it will have its own ventilating system. A lounging room for the Aldermen, with two immense stone fireplaces and lockers behind hand-carved paneled doors, runs the width of the Council chamber along the north end of the building. Aldermen pass through this to their seats on the floor of the Council and no passageway is provided between the Council floor and the public galleries for the lobbyists to pass back and forth, as they have in all previous Chicago Council chambers.—*Municipal Journal and Engineer*.

CHICAGO MILK SUPPLY DIRTY.

The milk of Chicago is the dirtiest in the world. This startling fact, vital to the health of 2,500,000 people, was made public last week by the Milk Commission recently appointed by Mayor Busse, in its first preliminary report to the City Council. The Commission, after going over the situation carefully, has arrived at the conclusion that nothing is to be gained by concealing the facts, and that the only way in which conditions can be remedied is to face the truth and begin all along the line. It was careful to impute no blame to the city Health Department, which its report says has done wonders with a staff that is undermanned and underpaid. The milk supply of Chicago amounts to 240,000 gallons daily. The commission will continue its investigations.—*Municipal Journal and Engineer*.

City of Boston — Street Department

NOTICE

The Board of Street Commissioners, in accordance with chapter 393 of the Acts of 1906, have passed orders for the laying out and construction of the following highways:

DORCHESTER.

Morton street, from Blue Hill avenue easterly for a distance of about 700 feet.
Wales street, between Harvard street and Talbot avenue.
Westcott street, between Talbot avenue and West Park street.
West Park street, between Bernard street and the New England railroad.

ROXBURY.

Leon street, between Ruggles and Greenleaf streets.
Rochdale street, northeasterly from Cobden street.

Notice is hereby given that the Street Department is about to do the work contemplated in said orders and that all work to be done in said highways by all persons or corporations having rights in the same to lay or repair either sewer, gas, water or other pipes must be done before MONDAY, September 19, 1910, as after that time no permits for openings will be granted until two years after said highways are completed.

LOUIS K. ROURKE,
Superintendent of Streets.

Boston, August 18, 1910.

(Aug. 27-Sept. 3-10.)

CITY OF BOSTON.

PROPOSALS FOR TWO SHELTER AND SANITARY BUILDINGS.

Proposals, on blanks obtained at the engineer's office, Franklin Park, for building a shelter and sanitary building on West Third Street Playground and a shelter and sanitary building on West Fifth Street Playground, South Boston, and giving bond of a surety company therefor in \$1,000, signed by bidder and left before 3 o'clock p. m. of September 6, 1910, at the office of the commissioners, Olmsted Park, Jamaica Plain, with a certified check for \$200, payable to and to be the property of the city if the proposal is not carried out, will then and there be publicly opened and read. A duplicate proposal, without the check, must be deposited with the City Auditor previous to the time named for opening the bids. The commissioners reserve the right to reject any or all proposals and to give preference to bidders paying the trade unions' rate of wages.

ROBERT S. PEABODY,
JAMES M. PRENDERGAST,
DANIEL H. COAKLEY,
Commissioners.

(Aug. 27.)

CITY OF BOSTON.

TO FIRE ESCAPE CONTRACTORS.

The Schoolhouse Commissioners of the City of Boston invite sealed proposals for erecting fire escape on Prescott School, Elm street, Charlestown, Boston, Mass., and giving bond of a surety company therefor in the sum of \$1,000. Only proposals obtained at the office of the commissioners, 120 Boylston street, signed by the bidder and left before 12 o'clock m. of Friday, September 2, 1910, at said office, with a certified check for \$500, payable to the city if the proposal is not carried out, will then and there be publicly opened and read. The bid must be made in duplicate, the one with the check to be sent as above, the other to be sent to the City Auditor, City Hall. The commissioners reserve the right to reject any and all proposals and to give preference to bidders paying the trade unions' rate of wages.

CHARLES LOGUE,
JOHN F. KENNEDY,
CHARLES B. PERKINS,
Commissioners.

(Aug. 27.)

CITY OF BOSTON.

PROPOSALS FOR PRINTING AND BINDING.

Sealed proposals will be received at the office of the Boston Transit Commission, 15 Beacon street, Boston, until 12 m. of Wednesday, August 31, for printing and binding the sixteenth annual report of this commission; also separate proposals for printing and binding an edition of "Legislation, Court Decisions, etc." Specifications may be obtained of the undersigned. By order of the Boston Transit Commission.

B. LEIGHTON BEAL,
Secretary.

(Aug. 27.)

NOTICE TO SUBSCRIBERS.

Subscribers will find the expiring date of their subscription stamped upon the mailing wrapper. As payment must be made in advance, remittance should be made on or before that date.

CITY OF BOSTON.

PROPOSALS FOR THE DISPOSAL OF REFUSE.

The Superintendent of Streets of the City of Boston, office 47 City Hall, invites proposals for the disposal of refuse for a term of 10 years from January 1, 1912, and giving bond therefor of a surety company approved by the superintendent. The proposals can be obtained at said office on and after September 1, 1910, and must be filled out, signed by the bidder and left at said office before 12 o'clock m. of Monday, October 17, 1910, with a certified check for five thousand dollars (\$5,000), payable to and to be the property of the city if the proposal after acceptance is not carried out, and will at said hour and place be publicly opened and read. Proposals must be made in duplicate, the duplicate, without check, to be deposited by the bidder with the City Auditor previous to the time named for opening the bids. The undersigned reserves the right to give preference to the proposals of bidders agreeing to pay the trade unions' rate of wages and the right to reject any or all proposals. The proposals should be inclosed in an envelope, sealed, and marked "Proposal for Disposal of Refuse."

L. K. ROURKE,
Superintendent of Streets.

Boston, Aug. 25, 1910.

(Aug. 27-Sept. 3-10-17.)

CITY OF BOSTON.

PROPOSALS FOR FLOUR.

The Boston Infirmary Department invites proposals for furnishing flour to the Boston Almshouse and Hospital, Long Island, and the Almshouse, Charlestown, and giving bond of a surety company for \$500. Only proposals obtained at the office of the department, 28 Court square, Room 3, signed by bidder and left before 12 m. on Thursday, September 8, 1910, at said office with certified check for \$50, payable to and to be the property of the city, if the proposal is not carried out, will then and there be publicly opened and read. The department reserves the right to reject any and all bids. The bids should be inclosed in a sealed envelope and marked "Proposals for Flour for the Boston Infirmary Department." A duplicate copy of the proposals must be filed at the City Auditor's office (without check) at the same time proposals are left at the Boston Infirmary Department.

EDWARD M. GALLAGHER,
Chairman.

(Aug. 27.)

CITY OF BOSTON.

TO GENERAL CONTRACTORS.

The Public Grounds Department of the City of Boston invites sealed proposals for soil work and renovation on Boston Common, and giving bond of a surety company therefor in the sum of \$10,000. Only proposals obtained at the office of the superintendent, city greenhouses, East Cottage street, signed by the bidder and left before 12 o'clock m. of Thursday, September 8, 1910, at said office, with a certified check for \$1,000, payable to the city if the proposal is not carried out, will then and there be publicly opened and read. The bid must be made in duplicate, the one with the check to be sent as above, the other to be sent to the City Auditor, City Hall. The superintendent reserves the right to reject any and all proposals and to give preference to bidders paying the trade unions' rate of wages.

D. H. SULLIVAN,
Superintendent of Public Grounds.

Boston, August 19, 1910.

(Aug. 27.)

CITY OF BOSTON.

NOTICE TO CONTRACTORS.

Sealed bids for building Section 2, Beacon Hill Tunnel for the Cambridge connection, including a three-platform station located under a portion of the existing Park street subway station and Boston Common, will be received by the undersigned until 12 o'clock m. of Tuesday, August 30, 1910. Specifications and forms of contract can be obtained at 15 Beacon street, ninth floor. The right to reject any and all bids, and to award the contract as is deemed to be for the best interest of the City of Boston is reserved. By order of the Boston Transit Commission.

(Aug. 27.)

B. LEIGHTON BEAL,
Secretary.

CITY OF BOSTON.

PROPOSALS FOR MACADAM ROADWAY AND ARTIFICIAL STONE SIDEWALKS.

The Superintendent of Streets of the City of Boston, office 47 City Hall, invites proposals for constructing a macadam roadway and artificial stone sidewalks in Leon street, between Ruggles and Greenleaf streets, Roxbury and giving bond therefor of a surety company approved by the superintendent. Only proposals obtained at said office, filled out, signed by the bidder and left at said office before 12 o'clock m. of Friday, September 2, 1910, with a certified check for \$500, payable to and to be the property of the city if the proposal is not carried out, will at said hour and place be publicly opened and read. The proposals must be made in duplicate, the duplicate, without check, to be deposited by the bidder with the City Auditor previous to the time named for opening the bids. The undersigned reserves the right to give preference to the proposals of bidders agreeing to pay the trade unions' rate of wages, and the right to reject any or all proposals, and no proposal will be accepted unless a fair, reasonable price is bid for each item. The proposals should be inclosed in an envelope, sealed and marked "Proposal for Macadam Roadway and Artificial Stone Sidewalks in Leon Street."

Superintendent of Streets.

Boston, August 25, 1910.

(Aug. 27.)

CITY OF BOSTON.

PROPOSALS FOR HAY, GRAIN AND STRAW.

Sealed proposals will be received at the office of the City of Boston Supply Department, Room 826, Tremont Building, until 11 o'clock Tuesday, August 30, for the hay, grain and straw needed in the different departments for September, 1910. The bid must cover the cost of delivery. The bidder is requested to bid on both No. 1 and No. 2 hay. The hay to be timothy hay, clean and sweet; the straw to be No. 1, straight rye straw. The grade of hay and straw must comply with the rules of the National Hay Association, and shall be weighed and inspected by a weigher appointed under the ordinances of the City of Boston. The oats must be No. 2, clipped white oats, to test not less than 34 pounds to the bushel. Samples of the oats must be given with the proposal, and must conform to the grade adopted by the Chamber of Commerce. The bidder must use the form to be obtained at Room 826, Tremont Building. A bid in duplicate must be filed, without the check, with the City Auditor. The successful bidder must deposit a certified check for one-quarter the amount of the contract as surety that the terms of the contract will be carried out. The proposals will be publicly opened and read on Tuesday, August 30, at 11 a. m. The superintendent reserves the right to reject or accept bids.

J. EDWARD MULLEN,
Superintendent of Supplies.

(Aug. 27.)

CITY OF BOSTON.

REPAIRING BROADWAY BRIDGE.

The Superintendent of Streets of the City of Boston, office 47 City Hall, invites proposals for repairing Broadway Bridge over the tracks of the Boston & Albany Railroad, and giving bond therefor of a surety company approved by the superintendent in the sum of five thousand dollars (\$5,000), to secure the due performance of the contract and the full protection of the city. Forms of bids may be obtained at the said office of the Superintendent of Streets. Each bid should be inclosed in an envelope, sealed, marked, "Bid for Repairing Broadway Bridge," and left at the said office of the Superintendent of Streets before 12 m. on Thursday, September 1, 1910, with a certified check for one thousand dollars (\$1,000), payable to and to become the property of the city if the bid after acceptance is not carried out. The bids will then and there be publicly opened and read. Bids must be made in duplicate, the duplicate without check to be deposited by the bidder with the City Auditor previous to the time named for opening the bids. The undersigned reserves the right to give preference to the proposals of bidders agreeing to pay the trade unions' rate of wages and the right to reject any or all proposals.

LOUIS K. ROURKE,
Superintendent of Streets.

Boston, August 18, 1910.

CITY RECORD

OFFICIAL PUBLICATION OF THE CITY OF BOSTON.

VOL. 2.

SATURDAY, SEPTEMBER 3, 1910.

No. 36

City of Boston.

CITY RECORD.

Published weekly under legislative act by the
City of Boston, Mass.

BY SUBSCRIPTION . . . \$1.00 Per Year.
SINGLE COPIES . . . 5 Cents.
IN ADVANCE.

ADVERTISING.

A rate of 10 cents per agate line has been established for such advertisements as under the law must be printed in the *City Record*. Advertising and other copy must be in hand by Thursday of each week to insure its publication in the Saturday issue.

Copies for sale at the Mayor's Office, Room 27, City Hall, and at all newsstands.

MUNICIPAL SERVICE.

Complaints, inquiries or suggestions regarding the work of municipal departments should be made in writing to the officials directly in charge. The failure of such officials to make reply within a reasonable length of time should be brought to the attention of the Mayor. Communications should be directed as follows:

TO THE BOARD OF STREET COMMISSIONERS, Room 41, City Hall, for information relative to the laying out, relocation, widening and discontinuance of highways; the taking of real property for municipal purposes; the assessments of betterments for streets and sewers; the plotting of undeveloped areas for streets and the opening of private ways; the granting of licenses for the storage or sale of merchandise in public streets; the regulation of street traffic; the making of specific repairs in public streets; the naming of public streets; the planting and removal of trees in public ways; the issuing of licenses for the storage of gasoline, oil and other inflammable substances or explosive compounds; the use of the public ways for any permanent or temporary obstruction or projection in, under or over the same, including the location of conduits, poles and posts for telephone, telegraph, street railway or illuminating purposes, signs, marquis, bay windows, coal holes and vaults.

TO THE SUPERINTENDENT OF STREETS, Room 44, City Hall, for information as to

the watering, cleaning, lighting and repairing of streets, the construction and care of sewers and catch-basins, the operation of the ferries, the maintenance of bridges and drawbridges and the removal of ashes and offal.

TO THE BOARD OF HEALTH, Room 11, Old Court House (rear of City Hall), for information relative to the inspection of milk, vinegar, meat, fish and vegetables, the issuance of permits for stables, slaughter houses, etc., smoke nuisances, the existence of contagious diseases or public health nuisances.

TO THE WATER COMMISSIONER, Room 58, City Hall, for information relative to the supplying or metering of water and the water charges of the city.

TO THE SUPERINTENDENT OF PUBLIC GROUNDS, 154 East Cottage street, for information as to the care of the Common, Public Garden, and the small parks throughout the city other than playgrounds, and the extermination of the gypsy moth and the charges made for the same.

TO THE PARK COMMISSIONERS, Pinebank, Jamaica Plain, for information as to Franklin Park and Field, Commonwealth avenue, the Back Bay Fens, Marine Park and playgrounds in general throughout the city.

TO THE SCHOOL COMMITTEE, Mason street, for information relative to the operation of the schools of the city.

TO THE SCHOOLHOUSE COMMISSIONERS, 120 Boylston street, for information as to the construction and repair of school buildings.

MUNICIPAL CALENDAR.

Meeting of City Council, Monday, September 12, 3 p. m.

Meetings of the Boston Transit Commission are held Tuesday and Thursday of each week at 10.30 a. m.

Parks, watchman, 1 day at \$2.50, \$2.50; Patrick Douglas, 2d, emergency man, 1 day at \$2.50, \$2.50; John Doherty, 2d, emergency man, 1 day at \$2.50, \$2.50; Michael J. Carney, emergency man, 1 day at \$2.25, \$2.25; Michael Grady, emergency man, 1 day at \$2.25, \$2.25; Jeremiah Looney, emergency man, 1 day at \$2.25, \$2.25; John J. Broderick, emergency man, 1 day at \$2.25, \$2.25; Charles J. McKenna, emergency man, 1 day at \$2.25, \$2.25; Robert McLaughlin, emergency man, 1 day at \$2.25, \$2.25; Moses McCue, emergency man, 1 day at \$2.25, \$2.25; Michael F. White, emergency man, 1 day at \$2.25, \$2.25; Thomas A. Gorman, foreman, 1½ days at \$2.75, \$4.81; Daniel J. Buckley, watchman, 1 day at \$2.25, \$2.25; Patrick J. Gorman, watchman, 1 day at \$2.25, \$2.25; James McKenney, teamster, ½ day at \$2.25, \$1.69; John McNulty, laborer, 2½ days at \$2.25, \$4.92; Dennis Shea, laborer, 1½ days at \$2.25, \$2.81; Alexander Thompson, plumber, 1½ days at \$3, \$3.56; Timothy Donovan, laborer, ½ day at \$2.25, \$0.56; John J. Barry, repairer, 1½ days at \$2.50, \$2.34; Patrick Cassidy, watchman, 1 day at \$2.25, \$2.25; Michael H. Dwyer, watchman, 1 day at \$2.25, \$2.25; Patrick J. Feeney, inspector, 1 day at \$2.75, \$2.75; John Egan, teamster, ½ day at \$2.25, \$1.97; James Murphy, teamster, ½ day at \$2.25, \$1.69; John Riley, laborer, ½ day at \$2.25, \$0.28; Thomas Lyden, laborer, ½ day at \$2.25, \$0.28; John Cummings, repairer, 1 day at \$2.75, \$2.75; James F. Donovan, watchman, 1 day at \$2.25, \$2.25; Patrick H. McCarthy, watchman, 1 day at \$2.25, \$2.25; William Regan, watchman, 1 day at \$2.25, \$2.25; Edward M. Houghton, teamster, ½ day at \$2.25, \$1.69; John McCormick, 1st, teamster, ½ day at \$2.25, \$1.69; Edward P. Sullivan, teamster, ½ day at \$2.25, \$1.69; John Buckley, watchman, 1 day at \$2.25, \$2.25; James J. Hayes, watchman, 1 day at \$2.25, \$2.25; William P. Kilty, yardman, 1 day at \$2.25, \$2.25; Lawrence A. Hillary, repairer, 1 day at \$2.50, \$2.50; Daniel J. Donovan, watchman, 1 day at \$2.25, \$2.25; David McCarthy, gateman, 1 day at \$2.50, \$2.50; Dennis McCarthy, gateman, 1 day at \$2.50, \$2.50; James M. Synnott, gateman, 1 day at \$2.50, \$2.50; Humphrey Sullivan, watchman, 1 day at \$2.25, \$2.25; John Cahill, stableman, 1 day at \$2.25, \$2.25; James J. Connors, stableman, 1½ days at \$2.75, \$4.81; John C. McCarthy, stableman, 1 day at \$2.25, \$2.25; John F. McCauley, stableman, 1 day at \$2.25, \$2.25; Thomas Lavery, stableman, 1 day at \$2.25, \$2.25; James Donovan, stableman, 1 day at \$2.25, \$2.25; Michael O'Leary, stableman, 1 day at \$2.25, \$2.25; Peter Welch, stableman, 1 day at \$2.25, \$2.25; Thomas Bowen, teamster, ½ day at \$2.25, \$1.69; Peter M. Brown, teamster, 2½ days at \$2.25, \$5.77; Michael F. Burke, teamster, ½ day at \$2.50, \$1.88; Raffaele Curcio, teamster, ½ day at \$2.25, \$1.69; David Leo, teamster, ½ day at \$2.25, \$1.69;

Thomas Magee, teamster, ½ day at \$2.25, \$1.41; Jeremiah J. McLaughlin, teamster, ½ day at \$2.50, \$1.88; Mathew I. Nolan, teamster, ½ day at \$2.50, \$1.88; Timothy Noonan, teamster, ½ day at \$2.25, \$1.69; James J. O'Brien, teamster, ½ day at \$2.25, \$1.69; John J. O'Brien, teamster, ½ day at \$2.25, \$1.13; Edward A. Pyne, teamster, ½ day at \$2.25, \$1.69; Michael Ronan, teamster, ½ day at \$2.25, \$1.69; John C. Thompson, teamster, ½ day at \$2.25, \$1.69; Thomas Williams, teamster, ½ day at \$2.25, \$1.41; Robert A. Barry, watchman, 1 day at \$2.25, \$2.25; Patrick F. Mullen, inspector, 2½ days at \$2.75, \$6.10; Thomas J. McKenney, laborer, 2½ days at \$2.25, \$6.33; Isaac Saperstein, repairer, ½ day at \$2.50, \$0.31; Michael Mulloy, laborer, ½ day at \$2.25, \$0.28; William Lonergan, laborer, ½ day at \$2.25, \$0.28; Joseph T. Ryan, plumber, 2½ days at \$3, \$6.09; Patrick Lawless, plumber's helper, 1½ days at \$2.25, \$4.01; John J. Welch, plumber's helper, ½ day at \$2.25, \$0.56; Patrick Heffernan, repairer, ½ day at \$2.75, \$0.69; Michael McCarthy, 2d, laborer, ½ day at \$2.25, \$0.56; William A. O'Connor, inspector, ½ day at \$2.75, \$0.52; Michael C. Sullivan, plumber, ½ day at \$2.50, \$0.63; Jeremiah P. Scanlon, inspector, 1½ days at \$2.75, \$3.09; Martin Dunlap, plumber's helper, 3½ days at \$2.25, \$6.89; Patrick Coleman, laborer, 2½ days at \$2.25, \$5.06; John Furey, laborer, 1½ days at \$2.25, \$3.38; George Greer, repairer, ½ day at \$2.75, \$1.89; Michael Hines, stableman, ½ day at \$2.25, \$0.56; Martin Murray, laborer, 1 day at \$2.25, \$2.25; John Rogers, watchman, 1 day at \$2.25, \$2.25; Patrick Joyce, watchman, 1 day at \$2.25, \$2.25; John D. Porter, pipe layer, 1 day at \$2.50, \$2.50; Eugene T. Shea, watchman, 1 day at \$2.25, \$2.25.

Water Department (Income Division).

For the week ending Thursday, August 11, 1910:

M. Bowen, plumber, ½ day at \$3, \$0.38; P. J. Clougherty, laborer, 1½ days at \$2.25, \$3.66; J. Cullen, plumber, 1½ days at \$3, \$4.22; M. Dinneen, laborer, ½ day at \$2.25, \$1.41; Thomas Dolan, plumber, ½ day at \$3, \$1.88; C. Fitzgerald, laborer, ½ day at \$2.25, \$0.49; P. Gateley, plumber, ½ day at \$2.75, \$1.46; E. Gilmore, tester, ½ day at \$2.50, \$1.88; O. Gilloon, plumber, ½ day at \$3, \$1.41; M. Kenney, laborer, ½ day at \$2.25, \$1.20; B. Magee, carpenter, ½ day at \$3.50, \$2.08; E. Mahoney, laborer, 1½ days at \$2.25, \$2.60; J. J. Mahoney, laborer, 1½ days at \$2.25, \$3.16; T. McAuliffe, laborer, 1½ days at \$2.25, \$2.53; F. McCarthy, laborer, 1½ days at \$2.50, \$3.75; M. McGrath, laborer, 1½ days at \$2.25, \$2.53; M. Mulkern, laborer, 1½ days at \$2.25, \$3.23; J. H. O'Brien, laborer, ½ day at \$2.25, \$0.70; Joseph Rice, tester, 1½ days at \$2.50, \$3.13; J. Roche, laborer, ½ day at \$2.25, \$1.05; P. A. Russell, laborer, 1½ days at \$2.25, \$2.53; J. Shea, laborer, ½ day at \$2.25, \$1.41; D. Sullivan, laborer, ½ day at \$2.25, \$1.97; J. Sullivan, laborer, ½ day at \$2.25, \$1.97; T. J. Sullivan, plumber, ½ day at \$3, \$1.88; M. Welch, plumber, ½ day at \$2.75, \$2.41.

CONTRACTS AWARDED.

The following contracts for work, materials and supplies have been awarded with the approval of the Mayor. Those awarded without public advertisement are specially indicated. Week ending Sept. 3, 1910:

PARK DEPARTMENT.

On August 31 the Mayor approved a contract with the Commonwealth Construction and Supply Company for building wall and curb on Franklin Field. Bids on this work, opened August 11, were as follows:

Commonwealth Construction and Supply Company, \$1,757; Frank Williams & Brother, \$2,500; John A. Rooney, \$2,424; John F. Griffin & Co., \$2,350.

WITHOUT ADVERTISING.

On August 31 the Mayor, in view of the representations contained in the following statement, approved a contract, without advertising, with the Central Construction Company for paving Hancock street, from Columbia road to beyond Winter street, with brick block pavement on a concrete base, at an estimated cost of \$25,000.

"This request is occasioned by the inability of the department to perform its contract with the Central Construction Company to pave Geneva avenue with brick, between Bowdoin and Park streets. The Boston Elevated Company does not wish to disturb its tracks this year, consequently it would not be advisable to do any permanent work on the street. Hancock street is in a condition that needs the attention of both the department and the railway company, the latter expressing its desire to co-operate in the new construction. The prices to be paid the contractor are the same as those to be paid for the work on Geneva avenue, where the Central Construction Company was the lowest bidder. It is understood that the Central Construction Company releases the city from all claims on account of the Geneva avenue contract. I recommend that the authority requested be given.

"(Signed) L. K. Rourke,
"Superintendent of Streets."

ADDITIONS AND ALLOWANCES TO CONTRACTS.

The following additions to and allowances on contracts have been approved by the Mayor:

BATH DEPARTMENT.

Addition, amounting to \$517, to the contract with Mack & Moore for East Boston Gymnasium, on account of extending public bath rooms.

Addition, amounting to \$1,245.20, on above contract, on account of changing boilers. Original contract, \$64,650; total additions, \$5,215.80; total deductions, \$1,198; contract as standing, \$68,667.80.

PERMISSION TO CONSTRUCT.

The Mayor has granted to the Superintendent of Streets authority to do the following work with the department force, without advertising: Resurface Pleasant street, from Stoughton to East Cottage streets, at an estimated cost of \$1,500. Build sanitary sewers, surface drains and catch-basins in Wales street, between Talbot avenue and Harvard street, Dorchester, at an estimated cost of \$5,444. Build sanitary sewer of 12-inch pipe and surface drains of 18 and 24 inch pipe in Alley 807, between Bryant and Hemenway streets, Roxbury, at an estimated cost of \$9,720.

"This work can, in my opinion, be as advantageously done by day labor methods as any work now necessary.

"(Signed) L. K. Rourke,
"Superintendent of Streets."

SCHEDULE OF BAND CONCERTS ARRANGED BY MUSIC DEPARTMENT, SEASON 1910.

The following schedule of band concerts has been prepared by the Music Commission for the season of 1910:

Boston Common. Sunday afternoons at 3.30 p. m., July 17 to September 4, inclusive. Kanrich's Band, Albert M. Kanrich, leader.

Signs.—Albino Flibbert, 368 Tremont street; Benjamin Greenbaum, 42 Howard street; Albert Logan, 268A Tremont street; J. Warren Leamann, 2½ Appleton street; George W. Hunter, 1894 Centre street; Julius B. Aronson, 17 Fleet street.

Illuminated Signs.—Neil McLaughlin, 945 Washington street; Supreme Theatre, Inc., 292 Centre street; Louis Goldberg, 16 Minot street; Dowling & Sproules, 127 Havre street; Boston Arena Company, 238 St. Botolph street; Hodges' Garage Company, 107 West Brookline street; The Heatherstone Improvement Company, Inc., 40 Broad street; John Venuto, 691 Washington street; Samuel Lowenberg, 410 Washington street; George L. Finn, 551 Main street; H. F. Gregoire, 72 Bennington street; William Morris, Inc., 413 Washington street; W. Fred Mason, 415 Washington street.

Order to close Street.—Nightingale street, Ward 20, during repairs.

Pole Locations.—New England Telephone and Telegraph Company, to attach wires to three poles of the West End Street Railway Company on Washington street, Ward 23; to remove one pole on Beacon street, east from Deerfield street, Ward 11.

ENTRANCE EXAMINATIONS FOR PUBLIC SCHOOLS.

The Boston Public Schools will reopen on Wednesday, September 14, 1910. Entrance examinations will be held as follows:

Latin Schools.—On Wednesday, September 14, 1910, at 9 o'clock a. m. Boys will be examined at the Public Latin Schoolhouse on Warren avenue; girls at the Girls' Latin Schoolhouse on Huntington avenue, near Longwood avenue. Candidates are required to pass an examination equivalent to that required for admission to the seventh grade of the elementary schools. The subjects of examination will be English language, including reading, writing, and spelling; geography; and arithmetic.

High Schools.—On Wednesday and Thursday, September 14 and 15, 1910, at 9 o'clock a. m., at the Normal Schoolhouse on Huntington avenue, near Longwood avenue. The subjects of examination will be English language, including reading, writing, spelling, grammar, and composition; history and civil government of the United States; geography; and arithmetic.

PAYMENTS TO DISABLED EMPLOYEES.

STREET DEPARTMENT.

The following allowances granted by the superintendent have been approved by the Mayor:

John Stanton, Sewer Division, 30 days at \$2.25, \$67.50; Denis Glynn, Sewer Division, 30 days at \$2.25, \$67.50; Bernard McLaughlin, Sewer Division, 4 days at \$2.25, \$9; Frank J. Munster, Sanitary Division, 20 days at \$2.25, \$67.50; Thomas Murphy, Ferry Division, 27 days at \$17 per week, \$76.50.

PERMISSION TO SELL.

WATER DEPARTMENT.

The Mayor has granted to the Water Commissioner authority to sell a quantity of composition chips and metals for an amount not exceeding \$500.

LAND-TAKING FOR SCHOOL PURPOSES.

The Mayor has approved the action of the Board of Street Commissioners in estimating the amount that should be paid for damages occasioned by a taking made for schoolhouse purposes on Chestnut Hill avenue, Brighton, to be as follows: William Warren, 983 square feet, \$500.

The Mayor has approved similar action of the Board in estimating the amount of damages occasioned by a taking made for schoolhouse purposes on Parker street and Fisher avenue, Roxbury, as follows:

Eugene S. Foss, 39,052 square feet, \$19,526.

LOCATION OF PRIVATE WAY.

The Mayor has approved the location, direction, width and grade of the private way designated as St. Botolph place, as shown on a plan approved by the Board of Street Commissioners and filed at the office of the City Engineer.

PROCEEDINGS OF CITY COUNCIL.

Tuesday, August 30, 1910.

Special meeting of the City Council, held in the Council Chamber, City Hall, at twelve o'clock noon, President BALLANTYNE in the chair and a quorum present.

Jurors were drawn in accordance with the provisions of chapter 514 of the Acts of 1894 (the Mayor absent) as follows:

Four grand jurors for the United States District Court, to appear September 13, 1910, viz.:

Charles A. Hill, Ward 24; John H. Carroll, Ward 9; Albert Emerson, Ward 20; Moses Leibman, Ward 6.

Forty-two traverse jurors for the Supreme Judicial Court, to appear September 13, 1910, viz.:

John M. Merrill, Ward 8; Joseph H. Aberdee, Ward 19; Louis Levisseur, Ward 11; John T. Smith, Ward 1; Henry S. Warner, Ward 21; Alfred J. McLean, Ward 3; Joseph H. Patterson, Ward 24; Michael Lynch, Ward 14; Fred A. Norcross, Ward 25; Eliot Hubbard, Ward 11; Daniel Russell, Ward 16; Benjamin Feinberg, Jr., Ward 3; Daniel McLaughlin, Ward 5; James F. Nyhan, Ward 5; Justin A. Margot, Ward 21; Jacob W. Volk, Ward 19; Frank Kenney, Ward 20; Charles H. Cole, Ward 20; Elmer E. Carr, Ward 20; Owen F. Flaherty, Ward 17; John L. Burke, Ward 18; William A. Sullivan, Ward 15; John P. Hunter, Ward 24; Harry V. Crocker, Ward 16; Joseph Pink, Ward 11; Fred P. Kinney, Ward 24; William A. Shivaree, Ward 1; Daniel T. Doherty, Ward 8; John A. Ackley, Ward 21; Charles L. Cooney, Ward 20; Hartley Seaver, Ward 21; Walter H. Kelley, Ward 4; Seymour Coffin, Ward 1; Josiah W. T. Holbrook, Ward 24; John J. Martin, Ward 22; James J. Collins, Ward 2; George Cobb, Ward 14; Edward J. Tutty, Ward 16; Herbert W. Dyer, Ward 14; Thomas Salmon, Ward 23; George G. White, Ward 1; Edward Stanley, Ward 21.

Adjourned at 12.16 p. m.

HARTFORD'S NEW AUTO-CHEMICAL.

Hartford, Conn.—A new auto-chemical was recently delivered to the city of Hartford by the Pope-Hartford Company. It is known as a combination chemical and flying squadron outfit, and is designed for the quickest possible flight to the scene of a blaze. It is equipped with a four-cylinder 40 horse power motor, capable of giving any desired speed up to the limit of safety. The wagon carries two ladders, one 17-foot and one 10-foot extension; two 40-gallon chemical tanks, 300 feet of hose with reel, 10-inch searchlight on dash and several spare parts.—*Municipal Journal and Engineer.*

OPENING UP WASHINGTON.

An appropriation of \$3,600,000 was put in the sundry civil bill this year for the purchase of fifteen blocks of various sizes in the nation's capital lying between the Union Depot and the head of Pennsylvania avenue. This includes all the squares fronting on the Plaza.

SANITARY CONVENIENCES IN VIENNA

The following information concerning public convenience stations in Vienna is furnished by Vice Consul-General R. W. Heingartner:

The number of public sanitariums or convenience stations in Vienna is 77, of which 74 are above ground, containing 564 water-closets, of which 136 first class and 148 second class are for women, and 136 first class and 144 second class for men. Besides these 77 stations there are 128 urinal stations for men, built at a cost of \$121 each.

The privilege of erecting all conveniences was granted to a single firm in 1883, the contract running to January 1, 1940, and their building, management and maintenance are carried on by the firm, in return for which it can prohibit the erection of stations by others within 1,666 feet of any of its own stations. The firm charges 2 cents for the use of a first-class closet, with washstand, and 1½ cents for a second-class closet, without washstand. The city pays it a yearly subvention of \$16 for each urinal in these stations.

The cost of building an over-ground station averages \$3,200, and of an under-ground station \$16,000. The cost of management and maintenance of an over-ground station is about \$600 per annum, and of an underground station double that amount.—*Municipal Journal and Engineer.*

CITY OF BOSTON.

PROPOSALS FOR REMOVING MANURE.

The Superintendent of Streets of the City of Boston, office 47 City Hall, invites proposals for removing manure, from the yards and stables in the various divisions of the Street Department, when ordered to do so by the superintendent, and giving bond therefor of a surety company approved by the superintendent, to secure the due performance of the contract and the full protection of the city. Each bid should be inclosed in an envelope, sealed, marked "Bid for Removing Manure." The bidder must furnish his own bid, stating the price he will pay the city for removing the manure from October 1, 1910, until January 31, 1912, and leave same at the said office of the Superintendent of Streets before 12 m. on Monday, September 12, 1910, with a certified check for one hundred dollars (\$100), payable to and to become the property of the city if the bid after acceptance is not carried out. The bids will then and there be publicly opened and read. Bids must be made in duplicate, the duplicate without check to be deposited by the bidder with the City Auditor previous to the time named for opening the bids. The undersigned reserves the right to give preference to the proposals of bidders agreeing to pay the trade unions' rate of wages and the right to reject any or all proposals.

LOUIS K. ROURKE,
Superintendent of Streets.
Boston, September 1, 1910. (Sept. 3.)

CITY OF BOSTON.

PROPOSALS FOR PIPE SEWERS.

The Superintendent of Streets of the City of Boston, office 47 City Hall, invites proposals for pipe sewer and drains in Rockview street, between old sewer 220 feet north of Robinwood avenue and Robinwood avenue, West Roxbury, and giving bond therefor of a surety company approved by the superintendent in the sum of five hundred dollars (\$500), to secure the due performance of the contract and the full protection of the city. Forms of bids may be obtained at the said office of the Superintendent of Streets. Each bid should be inclosed in an envelope, sealed, marked "Bid for Sewer in Rockview Street," and left at the said office of the Superintendent of Streets before 12 m. on Monday, September 12, 1910, with a certified check for three hundred dollars (\$300), payable to and to become the property of the city if the bid after acceptance is not carried out. The bids will then and there be publicly opened and read. Bids must be made in duplicate, the duplicate without check to be deposited by the bidder with the City Auditor previous to the time named for opening the bids. The undersigned reserves the right to give preference to the proposals of bidders agreeing to pay the trade unions' rate of wages and the right to reject any or all proposals.

LOUIS K. ROURKE,
Superintendent of Streets.
Boston, September 1, 1910. (Sept. 3.)

NOTICE TO SUBSCRIBERS.

Subscribers will find the expiring date of their subscription stamped upon the mailing wrapper. As payment must be made in advance, remittance should be made on or before that date.

City of Boston—Street Department

NOTICE

The Board of Street Commissioners, in accordance with chapter 393 of the Acts of 1906, have passed orders for the laying out and construction of the following highways:

DORCHESTER.

Morton street, from Blue Hill avenue easterly for a distance of about 700 feet.
Wales street, between Harvard street and Talbot avenue.
Westcott street, between Talbot avenue and West Park street.
West Park street, between Bernard street and the New England railroad.

ROXBURY.

Leon street, between Ruggles and Greenleaf streets.
Rochdale street, northeasterly from Cobden street.

Notice is hereby given that the Street Department is about to do the work contemplated in said orders and that all work to be done in said highways by all persons or corporations having rights in the same to lay or repair either sewer, gas, water or other pipes must be done before MONDAY, September 19, 1910, as after that time no permits for openings will be granted until two years after said highways are completed.

LOUIS K. ROURKE,
Superintendent of Streets.
Boston, August 18, 1910. (Sept. 3-10.)

CITY OF BOSTON.

PROPOSALS FOR SEWERAGE WORKS.

The Superintendent of Streets of the City of Boston, office 47 City Hall, invites proposals for pipe sewers and drains in Maynard street, from Poplar street to Metropolitan avenue, Metropolitan avenue from Maynard street to Poplar street, and Eldridge street, from Metropolitan avenue to a point 300 feet southwesterly, West Roxbury, and giving bond therefor of a surety company approved by the superintendent in the sum of fifteen hundred dollars (\$1,500), to secure the due performance of the contract and the full protection of the city. Forms of bids may be obtained at the said office of the Superintendent of Streets. Each bid should be inclosed in an envelope, sealed, marked "Bid for Sewers in Maynard Street, Etc.," and left at the said office of the Superintendent of Streets before 12 m. on Monday, September 12, 1910, with a certified check for eight hundred dollars (\$800), payable to and to become the property of the City if the bid after acceptance is not carried out. The bids will then and there be publicly opened and read. Bids must be made in duplicate, the duplicate without check to be deposited by the bidder with the City Auditor previous to the time named for opening the bids. The undersigned reserves the right to give preference to the proposals of bidders agreeing to pay the trade unions' rate of wages and the right to reject any or all proposals.

LOUIS K. ROURKE,
Superintendent of Streets.
Boston, September 1, 1910. (Sept. 3.)

CITY OF BOSTON.

PROPOSALS FOR THE DISPOSAL OF REFUSE.

The Superintendent of Streets of the City of Boston, office 47 City Hall, invites proposals for the disposal of refuse for a term of 10 years from January 1, 1912, and giving bond therefor of a surety company approved by the superintendent. The proposals can be obtained at said office on and after September 1, 1910, and must be filled out, signed by the bidder and left at said office before 12 o'clock m. of Monday, October 17, 1910, with a certified check for five thousand dollars (\$5,000), payable to and to be the property of the city if the proposal after acceptance is not carried out, and will at said hour and place be publicly opened and read. Proposals must be made in duplicate, the duplicate, without check, to be deposited by the bidder with the City Auditor previous to the time named for opening the bids. The undersigned reserves the right to give preference to the proposals of bidders agreeing to pay the trade unions' rate of wages and the right to reject any or all proposals. The proposals should be inclosed in an envelope, sealed, and marked "Proposal for Disposal of Refuse."

L. K. ROURKE,
Superintendent of Streets.
Boston, Aug. 25, 1910. (Sept. 3-10-17.)

CITY OF BOSTON.

PROPOSALS FOR PIPE SEWER.

The Superintendent of Streets of the City of Boston, office 47 City Hall, invites proposals for pipe sewer and drains in Mozart place, between old manhole in Priesing street and Mozart street, Roxbury, and giving bond therefor of a surety company approved by the superintendent in the sum of two hundred dollars (\$200), to secure the due performance of the contract and the full protection of the city. Forms of bids may be obtained at the said office of the Superintendent of Streets. Each bid should be inclosed in an envelope, sealed, marked "Bid for Sewer in Mozart Place," and left at the said office of the Superintendent of Streets before 12 m. on Thursday, September 8, 1910, with a certified check for one hundred dollars (\$100), payable to and to become the property of the city if the bid after acceptance is not carried out. The bids will then and there be publicly opened and read. Bids must be made in duplicate, the duplicate without check to be deposited by the bidder with the City Auditor previous to the time named for opening the bids. The undersigned reserves the right to give preference to the proposals of bidders agreeing to pay the trade unions' rate of wages and the right to reject any or all proposals.

LOUIS K. ROURKE,
Superintendent of Streets.
Boston, September 1, 1910. (Sept. 3.)

CITY OF BOSTON.

EXAMINATION FOR ADMISSION TO HIGH AND LATIN SCHOOLS.

Boston Public Schools.—The Boston public schools will re-open on Wednesday, September 14, 1910. Entrance examinations will be held as follows:

Latin Schools.—On Wednesday, September 14, 1910, at 9 o'clock a. m. Boys will be examined at the Public Latin Schoolhouse on Warren avenue; girls at the Girls' Latin Schoolhouse on Huntington avenue, near Longwood avenue. Candidates are required to pass an examination equivalent to that required for admission to the seventh grade of the elementary schools. The subjects of examination will be English language, including reading, writing, spelling, geography and arithmetic.

High Schools.—On Wednesday and Thursday, September 14 and 15, 1910, at 9 o'clock a. m., at the Normal Schoolhouse on Huntington avenue, near Longwood avenue. The subjects of examination will be English language, including reading, writing, spelling, grammar and composition; history and civil government of the United States; geography and arithmetic.

THORNTON D. APOLLONIO,
Secretary of the School Committee.
(Sept. 3.)

CITY OF BOSTON.

TO GENERAL CONTRACTORS.

The Schoolhouse Commissioners of the City of Boston invite sealed proposals for building cooking room in the Warren School, Pearl street, Charlestown, Boston, Mass., and giving bond of a surety company therefor in the sum of \$1,000. Only proposals obtained at the office of the commissioners, 120 Boylston street, signed by the bidder and left before 12 o'clock m. of Monday, September 12, 1910, at said office, with a certified check for \$500, payable to the city if the proposal is not carried out, will then and there be publicly opened and read. The bid must be made in duplicate, the one with the check to be sent as above, the other to be sent to the City Auditor, City Hall. The commissioners reserve the right to reject any and all proposals and to give preference to bidders paying the trade unions' rate of wages.

CHARLES LOGUE,
JOHN F. KENNEDY,
CHARLES B. PERKINS,
Commissioners.
(Sept. 3.)

BOSTON TRANSIT COMMISSION.

NOTICE TO CONTRACTORS.

Sealed bids for furnishing and delivering about 88 tons of structural steel for part of Section 2 of the Cambridge connection will be received by the undersigned at 15 Beacon street, Boston, Mass., until 12 o'clock m. of Tuesday, September 6, 1910. Further information can be had at 15 Beacon street, 9th floor. The right to reject any and all bids, and to award the contract as is deemed to be for the best interest of the City of Boston is reserved.

By order of the Boston Transit Commission,
(Sept. 3.) B. LEIGHTON BEAL, Secretary.

DUST PREVENTION EXPERIMENTS.

The Office of Public Roads of the United States Department of Agriculture, of which Mr. Logan Waller Page is director, has recently published a report concerning the experiments in dust prevention and road preservation conducted by the office during 1909. These consisted in experiments with waste sulphite liquors in Washington; with slag, slag and lime, slag and waste sulphite liquor, and slag and tar at Youngstown, Ohio, and tar, oil, artificial asphalt preparations, brick, cement and slag at Ithaca, N. Y.

WASTE SULPHITE LIQUORS.

The waste sulphite liquors were used in five different forms. The first was a preparation furnished by the manufacturer in 60-gallon barrels, which was a dense, sticky liquid, miscible with water and having a specific gravity of from 1.267 to 1.270 at 25 degrees Centigrade. Its binding value depends upon the presence of so-called calcium-magnesium-ligno-sulphonate, which is produced in the manufacture of wood pulp according to the sulphite process. This material was applied to a macadam driveway in the Agricultural Department grounds, which had been built of trap rock, with a soft limestone binder, and is subjected to a moderate amount of light traffic. It was applied by means of an ordinary 300-gallon sprinkling cart, a mixture of equal parts of the preparation and of water being employed. The roadway was sprinkled three times with this mixture at the rate of 0.54 gallons per square yard, or 0.27 gallons of the preparation itself. The section treated was 615 feet long and 16 feet in width, or a total of 1,093 square yards. The mixture was fairly well absorbed by the road, but a small amount was lost by drainage to the gutters.

This road had previously become quite dusty in dry weather. This sulphite preparation was applied on March 17, and until the middle of May it laid the dust successfully and bound the road surface well. Rains seemed to wash out the material much less than might have been expected. About May 15 the road showed signs of becoming dusty, and was watered a number of times. On June 1 another treatment of the sulphite liquid preparation in a 20 per cent dilution was given for a width of 12 feet in the center of the road. This was applied at the rate of 0.366 gallon of solution, or 0.073 of the preparation per square yard. This second application laid the dust satisfactorily for a period of six weeks, after which the road slowly reverted to its original condition, although the excellent binding value of the material was apparent for some time later.

No charge was made for this material, but it is figured at a cost of 12 cents per gallon, delivered at the road. The labor for the first application consisted of two laborers bailing the liquor for three hours and one sprinkling cart for the same length of time. Figuring the labor at \$2 for eight hours and the cart at \$5, this gives a total cost of labor of \$3.38, or of \$0.0031 per square yard. The cost of the material was figured at \$0.0324 per square yard, making a total cost per square yard of 3.55 cents. In the second application two laborers bailed liquor for one-half hour and the sprinkling cart was employed for 1½ hours, making the total cost \$1.19, or the cost per square yard \$0.0011 for labor and \$0.0088 for material; or cost per square yard of a little less than 1 cent.

Two experiments were made with crude waste sulphite liquor on a road which received somewhat less travel than the one previously mentioned. The material was obtained from a pulp and paper company, only one barrel being available for use. This was applied to 90 square yards adjoining the section first described at the rate of one-half gallon per square yard, by means of common garden watering pots, and was broomed into the surface. The material was readily absorbed by the road, but did not appear to be as satisfactory a binder as the first preparation. Another section of 90 square yards was treated in the same way with a sulphite liquor obtained from another pulp and paper company and having a specific gravity of 1.049. This was more readily absorbed than the other liquor, but seemed to produce a less satisfactory surface condition. The cost of labor in applying these was about 0.8 cents per square yard. They proved little more effective than water, so far as laying the dust was concerned. It is possible, however, that if the crude liquor were applied daily as in ordinary water sprinkling, its use would prove economical in localities where it is produced in that the base would concentrate in the road and eventually become a valuable binder.

Two other stretches of road were treated with concentrated waste sulphite liquor having a specific gravity of 1.220. In one of these the liquor was diluted with an equal volume of water and the mixture applied to 114 square yards at the rate of 0.44 gallon per square yard. The appearance of the road after treatment was quite similar to that produced by the use of the preparation first described. Another section of 45 square yards was treated with this same concentrated liquor, used full strength, at the rate of one-half gallon per square yard. It was not readily absorbed by the road, but after being broomed it produced a well-bonded surface. For the first six weeks the two sections of road treated as last described were as satisfactory as that of the first experiment; but owing to lack of material it was impossible to make a second application.

SLAG COMBINATIONS.

During the summer the Office of Public Roads, in co-operation with the Carnegie Steel Company, experimented with a view to determining the best method of utilizing slag for road construction, the company having large amounts of slag which it could furnish for this purpose at little cost. This slag consists of the impurities and flux which separate from the iron in the reduction of ores, and that used was hauled in cars to the edge of a bluff and there dumped and allowed to run out in thin layers to cool. The slag, even that in the same bank, may vary greatly in composition, in hardness and in structure. Where it is deposited in large banks it is most easily excavated by means of a steam shovel, which starts at the bottom and plows up through the material, breaking up and at the same time mixing the different layers. One-third of the slag obtained in this manner at Youngstown was found to pass a ¾-inch screen, and of the coarser material about one-third was less than 1½ inches in greatest diameter, while only a very small per cent was over 3½ inches. In addition to this there is a slag formed in the operation of open-hearth furnaces and in different processes of manufacturing steel. The former possesses many desirable properties, such as extreme hardness, toughness and frequently excellent cementing properties.

In the experiments at Youngstown the

blast furnace slag was taken from a bank that had aged for two years, and the material of which came from six furnaces of the same type. A steam shovel was used to load the slag from the bank into large gondola cars, which dumped it into a chute through which it was carried to a screen which separated it into proper sizes. At first a ¾-inch screen was used, the finer screenings falling into one car, the coarser into another. The coarse material was usually very soft and crumbly and was discarded, the finer being used for the experiments. The screened slag eventually obtained was quite uniform in character, but was further screened into different sizes, taken by rail to about 1½ miles from where it was to be used, from which point it was hauled by wagon.

The road treated was located just outside the city limits of Youngstown. The soil was a gravelly clay, sticky when wet and dusty when dry. The road was level for about 100 feet, but elsewhere the contour was rolling, the maximum grade being 4.5 per cent. The road is used by farmers in hauling their produce to town, and sustains also a heavy auto and a little carriage traffic. The grading had already been done by the county, the total cost for the entire 2,754 feet of road, including retaining walls, being over \$2,000.

Seven experiments were made with the use of slag. In the first a regular macadam road was built of the material, the first course consisting of slag ranging from 3½ to 1½ inches, laid loose to a depth of 9 inches and rolled until firm. The second course was composed of ¾-inch to 1½-inch slag, laid 4 inches deep at the center and 2½ inches at the side. This was rolled until smooth, but did not become absolutely firm until the top course of screenings had been applied, these ranging from ¾-inch to dust. After spreading and slightly rolling the screenings water was applied in the usual way and the rolling continued. In a very short time the surface was compacted and the water began to run off, but as the road dried out the surface became crumbly and required additional rolling and sprinkling. Experience with this section points to the advisability of sprinkling the surface every day for about ten days in order to develop the full binding value of slag screenings. This section was 500 feet long and contained 777 square yards. The first course was applied at the rate of ½ cubic yard per square yard; the second at the rate of .09 cubic yard, and the screenings at the rate of .042 cubic yard per square yard. The cost per square yard was as follows: Slag on siding, 18.95 cents; hauling and laying, 20.15 cents; rolling and sprinkling, 7.42 cents; a total of 46.52 cents per square yard.

To determine whether the cost could be reduced without bad results, a section was laid composed of ¾-inch to 3½-inch slag, laid 12 inches deep at the center and 9 inches at the side. There was considerable lack of uniformity between different loads of the material. Since the course was thick it required more rolling than the first course of the first experiment. The road was finished with slag screenings as in the first experiment. When inspected last fall the surface was well bonded. This section was 300 feet long, containing 456 square yards. There were used in it .292 cubic yards of slag per square yard, and .042 of slag screenings. The cost per square yard was 16.6 cents for slag on the siding; 17.6 for hauling and laying, 9.14 for rolling and sprinkling; a total of 43.34 cents per square yard, or about 3½ cents less than experiment No. 1.

In experiment No. 3 slag varying from

3½ inches to dust was laid 9 inches deep and on this a second course of 3½ inches to ¾-inch material, 6 inches deep at the center and 4 inches at the side. Each course was well rolled, and the results appeared similar to those of experiment No. 2. This section was 325 feet long and contained 506 square yards. There was used in the first course .25 cubic yard of slag per square yard; in the second, .139 cubic yard and .042 cubic yard of screenings. The costs per square yard were 21.41 cents for slag on siding, 22.75 cents for hauling and laying, 7.80 cents for rolling and sprinkling; a total of 51.96 cents per square yard.

Experiment No. 4 employed the same construction as No. 3, except that fine open-hearth slag screenings, varying in size from ¼ inch to dust, were used in place of the blast furnace slag screenings. When puddled this material set very quickly and produced a firm surface. These screenings were crushed from the smaller pieces of slag produced by the "skull-cracker," and were then placed in a dry rolling mill, where they were ground to fine screenings, a large percentage becoming dust. It is found that this slag when finely powered frequently has high binding properties, owing to the presence of free lime and silicate minerals, which, when moistened, produce a true hydraulic set. The total cost was 50.21 cents per square yard.

In the fifth experiment the same methods and materials were employed as in the first, except that 5 per cent of powdered quicklime was mixed with the slag screenings. This was done to hasten and increase the bond of the surface. In mixing, the fine slag was measured out on a mixing board and the 5 per cent of lime spread on top. This was turned twice and placed directly on the road by wheelbarrows. Upon being sprinkled and rolled the surface bonded very quickly and became solid. It did not crumble, as did section No. 1, nor "calk up" under traffic. It was observed that better results were obtained from very fine screenings than from coarser material. The total cost was 48.18 cents per square yard.

In the sixth experiment the same method was employed as in the first, except that a concentrated waste sulphite liquor preparation of 1.273 specific gravity, similar to that described in the beginning of this article, was mixed with water and used to puddle the surface. The sprinkler, after having been filled with water, was conducted over sections Nos. 1 and 2 and enough water sprinkled on these sections to leave space in the tank for the desired amount of sulphite liquor. This liquor was then poured into the sprinkler and it and the water thoroughly mixed with a hoe. This mixture was then used in the sixth experiment. As the solution tended to run toward the gutter, care was taken that the centers received the heaviest treatment. At first one part of the liquor to seven parts of water was used, the thin solution penetrating several inches into the wearing surface. As the voids were gradually filled the mixture was strengthened to prevent the liquid from running off the road. The last mixture used was composed of equal parts of water and liquor, only one-half of a tankful being applied at a time. The treatment was repeated from day to day as the material was absorbed, the surface being rolled shortly after each sprinkling, as otherwise it became so sticky that it would pickup under the wheels of the roller. After one gallon of the sulphite liquor per square yard had been applied a very smooth

surface was obtained, which did not calk up under traffic. A few days later, however, it was found badly calked and blistered to a depth of ½ inch, but below that was solid. It was sprinkled with water and well rolled again, which put the road in good shape, but not as smooth as before. The total cost was 61.31 cents per square yard.

In the seventh experiment was likewise used the same method as in No. 1, the second course being 4 inches deep and consisting of a mixture of three parts of slag from 1½ to ¾ inch in diameter to one part of slag from ¾ inch to dust, mixed with 6 per cent of tar. The slag was heated in a large pan until dry and warm to the hand, one-half of the pan being used for heating each size of material. The coarse slag was first shoveled into a measuring box placed upon the mixing board, and the finer slag was placed on top. After the two had been turned twice the tar, which had been heated in a two-barrel pot, was poured over the slag and the whole was well mixed and immediately applied to the road. The mixture was rather dry, and after rolling it was found necessary to flush the surface with tar, for which purpose two large sprinkling cans were used, the holes in their nozzles having been enlarged. About one-fourth gallon of tar per square yard was applied in this way, making a total of about 1½ gallons. A thin coat of slag, ¾ inch to dust, was then spread over the surface and rolled in. The tar was obtained from a by-product coke oven, where it had been refined by distilling off about 17 per cent of the lighter oils and water. When inspected last fall this section was in excellent condition. This section was 300 feet long, with an area of 456 square yards. The first layer of slag contained .25 cubic yard per square yard, the second layer .99 cubic yard and the screenings .022. Of tar, 1.545 gallons were used per square yard. The cost per square yard was 17.97 cents for slag on the siding, 19.10 cents for hauling and laying, 13.49 cents for tar binder, 12.72 cents for applying binder, 4.17 cents for rolling and sprinkling, and 1 cent miscellaneous, giving a total cost of 68.45 cents per square yard.—*Municipal Journal and Engineer.*

BUILDING DOWN.

One of the most pronounced features of modern building, is the way in which they are going down into the ground as well as up into the air. Already many buildings with four stories below the street level have been erected in large cities of the country. The development of subways during recent years is doubtless responsible for this new departure.

The advantages of this sub-basement plan in construction have been demonstrated in Chicago. In that city the Illinois Tunnel Company operates a system of underground freight lines. This arrangement allows them to receive and deliver freight and supplies direct from the cars, thus avoiding street teaming. One of the direct results of a complete development of this plan may be the entire disappearance of teaming from streets within range of the tunnel. This fact of itself should be sufficient to recommend the idea. Viewed from the standpoint of the owner or tenant, the additional floor space thus placed at his disposal is of first importance. Land values in our large cities have risen rapidly during the past ten years and will continue to rise. This condition had in the past been met by adding to the height of the building, but the safety point in this direction seems to have been reached, and builders

of to-day have apparently to choose between falling down or building down.

As is well known, the foundations for a modern skyscraper must be sunk to a considerable depth, even in cases where the building is not intended for manufacturing or mercantile purposes. Where this immense additional weight had to be considered the problem has been solved by increasing the depth of the building foundation. Thus the first step was taken. It was only a question of time until owners would see that space which could be rendered valuable at a comparatively small expense was being absolutely wasted. It is safe to predict that in buildings of the near future every foot of floor space down to the concrete base will be made available.

The value of these sub-basement floors depends, of course, on their successful ventilation, but more than that on their being kept perfectly dry. In cases where they are below the water or sewer levels, and cannot be drained by gravity devices for pumping and drainage are most important. This work was accomplished by means of compressed air and steam, but electric-driven ejectors are now in general use.

The economy of this plan is evident, when one considers the opportunity it gives of placing the heavy building loads in a position to add strength to the superstructure.

NEW TYPE OF PAVEMENT.

The new type of pavement which Mr. J. Y. McClintock, county engineer of Monroe County, N. Y., is laying in the vicinity of Rochester should not be overlooked by engineers visiting that city. The experimental roads he has constructed and is now building deserve a good deal of attention on account of the extraordinary growth of kleinpflaster in Germany and Austria. It is now something like twenty years since the first country highway near Stade was paved with these small cubes of stone. That road is in excellent condition to-day, although it carries a fairly heavy travel for a country road in that part of Germany. Kleinpflaster is now used in suburbs, the residential parts of cities and on main country roads, apparently with remarkable success, although it apparently violates the principles of good paving construction which were taught not so many years ago. The blocks used in such pavements are small cubes, and in some cities where they have been employed to advantage the joints are by no means close. It must not be understood, however, that this experience disproves the correctness of the principles upon which the theory of street paving has been based, because the travel to which such streets is subjected is unknown. A pavement consisting of 3-inch cubes placed on a sand cushion and subjected to what is called heavy teaming in the United States is almost certain to be destroyed quite speedily. On the other hand, the travel which ordinarily goes over a country highway should be resisted by such a form of construction, and the roads in Monroe County which Mr. McClintock is paving with cubes of concrete and vitrified clay and slag will show some decidedly surprising results before long, if foreign experience affords a safe basis upon which to base such a forecast.—*Engineering Record.*

Trenton, N. J., has adopted an ordinance forbidding drivers of trucks from running with one wheel on the street car track and the other on the pavement, which soon wears a deep rut.

DELINQUENT TAX SALES.

CITY OF BOSTON.

CITY COLLECTOR'S NOTICE.

The owners and occupants of the following described parcels of real estate situated in the City of Boston, in the County of Suffolk and Commonwealth of Massachusetts, and the public are hereby notified that the taxes and assessments thereon severally assessed for the years 1900, 1902, 1903, 1904, 1905, 1906, 1907 and 1908, according to the lists committed to me as City Collector of taxes and assessments of said City of Boston, including the assessments for the suppression of gypsy and brown-tail moths, levied under the provisions of chapter 381, Acts of 1905, and chapter 268, Acts of 1906, remain unpaid, and that the smallest undivided part of each of said estates sufficient to satisfy said taxes and assessments with interest and all legal costs and charges, or the whole of each of said estates, if no person offers to take an undivided part thereof, will be offered for sale by public auction at the City Collector's office, room numbered eleven, in the basement of City Hall, in said City of Boston, on Wednesday, September 28, 1910, at 9.30 o'clock a. m., for the payment of said taxes and assessments, with interest, costs and charges thereon, unless the same shall be previously discharged.

The sums set against the following descriptions of the several estates show the amounts due thereon respectively for the taxes and assessments for the nonpayment of which each of said estates is to be sold, but not including the costs and interest thereon and costs and charges incident to this sale.

Daniel Carroll Heirs (Bk. 20, p. 82)—About 2,500 feet of land on the easterly side of Meyer street, adjoining an estate of Michael and Amelia Uhl (numbered 6), apportionment of sewer assessment for 1908. 14 00

Mary F. Connolly (Bk. 22, p. 38)—About 5,850 feet of land on the southeasterly side of Addington road, being lot 23, W. C. Bates plan, October 1, 1897, recorded Suffolk Deeds, at end of Book 2478, apportionment of sewer assessment for 1908. 7 56

(Bk. 22, p. 38) Also about 4,925 feet of land on the southeasterly side of Addington road, being lot 24, same plan, apportionment of sewer assessment for 1908. 7 56

(Bk. 22, p. 38) Also about 5,145 feet of land on the southeasterly side of Addington road, being lot 61, same plan, apportionment of sewer assessment for 1908. 7 56

(Bk. 22, p. 37) Also about 5,400 feet of land, on the northwesterly side of Addington road, being lot 62, same plan, apportionment of sewer assessment for 1908. 7 56

(Bk. 22, p. 36) Also about 5,450 feet of land on the northwesterly side of Addington road, being lot 64, same plan, apportionment of sewer assessment for 1908. 7 56

(Bk. 22, p. 38) Also about 4,593 feet of land on the southeasterly side of Addington road, being lot 65, same plan, apportionment of sewer assessment for 1908. 7 56

(Bk. 22, p. 37) Also about 4,907 feet of land on the southeasterly side of Addington road, being lot 93, same plan, apportionment of sewer assessment for 1908. 7 56

(Bk. 22, p. 36) Also about 5,700 feet of land on the northwesterly side of Addington road, being lot 94, same plan, apportionment of sewer assessment for 1908. 7 56

(Bk. 22, p. 36) Also about 5,035 feet of land on the northwesterly side of Addington road, being lot 100, same plan, apportionment of sewer assessment for 1908. 7 56

(Bk. 22, p. 37) Also about 4,593 feet of land on the southeasterly side of Addington road, being lot 101, same plan, apportionment of sewer assessment for 1908. 7 56

(Bk. 22, p. 36) Also about 5,035 feet of land on the northwesterly side of Addington road, being lot 126, same plan, apportionment of sewer assessment for 1908. 7 56

(Bk. 22, p. 37) Also about 1,600 feet of land on the northwesterly side of Addington road, being a lot shown on same plan, apportionment of sewer assessment for 1908. 7 56

(Bk. 11, p. 270) Also about 6,630 feet of land on the northerly side of Weld street, being lot 114, same plan, apportionment of sewer assessment for 1908. 7 00

Catherine Cronin—About 10,605 feet of land on the southwesterly side of Baker street, being lot 18, N. Smith plan, May 22, 1885, recorded Suffolk Deeds, Book 1686, page 338, tax for 1908. 3 30

Also about 18,546 feet of land on the southwesterly side of Baker street, being lots 20 and 22, same plan, tax for 1908. 4 95

Also about 9,788 feet of land on the northeasterly side of Glendale road, being lot 19, same plan, tax for 1908. 1 65

Also about 9,847 feet of land on the northeasterly side of Glendale road, being lot 21, same plan, tax for 1908. 1 65

Also about 10,642 feet of land on the northeasterly side of Glendale road, being lot 23, same plan, tax for 1908. 1 65

Richard Cronin Heirs or Devises and Catherine Cronin—About 8,775 feet of land on the southwesterly side of Rockland street, being lot 35, N. Smith plan, October, 1888, recorded Suffolk Deeds, Book 1846, page 403, tax for 1908.....	\$6 60		
Mary A. Cunningham—Building and about 5,843 feet of land, numbered 40 Wenham street, assessment for the suppression of gypsy and brown-tail moths for 1908.....	50		
Mary A. and Katherine E. Daly—Building and about 3,956 feet of land, numbered 204 South street, to be sold for tax for 1908.....	95 70		
(Bk. 18, p. 81) Then for apportionment of street construction assessment for 1908.....	7 00		
John J. Dorey (Bk. 17, p. 93)—About 6,875 feet of land, on the southwesterly side of Calder street, being lot 23, S. C. Ellis plan, October 8, 1887, recorded Suffolk Deeds, at end of Book 1795, apportionment of sewer assessment for 1908.....	2 80		
Francis H. Downes Heirs or Devises—Building and about 13,113 feet of land, numbered 58 Eliot street, tax for 1908, Louise Duplain (Bk. 20, p. 58)—About 2,360 feet of land, on the easterly side of and at end of Jamaica place, adjoining an estate of Michael Shanney (numbered 7), apportionment of sewer assessment for 1908.....	280 50		
Auguste Fansel—Building and about 5,500 feet of land, numbered 10 Ridge street, tax for 1908.....	59 40		
Owen F. Flanders—About 6,250 feet of land on the southeasterly side of Montclair avenue, making the southerly corner of Fletcher street, being lot 50, Garbett & Wood plan, May 1, 1888, recorded Suffolk Deeds, at end of Book 1819, assessment for the suppression of gypsy and brown-tail moths for 1908.....	8 40		
John T. Foster—About 6,600 feet of land on the northwesterly side of Augustus avenue, being lot 13, J. E. Jones plan, July 2, 1892, recorded Suffolk Deeds, Book 2148, page 257, tax for 1908.....	2 50		
Bernard J. Gray (Bk. 12, p. 147)—Building and about 4,119 feet of land, numbered 16 Knoll street, to be sold for apportionment of sewer assessment for 1908.....	4 95		
Then for assessment for the suppression of gypsy and brown-tail moths for 1908.....	12 24		
Louis L. Green (Bk. 22, p. 82)—Building and about 6,800 feet of land, numbered 32 Landseer street, apportionment of sewer assessment for 1908.....	1 17		
Mary A. Griswold (Bk. 7, p. 50)—Building and about 2,900 feet of land, numbered 47 Arundel street, apportionment of sewer assessment for 1908.....	22 18		
Margaretha Heid (Bk. 20, p. 104)—Buildings and about 16,941 feet of land, numbered 40 Seymour street, to be sold for apportionment of sewer assessment for 1908.....	16 58		
(Bk. 21, p. 21) Then for apportionment of street construction assessment for 1908.....	24 14		
Dawson Johnson—Building and about 2,769 feet of land, numbered 5 St. Mark street, to be sold for tax for 1908.....	24 15		
(Bk. 9, p. 252) Then for apportionment of sewer assessment for 1908.....	33 00		
Ida J. Johnson—Buildings and about 5,549 feet of land, numbered 7, 7 rear and 9 St. Mark street, to be sold for tax for 1908.....	7 58		
(Bk. 9, p. 253) Then for apportionment of sewer assessment for 1908.....	75 90		
Susan J. Johnston (Bk. 22, p. 88)—Building and about 3,793 feet of land, numbered 8 Neponset avenue, apportionment of sewer assessment for 1908.....	15 17		
(Bk. 23, p. 193) Also building and about 2,956 feet of land, numbered 410 Hyde Park avenue, apportionment of street construction assessment for 1908.....	11 55		
Leopold Kahler (Bk. 20, p. 92)—Building and about 6,050 feet of land, numbered 91 Orange street, apportionment of sewer assessment for 1908.....	9 79		
Annie M. Kelley (Bk. 22, p. 89)—About 35,943 feet of land on the northerly side of Neponset avenue, being a lot shown on C. H. W. Wood plan, May 15, 1895, recorded Suffolk Deeds, Book 2273, page 471, apportionment of sewer assessment for 1908.....	7 00		
James Kelley (Bk. 20, p. 68)—About 6,582 feet of land on the westerly side of Berry street, being lot 41, shown on Assessors' plans, Volume 10, page 189, on file with Suffolk Deeds, apportionment of sewer assessment for 1908.....	44 28		
Emilie B. Kramer (Bk. 7, p. 66)—Building and about 5,051 feet of land, numbered 97 Florence street, apportionment of sewer assessment for 1908.....	7 00		
(Bk. 7, p. 80) Also building and about 5,490 feet of land, numbered 148 Sycamore street, apportionment of sewer assessment for 1908.....	8 93		
(Bk. 7, p. 79) Also about 14,758 feet of land on the northwesterly side of Sycamore street, adjoining another estate of said Kramer (numbered 148), apportionment of sewer assessment for 1908.....	\$4 83		
Mary J. Lawson (Bk. 23, p. 159)—Building and about 5,000 feet of land, numbered 103 Belgrade avenue, apportionment of street construction assessment for 1908.....	40 12		
Isador Levy (Bk. 20, p. 92)—Building and about 7,560 feet of land, numbered 131 Orange street, apportionment of sewer assessment for 1908.....	17 44		
Massachusetts Title Insurance Company (Bk. 15, p. 122)—Buildings and about 17,162 feet of land, numbered 45 and 47 Farrington street, to be sold for apportionment of sewer assessment for 1908.....	7 00		
(Bk. 15, p. 122) Then for apportionment of sewer assessment for 1908.....	9 88		
John J. McGuinness (Bk. 22, p. 48)—About 6,250 feet of land on the northerly side of Belgrade avenue, being lot 218, Garbett & Wood plan, May 11, 1892, recorded Suffolk Deeds, Book 2075, page 241, to be sold for apportionment of sewer assessment for 1908.....	14 31		
(Bk. 23, p. 162) Then for apportionment of street construction assessment for 1908.....	3 51		
(Bk. 22, p. 48) Also about 6,250 feet of land on the northerly side of Belgrade avenue, being lot 219, same plan, to be sold for apportionment of sewer assessment for 1908.....	17 44		
(Bk. 23, p. 163) Then for apportionment of street construction assessment for 1908.....	3 51		
Jennie McLean (Bk. 15, p. 109)—Building and about 5,000 feet of land, numbered 103 Amherst street, to be sold for apportionment of sewer assessment for 1908.....	17 44		
Florence B. Morrison—Building and about 29,200 feet of land, numbered 973 South street, assessment for the suppression of gypsy and brown-tail moths for 1908.....	10 50		
Ella E. Morse (Bk. 15, p. 139)—About 4,671 feet of land on the northwesterly side of Vermont street, making the westerly corner of La Grange street, being lot 33, Nathaniel Smith plan, January 1, 1893, recorded Suffolk Deeds, at end of Book 2112, apportionment of sewer assessment for 1908.....	57		
(Bk. 15, p. 139) Also about 4,731 feet of land on the northwesterly side of Vermont street, being lot 34, same plan, apportionment of sewer assessment for 1908.....	7 00		
Leah Payson (Bk. 11, p. 271)—About 5,250 feet of land on the southwesterly side of Weld street, being lot 10, J. E. Jones plan, April 2, 1888, recorded Suffolk Deeds, Book 1844, page 527, balance of apportionment of sewer assessment for 1908.....	7 00		
George H. Richards (Bk. 7, p. 73)—Buildings and about 43,700 feet of land, numbered 155 Bellevue street, apportionment of sewer assessment for 1907.....	3 06		
Sadie T. Riley (Bk. 11, p. 231)—Building and about 6,250 feet of land, numbered 116 Perham street, apportionment of sewer assessment for 1908.....	36 81		
Thomas W. Ryan—Building and about 12,619 feet of land, numbered 25 Custer street, tax for 1908.....	8 06		
Michael J. Shields—About 3,975 feet of land on the northwesterly side of Garfield street, being lot C, J. E. Jones plan, August 28, 1896, on file in the Assessors' office, tax for 1908.....	79 20		
Albert C. Smith (Bk. 11, p. 165)—About 2,500 feet of land on the northeasterly side of Angell street, being lot 2, A. E. Haskell plan, August, 1895, recorded Suffolk Deeds, Book 2316, page 203, to be sold for apportionment of sewer assessment for 1908.....	13 20		
(Bk. Div. 2, p. 102) Then for apportionment of street construction assessment for 1908.....	5 37		
Georgianna Smith (Bk. 20, p. 109)—Buildings and about 37,038 feet of land, numbered 116 Spring street, apportionment of sewer assessment for 1908.....	10 00		
Mary E. Stanton—Buildings and about 22,902 feet of land, numbered 133, 135 and 153 Hyde Park avenue, to be sold for tax for 1908.....	14 00		
(Bk. 22, p. 74) Then for apportionment of sewer assessment for 1908.....	306 90		
(Bk. 23, p. 205) Then for apportionment of street construction assessment for 1908.....	20 78		
(Bk. 23, p. 205) Then for apportionment of street construction assessment for 1908.....	13 50		
(Bk. 23, p. 205) Then for apportionment of street construction assessment for 1908.....	12 95		
(Bk. 23, p. 205) Then for apportionment of street construction assessment for 1908.....			
(Bk. 23, p. 204) Then for apportionment of street construction assessment for 1908.....			
(Bk. 23, p. 205) Then for apportionment of street construction assessment for 1908.....			
(Bk. 23, p. 206) Then for apportionment of street construction assessment for 1908.....			
Daniel P. Sullivan and James W. Loughlin—About 10,614 feet of land on the westerly side of Bradford terrace, being lot 129, C. H. W. Wood plan, June 1, 1896, recorded Suffolk Deeds, Book 2389, page 89, assessment for the suppression of gypsy and brown-tail moths for 1908.....	\$13 17		
William H. Thomas, surviving Trustee will John Thomas (Bk. 13, p. 127)—About 2,118 feet of land on the southwesterly side of Cornell street, making the southerly corner of Westbourne street, being the southeasterly part of lot 73, shown on Assessors' plans, Volume 10, page 190, on file with Suffolk Deeds, to be sold for apportionment of sewer assessment for 1908.....	17 65		
(Bk. 14B, p. 477) Then for apportionment of street construction assessment for 1908.....	11 95		
(Bk. 14B, p. 477) Also about 5,812 feet of land on the southwesterly side of Cornell street, being lot 74, same plan, apportionment of street construction assessment for 1908.....	15 64		
(Bk. 17, p. 105) Also about 8,215 feet of land on the southwesterly side of Cornell street, being lot 77, same plan, apportionment of sewer assessment for 1908.....	50		
(Bk. 17, p. 104) Also about 7,094 feet of land on the southwesterly side of Cornell street, being lot 78, same plan, apportionment of sewer assessment for 1908.....	13 10		
(Bk. 17, p. 104) Also about 7,913 feet of land on the southwesterly side of Cornell street, being lot 79, same plan, apportionment of sewer assessment for 1908.....	10 03		
George Thompson Heirs (Bk. 17, p. 104)—Building and about 4,800 feet of land, numbered 343 Cornell street, apportionment of sewer assessment for 1908.....	5 74		
Louis Weisner (Bk. 11, p. 166)—About 6,237 feet of land on the northeasterly side of Montello street, making the easterly corner of Belgrade avenue, being lot 68, Garbett & Wood plan, April 1, 1889, recorded Suffolk Deeds, at end of Book 1876, to be sold for apportionment of sewer assessment for 1908.....	15 68		
(Bk. 23, p. 172) Then for apportionment of street construction assessment for 1908.....	12 77		
(Bk. 20, p. 87) Also about 6,050 feet of land on the northeasterly side of Montello street, being lot 69, same plan, apportionment of sewer assessment for 1908.....	13 44		
(Bk. 11, p. 166) Also about 6,237 feet of land on the southeasterly side of Belgrade avenue, making the southerly corner of Malcolm street, being lot 99, same plan, apportionment of sewer assessment for 1908.....	13 44		
Willard Welsh—About 5,200 feet of land on the northwesterly side of Belle avenue, being lot 28, shown on Assessors' plans, Volume 10, page 97, on file with Suffolk Deeds, tax for 1908.....	10 28		
Thomas J. Allen Heirs or Devises—Building and about 7,118 feet of land, numbered 6 Elm street, assessment for the suppression of gypsy and brown-tail moths for 1908.....	8 70		
Also building and about 10,000 feet of land, numbered 9 Ashland street, assessment for the suppression of gypsy and brown-tail moths for 1908.....	10 50		
Charles A. Anderson—Building and about 4,000 feet of land, numbered 39 Bertram street, assessment for the suppression of gypsy and brown-tail moths for 1908.....	10 28

Ida J. Johnson—Building and about 3,155 feet of land, numbered 22 Coolidge road, tax for 1908.....	70 95	
Margaret B. Keefe—About 3,780 feet of land on the northerly side of Gerish street, being lot 50, shown on Assessors' plans, Volume 11, page 92, on file with Suffolk Deeds, tax for 1908.....	3 30	
Also about 5,737 feet of land on the northerly side of Gerish street, being lot 49, same plan, to be sold for tax for 1908.....	4 95	
(Bk. 7, p. 151) Then for apportionment of sewer assessment for 1908.....	11 28	
Also about 3,412 feet of land on the southerly side of Newton street, being a lot shown on Assessors' plans, Volume 11, page 92, on file with Suffolk Deeds, to be sold for tax for 1908.....	4 95	
(Bk. 7, p. 150) Then for apportionment of sewer assessment for 1908.....	19 55	
Annie M. Kelley—About 737 feet of land on the southeasterly side of Collidge road, being the westerly part of lot 43, E. W. Bowditch plan, dated November, 1890, recorded Suffolk Deeds, Book 1999, page 593, tax for 1908.....	3 30	
Melvin M. Lee (Bk. 17, p. 192)—Buildings and about 4,400 feet of land, numbered 245 and 247 Cambridge street, apportionment of sewer assessment for 1908.....	17 33	
Daniel M. O'Connell Heirs or Devises—Buildings and about 9,240 feet of land, numbered 9 and 9 rear Winship street, to be sold for tax for 1907.....	85 86	
Then for tax for 1908.....	82 50	
Then for assessment for the suppression of gypsy and brown-tail moths for 1907.....	87	
Also building and about 3,139 feet of land, numbered 13 Winship street, tax for 1908.....	23 10	
Also buildings and about 25,804 feet of land, numbered 15, 19, 21 and 23 Winship street, tax for 1908.....	145 20	
Charles W. Parker, William W. Kelchner and Arthur W. Stevens, Trustees, Westminster Company—About 7,970 feet of land on the southwest side of Wallingford road, being a lot not numbered, shown on Aspinwall & Lincoln plan, dated December 7, 1903, recorded Suffolk Deeds, Book 2941, page 130, tax for 1908.....	39 60	
George A. Richards (Bk. 14B, p. 632)—Buildings and about 37,725 feet of land, numbered 73 and 75 Tremont street, apportionment of street construction for 1908.....	43 03	
Roderick Richardson Heirs or Devises—About 3,457 feet of land on the northerly side of Richardson street, being lot 6, T. Howard Barnes plan, dated July 2, 1901, recorded Suffolk Deeds, Book 2792, page 433, assessment for the suppression of gypsy and brown-tail moths for 1907.....	3 00	
Also about 3,150 feet of land on the northerly side of Richardson street, being lot 5, same plan, for the suppression of gypsy and brown-tail moths for 1907.....	\$2 50	
Also about 3,720 feet of land on the northerly side of Richardson street, being lot 4, same plan, for the suppression of gypsy and brown-tail moths for 1907.....	4 00	
M. Thomas Roddy Heirs—Buildings and about 19,299 feet of land, numbered 58, 60, 60 rear, 62, 64, 66, 68, 68 rear and 68 first, 68 second, 68 third, 68 fourth, 68 fifth and 68 sixth doors, Market street, assessment for the suppression of gypsy and brown-tail moths for 1907.....	2 09	
Albert C. Smith (Bk. 7, p. 157)—About 3,383 feet of land on the southerly side of Newton street, adjoining an estate of Lizzie A. Vose (numbered 43), apportionment of sewer assessment for 1908.....	17 90	
John J. Tatten—Building and about 6,331 feet of land, numbered 8 School street, assessment for the suppression of gypsy and brown-tail moths for 1907.....	50	
Annie H. Waters—Buildings and about 27,000 feet of land, numbered 25 Oakland street, tax for 1908.....	99 00	
Willard Welsh—About 20,000 feet of land on the westerly side of Brooks street, being lot 137, shown on Assessors' plans, Volume 11, page 79, on file with Suffolk Deeds, to be sold for tax for 1908.....	29 70	
(Bk. 7, p. 142) Then for apportionment of sewer assessment for 1908.....	22 59	
Also about 20,000 feet of land on the westerly side of Brooks street, being lot 139, same plan, to be sold for tax for 1908.....	29 70	
(Bk. 7, p. 142) Then for apportionment of sewer assessment for 1908.....	22 59	
(Bk. 16, p. 43) Also building and about 3,200 feet of land, numbered 15 and 17 Brackett street, apportionment of street construction assessment for 1908.....	12 07	
Joseph J. Wilde—Building and about 2,487 feet of land, numbered 16 and 18 Spring street, tax for 1908.....	54 45	
Also about 689 feet of land on the northerly side of Spring street, being the easterly part lot 17, D. W. Hyde plan, dated December 3, 1892, recorded Suffolk Deeds, Book 2169, page 447, tax for 1908.....	1 65	
Also building and about 2,278 feet of land, numbered 24 Spring street, tax for 1908.....	19 80	
Hyman Uroff (Bk. 7, p. 140)—About 18,390 feet of land on the northwesterly side of Bigelow street, being lot 47, Whitman & Breck plan, dated October, 1887, recorded Suffolk Deeds, at end of Book 1815, apportionment of sewer assessment for 1908.....	16 30	

BOWDOIN S. PARKER,
Collector of Taxes for the City of Boston.

ELECTRICITY FOR SMOKE PREVENTION.

A new scheme for consuming smoke, doing away with a carbon-laden atmosphere, has attracted the attention of Omaha councilmen and an agitation has been begun to do something for Omaha's smoke troubles. A clipping from a San Francisco paper, reporting a speech delivered before the American Chemical Association by F. G. Cottrell on smoke consumers, was sent to G. F. Brucker, Acting Mayor, and he became interested enough to bring the matter before some of his colleagues, and will ask City Electrician Michaelson to investigate the practicability of the scheme. Cottrell's device is to run a direct current through the smoke. The electricity causes the smoke to precipitate itself in carbon deposits on the sides of the chimney and does not pass out into the atmosphere at all. Several schemes of similar nature have been tried in cities before, and have been only indifferently successful, but the chemists who advocate this latest method say that all smoke troubles can be done away with, without difficulty. It is expensive, however, and that will probably be the greatest argument against it with manufacturers.—*Municipal Journal and Engineer.*

THE CITY PLAN EXHIBIT IN BERLIN.

There has just closed in Berlin the most interesting exhibition in city planning that has ever been held. We have had several good exhibitions of city planning in America, but none that for seriousness or extent can compare with this one. The exhibition held in the Twenty-second Regiment Armory in New York a year ago was excellent so far as it went and the Boston-1915 exhibit last December was quite worth while, but neither brought together the variety or number of plans, charts and models that were to be found here in Berlin. The two American exhibits were designed primarily to arouse interest in the subject; this one in Berlin to allow a person a chance to study it. All admissions were paid and yet something like 70,000 people attended. Many German towns sent official delegations to it, also many societies, and the trades unions bought about 15,000 tickets for their members. All classes of people were reached by it and a knowledge of town planning was quite generally disseminated.

The exhibit was planned and organized by one of the head workers of the Boston-1915 exhibit, Werner Hegemann, who was called back from Boston during the progress of the latter exhibition to organize this one in Berlin. The special occasion was to give a chance to see the competition plans for Greater Berlin. This had been the largest city competition ever held, and as something like \$40,000 had been spent on prizes the people were interested to see for what it had gone. Large as this part of the exhibition was, it was almost lost in the general mass, for they had brought together here a most unexpectedly large amount of good city planning material. The wall space covered was much larger than in either American exhibit. The trip about the place with a group of people under a competent guide took about two hours for even the most superficial view.

The exhibition consisted of plans, charts, photographs and models—in particular, a great many models, for these proved here, as they have everywhere else, the most attractive feature of the exhibition. The various subjects considered after the plans for Greater Berlin were the problems of transportation and traffic; those of the distribution of city dwellers through garden cities; the opening up of cities by better traffic or street planning and by the creation of squares, parks and playgrounds; the remodeling of the older part of old cities so as to preserve their original character and yet make them a more practical place to live in; the designing of the features in the streets and open places, such as fountains, statues or lamp-posts, sign-posts or guide-posts, and so forth; and lastly the designing of cemeteries and attendant crematoria.

There was in this exhibition none of the yellow headline placarding to catch the eye of the passerby, no special graphic "before" and "after" exhibits. Everything was there for study and demanded serious attention from the visitor. An understanding of the exhibition was made materially easier by competent guides who conducted parties from twenty-five to 100 people, pointing out and explaining the interesting features. On some days as many as fifteen or twenty parties were going the rounds at the same time.

Among the charts, several of particular interest were made by the statistical bureaus in different cities of Germany and Austria. One series dealt with the relation of rent to income, and here it was very interesting to note that in Schoenberg, a typical manufacturing suburb of

Berlin, one-quarter of the people with incomes of 1,200 to 1,500 marks a year, spend nearly one-half of their income for rent. Also that above or below this income people spend a decreasing proportion for rent. In another chart comparing the proportion of rent to income through different periods of time, it was to be noted that during the last ten years people with an income below 1,000 to 1,500 marks a year have been spending an increasing proportion for rent, while above 1,000 to 1,500 marks a year people had been devoting a decreasing proportion for rent. In another very interesting chart which showed the number of people and the kinds of families living in apartments of different sizes, we found that in Berlin with a population of three and one-half million there are 190,000 people living in two rooms of which 40,000 are living four people in two rooms, and 50,000 three people in two rooms.

In another chart we saw the comparative growth of the cities of different sizes throughout the German Empire. It was quite unexpected to find that the larger cities had increased so uniformly at the expense of the smaller—in fact in towns below 5,000 to 10,000 inhabitants the actual number of residents had decreased while the total population of the empire had greatly increased, and it was further true that the larger the city the greater the increase of the population. All of this shows in Germany, as elsewhere the tendency of people to accumulate in large cities at the expense of the country. It is said that 80 per cent of the total population of England lives in large cities. The effect of this is to make the problem of planning cities more and more difficult, and so vital has the question become that many of the larger cities of Europe are awakening to the fact that if they do not begin to take thought immediately as to how cities shall extend out into the surrounding country they will have to face conditions more dreadful than now exist.

As brought out everywhere in this exhibition, the one most necessary thing is to get people away from the crowded portions of the city. In order to do this it is necessary to have well laid out suburbs with the best possible means of transit to the center of the city. These features of traffic and transit were an important part of the exhibition, many cities showing their latest developments. The consensus of opinion seemed to be in favor of underground railways in the most built-up parts of cities. These would be supplemented by radiating electric surface lines from their termini.

Once the people could be brought to the outlying districts the great question was how to house them, and in this connection a great feature was made of garden cities. The garden city has had its commencement and reached its highest development in England but the idea of it so appeals to the other nations of Europe that, one and all, they are trying experiments on similar lines. In Germany the most interesting cities of this sort are Hellerau, near Dresden; Essen, which is already well known; and Parlach, near Munich. In Switzerland a new garden city is being created near Berne and there is one in France at Dourges. All are modeled on English prototypes, but in their details of streets and buildings they follow local traditions. Hellerau is co-operative.

Many other suburbs similar to garden cities have grown up around industrial plants. In every case these are the result of private enterprise and constructed by private capital, but many cities are, as municipalities, directly

interested in the development of their suburbs and many own land on their outlying districts or in their immediate surroundings. This land is leased by the city or sold under restrictions for the erection of dwelling houses for the working classes. Stockholm, Sweden, owns nearly 60 per cent of the outlying land within its borders, and just outside of its borders it owns a great deal more, with the result that it very effectually prevents speculation in land. This means that land for workmen's dwellings can be secured at a price which makes possible the erection of buildings, with good accommodation that can be let within the amount that the workman can afford to spend. In Germany, Ulm is the leader in this work and not only here does the city own a great deal of land in its surroundings but it has built a great many dwelling houses of the cottage type which it rents to working people at most reasonable rates. As far as Ulm is concerned the result seems to be most satisfactory.

Aside from the plans of Greater Berlin, the one thing in the exhibition which most attracted the attention of the Germans was the exhibit made of American playgrounds. The lack of open spaces where children may play has become a very serious matter in the larger German cities. In proportion to the difficulty of the problem, Chicago and Boston have done more than any other cities in the world in providing playgrounds for their boys and girls. There was a large exhibit of these with many photographs here and it had the effect of arousing considerable interest on the part of influential people in the German municipalities. At the closing meeting of the exhibition the leading speaker made the main point of his address the desirability and the necessity of removing all the hospitals and barracks from the crowded portions of the cities and changing these spaces into playgrounds. Already Berlin, Cologne and Düsseldorf have started laying out playgrounds along American lines. Heretofore the idea of organized play has not been operative on the continent, but they are awakening to a realization of its advantages, where the spontaneous play of the country is impossible.

There are a thousand and one other interesting things in the exhibition but in order to appreciate them one must see them. The exhibition itself will be transferred in large part first to Düsseldorf, in August, then to London, then to Antwerp, then to Frankfurt, and probably after that to other cities. The greater Berlin plans are on permanent exhibition in the Berlin City Hall. A book will be published some time in the fall covering all the interesting features of the exhibition and containing some 500 illustrations. This can be secured for ten marks, plus postage, by applying to Dr. Werner Hegemann, 9 Marchstrasse, Charlottenburg, Germany. Further, the magazine called the *Stadtebau*, published by Ernst Wasmuth, Berlin, will have, probably for July, a special number with seventy illustrations of the exhibition. This will sell for six marks, plus postage.

This exhibition has set us a splendid pace. It remains for America to do something which will surpass it. That the plans are already laid for such an exhibition in America is clearly evidenced when we consider the arrangements made for the great civic-social exhibit to be held in Boston in 1915.—George B. Ford in *The Survey*.

SEWAGE DISPOSAL IN THE VICINITY OF LONDON, ENGLAND.

After inspecting about a dozen sewage disposal plants in the vicinity of London, all of which have been recently constructed or remodeled, the writer has been much impressed with several phases of the sewage disposal problem, all pertinent to American conditions. There are, to be sure, in England, two modifying factors, viz., the strength of the English sewage, and the requirements of the Thames and Lea Conservancy Boards, under whose jurisdiction most of those plants which were visited lie. From 20 to 30 gallons of sewage per head per day seems to be an average volume, and this must result in a sewage of two or three times the concentration of American sewage. The appearance of the raw sewage tends to confirm this, since it is of a darker color, more opaque, and apparently thicker in England. The standards of the Conservancy Boards are chemical, condemning, for example, a sewage containing more than a definite amount of albuminoid ammonia. The putrescibility test with methylene blue is not used, although the incubation test is practised as a part of the regular laboratory routine. It is possible, therefore, that putrefaction, in order to conform to the chemical standards, is carried further than would be necessary to avoid a nuisance only.

With these two factors in mind, then, the writer has noticed, first of all, a remarkable loss of interest in the septic tank as a method of reducing the amount of sludge.

Septic Tanks.—It has been pointed out in a number of papers read before engineering bodies that the early claims of Cameron in the matter of the elimination of sludge were not warranted, and that if 50 per cent of the solids in suspension in sewage were deposited in a tank not more than about half of this would disappear, the other half remaining and requiring attention at intervals. The detrimental effect of allowing the liquid sewage to reach a septic condition has not been so pointedly noted, although the Massachusetts State Board of Health and Doctor Dunbar have both called attention to it. This is perhaps the result of the earlier English writings, which laid stress on the division of labor between anaerobes and aerobes, assigning to the former the septic tank as a habitat, and to the latter the filter bed. This sequence in practice seems to be unnecessary, and the managers interviewed, one after another, almost without exception have been emphatic in their opinion that better results in sewage treatment can be obtained if septic action is not allowed. In one or two cases, where the old order still obtained, the foul appearing and foul smelling liquids entering and leaving the filters, after standing in tanks till bubbles were rising as in a boiling teakettle, were in striking contrast to the influents and effluents at the more recent plants, where only a short stay in the tanks was provided for.

At the same time, there is a growing feeling that great emphasis should be laid upon the imperative necessity of removing as much of the suspended solids from the raw sewage as possible before subjecting it to treatment. The plant at Hanwell, which, however, the writer did not visit, finds it expedient to use preliminary chemical in order to reduce the suspended solids of the tank effluent to a minimum. Another plant at Croydon interposes fine screens $\frac{1}{8}$ -inch mesh

between the sedimentation tank and the filters. The principle seems to be generally agreed upon that the tank should be large enough to produce all possible sedimentation without allowing septic action to proceed.

This principle develops logically the use of a modified Dortmund tank instead of the usual rectangular tank; that is, the use of a tank with an inverted conical or pyramidal bottom in which sludge may accumulate and be drawn off from time to time without emptying the tank. Such tanks do not have any submerged diaphragm, although at Hampton the tanks do contain special submerged diaphragms, separating the clearer and lighter liquid from the heavier sludge. At Woodford, the tanks, of ordinary form, are drained and cleaned out every three weeks, which, the manager says, maintains the supernatant liquid in a non-septic condition and yet provides as perfect a sedimentation as the size of the tank will allow. This testimony of an experienced manager is particularly interesting in view of the Cameron patent claims in the United States, and of the legal opinion that if the tanks are cleaned as often as once in six weeks they are not legally septic tanks, according to the evidence in the Saratoga case. With such experience there seems to be no longer any sound basis for claims of patent infringement, and all managers of tanks will clean them frequently, not to avoid the patent, but to secure a more successful after treatment.

At Chigwell, the tanks were circular, holding about one day's flow, and the sludge was drawn off regularly without ever emptying the tanks. At Enfield, where the tanks were covered with a thick scum, the filters were ponded on the surface, the liquid came off black and foul, and while apparently the beds were overworked, the condition of the tank effluent seemed to be somewhat responsible for the inefficient results of the filters. At Uxbridge, on the contrary, where the tank effluent was noticeably septic, the effluent from the coarse contact bed became clear, although bubbles of gas were still occasionally present. At Croydon the tanks hold about three hours' flow, and although there is a heavy scum on the surface of the tanks, the liquid itself passes too rapidly through the tanks to be itself affected by bacterial decomposition.

One of the most striking points in connection with the construction of the modified Dortmund tank is the ease with which the sludge is drawn off. Although the vertex of the cone or pyramid may be twenty feet below the surface of the liquid, the pipe leading from this vertex to a sludge well is kept filled with sludge and is forced up by a difference in head of two feet between the liquids in the tank and in the sludge well. It was quite impressive to see the black, pasty sludge discharging when the bottom valve was opened, with no disturbance of the operation of the tank. Altogether, the general tendency to use only fresh sewage on the filters, or sewage as fresh as possible, was most marked in this locality.

Disposal of Sludge.—This problem, as always, has been the bane of the sewage plant manager. Filter presses, ten years ago, were largely resorted to as the only method of reducing the enormous volume of the chemically precipitated deposit. To-day, in the absence of chemical treatment, the presses are not used and the sludge is run out into lagoons, or beds, where it gradually dries, and is finally hauled away by farmers. At Woodford, two small beds were used alternately, at

an interval of a fortnight, a light covering of dust from a refuse heap being used to cover the sludge, for the double purpose of aiding the drying process and of reducing the smell. At Hampton, with a population of 10,000, the sludge has been cared for successfully in a series of beds covering one acre for six years past, and apparently can continue to be so cared for. Here, however, the sludge is held for some time in a separate sludge tank to provide septic action.

Dibdin's sludge beds, which the writer saw at Malden and at Nethane, and hopes to see at Devizes, are now considered by some to be the most advanced method of dealing with the sludge. These beds, built up of horizontal layers of slate, supported on small blocks 2 inches thick, are operated as sludge beds, and the multiple layers afford opportunity for solids to settle during the two hours the liquid remains in contact. The theory of Mr. Dibdin is that not merely does a larger proportion of the solids settle in his slate beds than through the depth of several feet of an ordinary bed, but that an intensely active digestion of this subsided material goes on during the time when the bed is empty. He asserts that this sludge, instead of being an inert mass of matter, is a hive of active and voracious living organisms, from the lowest type of bacteria up to the highly organized worms, larvæ, etc., which, like a collection of animals in a zoological garden, feed upon the daily supply of food given them; and that, so long as this supply is steadily and regularly given, so long will they perform their life functions, and in so doing destroy the waste organic matters, which in their collective form we call sludge—the process involved being merely that of digestion, the waste products of one group being but food for another. He also claims that these slate beds arrest the very fine particles, known now so generally as colloidal particles, which Dr. Travis says are found to vary from 0.000004 to 0.000010 mm. In the Hampton doctrine, much emphasis is laid on the presence of this colloidal matter, formed by these extremely minute particles in suspension, and it is one of the features of that doctrine that it insists upon the necessity of removing these minute particles as well as the coarser suspended matter. Dibdin believes that in his slate beds the finely divided particles of sewage matter, including some of those in true solution, will be arrested and destroyed by the living organisms resident in the deposited sludge.

So far as practical experience with the beds goes, that at Devizes has been in operation six years, and while the beds have lost about 25 per cent of their water capacity, the sludge accumulation to which this is due has not increased, the beds having remained practically in a stationary condition as far as this is concerned. Dibdin points out, however, that should a greater deposit take place a very moderate flush of water will remove all the deposit from the slates and leave them perfectly clean. His own explanation to the writer on this point was that, as the sludge became reduced to the inorganic humus, it freed itself in the deposit and was carried away when the contact bed was emptied.

The claims made for this treatment seem to the writer somewhat extravagant, and in spite of the favorable experience at Devizes, and in spite of the fact that Mr. Dibdin is building several plants of larger size at the present time, showing a confidence in the treatment by those in authority, the writer believes that a more extended observation should be made

before it can be said that no sludge will remain to be cared for.

Filters.—One of the most astonishing developments since the writer's last visit to English disposal plants has been the diminishing popularity of the contact beds, so generally adopted after the favorable experiments at Barking and at Sutton. In the United States, where sand in situ is not available for filters, it was believed by some that the only method of treatment available was contact beds, and not long since in England contact beds, either single, double or triple, were generally used in place of broad irrigation or chemical precipitation. To-day the unmistakable tendency in new installations is to supplant contact beds with sprinkling filters, preceded always by thorough sedimentation. The advantage of the percolating filters seems to lie in the fact that their capacity is more than double that of the contact beds, and in some cases, as at Sutton, where some of the original contact beds are still in use alongside of recently installed percolating filters, the manager believes that even at the greater rate, better results are obtained than with the double contact beds. This is not, however, universal experience, since the effluent from the third contact bed at Guilford was remarkably clear and well oxygenated, so much so, in fact, that the manager maintains a pool of the effluent for the purpose of exhibiting gold fish living there in health for the last seven years. Guilford, however, is an exception, since all the other places visited, even including Sutton, the home of the contact bed, are installing percolating filters as rapidly as their needs require and as funds permit. Even places of a few thousand population requiring a single percolating filter apparently find it to their advantage to make use of this kind of treatment, and the value of the process is generally accepted. There is, however, a marked tendency at some plants to use a much finer material in the sprinkling filters than is the American practice. Instead of particles 2 or 3 inches diameter, small particles from $\frac{3}{8}$ to $\frac{1}{4}$ inch are used.

The depth of the bed, also, is considerably modified from that indicated as desirable by the earlier experiments. Instead of a depth of from 7 to 8 feet, 4 or even 3 feet of the finer material above noted seems to be used. At Croydon an experimental bed has been in operation for several years, one-half of which was 5 feet deep and the other half 3 feet, and the testimony of the manager is clear that the 3-foot depth gives quite as good results as the 5-foot depth. This experience may be somewhat affected by the fact that the greater depth is made up of 3 feet of stone and 2 feet of clinker, while the 3-foot depth is all clinker.

Great emphasis was laid at all the plants upon the necessity of thorough aeration in the underdrains, and at one plant, where the effluent backed up in the main drain, the poor effluent was ascribed to this lack of ventilation. Where old contact beds have been made over into sprinkling filters, these underdrains are open on one side and extend upward to the outer air vertically against the inside wall. Otherwise they extend through the filter from one side to the other. In the opinion of the managers of the plants visited there is no advantage in porous walls around these filters, although in many cases the sides of the beds are built up as dry walls without mortar, using large pieces of coke filler. The majority of the beds inspected are circular, from 60 to 100 feet in diameter, and the managers in charge of these beds all seem to believe that the circular

beds have a great advantage, so far as distribution is concerned, over the rectangular forms where the distributors travel from end to end. They point out that at the end of the beds there must be a short interval when the sewage is discharged continuously over a small area, resulting in imperfect purification at these places. On the contrary, the managers of the rectangular beds believe that this is insignificant in comparison with the more perfect distribution of which the rectangular bed permits. So far as the observation of the writer is concerned, there is little to choose between them. Circular beds make larger demands upon the area required, while the rectangular beds require auxiliary power to operate the distributor. Certainly the distribution of the revolving distributor leaves nothing to be desired, and in most cases the effluent is equally as satisfactory as that from the rectangular beds. The difficulty, of course in adopting sprinkling filters of the revolving or moving type in the United States would come from the formation of ice in the winter, and one of the managers acknowledged that even in this warmer climate, ice had formed on the revolving arms and caused the guys to stretch so that the arms dragged along the surface of the bed. It does not seem, however, a serious problem to construct a light covering over a filter of 100 feet in diameter in such a way that the natural warmth of the sewage would be able to maintain a temperature to prevent the formation of ice upon the surface.

There are, of course, a number of manufacturers who will furnish revolving distributors, the iron work of which is sold for about \$450 in England. They all look much alike, the different patents covering the methods adopted for supporting the heavy weight in such a way as to reduce friction to a minimum and yet furnish a water-tight joint with the feed pipe. A most elaborate construction, with concrete side walls, screened clinker filling, and an automatic revolving sprinkler was stated to have cost \$4,500, taking care of 100,000 gallons per day. At Chesterfield, on the other hand, where, in a clay soil, no concrete bottom was provided, and where the walls were laid up of the coke used for filling, the cost was only \$2,000 for the same capacity of filter. These figures may not be exactly applicable in the United States, but they are the limits between which the cost of a single unit is found in England.

Humus Tanks.—The practice involved in the construction of humus tanks to remove the particles in suspension which are generally found in the effluent of the trickling filter is the same as that indicated by early experiments, and as actually adopted at Columbus, Ohio, and at Baltimore. A period of two hours detention seems to be sufficient, and at some of the places visited the small and inadequate size of this tank was pointed to as being responsible for the cloudy appearance of the effluent. At one point the engineer had converted the circular channel surrounding the percolating filter into a settling tank by building weirs near the outlet, but, partly because of the effect in backing up the flow into the filter, and partly because of the high velocity even under these conditions in the channel of small cross section, the effluent was not as good as would have been obtained from a larger tank. It was not the observation of the writer that even with a tank of the proper capacity the effluent was free from suspended matter, and in some cases there was an

amount of colloidal material present which gave the effluent a markedly cloudy appearance. In fact, the impression is quite vivid that in order to produce a sparkling, clear, effluent a further treatment is necessary, and that this is generally recognized is shown by the fact that in nearly all cases observed the sprinkling filter effluent is passed through filter beds, filled either with sand or with fine coke breeze.

Final Filters.—One of the plants visited, that at Bushey, newly constructed, had filter beds filled with a coarse yellow sand very much resembling slow sand filters for water. The noticeable thing about these beds was the high rate at which they were expected to work; and this was apparent in all the installations. The area of the filter beds was generally about that of the sprinkling filters, so that the similarity to water filtration extends to the rate as well as to the method of construction.

The distribution in the filter beds was generally obtained by running out wooden or galvanized semi-circular channels, about 10 feet apart, across the beds, so arranged that the sewage is discharged at intervals throughout their length. These beds are generally shallow, less than 3 feet in depth, and the humus-like particles in the sewage are arrested on the surface and presumably there dried up.

Conclusion.—One of the surprising points to the writer in visiting these recently constructed plants is that no use of the fixed nozzle or sprayer has been found, although at Staines such a plant is in existence, and presumably at other places. In order to demonstrate the advantage of a movable sprinkler, one of the managers held the mechanism in one place for a time, pointing to the fact that thereby the black humus of the bed was immediately washed out with the effluent—a proof, to his mind at least, that the fixed nozzle would cause a similar action to go on continuously. The manager at Staines, with whom the writer talked, claims that no such effect is produced, and that the effluent from his plant would compare favorably with that obtained by any movable distributor. It would seem as if a fixed spray operated by means of a flush tank, or by butterfly valves, as at Baltimore, should have the same effect as the revolving sprinkler. It is quite possible that the fixed spray may allow a higher rate of operation, since the interval between applications would be considerably less than with the revolving or traveling distributor, where the interval ranges from 30 seconds to 5 minutes. In most of the places no trouble was experienced with the clogging of the distributor, the openings generally being $\frac{1}{2}$ inch. This would depend, of course, on the thoroughness of the preliminary treatment, and it is not impossible with the present attitude of the managers toward septic action in the tanks to foresee the time when screening will precede the sprinkling filter as the only preliminary treatment.

This possibility makes the experiments made in Germany on fine screening of great interest, since thereby the amount of land necessary is much reduced, and the sewage absolutely prevented from becoming septic.

Finally, it must be remembered that these observations above recorded are based on plants of small size, with concentrated sewage collected on a separate system. Croydon alone, of the plants visited, has a combined system of sewers and is a city of more than 25,000 inhabitants. The success, however, of the same methods here as in the small places leads

one to think that the method described is generally applicable. Whether larger cities, with their greater variations in flow, can handle their sewage in the same successful manner remains to be seen. Certain it is that the problem of changing the foul sewage of a small city into a clarified and even a sparkling effluent has been satisfactorily solved in the places thus far visited.

It must be remembered, as was pointed out at the beginning of this article, that the quality of the American sewage differs essentially from that of the English cities, and it is quite possible that, for American conditions, a fixed spray discharging onto coarse material, or the use of a coarse contact bed, may be equally or even more efficient than the methods above described. It is in this connection that the experiments just undertaken by the Massachusetts Institute of Technology will be particularly valuable.—*Engineering Record*.

CHICAGO'S LARGE EXPENDITURE FOR SUBWAYS TO IMPROVE TRAFFIC CONDITIONS IN THE CONGESTED DISTRICT.

The traffic problem of the loop district in Chicago has been studied very carefully by the City Subway Division and a supplemental report on transportation subways has recently been made. The first subway report was noticed in the *Engineering Record* of March 27, 1909. Further consideration of certain points of traffic, operation and trial designs were left until more data had been collected and studied. In the letter transmitting the supplemental report to the Commissioner of Public Works credit for its preparation is given to Mr. R. C. St. John, assistant engineer. Extracts from it are given here to illustrate how he studied the problem.

The conclusions regarding congestion of traffic are as follows:

1. The density of traffic congestion is constantly increasing and extending over longer periods both morning and evening. The result is that the time required to go to and from work is increasing, so that the working day is lengthened.

2. Not only is the rapid growth of the city leading to this undesirable result, but as the congestion in the streets in the business district increases the interruption to surface traffic is leading to a smaller capacity for carrying passengers on surface lines. The present actual maximum traffic per hour on surface lines entering the business district is but 62 per cent of what it was estimated to be seven years ago, notwithstanding that extensive improvements have since been made, and that the total annual surface line traffic has increased 30 per cent.

3. The capacity of the elevated lines as it relates to traffic into and out of the business district is limited to the capacity of the elevated loop. The capacity of the elevated loop has been reached and can be only slightly increased by physical changes and revised methods of operation. Stub terminals, while adding to the capacity of the elevated lines, serve only those patrons whose destinations are nearby.

4. The existing main lines of transportation have reached their ultimate practicable capacity for carrying passengers.

5. The increase of 100 per cent in the carrying capacity of existing local transportation facilities would still leave a period of congestion in the morning and evening traffic.

Contributory Population.—It will be interesting and profitable to study the drifts and settlements of population in the past, and for this purpose the city might be divided into successive imaginary zones or belts one mile in width, assuming the center of the city to be the intersection of State and Madison streets. A comparison of the zonal distribution of population within the traffic divisions showed that increased transportation facilities have in a great measure assisted in the rapid increase in population outside the first and second mile zones.

The proportion of traffic handled during the rush periods in Chicago varies. In most cities it has been found that the traffic of the heaviest hour is generally one-sixth of the total traffic of one day in that direction, or 16 per cent. The congestion in this city is much greater. It is found for the elevated roads that the percentage of the heaviest hourly traffic inbound to the total outbound traffic for twenty-four hours is 33 per cent and for the outbound traffic 36 per cent. For the surface lines traffic it is found that the percentage of the heaviest hourly traffic inbound to the total inbound traffic for twenty-four hours is 20 per cent and for the outbound traffic is 25 per cent. The high percentage of the heavy traffic hours of Chicago for both the elevated and surface lines, in comparison with that of other cities, emphasizes the greater magnitude of the transportation problem.

The only solution of the transportation problem is to provide means for handling this immense traffic.

Operation.—It is believed that subways should first be constructed entirely within the subway zone with a total capacity sufficient to handle all the elevated and surface lines traffic that will flow over the subway zone borders for several years in the future, and that subway terminals should be located at or near the subway zone boundaries; that there should be one for each of the traffic divisions, and that besides being at first perhaps only outlets for the elevated and surface lines they should finally, or as traffic would warrant, be terminals for the storage of the extra equipment that handles the traffic of the morning inbound rush period until it is required to handle the outbound traffic of the evening rush period. The saving of empty car mileage would warrant the construction of these terminals, the cost of which, in comparison to the cost of the subways, should not deter their construction.

There are loops and through-routes in all of the proposed plans. A study of each proposed subway plan will develop some advantages for "loops" over "through-routes" and "through-routes" over "loops." The double-deck type of subways having been considered impractical in the first subway report prepared by the city in 1909, all the plans suggested in the supplemental report are necessarily the single-deck type, crossing each other only at or near the river. This restriction and the avoidance of grade crossings naturally makes the problem of location more difficult. Each plan, however, has possibilities of operation that entitle it to consideration.

Costs and Capacities.—A table is shown which gives the approximate cost and capacity of the various plans, including the year when the estimated future traffic will equal the subway capacity. The costs vary from about \$33,700,000 for a seating capacity of 191,000 and exclusive of a utilities gallery, to \$109,000,000 for a seating capacity of 529,000 and including a utilities gallery.—*Engineering Record*.

ASSESSING FOR STREET PAVING.

A method of assessing for street paving which seems to be an improvement on that used in many cities (although we believe that several have already adopted practically the same plan) has received the approval of the several borough presidents and engineers and the Board of Estimate and Apportionment of Greater New York, and has been embodied in a bill now before the New York State Legislature. The general idea is that of requiring the property owner to pay ultimately for a so-called "permanent pavement" in front of his property, but not requiring him to pay more than the cost of such pavement.

A practice which is not as common as it was some years ago is still in use in some cities of requiring each property owner to pay for but one road improvement in front of his property, whether that be a macadam or permanent pavement. In a few cities the owner pays for all pavements, whether the street be paved once or a number of times. Either of these works an injustice. According to the plan proposed for New York pavements, they are to be divided into two classes. Class A will include sheet asphalt, asphalt block, wood block, granite block or such other permanent pavements as shall from time to time be designated for that class by the Board of Estimate and Apportionment. Class B will include macadam, bituminous macadam or other of the less costly pavements. An owner who has once paid for a Class A pavement in front of his property would never again be called upon for any pavement assessments. Should an owner have paid for a Class B pavement, and a Class A pavement be later laid to replace this, his assessment would be the cost of the Class A pavement less the amount previously paid by this property for the Class B pavement. Should a Class B pavement at any time need renewal, the owner may petition that it be renewed by another Class B pavement rather than a Class A, and such renewal may be granted or not by the authorities having control over the pavements; but in such case, when a Class A pavement is ultimately laid, the amount deducted from the assessment therefor would be the cost of the original Class B pavement only, no account being taken of the second Class B pavement.

This method differs from the one suggested by us a few weeks ago, in that it requires each property owner in the end to pay for a pavement of the highest price, whereas our suggestion was that each property pay for a Class B pavement only, whether such a pavement be laid originally or whether a Class A pavement be laid in the first instance, the city at large paying the balance of the cost. Either method; however, tends to remove an injustice which is inherent in most other methods: which inequitable methods should, in our opinion, be superseded by one similar to those referred to.—*Municipal Journal and Engineer*.

FOOD SUPPLY OF PASADENA.

Pasadena is said to be the best regulated city in the state with respect to food and milk supply. The tubercular test is applied once a year to every cow supplying milk to the city and if there are indications of tuberculosis its milk is condemned. The dairy from which the certified milk sold in Pasadena comes is said by the national inspectors to be the most complete and the most perfectly managed in the United States.

MUNICIPAL MARKETS OF ST. LOUIS.

The City of St. Louis is operating three municipal markets and owns the land upon which a fourth is being operated by a private stock company. The four markets are the remains of a score of markets started half a century ago, most of them operated by private interests.

Union Market, located in the heart of the business district and covering a full city block, is one of the most important markets in the country, though not the finest. It is still an imposing structure, and is in at least a sanitary condition, but it is far behind what might be considered modern in a market.

Both of the other municipal markets have been allowed to run down and are a burden on the city, without much apparent appreciation by the citizens. Soulard Market, located about two miles south of Union Market, has been practically deserted except for wagon business. The South Market, located about six miles south of the dividing line, and about six and a half miles south of the Union Market, is still patronized in an indifferent way, but it has long since ceased to pay its upkeep.

UNION MARKET.

The main building of the Union Market faces 110 feet on Broadway and 270 feet on Morgan street. It is built of brick, with stone trimmings. The metal-covered, steel-trussed roof curves gracefully downward from a flat "promenade deck," in the middle, formerly used as an observation vantage point, but now little used because of surrounding tall buildings. The floor is of brick, which, though still in a pretty good condition, is not overly sanitary. There are no inside partitions except the matched and beaded sash partitions enclosing the restaurants in the southeast and northwest corners. The double rows of stalls in the center of the building are separated lengthwise only by the heavy meat racks.

Refrigeration is particularly well provided for. Each stall which desires it has underground pipe connection with a nearby cold-air refrigerating system. The butcher stalls all have refrigerator counters with curved glass tops for the display of meats. These are usually covered over with boards during the winter and the meat is displayed on top, but in summer the meats are laid in the cold-air chambers plainly visible from the aisles, and the patrons can choose their cuts without the necessity of removing any from the refrigerators until sold.

Extending entirely around the block is a row of stalls occupying eight feet of the 18-foot sidewalks and protected by permanent awnings of wood and steel. All of these outside stalls have sliding fronts and sides, which are easily pushed up out of the way when the market is open and drawn down into place to protect the contents of the stalls after closing time.

Every lessee, as a consideration of his lease, must, when the market closes, remove all vegetables and other articles from the market, or put them into clean sanitary coolers, and all animal and vegetable offal and rubbish must be removed from the market place. Butchers must cause their table, meat blocks and other fixtures to be thoroughly scraped and cleaned. In addition to these requirements, the Revised Code of the city says: "The market masters shall cause the market house and market places to which they shall be respectively appointed to be thoroughly cleaned and all the filth to be removed therefrom by the scavengers

employed for that purpose by the city, and shall keep the footways and steps in the winter season clear of ice and snow." These regulations are enforced.

Each stall keeper is required to paint the woodwork of the stall and his wooden fixtures which need painting at least once in six months. The city comptroller decides the color of the paint to be used that it may be uniform throughout the market. This, if strictly enforced, would add materially to the clean appearance of the market; but, though an ordinance requirement applying to all markets, it is not enforced very rigidly. The Union is painted white inside, but the paint does not look very new. Among other regulations enforced is one prohibiting the sale of intoxicants in the market places.

Duties of the market masters are prescribed by city ordinance. They include special police powers for preserving order, and direct him to inspect scales and measures to see that citizens are being fairly treated. He is authorized and directed to seize all short-weight articles and every article of food that is not up to the standard quality. Berries and similar farm products may be sold in original crates of any size, without regard to the fairness of their measure, but any citizen has a right under the ordinances of the city to demand the weighing or measuring of any purchase.

The market master is to keep order, enforce regulations, supervise the market, assign places to the market wagons, act as custodian of the market, decide disputes between patrons and owners of stalls, weigh or measure every article about which there is question, on tested scales and measures; rent wagon stands for short periods. Failure to obey any reasonable orders or decisions of the market master is punishable by a fine of from \$5 to \$100, so he is a sort of czar in his bailiwick. He gets a salary of \$1,000 a year, and has four assistants at \$50 a month.

Stalls are rented, cash in advance, every six months; butcher stalls inside the market on the first Monday in January and July, and the others on the first Monday in May and November. The stalls may be auctioned once in five years, and prices may be fixed at any time by the comptroller, excepting between rent periods. The ordinances reserve to the city the right to cancel any lease on thirty days' notice. Failure to occupy a stall for six consecutive days, except in case of sickness, forfeits it, advance rent included. Two violations of the market regulations has the same effect.

Union market covers a city block of 1.4 acres, and was purchased in 1866 at a cost, including the building, of \$245,000. The ground alone is now worth about \$1,000,000, and the present value of the building is estimated at \$200,000. It is now surrounded with large business houses, and the land is rapidly increasing in value; in fact, some have thought it too valuable to be used by the city for this purpose. In 1908 the people voted down a proposition to issue \$500,000 worth of bonds for a new building on the same site, similar to the \$490,000 modern market building in Baltimore, the reason for rejecting the proposition being largely the opposition to it on the part of the retail dealers, those near the market opposing it because it would centralize the business of that locality, and those at a distance because it would tend to draw business away from their district; also because of the lack of interest on the part of most of the voters. The building contemplated would occupy the entire block, being two or three stories in height, and contain modern-glass-cov-

ered market stalls around the sidewalk space, to be used for fruit stands and the like; the interior, with the best drainage and ventilation, to be occupied by stalls for meat, poultry and fish.

SOULARD MARKET.

The Soulard Market, formerly an important one, was never very well equipped. It originated as a private market on public ground donated by Julia C. Soulard in 1833, and was later purchased by the city for \$25,000. Very little has been done to it since then. It is the least sanitary of the city markets and the least remunerative. But four stalls are now rented, and these are for fresh meats and other perishable goods.

This market derives most of its revenue from farmers who occupy Soulard Market place, an extension of the market grounds occupying one block, for which from 5 to 10 cents a day per wagon stand is charged. The market place is vacant except on market days — Tuesdays, Thursdays and Saturdays.

SOUTH ST. LOUIS MARKET.

South St. Louis Market is located in the northeast corner of South St. Louis square, a small public park. The building is about 30 by 50 feet, constructed of brick with granitoid floor. There are no partitions, but a heavy wooden frame work on the wall serves for both a meat rack and as a dividing line for the stalls. The building contains twelve stalls, nine of which are rented, but the rents are so low as to total only one-half the expense of maintaining the market. As in the case of the Soulard Market, two men are employed, the market master being also public weigher at the scales located at the market. As at the Soulard Market, his office is in the tiny scale house. This market has no wagon stand, and wagons are not allowed to compete with the market men. The building is valued at \$5,000 and the ground at \$3,000.

For the fiscal year ending April 12, 1909, the Union Market paid \$38,905.85 in rents; Soulard Market, \$468, and the South Market, \$102. The figures for the two later markets do not include the revenue from the two public scales in connection. — *Municipal Journal and Engineer.*

JERUSALEM DECIDES ON MUNICIPAL OWNERSHIP.

Even in the benighted realms of the Sultan of Turkey municipal ownership is rearing its beneficent front. The city of Jerusalem, by practically the unanimous vote of its 80,000 inhabitants, recently decided to build waterworks. No sooner had the vote been cast than a German concern appeared with an offer to construct the plant, pipe the water into every home at a fair rate, and at the end of twenty years turn the works over to the municipality in first-class condition and free from debt. But the matter is in the hands of a special committee, consisting of the Mayor, a member of the City Council, a couple of city engineers and the principal religious officer of Jerusalem, and this committee believes it can do better. It invites the world to come on and bid on the construction of a straight municipal plant, and the invitation has been forwarded to the United States through the American Consul. He suggests that American waterworks builders enter the competition. — *Municipal Journal and Engineer.*

CITY RECORD

OFFICIAL PUBLICATION OF THE CITY OF BOSTON.

VOL. 2.

SATURDAY, SEPTEMBER 10, 1910.

No. 37

City of Boston.

CITY RECORD.

Published weekly under legislative act by the
City of Boston, Mass.

By SUBSCRIPTION . . . \$1.00 Per Year.
SINGLE COPIES . . . 5 Cents.
IN ADVANCE.

ADVERTISING.

A rate of 10 cents per agate line has been established for such advertisements as under the law must be printed in the *City Record*. Advertising and other copy must be in hand by Thursday of each week to insure its publication in the Saturday issue.

Copies for sale at the Mayor's Office, Room 27, City Hall, and at all news stands.

MUNICIPAL SERVICE.

Complaints, inquiries or suggestions regarding the work of municipal departments should be made in writing to the officials directly in charge. The failure of such officials to make reply within a reasonable length of time should be brought to the attention of the Mayor. Communications should be directed as follows:

TO THE BOARD OF STREET COMMISSIONERS, Room 41, City Hall, for information relative to the laying out, relocation, widening and discontinuance of highways; the taking of real property for municipal purposes; the assessments of betterments for streets and sewers; the plotting of undeveloped areas for streets and the opening of private ways; the granting of licenses for the storage or sale of merchandise in public streets; the regulation of street traffic; the making of specific repairs in public streets; the naming of public streets; the planting and removal of trees in public ways; the issuing of licenses for the storage of gasoline, oil and other inflammable substances or explosive compounds; the use of the public ways for any permanent or temporary obstruction or projection in, under or over the same, including the location of conduits, poles and posts for telephone, telegraph, street railway or illuminating purposes, signs, marquis, bay windows, coal holes and vaults.

TO THE SUPERINTENDENT OF STREETS, Room 44, City Hall, for information as to

the watering, cleaning, lighting and repairing of streets, the construction and care of sewers and catch-basins, the operation of the ferries, the maintenance of bridges and drawbridges and the removal of ashes and offal.

TO THE BOARD OF HEALTH, Room 11, Old Court House (rear of City Hall), for information relative to the inspection of milk, vinegar, meat, fish and vegetables, the issuance of permits for stables, slaughter houses, etc., smoke nuisances, the existence of contagious diseases or public health nuisances.

TO THE WATER COMMISSIONER, Room 58, City Hall, for information relative to the supplying or metering of water and the water charges of the city.

TO THE SUPERINTENDENT OF PUBLIC GROUNDS, 154 East Cottage street, for information as to the care of the Common, Public Garden, and the small parks throughout the city other than playgrounds, and the extermination of the gypsy moth and the charges made for the same.

TO THE PARK COMMISSIONERS, Pinebank, Jamaica Plain, for information as to Franklin Park and Field, Commonwealth avenue, the Back Bay Fens, Marine Park and playgrounds in general throughout the city.

TO THE SCHOOL COMMITTEE, Mason street, for information relative to the operation of the schools of the city.

TO THE SCHOOLHOUSE COMMISSIONERS, 120 Boylston street, for information as to the construction and repair of school buildings.

MUNICIPAL CALENDAR.

Meeting of City Council, Monday, September 12, 3 p. m.

Meetings of the Boston Transit Commission are held Tuesday and Thursday of each week at 10.30 a. m.

PROPOSALS ADVERTISED.

Bids have been asked for by advertisements in the *City Record* by the following departments. The attention of contractors and others is specially called to the closing time for the receipt of such proposals. This will be published weekly.

PUBLIC BUILDINGS DEPARTMENT.

Advertises for proposals for electrical fixtures for the new library building, Sedgwick street, Jamaica Plain. Blank forms for proposals may be obtained at the office of the superintendent, Room 30, Old Court House. Bids to be filed at same office.

Bids close Monday, September 19, at 12 m.

Promotion of Lieut. James W. Dwyer, who has been assistant to the veterinary and now serving as such, to the position of captain.

Increase in salary of Senior Deputy Chief John Grady from \$2,400 to \$3,000, and the salary of Junior Deputy Chief Peter F. McDonough from \$2,200 to \$2,500.

Promotion of Eugene M. Byington, superintendent of the repair division, to the rank of deputy chief in charge of the repair and construction division, without any change in salary.

Promotion of Charles F. Elsesser, assistant engineer of Engine Company 27, to the position of engineer.

Appointment of Walter E. Struble, 4 Eden street, Charlestown; James Wall, 76 Cottage street, East Boston, and Thomas H. Devney, 17 Hall street, Jamaica Plain, to serve in this department on probation at a salary of \$720 per annum.

Retirement from service of Ladderman John Prendergast of Ladder Company 4 on pension at the rate of \$600 per annum.

HOSPITAL DEPARTMENT.

The following persons have been employed at the Boston City Hospital, during the past week:

To Fill Vacancies.

Permanent. — Minnie McLaughlin, baker's assistant, \$16 per month; Bridget Dreslan, scrubber, \$5 per week; Stela Gustowski, scrubber, \$5 per week; Frank W. Knowlton, center orderly, \$20 per month; John W. Freely, elevator boy, \$7 per week.

The following employees have had increase of wages:

M. Alice McMahon, head nurse, \$40 to \$45 per month; Alice M. Laurie, nurse, \$8.33 to \$12.50 per month; May V. Bowdring, probationer (no pay) to nurse at \$5 per month; Elizabeth T. Healey, probationer (no pay) to nurse at \$5 per month; Adelaide M. Hudson, probationer (no pay) to nurse at \$5 per month; Grace A. Hunt, probationer (no pay) to nurse at \$5 per month; Mary A. Duggett, probationer (no pay) to nurse at \$5 per month.

INFIRMARY DEPARTMENT.

Boston Almshouse and Hospital.

Appointment to fill vacancy.—Hilda Erickson, laundress, \$18 per month.

LIBRARY DEPARTMENT.

Grade Increases.—Walter T. Hanna, patent room, \$5.50 to \$6.25 per week, September 1; Charles J. Mackin, branch department, \$5.50 to \$6.25 per week, September 14.

MARKET DEPARTMENT.

Designation of Charles H. Webster to act as Superintendent of Markets during the absence of the superintendent for one week from September 8.

STREET DEPARTMENT (Ferry Division).

Appointment of Thomas J. Watts as a painter for a period of sixty days in the Ferry Division, with wages at the rate of \$3 per day.

Appointment of the following regular extra deckhands in the Ferry Division of this department, with salary at the rate of \$840 per year: Thomas J. Downs, William Hogan, Peter H. Joyce, Jeremiah J. McCarthy, Henry J. Scaife, Dennis G. Sheehan, Frank Silvia.

Increase in wages of John J. Hassett,

promoted from machinist's helper to steam fitter, from \$2.75 to \$3.25 per day.

WATER DEPARTMENT.

Appointment of George H. Flanagan as a machinist in the Water Department with compensation at the rate of \$3 per day.

WIRE DEPARTMENT.

Designation of Walter J. Burke as acting commissioner during the absence of the commissioner for two weeks beginning September 5.

OVERTIME ALLOWED.

Park Department.

For the week ending Thursday, September 1, 1910:

William H. Allen, foreman, 1½ days at \$3.25, \$5.69; George W. H. Timson, timekeeper, 1 day at \$2.50, \$2.50; Bartholomew M. Ryan, blacksmith, ½ day at \$3, \$0.38; Bernard J. Conley, machinist, ¾ day at \$3, \$2.25; William F. Conklin, machinist, ¼ day at \$3, \$0.75; Martin Feeley, pipefitter, ¼ day at \$2.75, \$0.69; Edward T. Bean, gardener, 1 day at \$2.50, \$2.50; James H. Kelley, janitor, 1 day at \$2.50, \$2.50; Thomas Dillon, driver and chauffeur, 1 day at \$3, \$3; John J. Regan, boy and chauffeur, ½ week at \$9 per week, \$1.50; Mary A. McLaughlin, matron substitute, ½ week at \$10 per week, \$1.43; Charles A. Hogan, clerk, ¼ day at \$2.50, \$1.25; Patrick McKenzie, powderman and gardener, 1 day at \$3.25, \$3.25; James D. Edgeworth, subforeman, 1 day at \$3.75, \$3.75; John J. Tatten, Jr., fireman, ¾ day at \$2.50, \$1.88; Michael A. Martin, laborer and watchman, ½ day at \$2.50, \$1.25; Robert Hindle, steam roller engineer, ¾ day at \$3, \$2.25; Julius Weidner, subforeman, 1½ days at \$3.25, \$4.06; Charles Walters, gardener, 1 day at \$3, \$3; Mrs. William Campbell, matron, ¼ week at \$10 per week, \$0.71; Alice Timmins, matron, 1 day at \$1.50, \$1.50; Thomas J. Delaney, watchman, 1 day at \$2.50, \$2.50; Michael McNulty, subforeman, 1½ days at \$3.25, \$3.66; Ann I. Loftus, instructor, ¼ week at \$13.80 per week, \$1.97; Margaret Mulhern, matron, 1 day at \$1.50, \$1.50; Thomas A. Callahan, laborer and assistant in care of building, ½ day at \$2.50, \$1.25; John Younie, watchman, 1 day at \$2.50, \$2.50; John P. Kelly, subforeman, 1 day at \$3.25, \$3.25; and 71 laborers, 66½ days at \$2.25, \$149.99.

Street Department (Highway Division).

For the week ending Thursday, September 1, 1910:

Bernard J. McGovern, engineer, 1 day at \$3, \$3; Andrew T. Roach, weigher, 1 day at \$2.50, \$2.50; John T. Sweeney, subforeman, 1 day at \$3.50, \$3.50; William L. Carty, inspector, 1 day at \$3, \$3; James F. Whooley, inspector, 2 days at \$2.50, \$5; Francis P. Aicla, clerk, 1 day at \$2.50, \$2.50; James J. Sullivan, messenger, 1 day at \$3, \$3; John H. Murphy, inspector, 1 day at \$3, \$3; Robert J. Mason, messenger, 1 day at \$2.50, \$2.50; Patrick H. Connolly, inspector, 1 day at \$3, \$3; James D. Gorman, inspector, 1 day at \$3, \$3; Frank J. Hasson, inspector, 1 day at \$3, \$3; George W. Jepson, inspector, ¼ day at \$3, \$2.25; Thomas W. H. Kelley, inspector, 2 days at \$4, \$8; William J. Lynch, inspector, 2½ days at \$3, \$7.50; Michael F. O'Brien, inspector, 1½ days at \$3, \$3.75; James A. Keveney, inspector, ¾ day at \$3, \$2.25; Timothy Fitzmaurice, inspector, ¾ day at \$3.50, \$2.63; and 70 laborers, \$166.53.

Michael J. Rennison, subforeman, 2 days at \$3.50, \$7; A. S. Quinn, subforeman, 2 days at \$3.50, \$7; Parker V. Coburn, subforeman, 2 days at \$3.50, \$7; George E. Hanlon, carpenter, 2 days at \$3.50, \$7; Joseph A. Coyle, carpenter, 2 days at \$3, \$6; M. J. Sullivan, carpenter, 2 days at \$3, \$6; Daniel Crowley, carpenter, 2 days at \$2.75, \$5.50; M. J. Harkins, carpenter, 2 days at \$2.75, \$5.50; P. J. Henebury, carpenter's helper, 2 days at \$2.75, \$5.50; John F. Sullivan, carpenter's helper, 2 days at \$2.50, \$5; Henry D. Gay, painter, 2 days at \$3, \$6; John A. Buckley, painter, 2 days at \$3, \$6; Jeremiah Coleman, painter, 2 days at \$3, \$6; John J. Green, teamster, 2 days at \$2.75, \$5.50; and 2 laborers, 2 days each, \$9.

Timothy Sullivan, 1 day at \$2.50, \$2.50; John B. Bowler, bridge cleaner, 1 day at \$2.50, \$2.50; William J. Doherty, first assistant drawtender, 1 day at \$900 per year, \$2.46; 6 assistant drawtenders, 11 days' time at \$800 per year, \$24.09; Patrick F. Murphy, machinist, 2 days at \$3.52, \$7.04.

(Street Department (Sanitary Division)).

For the week ending Thursday, September 1, 1910:

James F. Maloney, teamster, 1 day at \$2.25, \$2.25; J. J. Barry, scowman, 1 day at \$2.50, \$2.50; E. J. Hardy, scowman, 1 day at \$2.50, \$2.50; J. A. Hillon, foreman, 1½ days at \$3.50, \$5.25; Daniel Collins, mate, 1½ days at \$3, \$3.75; John Pomeroy, engineer, 1½ days at \$3.50, \$4.38; James Riley, fireman, 1½ days at \$2.83½, \$3.54; James Kelly, fireman, 1 day at \$2.83½, \$2.83; 2 laborers, \$4.04; W. V. Quinn, inspector, 1 day at \$2.50, \$2.50; J. J. Shea, driver, ½ day at \$2.50, \$1.25; J. P. Kelley, inspector, 1 day at \$3, \$3; Peter King, laborer, 1 day at \$2.50, \$2.50; Michael Mullen, stableman, 1 day at \$2.50, \$2.50; M. J. Concannon, inspector, 1 day at \$3, \$3; Thomas Rice, driver, 1 day at \$2.50, \$2.50; Patrick Sweeney, driver, 1 day at \$2.50, \$2.50; J. J. Carey, inspector, 1 day at \$2.50, \$2.50; C. J. Scanlan, inspector, 1 day at \$2.50, \$2.50; D. J. Griffin, inspector, 1 day at \$2.50, \$2.50; A. H. Brown, driver, 1 day at \$2.50, \$2.50; D. J. Sullivan, driver, 1 day at \$2.50, \$2.50; Timothy Curran, driver, 1 day at \$2.50, \$2.50; J. A. Brown, driver, 1 day at \$2.50, \$2.50; John Dillon, inspector, 1 day at \$2.50, \$2.50; H. J. Barry, driver, 1 day at \$2.50, \$2.50; P. F. McCormick, driver, 1 day at \$2.50, \$2.50; and 62 laborers, \$158.06.

Street Department (Sewer Division).

For the week ending Thursday, September 1, 1910:

James A. Bell, rodman, ¾ day at \$2.50, \$1.88; Daniel P. Kelly, instrument man, 1½ days at \$3.50, \$5.25; Michael F. Garra, inspector, 1 day at \$5, \$5; Thomas McDonald, yardman, 1 day at \$2.50, \$2.50; Nathan F. O'Neil, teamster, 1½ days at \$2.50, \$3.75; Thomas Glennon, inspector, 1½ days at \$3.50, \$6.13; Bernard Gibbons, bracer, 1½ days at \$2.50, \$4.38; John Flaherty, yardman, 1 day at \$2.50, \$2.50; Edward Doherty, bracer, 1½ days at \$2.50, \$4.38; Peter Ducie, watchman, 1 day at \$2.50, \$2.50; 33 laborers, 32½ days at \$2.25, \$73.13.

Water Department (Distribution Division).

For the week ending Thursday, September 1, 1910:

John Austin, watchman, 1 day at \$2.50, \$2.50; Charles J. Parks, watchman, 1 day at \$2.50, \$2.50; Patrick Douglass, 2d, emergency man, 1 day at \$2.50, \$2.50; John Doherty, 2d, emergency

man, 1 day at \$2.50, \$2.50; Michael J. Carney, emergency man, 1 day at \$2.25, \$2.25; Michael Grady, emergency man, 1 day at \$2.25, \$2.25; John J. Broderick, emergency man, 1 day at \$2.25, \$2.25; Jeremiah Looney, emergency man, 1 day at \$2.25, \$2.25; Charles J. McKenna, emergency man, 1 day at \$2.25, \$2.25; Robert McLaughlin, emergency man, 1 day at \$2.25, \$2.25; Moses McCue, emergency man, 1 day at \$2.25, \$2.25; Michael A. White, emergency man, 1 day at \$2.25, \$2.25; Thomas Douglass, emergency man, 1 day at \$3, \$3; Morgan Donahue, emergency man, 1 day at \$2.25, \$2.25; Timothy J. Kelliher, chauffeur, 1 day at \$2.75, \$2.75; George F. W. Stevens, chauffeur, 1 day at \$3, \$3; Thomas Lavery, stableman, 1 day at \$2.25, \$2.25; Thomas A. Gorman, foreman, 1½ days at \$2.75, \$4.81; Daniel J. Buckley, watchman, 1 day at \$2.25, \$2.25; Patrick J. Gorman, watchman, 1 day at \$2.25, \$2.25; Patrick Cassidy, watchman, 1 day at \$2.25, \$2.25; Michael H. Dwyer, watchman, 1 day at \$2.25, \$2.25; Patrick J. Feeney, inspector, 1 day at \$2.75, \$2.75; Dennis McGowan, laborer, 1 day at \$2.25, \$2.25; Michael O'Leary, stableman, 1 day at \$2.25, \$2.25; John Egan, teamster, ½ day at \$2.25, \$1.69; James Murphy, teamster, ½ day at \$2.25, \$1.69; John Cummings, repairer, 1½ days at \$2.75, \$4.64; James F. Donovan, watchman, 1 day at \$2.25, \$2.25; Patrick H. McCarthy, watchman, 1 day at \$2.25, \$2.25; William Regan, watchman, 1 day at \$2.25, \$2.25; John McLaughlin, laborer, ½ day at \$2.25, \$1.55; John Cronin, laborer, ½ day at \$2.25, \$1.55; Thomas Dolan, laborer, ½ day at \$2.25, \$1.55; John Buckley, watchman, 1 day at \$2.25, \$2.25; James J. Hayes, watchman, 1 day at \$2.25, \$2.25; William P. Kilty, yardman, 1 day at \$2.25, \$2.25; Edward P. Sullivan, teamster, ½ day at \$2.25, \$1.69; Daniel J. Donovan, watchman, 1 day at \$2.25, \$2.25; David McCarthy, gateman, 1 day at \$2.50, \$2.50; Dennis McCarthy, gateman, 1 day at \$2.50, \$2.50; James M. Synnott, gateman, 1 day at \$2.50, \$2.50; Humphrey Sullivan, watchman, 1 day at \$2.25, \$2.25; Peter Welch, stableman, 1 day at \$2.25, \$2.25; John McNulty, laborer, 1½ days at \$2.25, \$3.87; James McKenny, teamster, 2½ days at \$2.25, \$5.20; John J. Barry, repairer, ½ day at \$2.50, \$1.33; Daniel O'Brien, repairer, ½ day at \$2.50, \$1.33; John Concannon, laborer, ½ day at \$2.25, \$1.69; Alexander Thompson, plumber, ½ day at \$3, \$1.13; John Walsh, laborer, ½ day at \$2.25, \$0.84; Peter Halligan, laborer, ½ day at \$2.25, \$2.04; Robert A. Barry, watchman, 1 day at \$2.25, \$2.25; John Cahill, stableman, 1 day at \$2.25, \$2.25; James J. Connors, stableman, 1½ days at \$2.75, \$4.81; John C. McCarthy, stableman, 1 day at \$2.25, \$2.25; John F. McCauley, stableman, 1 day at \$2.25, \$2.25; James Donovan, stableman, 1 day at \$2.25, \$2.25; Dennis Shea, laborer, 1 day at \$2.25, \$2.25; Edward M. Houghton, teamster, ½ day at \$2.25, \$1.69; John McCormack, teamster, ½ day at \$2.25, \$1.69; Thomas Bowen, teamster, ½ day at \$2.25, \$1.69; Peter M. Brown, teamster, ½ day at \$2.25, \$1.69; Michael F. Burke, teamster, ½ day at \$2.50, \$2.42; Raffaele Curcio, teamster, ½ day at \$2.25, \$1.69; David Leo, teamster, ½ day at \$2.25, \$1.41; Thomas Magee, teamster, ½ day at \$2.25, \$1.69; Jeremiah J. McLaughlin, teamster, ½ day at \$2.50, \$1.56; Matthew I. Nolan, teamster, ½ day at \$2.50, \$1.88; Timothy Noonan, teamster, ½ day at \$2.25, \$1.69; James J. O'Brien, teamster, ½ day at \$2.25, \$1.69; John J. O'Brien, teamster, ½ day at \$2.25,

\$1.69; Edward A. Pyne, teamster, ½ day at \$2.25, \$1.69; Michael Ronan, teamster, ½ day at \$2.25, \$2.04; John C. Thompson, teamster, ½ day at \$2.25, \$1.69; Thomas Williams, teamster, ½ day at \$2.25, \$0.84; Jeremiah P. Scanlan, inspector, ½ day at \$2.75, \$2.41; Charles M. Driscoll, plumber, ½ day at \$2.75, \$1.20; Martin Dunlap, plumber's helper, ½ day at \$2.25, \$0.98; Reuben Overton, laborer, 1½ days at \$2.25, \$2.53; Patrick F. Mullen, inspector, ½ day at \$2.75, \$1.03; Michael Hines, stableman, ½ day at \$2.25, \$0.56; Bartholomew O'Leary, stableman, ½ day at \$2.25, \$0.56; John J. Gallagher, pipelayer, 1 day at \$2.50, \$2.50; Patrick Joyce, laborer, 1 day at \$2.25, \$2.25; Eugene Shea, watchman, 1 day at \$2.25, \$2.25; Arthur Christie, pipelayer, 1 day at \$2.50, \$2.50; John Rogers, watchman, 1 day at \$2.25, \$2.25.

Water Department (Income Division).

For the week ending Thursday, September 1, 1910:

P. J. Clougherty, laborer, ½ day at \$2.25, \$1.69; M. Dinneen, laborer, 1½ days at \$2.25, \$2.39; Thomas Dolan, plumber, 1½ days at \$3, \$3.19; Michael Fenton, plumber, ½ day at \$3, \$0.38; C. Fitzgerald, laborer, ½ day at \$2.25, \$1.20; Owen Gilloon, plumber, ½ day at \$3, \$0.56; B. Magee, carpenter, ½ day at \$3.50, \$1.31; E. Mahoney, laborer, ½ day at \$2.25, \$1.69; Thomas McAuliffe, laborer, ½ day at \$2.25, \$1.97; Frank McCarthy, laborer, 1 day at \$2.50, \$2.50; P. McCarthy, plumber, ½ day at \$2.75, \$0.34; M. McGrath, laborer, 1½ days at \$2.25, \$2.71; M. Mulkern, laborer, 1½ days at \$2.25, \$3.02; John H. O'Brien, laborer, ½ day at \$2.25, \$0.28; Thomas Ratchford, laborer, ½ day at \$2.50, \$0.63; Joseph Rice, tester, 1½ days at \$2.50, \$3.13; James Roche, laborer, ½ day at \$2.25, \$0.42; J. J. Shea, laborer, ½ day at \$2.25, \$0.28; Daniel Sullivan, laborer, ½ day at \$2.25, \$0.28; J. Sullivan, laborer, 1 day at \$2.25, \$2.25; T. Sullivan, plumber, ½ day at \$3, \$0.38; M. P. Welch, plumber, ½ day at \$2.75, \$0.34.

CONTRACTS AWARDED.

The following contracts for work, materials and supplies have been awarded with the approval of the Mayor. Those awarded without public advertisement are specially indicated. Week ending September 8, 1910:

PUBLIC BUILDINGS DEPARTMENT.

On September 2 the Mayor approved a contract with A. Varnerin Company for the reconstruction of Curtis Hall. Bids on this work, opened August 22, were as follows:

A. Varnerin Company, \$74,844; Ford & Denning, \$81,480; McGahey & O'Connor, \$101,390; John A. Rooney, \$85,320.

On September 2 the Mayor approved a contract with James P. Dwyer for installing heating and ventilating system in Curtis Hall. Bids on this work, opened March 29, were as follows:

James P. Dwyer, \$22,277; Ingalls & Kendrick, \$22,590; C. H. Sanborn, \$22,714; Alexander Duncan Company, \$22,647; F. W. Zemeir & Co., \$22,775; Lynch & Woodward, \$22,786; Pierce & Cox, \$23,293; W. H. Gallison Company, \$24,825; Buerkel & Co., \$25,576; Chase & Baker Company, \$25,720; J. J. Hurley & Co., \$33,980.

On September 2 the Mayor approved a contract with Michael Ahern for install-

ing plumbing in Curtis Hall. Bids on this work, opened April 5, were as follows:

Michael Ahern, \$6,237; W. H. Mitchell & Son Company, \$6,595; Edward C. Kelly, \$7,825; C. A. Bray Company, \$8,035; Buerkel & Co., \$8,461; W. N. McKenna Company, \$8,758.

On September 2 the Mayor approved a contract with the Dolan Electric Company for installing electrical system in Curtis Hall. Bids on this work, opened April 5, were as follows:

Dolan Electric Company, \$4,417; T. T. Kelly & Co., \$4,404; James Wilkinson & Co., \$4,415; Edwin C. Lewis, Inc., \$4,769; Martin Keough & Co., \$4,807; H. A. Holders, \$4,950; Alfred J. Hixon, \$5,095.

STREET DEPARTMENT (Highway Division).

On September 2 the Mayor approved a contract with Jeremiah J. Sullivan for constructing artificial stone sidewalks in Washington street. Bids on this work, opened August 29, were as follows:

Jeremiah J. Sullivan, \$1,409.60; James Doherty, \$1,499.40; Warren Brothers, \$1,809.60.

On September 8 the Mayor approved a contract with James Doherty for building with trap rock a macadam roadway in Ralston street, South Boston. Bids on this work, opened August 29, were as follows:

	Local Stone.	Trap Rock.
James Doherty.....	\$2,599 16	\$2,606 96
J. H. McCarthy.....	3,207 00	3,207 00
J. B. O'Rourke & Co.....	3,994 30	3,994 30

On September 8 the Mayor approved a contract with the Adams-Pond Company for laying artificial stone sidewalks in Beaumont street, Dorchester. Bids on this work, opened August 29, were as follows:

Adams-Pond Company, \$2,400; Warren Brothers, \$2,638.40; James Doherty, \$2,720; Jeremiah J. Sullivan, \$2,720; D. M. Biggs & Co., \$3,024.

On September 8 the Mayor approved a contract with the New England Structural Company for the reconstruction of Albany Street Bridge. Bids on this work, opened August 23, were as follows:

New England Structural Company, \$9,479; Boston Bridge Works, \$10,295.70.

On September 8 the Mayor approved a contract with George F. Rendle for repairing Broadway Bridge. Bids on this work, opened September 1, were as follows:

George F. Rendle, \$9,972; Lawler Brothers, \$10,212; William H. Ellis, \$10,932.50.

On September 8 the Mayor approved a contract with James Doherty for building with trap rock a macadam roadway in Leon street, Roxbury. Bids on this work, opened September 2, were as follows:

	Local Stone.	Trap Rock.
James Doherty.....	\$3,976 15	\$4,058 35
William J. Rafferty & Co..	4,104 03	4,186 23

WITHOUT ADVERTISING.

SUPPLY DEPARTMENT.

On September 2 the Mayor approved a contract awarded, without advertising, to the J. W. Bowman Company for two Stevens-Duryea commercial automobiles, to cost \$1,000 each, for use of the Health Department.

ADDITIONS AND ALLOWANCES TO CONTRACTS.

The following additions to and allowances on contracts have been approved by the Mayor:

FIRE DEPARTMENT.

Addition, amounting to \$62.25, on contract with Martin Flynn for Forest Hills engine house, on account of various items. Original contract, \$20,928; total additions, \$3,069.25; total deductions, \$1,032.79; contract as standing, \$22,964.46.

PUBLIC BUILDINGS DEPARTMENT.

Addition, amounting to \$85.50, on contract with A. Varnerin Company, dated December 10, 1909, on Curtis Hall building, on account of six iron braces for skylight. Deduction, amounting to \$285.50, for transom attachments, monitor sashes and fireproof blocks in gables of main skylight. Original contract, \$13,996; total additions, \$85.50; total deductions, \$285.50; contract as standing, \$13,796.

Deduction, amounting to \$2,240, on contract with A. Varnerin Company for heating and ventilating Curtis Hall, on account of eliminating certain work specified. Original contract, \$22,277; total deductions, \$2,240; contract as standing, \$20,037.

Addition, amounting to \$220, on contract with A. Varnerin Company for Curtis Hall building, dated September 2, 1910, for transom attachments for opening and closing monitor sashes. Original contract, \$74,844; total additions, \$200; contract as standing, \$75,044.

Everett and Stanley streets; one on Gladstone street, near Walley street; two on Walnut avenue, near Rockland street, Ward 21; one on Rockland street, near Walnut avenue, Ward 21, and to one pole of the Western Union Telegraph Company on North Harvard street, opposite Bertram street, Ward 25.

STREET COMMISSIONERS.

On September 2 the Mayor approved orders of the Board of Street Commissioners determining that no person sustains damages in his estate by reason of the laying out and construction of Danville street, West Roxbury, as a highway from Bellevue street to Wren street, and assessing benefits as follows:

Lot.	Amount.
2. John Hamilton.....	\$204 27
3. George W. Marden.....	224 64
4. Annie L. Nissen.....	219 08
5. Carleton E. Preston.....	213 56
6. George F. Bowes.....	208 04
7. Alice E. Fowler.....	151 50
10. Martha A. Tuttle.....	170 28
11. Frank J. and Josephine B. Nowell.....	200 00
12. Clarence H. Jones.....	200 00
13. Marie and Marie L. Soderstrom.....	200 00
14. Mason P. Currier.....	200 00
15. Mabel M. Swan.....	149 43
Total.....	\$2,340 80

Estimated Cost of Construction:	
Sewer construction.....	\$672 88
Street construction.....	4,000 00
Total.....	\$4,672 88

On the same date the Mayor approved similar orders as below:

That no person sustains damages in his estate by reason of the laying out and construction of Ainsworth street, West Roxbury, as a highway, and assessing benefits as follows:

Lot.	Amount.
1. James W. Laughlin.....	\$169 54
2. Clifford Devens.....	175 00
3. Clifford Devens.....	175 00
4. Clifford Devens.....	175 00
5. George L. Drake.....	175 00
6. Dorothy M. Clifford.....	175 00
7. Albert G. Clifford.....	175 00
8. George L. Drake.....	175 00
9. Anna M. Horn.....	175 00
10. Ella T. Hall.....	175 00
11. Harry A. Gilman.....	175 00
12. Annie B. Schmidt.....	220 50
13. Annie A. Hall.....	227 50
14. Susan E. Thrasher.....	195 65
15. Florence M. Adams.....	106 00
16. Julia M. Ely.....	209 11
17. Effie M. Bettley.....	153 05
18. George S. Genter.....	151 58
19. Mary E. Johnson.....	153 96
20. Mary E. Johnson.....	111 65
21. Heirs or devisees of William H. Devens.....	128 37
22. Bessie C. Poole.....	192 50
23. William G. Ferris.....	192 50
24. Izah M. Eaton.....	101 50
25. Daniel P. Sullivan and James W. Laughlin.....	350 00
26. Otis P. Day.....	192 50
27. Thomas G. Fowler.....	113 40
Total.....	\$4,719 31

Estimated Cost of Construction:	
Sewer construction.....	\$2,296 64
Street construction.....	8,600 00
Total.....	\$10,896 64

That no person sustains damages in his estate by reason of the laying out and construction of Intervale street, Roxbury,

as a highway from Blue Hill avenue to Normandy street, and assessing benefits as follows:

Lot.	Amount.
2. Simon Brodny.....	\$17 94
3. Simon Brodny.....	33 62
4. Sarah Zanditon.....	69 51
5. Sarah Zanditon.....	117 74
6. Sarah Isaacs.....	136 04
7. Sarah A. Kennedy.....	150 15
8. Chauncey C. Hathaway.....	151 20
9. Gertrude Levi.....	151 20
10. Mabel E. Reed.....	154 14
11. Annie Goldstein.....	132 51
12. Annie Goldstein.....	126 00
13. Toba Rosengard.....	126 00
14. David S. Smith.....	126 00
15. Charles Sudhalter.....	126 00
16. Charles Sudhalter.....	110 70
18. William Carp et al.....	22 95
19. William Carp et al.....	22 95
20. William Carp et al.....	22 95
21. Dora Flashman.....	57 37
22. Kate E. Morawski.....	151 20
23. Carrie W. Beal.....	151 20
24. Isaac Bornstein.....	151 20
25. Lena Swartz, Louis Nichols.....	157 50
26. Bessie P. Zwickler.....	144 90
27. Clare H. Moreau.....	223 26
28. Sarah Schotlender.....	121 90
29. Julius Kopans, Benjamin Kopans.....	125 33
30. Sarah Dreyer.....	101 81
31. Louis Weinbaum.....	109 16
32. Louis Weinbaum, Rosie Weinbaum.....	89 91
Total.....	\$3,382 34

Estimated Cost of Construction:	
Sewer construction.....	\$474 00
Street construction.....	5,100 00
Total.....	\$5,574 00

That no person sustains damages by reason of the laying out and construction of Granville street, Dorchester, as a highway from Adams street to Milton street, and assessing benefits as follows:

Lot.	Amount.
1. Edward K. Harris.....	\$349 66
2. Ella L., wife of Roderick Pepper.....	164 32
3. Bessie M., wife of Henry S. Clark.....	164 99
4. Warren W., Eliot W. and Margaret E. Reed.....	165 69
5. Bessie M., wife of Henry S. Clark.....	166 35
6. Hannah G. Dillaway.....	167 02
7. Bessie M., wife of Henry S. Clark.....	167 72
8. Bessie M., wife of Henry S. Clark.....	168 38
9. Bessie M., wife of Henry S. Clark.....	169 05
10. Bessie M., wife of Henry S. Clark.....	169 75
11. Bessie M., wife of Henry S. Clark.....	299 69
12. George A. Shackford.....	276 68
13. Jacob I. Nesson.....	180 39
14. Eva M., wife of Israel Nesson.....	184 27
15. James E. Hall.....	170 10
16. James E. Hall.....	170 10
17. Marthaett, wife of Lewis B. Noyes.....	170 10
18. Bessie M., wife of Henry S. Clark.....	170 10
19. Bessie M., wife of Henry S. Clark.....	170 10
20. Roza Dietz.....	170 10
21. Bessie M., wife of Henry S. Clark.....	170 10
22. Bessie M., wife of Henry S. Clark.....	290 52
Total.....	\$4,275 18

Estimated Cost of Construction:	
Sewer construction.....	\$227 50
Street construction.....	7,500 00
Total.....	\$7,727 50

That the following-named persons sustain damages in their estates by reason of the laying out and construction of Brinsley street, Dorchester, from Columbia road to Washington street, and award the amounts as below:

Bridget L. Guy, grade damages, \$250; Annie A. McLaughlin, grade damages, \$150.

Benefits resulting from this improvement were assessed as follows:

Lot.	Amount.
2. Isaac Alberts.....	\$64 93
3. Isaac Alberts.....	101 25
4. Mary L. Wetherell.....	141 75
5. Albert G. Morse.....	182 25
6. Albert G. Morse.....	202 50
7. Adelaide Squires.....	220 55
8. Edmund K. Baker, T. T.....	194 85
9. George A. Philbrick.....	228 96
14. Mary A. Mullen.....	134 04

16. Mary E. Gray.....	135 50
18. Ann Dillon et al.....	25 00
19. Heirs or devisees of Nicholas Dillon.....	45 00

Lot.	Amount.
20. Albert G. Morse.....	\$25 00
23. Alfred Anderson.....	124 32
24. Fannie Spiegel.....	210 60
25. Annie A. McLaughlin.....	176 00
26. Bridget L. Guy.....	176 00
27. Albert G. Morse.....	75 82
Total.....	\$2,729 02
Estimated Cost of Construction:	
Sewer construction.....	\$1,926 30
Street construction.....	5,600 00
Total.....	\$7,526 30

On September 6 the Mayor approved similar orders of the Board that the following named estates sustain damages by reason of the laying out and construction of Greenwood street, Dorchester, as a highway:

Charles L. Pierce, 1,973 square feet, \$500; Mary R. Hubbard, 591 square feet, \$150.

Benefits resulting from this improvement were assessed as follows:

Lot.	Amount.
1. Willard Welsh, T. T.....	\$60 02
2. Willard Welsh, T. T.....	107 69
3. Charles I. Pierce.....	103 07
4. Walter B. Good, T. T.....	20 82
5. New York, New Haven and Hartford Railroad Company.....	165 90
6. Emily Cameron.....	112 00
7. James F. Smith.....	127 22
8. Joseph A. Smith, Ellen F. Smith..	66 74
9. Bridget Tangney.....	66 85
10. John Donahue.....	86 80
11. John Donahue.....	86 80
12. Annie M. Smith.....	131 60
13. Annie M. Smith.....	140 00
14. Charles H. Greenwood.....	175 00
15. Charles H. Greenwood.....	137 20
16. Charles H. Greenwood.....	137 20
17. Charles H. Greenwood.....	137 20
18. Charles H. Greenwood.....	109 20
19. Charles H. Greenwood.....	109 20
20. Charles H. Greenwood.....	109 20
21. Charles H. Greenwood.....	109 20
22. Charles H. Greenwood.....	109 20
23. Abbie J. Jackson.....	137 20
24. Margaret Johnson.....	137 20
25. Charles H. Greenwood.....	137 20
26. Ellen C. McDermott.....	137 20
27. Charles H. Greenwood.....	137 20
28. Lucy A. Reynolds.....	140 00
29. Charles H. Greenwood.....	140 00
30. Charles H. Greenwood.....	140 00
31. Edward M. Green <i>et al.</i>	140 00
32. Charles H. Greenwood.....	140 00
33. Charles H. Greenwood.....	140 00
34. Adolph Hubbard.....	140 00
35. Charles H. Greenwood.....	140 00
36. Charles H. Greenwood.....	140 00
37. Charles H. Greenwood.....	140 00
38. Charles H. Greenwood.....	140 00
39. Charles H. Greenwood.....	140 00
40. Charles H. Greenwood.....	140 00
41. Charles H. Greenwood.....	140 00
42. Charles H. Greenwood.....	140 00
43. Charles H. Greenwood.....	103 60
44. Katherine F. Nelson.....	95 00
47. Harry Brooker <i>et al.</i>	25 00
48. Harry Brooker <i>et al.</i>	162 16
49. Thomas M. Smith.....	138 00
50. Thomas M. Smith.....	125 75
51. Isaac Harris.....	71 57
57. Maurice R. Tierney, Matthew J. Tierney.....	74 90
58. Mary Pepper.....	70 73
59. Robert C. Pepper.....	109 79
60. Charles H. Greenwood.....	50 00
64. Leah Rubenstein.....	108 00
65. Mamie Alexander.....	148 99
66. Samuel F. Bacheider.....	142 80
67. Alice M. Russell.....	116 17
70. Laura A. Giles.....	100 00
71. Alice M. Russell.....	140 00
72. William T. Beale, Mary W. Beale,	120 40
73. Charles H. Greenwood.....	109 30
77. Frederick Phillips.....	144 90
78. Charles H. Greenwood.....	140 00
79. Fannie E. Covington.....	100 00
82. William O. Putnam.....	240 84
83. Frederick K. Russell.....	123 77
88. Bertha Wilson.....	145 02
89. Charles H. Greenwood.....	546 00
	\$8,646 80

SALE OF LAND BY AUCTION.

The Mayor has approved the sale by public auction to Flora A. Ginty of a parcel of land located on Public Alley No. 444, containing 1,273 square feet, the amount paid being \$2,230.

ENTRANCE EXAMINATIONS FOR PUBLIC SCHOOLS.

The Boston Public Schools will reopen on Wednesday, September 14, 1910. Entrance examinations will be held as follows:

Latin Schools.—On Wednesday, September 14, 1910, at 9 o'clock a. m. Boys will be examined at the Public Latin Schoolhouse on Warren avenue; girls at the Girls' Latin Schoolhouse on Huntington avenue, near Longwood avenue. Candidates are required to pass an examination equivalent to that required for admission to the seventh grade of the elementary schools. The subjects of examination will be English language, including reading, writing, and spelling; geography; and arithmetic.

High Schools.—On Wednesday and Thursday, September 14 and 15, 1910, at 9 o'clock a. m., at the Normal Schoolhouse on Huntington avenue, near Longwood avenue. The subjects of examination will be English language, including reading, writing, spelling, grammar, and composition; history and civil government of the United States; geography; and arithmetic.

PAYMENTS TO DISABLED EMPLOYEES.

The following allowances have been made by the superintendent and approved by the Mayor:

STREET DEPARTMENT.

Daniel Hurley, Sewer Division, 28 days at \$2.25, \$63; Cornelius J. Murphy, Sewer Division, 23½ days at \$2.25, \$52.88; John P. Queenan, Sewer Division, 16 days at \$2.25, \$36.

LAND-TAKING FOR SCHOOL PURPOSES.

The Mayor has approved the finding of the Board of Street Commissioners that the sum that should be paid for damages to estates occasioned by a taking made for schoolhouse purposes on Dacia, Brookford and Danube streets, Dorchester, is as follows:

Thomas McAuliffe, 35,835 square feet, \$11,750.50.

PERMISSION TO SELL.

The Mayor has granted to the Water Commissioner permission to dispose, in trade, of horse No. 163.

The Mayor has granted to the Water Commissioner authority to sell a lot of old cast-iron pipe which was removed from a trench in Burroughs street, Roxbury, for an amount of about \$160.

TRANSFER OF APPROPRIATION.

The Mayor has approved the transfer of \$7,500 from the Reserve Fund to the Fire Department.

TO ASSIST BLIND PEOPLE IN CROSSING STREETS.

Whistles of official design which blind people can use in signaling policemen to help them across congested streets will soon be furnished every sightless person in Chicago. Chief of Police Steward has approved the plan and expects the traffic squad to recognize the whistles. A blast from one of the whistles, which will be different in sound from the regular traffic whistle used by patrolmen, will be a signal to crossing policemen to assist a blind person across a crowded thoroughfare.

A CIVIC IMPROVEMENT TRUST.

The movement under way in Toronto, Canada, to create a civic improvement trust will attract considerable attention. The Toronto proposal, which is being introduced by Controller Spence, would differ from an ordinary commission appointed by the city council or elected by the people in that legislation of the province would be asked to enable the civic trust to authorize the effective discharge of its special duties and it would be clothed with large powers. It is not proposed that the management of the parks or the regulations governing them should be taken out of the hands of the representatives of the people who use and own the parks system. The suggestion, as Mr. Spence points out, is that there be established a new administrative body, charged with a special and important civic duty. It would undertake the acquirement of parks or playgrounds, or the construction of boulevards, or the carrying out of street widenings or extensions, or other similar enterprises which the people's representatives had decided upon.

For instance, if it were deemed desirable to open a new street and the council had approved of the project, supervision of the details of this work would be committed to the trust, which would have power to buy the necessary land affected by the improvement, so as to preclude claims for damages against the city. Instead of taking the necessary 66 feet for the street the trust might purchase or take a strip of 250 or 300 feet, the extra portion of which would be greatly enhanced in value by being given frontages on the new street. The trust would sell the new lots, the profits on the land going towards the improvement, which would then be turned over to the city at a smaller cost than would have been put through in any other way. Any purchase for any other purpose could in a similar manner be most economically carried out and would relieve the city from certain legal liabilities which are always very troublesome because of the lack of direct and well-informed control of these matters, free from the influence of local personal appeals or possible election considerations.

This plan of a civic improvement trust has much to commend itself on the score of its freedom from civic politics, which is always a hampering influence in the way of direct and economical management of municipal financial business, and particularly in the matter of the purchase of land for public improvement. The membership of the trust would be made up of a few public-spirited and independent citizens with special capabilities for handling such business.—*Municipal World*.

EXTENSIVE MUNICIPAL REPAIR SHOP.

It is announced that a municipal repair shop, to combine the present shops of the various departments, will be established in the near future by the city of Milwaukee. The site will be on the river, so that boilers and machinery from the fireboats may be readily handled. All heavy machinery is to be on the first floor, and the shop will be laid out in such a way as to permit of indefinite expansion. The equipment will cover foundry, forge, machine and carpenter work. Aside from repairs, the intention is to have the city build much of the apparatus which it uses. This is done to some extent at present by the fire department.—*Municipal Journal and Engineer*.

CONCRETE MIXER PLANT FOR ROADBED REPAIRS.

The concrete mixing plant used in connection with the roadbed work of the Detroit United Railway is so arranged that there is no manual labor at any stage in its operation except in emptying cement bags and trimming, following the deposit of the material by the mixer. Owing to the character of the soil it becomes necessary on the main thoroughfares to reinforce the regular foundation with a broad concrete mat to withstand the hammering of the heavy city cars and suburban coaches which run over the lines. Dump cars, loaded with gravel by a locomotive crane at a dock in the suburbs of Detroit, are drawn to place by an electric motor car and their contents dumped between the rails of the track under construction. A car loaded with cement in bags is then run over the gravel pile and the cement deposited. A concrete mixer plant, mounted on wheels and provided with a scooping device, is run forward and a shovelful of the cement and gravel mixture scooped up, raised and discharged into a 5-cubic-yard hopper above the mixer, from which a charge of 2 cubic yards is delivered to the mixing drum. While the material is being mixed the machine is run back to the point of delivery and a batch of concrete is dropped between the rails and leveled off to the correct height by lowering a leveling board at the rear of the machine and running forward slowly. Trimming and final leveling is done by a crew of three or four men who follow behind the mixer.

The concrete mixer consists of a rigid platform of steel I-beams covered with a floor of $\frac{3}{4}$ -inch steel plate and resting upon two Peckham trucks, which are equipped with four 30 horse power motors. The mixing drum, of the hollow rotating type, is mounted on rollers on this platform and is rotated by a motor geared to it and resting on the same platform. The shovel for raising the aggregate to place in the hopper is raised and lowered by another motor geared to a windlass drum, both resting on the same platform. The hopper is suspended on a steel frame over the mixing drum and delivers the aggregate to this drum in batches of 2 yards as desired and can fill the drum from either side of the bin. The mixing drum is similar to those used in Smith mixers. A tank holding water enough for six batches is carried in the rear of the control platform. The shovel for loading the hopper is carried by two long channel bar arms on either side of the machine, one end of each bar being attached to the shovel and the other end being pivoted to a cast-iron arm suspended from the side of the platform. The whole is low enough to get a good push into the gravel pile and the arms are long enough to swing the shovel clear of everything and to bring it to a vertical position over the bin, where its bottom is tripped and the contents drop into the hopper. In working it is customary to load the drum with a batch of 2 yards first, then close the slides in the bottom of the hopper and load it to its capacity.

The mixer is handled by two men, who stand on a platform high in the rear of the machine, where all the apparatus is located for the control of the drum and shovel and the progress back and forth of the car. Six other men handle all material from the car and finish leveling on the track. The capacity of the mixer is about 180 cubic yards in 10 hours, or, counting in the time of transfer from line to line, repairs, etc., about 300 cubic yards in 24 hours. The entire cost of the plant for concreting, including the mixer, crane, 27

dump cars, 2 motor cars, gravel dock and miscellaneous tools, is approximately \$57,000. The saving per yard on the lowest price that the company is paying a contractor for laying concrete is \$1.25. The roadway maintenance of the Detroit United Railway is in charge of Mr. John Kerwin, superintendent of tracks, who devised the concrete mixer described.—*Engineering Record.*

CITY OF BOSTON.

PROPOSALS FOR ASPHALT PAVEMENT.

The Superintendent of Streets of the City of Boston, office 47 City Hall, invites proposals for asphalt pavement and regulating Kingston street, between Essex and Beach streets, city proper, and giving bond therefor of a surety company approved by the superintendent. Only proposals obtained at said office, filled out, signed by the bidder and left at said office before 12 o'clock m. of Friday, September 16, 1910, with a certified check for \$500, payable to and to be the property of the city if the proposal is not carried out, will at said hour and place be publicly opened and read. The proposals must be made in duplicate, the duplicate without check to be deposited by the bidder with the City Auditor previous to the time named for opening the bids. The undersigned reserves the right to give preference to the proposals of bidders agreeing to pay the trade unions' rate of wages, and the right to reject any or all proposals, and no proposals will be accepted unless a fair, reasonable price is bid for each item. The proposals should be inclosed in an envelope, sealed, and marked "Proposal for Asphaltting Kingston Street."

LOUIS K. ROURKE,
Superintendent of Streets.
Boston, September 8, 1910. (Sept. 10.)

CITY OF BOSTON.

ELECTRICAL FIXTURES FOR THE NEW LIBRARY BUILDING, SEDGWICK STREET, JAMAICA PLAIN, WARD 22.

The Superintendent of Public Buildings of Boston, Massachusetts, invites proposals for furnishing new electrical fixtures for the new Library Building, Sedgwick street, Jamaica Plain, Ward 22, according to plans and specifications, and giving a bond of a surety company therefor, satisfactory to the superintendent, in the sum of \$400. Only proposals obtained at the office of the Superintendent of Public Buildings, Room 30, Old Court House, Boston, filled out, signed by the bidder and left before 12 o'clock m. of Monday, September 19, 1910, at said office, with a certified check on a Boston bank for \$200, payable to and to be the property of the City of Boston if the proposal is not carried out, will then and there be publicly opened and read. The bid must be made in duplicate, the one with the check to be sent as above, the duplicate to be sent to the City Auditor, City Hall, previous to the time named for opening bids. The undersigned reserves the right to reject any and all proposals and give preference to bidders paying the trade unions' rate of wages.

M. J. FISH,
(Sept. 10.) Superintendent of Public Buildings.

CITY OF BOSTON.

PROPOSALS FOR THE DISPOSAL OF REFUSE.

The Superintendent of Streets of the City of Boston, office 47 City Hall, invites proposals for the disposal of refuse for a term of 10 years from January 1, 1912, and giving bond therefor of a surety company approved by the superintendent. The proposals can be obtained at said office on and after September 1, 1910, and must be filled out, signed by the bidder and left at said office before 12 o'clock m. of Monday, October 17, 1910, with a certified check for five thousand dollars (\$5,000), payable to and to be the property of the city if the proposal after acceptance is not carried out, and will at said hour and place be publicly opened and read. Proposals must be made in duplicate, the duplicate, without check, to be deposited by the bidder with the City Auditor previous to the time named for opening the bids. The undersigned reserves the right to give preference to the proposals of bidders agreeing to pay the trade unions' rate of wages and the right to reject any or all proposals. The proposals should be inclosed in an envelope, sealed, and marked "Proposal for Disposal of Refuse."

L. K. ROURKE,
Superintendent of Streets.
Boston, Aug. 25, 1910. (Sept. 10-17.)

City of Boston — Street Department NOTICE

The Board of Street Commissioners, in accordance with chapter 393 of the Acts of 1906, have passed orders for the laying out and construction of the following highways:

SOUTH BOSTON.

Emmet street, between East Third street and East Second street.

WEST ROXBURY.

Ainsworth street, between Centre street and South street.

Danville street, between Bellevue street and Wren street.

ROXBURY.

Brinsley street, between Columbia road and Washington street.

Granville street, between Adams street and Milton street.

ROXBURY AND DORCHESTER.

Intervale street, between Blue Hill avenue and Normandy street.

Notice is hereby given that the Street Department is about to do the work contemplated in said orders, and that all work to be done in said highways by all persons or corporations having rights in the same to lay or repair either sewer, gas, water or other pipes must be done before MONDAY, October 3, 1910, as after that time no permits for openings will be granted until two years after said highways are completed.

LOUIS K. ROURKE,
Superintendent of Streets.
Boston, September 6, 1910. (Sept. 10-17-24.)

City of Boston — Street Department NOTICE

The Board of Street Commissioners, in accordance with chapter 393 of the Acts of 1906, have passed orders for the laying out and construction of the following highways:

DORCHESTER.

Morton street, from Blue Hill avenue easterly for a distance of about 700 feet.

Wales street, between Harvard street and Talbot avenue.

Westcott street, between Talbot avenue and West Park street.

West Park street, between Bernard street and the New England railroad.

ROXBURY.

Leon street, between Ruggles and Greenleaf streets.

Rochdale street, northeasterly from Cobden street.

Notice is hereby given that the Street Department is about to do the work contemplated in said orders and that all work to be done in said highways by all persons or corporations having rights in the same to lay or repair either sewer, gas, water or other pipes must be done before MONDAY, September 19, 1910, as after that time no permits for openings will be granted until two years after said highways are completed.

LOUIS K. ROURKE,
Superintendent of Streets.
Boston, August 18, 1910. (Sept. 10.)

CITY OF BOSTON.

TO GRADING CONTRACTORS.

The Schoolhouse Commissioners of the City of Boston invite sealed proposals for grading grounds about Blackinton School, Blackinton street, East Boston, Boston, Mass., and giving bond of a surety company therefor in the sum of \$500. Only proposals obtained at the office of the commissioners, 120 Boylston street, signed by the bidder and left before 12 o'clock m. of Thursday, September 15, 1910, at said office, with a certified check for \$500, payable to the city if the proposal is not carried out, will then and there be publicly opened and read. The bid must be made in duplicate, the one with the check to be sent as above, the other to be sent to the City Auditor, City Hall. The commissioners reserve the right to reject any and all proposals and to give preference to bidders paying the trade unions' rate of wages.

CHARLES LOGUE,
JOHN F. KENNEDY,
CHARLES B. PERKINS,
Commissioners.
(Sept. 10.)

NOTICE TO SUBSCRIBERS.

Subscribers will find the expiring date of their subscription stamped upon the mailing wrapper. As payment must be made in advance, remittance should be made on or before that date.

AUTOMOBILE FIRE APPARATUS.

Several papers were read before the convention of the International Association of Fire Engineers at Syracuse giving the opinions of fire chiefs concerning the use of automobile fire apparatus. Among these were one by Charles S. Allen, chief of the fire department of Trenton, N. J., and another by Frederick G. Reynolds, chief of the fire department of Augusta, Ga.

Chief Reynolds stated that his department has had a Webb auto engine in commission since October 6, 1909, since which time it has responded to 109 alarms without a single failure from any cause. On the night following its arrival, before it had been tested, it ran 2½ miles to a fire and had 1,200 feet of hose stretched in less than six minutes; and in the chief's opinion saved at least \$10,000 to \$15,000 worth of property at this one fire. Later, at a cotton mill fire, this engine played two 1½-inch streams for three-quarters of an hour without any change in pressure, obtaining high pressure immediately through 1,500 feet of hose; and it is the chief's opinion that the quick connection and instantaneous high-pressure saved an adjoining mill from total destruction.

Recognizing the efficiency of the machine as a hill climber and distance coverer an adjoining community 2½ miles distant, the road to which is on a 10 to 11 per cent grade, arranged to pay \$2,500 a year to the city if it would send the auto apparatus in response to calls. Says the chief: "I become more wedded to the idea that for long or short distances, hill climbing, through sand and clay, the problem of 'getting there' is practically settled by the auto fire apparatus."

The advantages he finds are economy, speed, and territory covered, and ability to remain under a shower of sparks which would require the removal of the horses and possibly the consequent destruction of the engine by fire. Concerning economy, he states that an auto engine dispenses with three horses to an engine and two horses to a hose wagon, a total of five horses costing \$1,500. Moreover, the driver of the car handles the engine at the fire, if needed, thereby dispensing with the services of the engineer, stoker, driver of the engine and driver of the hose wagon. Augusta has not decreased the force, however, but has retained these men in the company, adding them to the fighting force. On account of the speed, an auto engine is believed not only to reach a fire quickly, but to cover at least three times as much territory as a horse-drawn apparatus.

Chief Reynolds considers the 6-inch pneumatic demountable rim tire the best. He has not had a single mishap with these while responding to fires, and the total expense for tires to date, including renewals and repairs on two large machines and a chief's car, has been only \$200. He recommends electric headlights which can be lighted by simply pressing a button on leaving the house and the current shut off on reaching the fire.

He states that one gallon of gasoline, at 12 cents a gallon, will run the engine at high speed 8 to 10 miles. While pumping two streams of water it will require from 7 to 10 gallons per hour, according to the volume pumped. He does not find it necessary to have an expert for handling the cars, but that any cool, sober man with ordinary common sense can handle them after twelve one-hour lessons. All of the recent accidents to auto fire apparatus he believes were due to too high speed or over-ambition of inexperienced drivers.

Chief Allen in his paper describes some

of the objections to auto apparatus. The first and most serious of these in his opinion is the excessive weight of load which is now being carried on pneumatic tires, the various auto engines weighing from 8,000 to 9,000 pounds loaded, which is in his judgment too much for this kind of tire. The pump problem also he does not consider as having been finally and satisfactorily solved.

"The various types now used on autos are not as satisfactory as we would like, and we must admit that weight and space are two important factors to be considered in the construction of an auto engine. The ideal pump for this work should be light and compact; of large capacity, and so geared to the motor that the power may be applied as direct as possible, and one requiring the least possible energy to operate, as under present conditions we find no spare energy when pumping up to full capacity. While our present pump has given us excellent service and no trouble, yet I feel that the present types of pumps used can and will be improved upon in the near future.

"The desire of some departments to have the auto engine equipped with large, heavy chemical tanks in addition to its present load is wrong, and should be discouraged in every case: You cannot carry the entire equipment used at a fire on one piece of apparatus and do it safely, and I might say such a combination does not work well, as the chemicals are wanted in front of the building and the engine should be at the hydrant, connected and ready for immediate use should the chemicals fail. Therefore, I do not recommend such a combination."

In making a comparison as to the cost of horse and auto apparatus, Chief Allen gives the figures for two companies, one an auto company with a crew of seven men, the other an engine company with a crew of nine men, both companies located in the same district and doing the same work. The supplies and repairs for the auto company for a period of ten months amounted to \$151.60, and the salaries of the seven men to \$5,770; a total of \$5,921.60. The supplies and repairs of the engine company during the same time amounted to \$885.41, and the salaries of the nine men to \$8,129.80; a total of \$9,015.21. This shows a saving of \$3,093.61 in favor of the auto company.

"The difference in cost of maintenance, as you will note, is the employment of two less men on the auto company, and the cost of feeding, shoeing and caring for four or five horses of the engine company. In fact, when the auto is idle there is no expense attached to it, while the engine company has a fixed charge of expense at all times. The saving of two men's salaries is a large item of expense, without impairing the efficiency of the company, and I might say that we get better results from seven men on the auto than we do from nine on the engine company. Another good feature of the auto is the dispatch in reaching fires. This you all know is a very important factor, and I have no doubt that chiefs who are using the auto as a conveyance have had this feature brought forcibly to their attention. The auto in responding to a call in the business or congested section of the city and running at a speed of 15 or 20 miles an hour is always under full control, and is less liable to accident than the horse-drawn apparatus going at much less speed. Driving an auto engine at high speed through the city does not pay, and the practice should be discouraged, as the small amount of time saved does not warrant the risk taken.

"Another feature of the auto engine is the efficient service rendered in the early stages of the fire. You are not delayed by low steam pressure, a poor fire, or an incompetent stoker, as frequently occurs with the engine; but as soon as the auto is connected and the water is turned on, in less than one minute you have the full capacity of your engine, if you wish; the stream is just as good the first minute as it will be at any time of the fire, and we find it a decided advantage to have a stream that will cover an area of from 200 to 225 feet right at the beginning of a stubborn blaze.

"The auto engine has traveled through the snow, and for hill climbing is a decided success. During the past winter we had considerable snow in our section of the country, and all of our auto apparatus was given a severe test in responding to calls; and I might say that we were able to go through snow drifts where four horses would not take the same load. In fact, the performance of the auto in the snow was far beyond our expectations, and we have no hesitancy in saying that it is the only safe apparatus to use in the snow."

The method of using the auto engine in Trenton is as a sort of "first aid." The auto is generally the first apparatus to reach the fire, and it immediately gets to work, if necessary, and endeavors to put it out. If it is found that other apparatus is required, the horse apparatus is sent for and as soon as it is at work on the fire the auto engine is withdrawn and returns to a central point to attend to other fires which may break out while the horse apparatus is thus engaged. By this method the auto is not required to do much pumping, but is rather confined to the duty in which it excels, that of rendering service in any part of the city on short notice.—*Municipal Journal and Engineer.*

NEW YORK HAS MODEL WEIGHTS AND MEASURES ORDINANCE.

The new weights and measures ordinance which went into effect August 1 amends the old ones relating to weights and measures and is the work of Mayor William J. Gaynor, who has devoted much time to the work of reconstructing the Bureau of Weights and Measures, as well as creating new laws and rules for the better protection of the public against "short-weight" dealers. All scales, weights and measures must hereafter be tested and sealed at the Bureau of Weights and Measures. Any change after this test will subject the owner to a fine of \$100. The new ordinance prohibits the sale of butter in prints unless it is weighed in the presence of the consumer, each print being devoid of wrappings of any character. In the case of ice the weight must be demonstrated immediately before delivery. Violation of the new ice regulation means a fine of \$50 for each offence. Short-weight scales are to be confiscated as formerly, but the new ordinance provides that a fine shall be imposed where the owner is found to be willfully in possession of such scales.

Short measure devices, such as pails and baskets with false bottoms and cans with double interiors, are prohibited under the penalty of a fine of \$100. In addition, Mayor Gaynor has caused Police Commissioner Baker to bestow power of arrest on inspectors of weights and measures who now may take short weight dealers and peddlers into custody on the spot.—*Municipal Journal and Engineer.*

DELINQUENT TAX SALES.

CITY OF BOSTON.

CITY COLLECTOR'S NOTICE.

The owners and occupants of the following described parcels of real estate situated in the City of Boston, in the County of Suffolk and Commonwealth of Massachusetts, and the public are hereby notified that the taxes and assessments thereon severally assessed for the years 1900, 1902, 1903, 1904, 1905, 1906, 1907 and 1908, according to the lists committed to me as City Collector of taxes and assessments of said City of Boston, including the assessments for the suppression of gypsy and brown-tail moths, levied under the provisions of chapter 381, Acts of 1905, and chapter 268, Acts of 1906, remain unpaid, and that the smallest undivided part of each of said estates sufficient to satisfy said taxes and assessments with interest and all legal costs and charges, or the whole of each of said estates, if no person offers to take an undivided part thereof, will be offered for sale by public auction at the City Collector's office, room numbered eleven, in the basement of City Hall, in said City of Boston, on Wednesday, September 28, 1910, at 9.30 o'clock a. m., for the payment of said taxes and assessments, with interest, costs and charges thereon, unless the same shall be previously discharged.

The sums set against the following descriptions of the several estates show the amounts due thereon respectively for the taxes and assessments for the nonpayment of which each of said estates is to be sold, but not including the costs and interest thereon and costs and charges incident to this sale.

WARD ONE.

Samuel Barkin, set off to Anna Hill—Building and about 2,500 feet of land, numbered 213 Princeton street, tax for 1908.....	\$39 60
James Biggio (Bk. 12, p. 3)—About 2,056 feet of land on the southwesterly side of Boardman street, adjoining an estate of Michele Sacco (numbered 16), apportionment of sewer assessment for 1908.....	9 27

(Bk. 13, p. 186) Also about 5,340 feet of land on the southerly side of Brookdale road, being lot 47, E. S. Smilie plan, dated January, 1899, recorded with Suffolk Deeds, Book 2589, page 401, apportionment of sewer assessment for 1908. 13 82

H. Fisher Eldredge (Bk. 15, p. 250)—About 3,600 feet of land on the westerly side of Brackett street, being the easterly part of lot 24, Charles A. Pearson plan, March 18, 1897, recorded Suffolk Deeds, Book 2428, page 226, apportionment of sewer assessment for 1908. 2 46

(Bk. 15, p. 250) Also about 4,751 feet of land on the southerly side of Faneuil street, being the easterly part of lot 15, same plan, apportionment of sewer assessment for 1908. 2 47

(Bk. 15, p. 250) Also about 5,203 feet of land on the easterly side of Brackett street, being lot 14, same plan, apportionment of sewer assessment for 1908. 3 22

(Bk. 15, p. 250) Also about 3,600 feet of land on the westerly side of Brackett street, being the easterly part of lot 18, same plan, apportionment of sewer assessment for 1908. 2 41

(Bk. 15, p. 251) Also about 3,200 feet of land on the easterly side of Brackett street, being the westerly part of lot 12, same plan, apportionment of sewer assessment for 1908. 3 22

(Bk. 15, p. 251) Also about 3,600 feet of land on the westerly side of Brackett street, being the easterly part of lot 19, same plan, apportionment of sewer assessment for 1908. 2 35

(Bk. 15, p. 251) Also about 3,600 feet of land on the westerly side of Brackett street, being the easterly part of lot 20, same plan, apportionment of sewer assessment for 1908. 2 30

(Bk. 16, p. 40) Also about 3,200 feet of land on the easterly side of Brackett street, being the westerly part of lot 11, same plan, apportionment of street construction assessment for 1908. 12 07

(Bk. 16, p. 41) Also about 3,600 feet of land on the westerly side of Brackett street, being the easterly part of lot 24, same plan, apportionment of street construction assessment for 1908. \$13 58

(Bk. 16, p. 42) Also about 4,751 feet of land on the southerly side of Faneuil street, being the easterly part of lot 15, same plan, apportionment of street construction assessment for 1908. 8 88

(Bk. 16, p. 43) Also about 3,200 feet of land on the easterly side of Brackett street, being the westerly part of lot 12, same plan, apportionment of street construction assessment for 1908. 12 07

(Bk. 16, p. 43) Also about 5,203 feet of land on the easterly side of Brackett street, being lot 14, same plan, apportionment of street construction assessment for 1908. 7 78

(Bk. 16, p. 42) Also about 3,600 feet of land on the westerly side of Brackett street, being the easterly part of lot 13, same plan, apportionment of street construction assessment for 1908. 13 58

(Bk. 16, p. 42) Also about 3,600 feet of land on the westerly side of Brackett street, being the easterly part of lot 19, same plan, apportionment of street construction assessment for 1908. 13 58

(Bk. 16, p. 42) Also about 3,600 feet of land on the westerly side of Brackett street, being the easterly part of lot 20, same plan, apportionment of street construction assessment for 1908. 13 58

Michael Flaherty (Bk. 14B, p. 630)—Building and about 5,871 feet of land, numbered 64 and 66 Tremont street, apportionment of street construction assessment for 1908. 14 12

Florence O. Fuller (Bk. 13, p. 186)—About 5,472 feet of land, on the westerly side of Faneuil terrace (formerly Allston terrace), being lot 44, E. S. Smilie plan, dated January, 1899, recorded Suffolk Deeds, Book 2589, page 401, apportionment of sewer assessment for 1908. 15 39

Jane Grace—Building and about 7,500 feet of land, numbered 62 Waverly street, assessment for the suppression of gypsy and brown-tail moths for 1907. 55

John H. Higgs and Daniel P. Miner—About 20,250 feet of land, on the southerly side of Webster street (formerly Perthshire road), being lot E. H. T. Whitman plan, dated August 21, 1893, recorded Suffolk Deeds, Book 2368, page 232, assessment for the suppression of gypsy and brown-tail moths for 1907. 1 43

Margaret B. Keefe—About 3,780 feet of land on the northerly side of Gerrish street, being lot 50, shown on Assessors' plans, Volume 11, page 92, on file with Suffolk Deeds, tax for 1908. 3 30

Also about 5,737 feet of land on the northerly side of Gerrish street, being lot 49, same plan, to be sold for tax for 1908. 4 95

(Bk. 7, p. 151) Then for apportionment of sewer assessment for 1908. 11 28

Also about 3,412 feet of land on the southerly side of Newton street, being a lot shown on Assessors' plans, Volume 11, page 92, on file with Suffolk Deeds, to be sold for tax for 1908. 4 95

(Bk. 7, p. 150) Then for apportionment of sewer assessment for 1908. 19 55

Annie M. Kelley—About 737 feet of land on the southeasterly side of Collidge road, being the westerly part of lot 43, E. W. Bowditch plan, dated November, 1890, recorded Suffolk Deeds, Book 1999, page 593, tax for 1908. 3 30

Melvin M. Lee (Bk. 17, p. 192)—Buildings and about 4,400 feet of land, numbered 245 and 247 Cambridge street, apportionment of sewer assessment for 1908. 17 33

Daniel M. O'Connell Heirs or devisees—Buildings and about 9,240 feet of land, numbered 9 and 9 rear Winship street, to be sold for tax for 1907. 85 86

Then for tax for 1908. 82 50

Then for assessment for the suppression of gypsy and brown-tail moths for 1907. 87

Also building and about 3,139 feet of land, numbered 13 Winship street, tax for 1908. 23 10

Also buildings and about 25,804 feet of land, numbered 15, 19, 21 and 23 Winship street, tax for 1908. 145 20

Charles W. Parker, William W. Kelechner and Arthur W. Stevens, Trustees, Westminster Company—About 7,970 feet of land on the southwesterly side of Wallingford road, being a lot not numbered, shown on Aspinwall & Lincoln plan, dated December 7, 1903, recorded Suffolk Deeds, Book 2941, page 130, tax for 1908. 39 60

Roderick Richardson Heirs or Devises

—About 3,457 feet of land on the northerly side of Richardson street, being lot 6, T. Howard Barnes plan, dated July 2, 1901, recorded Suffolk Deeds, Book 2792, page 433, assessment for the suppression of gypsy and brown-tail moths for 1907.....

\$3 00

Also about 3,150 feet of land on the northerly side of Richardson street, being lot 5, same plan, for the suppression of gypsy and brown-tail moths for 1907.....

2 50

Also about 3,720 feet of land on the northerly side of Richardson street, being lot 4, same plan, for the suppression of gypsy and brown-tail moths for 1907.....

4 00

M. Thomas Roddy Heirs—Buildings and about 19,299 feet of land, numbered 58, 60, 60 rear, 62, 64, 66, 68, 68 rear and 68 first, 68 second, 68 third, 68 fourth, 68 fifth and 68 sixth doors, Market street, assessment for the suppression of gypsy and brown-tail moths for 1907.....

2 09

Albert C. Smith (Bk. 7, p. 157)—About 3,383 feet of land on the southerly side of Newton street, adjoining an estate of Lizzie A. Vose (numbered 43), apportionment of sewer assessment for 1908.....

17 90

John J. Tatten—Building and about 6,331 feet of land, numbered 8 School street, assessment for the suppression of gypsy and brown-tail moths for 1907.....

50

Annie H. Waters—Buildings and about 27,000 feet of land, numbered 25 Oakland street, tax for 1908.....

99 00

Willard Welsh—About 20,000 feet of land on the westerly side of Brooks street, being lot 137, shown on Assessors' plans, Volume 11, page 79, on file with Suffolk Deeds, to be sold for tax for 1908.....

29 70

(Bk. 7, p. 142) Then for apportionment of sewer assessment for 1908.....

22 59

Also about 20,000 feet of land on the westerly side of Brooks street, being lot 139, same plan, to be sold for tax for 1908.....

29 70

(Bk. 7, p. 142) Then for apportionment of sewer assessment for 1908.....

22 59

(Bk. 16, p. 43) Also building and about 3,200 feet of land, numbered 15 and 17 Brackett street, apportionment of street construction assessment for 1908.....

12 07

Joseph J. Wilde—Building and about 2,487 feet of land, numbered 16 and 18 Spring street, tax for 1908.....

54 45

Also about 689 feet of land on the northerly side of Spring street, being the easterly part lot 17, D. W. Hyde plan, dated December 3, 1892, recorded Suffolk Deeds, Book 2169, page 447, tax for 1908.....

1 65

Also building and about 2,278 feet of land, numbered 24 Spring street, tax for 1908.....

19 80

Hyman Uroff (Bk. 7, p. 140)—About 18,390 feet of land on the northwesterly side of Bigelow street, being lot 47, Whitman & Breck plan, dated October, 1887, recorded Suffolk Deeds, at end of Book 1815, apportionment of sewer assessment for 1908.....

16 30

BOWDOIN S. PARKER,

Collector of Taxes for the City of Boston.

EMERGENCY REPAIR GANGS.

Mayor J. E. Reyburn of Philadelphia has put into effect his plan for having small street repairs done by an emergency gang that will respond so speedily to request for repairs that the damage may be patched up before it grows into an expensive undertaking. Recently a request was made to the highway bureau to have an opening repaired at Seventh and Chestnut streets, where the pavement became broken. Three hours later the repairs had been made. When the mayor was asked about the speed with which repairs are being made he admitted that he had a repair gang at work. "We have no authority to do this," said the mayor, "but we can't wait for councils to pass an ordinance. The city is losing money by neglected repairs. We would have to send for a contractor under the old system and then wait days for him. Now we have the work done at once and will save the city a great sum of money. As soon as the councils reconvene I will ask for the passage of an ordinance creating an emergency repair gang for the streets."

THE FIREPROOFING OF ROOFS.

Architects and builders are fast coming to realize the need and importance of fireproof roof construction as pointed out in an article in Insurance Engineering. Investigations conducted after the great conflagrations in San Francisco, Baltimore and Chelsea, have clearly shown that the mode of progress in any large conflagration will be from roof to roof rather than from wall to wall. With a view to reducing fire risk in this direction to a minimum, insurance underwriters and architects are urging the general use of metal or tile as a roofing material.

This roof problem is a difficult one, calling for much greater consideration than is usually bestowed upon it. It is an inexplicable fact that an architect when planning a costly structure should adopt every known means of rendering walls and partitions fireproof and then nullify his efforts by topping the building with a roof of highly inflammable material. Nor have the framers of building laws in our large cities given to this matter the consideration it undoubtedly demands. They specify with great exactness the form and material of cornices with a view to protecting a building from flames which might come from the windows of an adjoining structure, but in the matter of roof construction the provisions are usually vague and indefinite. This, too, despite the fact that the roof is nowadays recognized as the most vulnerable point in the average building.

Western cities are already convinced of the value of metal shingles on houses where the roofs are of hipped or mansard type. The result of this departure is shown in the greatly decreased fire risk in those sections where it has been adopted. These shingles are made in a variety of shapes and are put on in the manner of ordinary shingles. No solder is used, their adjustment being secured by means of water-tight seams. As they are made to imitate wood shingles in appearance they answer the architectural requirements.

Heretofore the chief objections to metal roofs was on the ground of their cost and weight. Modern developments have largely removed these objections and roofs of pressed or stamped steel or iron are to-day no more costly than ones of wooden shingles. Weight has likewise been reduced, so that a square yard of metal roofing will weight but a trifle heavier than the same area of wood shingle.

Proper protection in this matter of roofs will not, of course, secure entire immunity from fire risk nor greatly lessen insurance rates, but it will appreciably reduce the risk. The danger from flying sparks would be greatly lessened, and the spread of conflagrations would be retarded in no small measure.

PROPERTY OWNERS MUST PAY FOR OCCUPYING SIDEWALKS.

At the regular meeting of the city commissioners, Mayor Davis recommended, in regard to the much discussed sidewalk basement entrance for which so many builders have petitioned, that each company or individual who erects or has erected already a building which has a sidewalk entrance to the basement be given a contract to sign which will make them pay to the city in proportion to the benefits received from their use of the walk. Contending that the walk is city property and belongs to the public, the Mayor argued that the city should receive some benefit from the public being inconvenienced.—*Municipal Journal and Engineer.*

CHICAGO SUBWAY LITIGATION.

Chicago subway litigation reached a final stage on June 29 in a decision of the Supreme Court of Illinois, which sustained decisions of Judge George A. Carpenter of the Circuit Court, that the city of Chicago had the right to build subways, and to use the traction fund, amounting to over \$4,000,000, for that purpose. The suits were brought to enjoin the payment of the expenses of the local transportation committee in subway investigation. For some months past the city has had a large force of engineers working on the subway problem, and as this decision removes the last obstacle in the progress of this important undertaking, there seems to be no reason why the city government should not proceed at once with definite plans and in the near future with construction. These subways will involve many features of interest to engineers, among which will be extensive down town storage facilities for cars when not in service, thus reducing the "dead" mileage caused by hauling empty cars from the down town section in the morning and back again in the evening to meet needs of traffic during rush hours. When completed the subways will be owned by the city. The sum of \$4,000,000, above mentioned, represents the city's share of the net traction receipts for three years and according to the decision is now available for appropriation by the City Council. In one suit the claim was made that the city had no right to build a subway, and in another that the city could spend the money received from the traction companies only in the purchase of the street railway properties. In the light of these claims it is interesting to note that the decision of the Supreme Court states that the city has power to acquire or construct street railways and that the term "street railways," properly construed, means elevated, surface or underground railways. Furthermore, it appears that the city may expend for such purposes either the special traction fund or any other available corporate funds belonging to the city. It is thus seen that in this decision the court includes in the term street railway not only surface lines but also those above or below the surface as well. The importance of this decision to the cause of improved transportation facilities in Chicago can hardly be overestimated, as it clears the way for immediate action, and it is hoped that steps will at once be taken toward affording some relief from the present congestion.—*Engineering Record.*

NO MORE PLAYGROUND SITES.

Philadelphia, Pa.—At a meeting of the Playground Association last week it was agreed that no more offers of sites for playgrounds should be considered for the present, owing to the expense which their opening and maintenance would necessitate. It was shown that the expense of maintaining the playgrounds at present is about \$1,000 a month, without considering the cost of games, supplies, etc.—*Municipal Journal and Engineer.*

CITY HALL MADE TO FIT.

Des Moines is building a city hall, and it has adopted an interior plan that will fit the commission system under which that city is governed. Instead of cutting the two lower floors up into separate rooms, the whole space is left open and merely railed in for the various users. This is held to typify the unity of the city government.

mation, comments and copies of ordinances which were too extensive to be embodied in the table but which seem of sufficient interest to be given at some length.

The Chief Highway Engineer of Boston, Joshua Atwood, 3d, in commenting upon the laying of all house connections, even to unoccupied property, which is required by the Boston ordinances, states: "The law has been in effect some years, and it was found that house connections, laid to vacant lots, did not answer the purpose some years afterward when a readjustment of lot line would be made; so that of recent years a great deal of discretion has been used by the various city departments as well as by public service corporations as to the matter of laying house connections to the property lines."

At Hartford, Conn., house connections are required to be laid, but Assistant City Engineer Roscoe N. Clark states:

"The gas light company and the board of water commissioners, which is a branch of the municipal government, are inclined to co-operate with the street board as far as possible in this matter. The board of water commissioners in general disapprove of laying service pipes from their mains to the curb unless there is a prospect of their being immediately put in use. They urge as a reason for this that short dead-end pipes with no flow of water through them are bound to rust out within a comparatively short time; which will necessitate their removal before the property, which they were designated to serve, has been built upon."

In Daytona, Fla., there is little trouble from house connections, both because the mains are to a large extent laid in the parkways, of which there is one 25 feet in width on each side of the 100-foot streets; and because the water and gas connections are generally not laid in dug trenches, but are driven through the sandy soil with wooden mauls, a cap having first been placed on the end of the pipe to enable the same to be driven without being filled with dirt.

In Cincinnati, Ohio, Mr. Robert Laidlaw, general superintendent of water works, states that there is being enforced a law passed by the last Legislature giving the director of public service the right to order all mains laid and lateral branches put in to the curb for all water and service pipe before a new street improvement is made; and on the refusal of the property owner to put in such branches the city can lay the pipes and assess the cost against the property, collecting it in the same way as taxes are collected.

The charter of the city of Milwaukee requires that no street shall be paved or repaved unless the water, sewer and gas mains be first laid in such streets, and that "The board of public works cause water and gas service pipes and house drains to be first laid in such street, at the cost of the property fronting such street, from the main sewer and water and gas mains in such street to the curb line on either side of the street, at intervals of not less than 20 feet along the whole length of such paved street, excepting at the street and alley crossings; and the board of public works shall give notice to the owners or occupants of the property adjoining such paved street, by publication thereof for six days in the official papers, requiring them to do such work opposite their respective lots, according to a plan and specification to be before prepared and on file in the office of said board, showing the location and size and the kind and quality of material of such lateral sewers or drains and water and gas service

pipes; and if such owners or occupants shall refuse or neglect to do the same before the paving of said street and within ten days after the publication of such notice, the said board may procure the same to be done and charge and assess the expense thereof to the lots or parts of lots fronting upon such work."

Mr. H. N. Ruttan, city engineer of Winnipeg, Manitoba, states that some years ago it was compulsory to carry house connections to the curb line where the property was not built upon, but it was found that not more than 10 per cent of the connections so laid were ever used, they not being in the exact position required by the property owners when the buildings were erected. The connections were very expensive and laying them in advance did not seem to have any effect on the cutting up of the pavement.

In Pawtucket, R. I., according to City Engineer George A. Carpenter, the city sees that all services are in good condition, and if not makes them so before putting down any permanent pavements.

In Elmira, N. Y., the charter provides that conduits and mains and renewals must be laid previous to paving, three months to be given in which to do the work, failing which the city may do it and assess the full cost on the companies. In fifteen years this city has had to lay but one telegraph conduit of about 875 feet because of the failure of the company to do so. All iron pipe water and gas services are renewed if twelve years or more old. Ten days' notice for service connections is given, after which the city does the work and assesses the cost.

City Engineer Robert Hoffman sends the following description of the procedure in the city of Cleveland, Ohio:

"The first step in beginning legislation to pave a street is a resolution by the city council declaring the necessity for such paving. In order to obtain a proper record of the beginning of such legislation, it is the practice to secure from the councilman representing the district in which the paving is to be done a written request asking the city engineer to begin proceedings for such paving. Before the declaratory resolution above referred to is introduced in the council the request signed by the councilman is submitted to the various assistant engineers in charge of subdepartments for their approval, so as to insure that the street to be paved is properly dedicated to public use and accepted by the city; also to insure that the street has been properly sewered. After the proceedings for the legislation have been begun and in ample time before any contract for the paving is let, notices are sent by the paving department to the various subdepartments of the city interested in doing work in such a street in advance of paving, and also to the various public corporations which might have occasion to do work in the street in question. The notices above referred to are supplied with a return form, upon which it is expected will be noted the exact date when any contemplated improvements will be completed. In this manner the house connections for both sewer and water are placed to the curb for all properties requiring the same in advance of the paving. The public service corporations are given an opportunity to place wires underground, doing any pipe laying or making of service connections in advance of the actual beginning of the paving construction. The laying of sewer and water connections to the curb is done by city departments and charged to the property owners, the employees in charge of these depart-

ments exercising their own judgment regarding the necessary number and size of such connections. This method has been fairly successful in preventing the tearing up of pavements for purpose of making underground improvements, but even with all the care taken conditions still arise making such tearing up essential.

"The completing of the paving legislation requires considerable time. For instance, should paving legislation be begun after about May 1, it would be impossible to do the paving even the following year, but for any legislation begun previous to about May 1, the paving can be done the following year. For this reason ample time is secured for the sending out of all notices above referred to, in order to give all parties interested an opportunity to complete any contemplated improvements in the streets in question."

In Chicago, according to Mr. John B. Hittell, chief engineer of streets, corporations are notified of proposed paving at the time the assessment is confirmed. At the same time a tracer is sent to the various departments of the city having underground structures, which secures information as to whether the underground work has been laid. If a sewer is necessary an estimate is ordered and the proceedings carried through. If the water main has not been laid, it is built by a special assessment, except in districts which pay a revenue, in which case it is paid for by the city. Water and sewer house connections are built by special assessment, unless the number needed is less than ten, in which case the owners of the property not connected are notified to have them built before the pavement is laid. Neither these nor the structures of the public service corporations are compulsory, but they are generally put in to save the greater cost of doing the work after the permanent pavements have been constructed.

In Morristown, N. J., several months before any resurfacing or repaving is done circular letters are sent to the various corporations describing the street to be paved and the kind of pavement and advising them, if they contemplate any change or additions to their subsurface construction, to make them at once, as after the pavement has been laid no permits for opening the street, except for the most extraordinary and urgent reasons, will be granted for years.

The law of Syracuse, N. Y., referring to this subject requires that whenever the council orders any street to be paved or repaved, where water mains, sewer inlets, gas mains, heating mains and electrical subways and conduits have not been laid, or where those already laid are defective or of insufficient capacity or improperly located or for any other reason are condemned, council must require these to be laid and all connections to be put in to the curb at such distances apart as the commissioner of public works may prescribe. The cost of sewer inlets is included in and collected as a part of the cost of the paving improvement. If the sewer is not in or should for any reason be reconstructed, the common council must have it constructed or reconstructed in the same way as in the case of other sewers ordered by common council without petition of the property owners. Notices to the private companies specify the time (which cannot be less than five days from the date of mailing the notice) in which the work is to be completed, and if it is not done the commissioner of public works has the power to do the work and collect the money from the company.

In Asheville, N. C., the aldermen order all property owners to carry water and sewer connections from the nearest accessible mains to the property whenever a street is to be paved, and in case this is not done within 15 days the city does the work and the cost becomes a lien upon the property. Apparently no effort is made to have public service corporations do any work on their conduits.

In Titusville, Pa., it is the general intention and practice to lay all sewers at least one year in advance of paving operations, according to Mr. Herbert A. Holstein, city engineer. At times, however, this has seemed to be impossible and the sewer has been laid immediately before the paving. The gas company renews all defective mains, and uniformly reconstructs all old services to the curb box and puts in new services to vacant lots 30 feet apart, in advance of paving operations, without any urging by the city. The water department, as soon as notified that a pavement is contemplated on any street, immediately proceeds to renew all water services to the curb box, and to put in connections every 30 feet in front of all vacant properties. These services, like all others in the city, are put in without cost to the property owner. Sewer connections are carried to the curb at the time of laying all new sewers, these being placed opposite all buildings and at intervals of 30 feet along vacant property. Where sewers were laid before this practice went into effect, property owners were notified to have the connections laid. "With the enforcement of this plan, we have little or no trouble on freshly laid pavements with this question. Previous to 1905, although this ordinance was in effect, it was not enforced as it should have been, and we have one street which has been badly damaged by tearing the same up for sewer, water and gas connections within one year after the same was laid."

The state of New Jersey in 1899 passed a law providing for sewer and water connections to all lots. This law is as follows:

Chapter 189 of the State Laws of 1899.

An act concerning cities, etc.

"Whenever in any city in this state any ordinance shall be adopted or contract made by such city for the pavement or repavement with asphalt, Belgian blocks, macadam or other hard and durable pavement, of any section or sections of street or streets, it shall and may be lawful for the board of aldermen, common council, or other governing body of such city to provide by ordinance: First, that all owners or occupants of buildings along the line of said proposed pavement, or other persons or corporations possessing or controlling the right to lay wires, pipes or other conduits in the said streets who shall desire to make connections, lay or relay pipes, wires or other conduits, or make repairs under the roadway of any section or sections of any street or streets proposed to be paved as aforesaid, shall be required to complete all work in the premises within 90 days from date of approval or final adoption of said ordinance hereby authorized and that after such proposed pavement shall have been laid the said pavement shall in no manner be disturbed for the space of at least five years thereafter for the laying or relaying of pipes, wires or other conduits, or making repairs, without express permission first granted in writing by the superintendent of streets or other person or body having charge of the streets in any city or by resolution of the governing body of said city and upon such terms as may be stated in such written permission or resolution.

Mr. William A. Howell, engineer of streets and highways of Newark, N. J., states that, "Until within a year or so the public service corporation controlling the gas companies of Newark has declined to make gas connections at vacant lots unless the owner would guarantee payment in advance of said connection. Our board of public works has been besieged with applications from property owners asking permission to make cuts in pavements where the lot had been purchased from the owner of a large tract of land who had previously declined paying the public service corporation for the connection. After much thought on the matter it was finally determined by the board of public works to guarantee to the public service corporation payment for all gas connections made at vacant lots where the owner evaded payment, the cost of said connection to be added to the cost of paving assessment on the property in question." This plan seems to have worked well and eliminated the trouble from this service.

The Ohio state legislature last year passed a law giving to the director of public service of certain cities the right to order all mains laid and lateral branches to the curb put in before any new street improvements, and giving the city the right to do this work and assess the cost against the property in case the owners should refuse or neglect to obey the order.

Since preparing the table we have received information concerning the practice of the town of Brookline, Mass. That town before doing any paving work always makes an effort to persuade the companies controlling mains and conduits to satisfy themselves that they are sufficient in capacity for at least five years to come. It is found, however, that the companies either fail to see the necessity for increasing the capacity or underestimate the future demands, and sometimes within a year ask the privilege of opening the new pavement. As to municipal sewers and water mains, those laid by the town are always attended to well in advance of the paving; but the water mains controlled by the metropolitan district and the sewers by the metropolitan department are not always so taken care of. There is no policy concerning house connections, and they are not required by ordinance; but preceding some recent paving the town carried sewer and drain connections to the property line at 25-foot intervals.

In New Orleans the companies owning mains or conduits for their own protection usually make repairs known to be necessary prior to the laying of new pavements. The sewerage and water board lays sewers and mains ahead of new pavements and the city constructs subsurface drainage in connection with paving. The board also advises all owners to apply for water and sewer connections prior to paving. For water connections no charge is made; for sewer connections the charge is \$25 in residence sections and \$50 in business sections, which will be refunded later. Unless a connection is to be used within six months it will not be laid, as experience has shown that connections opposite vacant property usually are found to be undesirably located and frequently are never used, but constitute a perpetual menace to the system. — *Municipal Journal and Engineer*.

NEW FIRE ALARM SYSTEM.

New York City is spending \$2,200,000 in overhauling and renewing and improving its fire-alarm system. Most of the wires are being put in conduits underground.

MINNEAPOLIS REGULATES CHEAP LODGING HOUSES.

Some weeks ago *The Survey* reported the enactment by the Minnesota State Board of Health of a code of rules and regulations governing sanitary conditions in cheap lodging houses in all cities of ten thousand or more population. The City Council of Minneapolis has recently passed a special ordinance, based largely upon this code, since the local board of health preferred to work under an ordinance rather than under a state regulation. A number of proprietors of lodging houses of the better type were present at hearings and approved of practically everything in the ordinance, so that the health department, which is charged with their enforcement, with the moral backing of these men will feel stronger than it would otherwise. The committee on lodging houses of the board of directors of the Minneapolis Associated Charities was represented at the meeting, and it was due to that committee's activity and study of the question that the movement for regulation began. While the ordinance was under consideration by the two council committees, the members took an evening jaunt through some of the lodging houses and substantiated all that had been said about conditions.

The ordinance as passed is regarded as one of the most thorough-going in any city in the United States. Copies may be had by sending to E. T. Lies, general secretary, Associated Charities, Minneapolis.

The first fruits of the campaign for better conditions in the commercial lodging houses were represented in the order of Health Commissioner P. M. Hall closing the cellar sleeping room in the downtown city police barn and the basement lodging quarters of the Union City Mission. In the former as many as 150 men a night have been allowed to sleep on low platforms and on the cement floor. It was never possible for sunlight to penetrate this hole since there were no windows leading to the outside air. Men allowed to sleep here were asked no questions by the officers in charge, thus giving strong encouragement to their accepting free lodgings as long as possible. It has been a disgrace to the city.

The Union City Mission's basement rooms were dangerous to health and to life and, it should be said, the persons in charge have for some time expressed themselves in favor of closing and have joined with other social workers in demanding of the city authorities a municipal lodging house of the best type. The Union City Mission has been in the habit of giving free beds to a considerable number of men during the cold months and it was found that for a number of obvious reasons this practice interfered materially with the distinctive work of the mission. — *The Survey*.

NOVEL METHOD OF FINANCING SIDEWALK LAYING.

The accountants of the State Accounting Board, of Indiana, in their report call attention to the peculiar method of financing the building of sidewalks which is used only in Winchester. The citizens get permission of the council to construct the walk, pay the contractor in full, and then are allowed a refund certificate by which the amount is deducted from their taxes. The legality of the method is referred to the State Law Department but the experts state that the procedure has certainly stimulated the building of fine cement walks in the city. — *Municipal Journal and Engineer*.

CITY RECORD

OFFICIAL PUBLICATION OF THE CITY OF BOSTON.

VOL. 2.

SATURDAY, SEPTEMBER 17, 1910.

No. 38

City of Boston.

CITY RECORD.

Published weekly under legislative act by the
City of Boston, Mass.

By SUBSCRIPTION . . . \$1.00 Per Year.
SINGLE COPIES . . . 5 Cents.
IN ADVANCE.

ADVERTISING.

A rate of 10 cents per agate line has been established for such advertisements as under the law must be printed in the *City Record*. Advertising and other copy must be in hand by Thursday of each week to insure its publication in the Saturday issue.

Copies for sale at the Mayor's Office, Room 27, City Hall, and at all news stands.

MUNICIPAL SERVICE.

Complaints, inquiries or suggestions regarding the work of municipal departments should be made in writing to the officials directly in charge. The failure of such officials to make reply within a reasonable length of time should be brought to the attention of the Mayor. Communications should be directed as follows:

TO THE BOARD OF STREET COMMISSIONERS, Room 41, City Hall, for information relative to the laying out, relocation, widening and discontinuance of highways; the taking of real property for municipal purposes; the assessments of betterments for streets and sewers; the plotting of undeveloped areas for streets and the opening of private ways; the granting of licenses for the storage or sale of merchandise in public streets; the regulation of street traffic; the making of specific repairs in public streets; the naming of public streets; the planting and removal of trees in public ways; the issuing of licenses for the storage of gasoline, oil and other inflammable substances or explosive compounds; the use of the public ways for any permanent or temporary obstruction or projection in, under or over the same, including the location of conduits, poles and posts for telephone, telegraph, street railway or illuminating purposes, signs, marquees, bay windows, coal holes and vaults.

TO THE SUPERINTENDENT OF STREETS, Room 44, City Hall, for information as to

the watering, cleaning, lighting and repairing of streets, the construction and care of sewers and catch-basins, the operation of the ferries, the maintenance of bridges and drawbridges and the removal of ashes and offal.

TO THE BOARD OF HEALTH, Room 11, Old Court House (rear of City Hall), for information relative to the inspection of milk, vinegar, meat, fish and vegetables, the issuance of permits for stables, slaughter houses, etc., smoke nuisances, the existence of contagious diseases or public health nuisances.

TO THE WATER COMMISSIONER, Room 58, City Hall, for information relative to the supplying or metering of water and the water charges of the city.

TO THE SUPERINTENDENT OF PUBLIC GROUNDS, 154 East Cottage street, for information as to the care of the Common, Public Garden, and the small parks throughout the city other than playgrounds, and the extermination of the gypsy moth and the charges made for the same.

TO THE PARK COMMISSIONERS, Pinebank, Jamaica Plain, for information as to Franklin Park and Field, Commonwealth avenue, the Back Bay Fens, Marine Park and playgrounds in general throughout the city.

TO THE SCHOOL COMMITTEE, Mason street, for information relative to the operation of the schools of the city.

TO THE SCHOOLHOUSE COMMISSIONERS, 120 Boylston street, for information as to the construction and repair of school buildings.

MUNICIPAL CALENDAR.

Meeting of City Council, Monday, September 19, at 3.30 p. m.

Meeting of School Committee, Monday, September 26, at 5.30 p. m.

Meetings of the Transit Commission are held Tuesday and Thursday of each week at 10.30 a. m.

HEARING.

The Executive Committee of the City Council will hold a public hearing on the subject relative to legislation now pending before the Joint Boards of Railroad and Transit Commissioners, under the provisions of chapter 58, Resolves of 1910, on Monday next, September 19, in the committee room, City Hall, at 1.30 o'clock p. m.

PROPOSALS ADVERTISED.

Bids have been asked for by advertisements in the *City Record* by the following departments. The attention of contractors and others is specially called to the closing time for the receipt of such proposals. This will be published weekly.

HOSPITAL DEPARTMENT.

Advertises for proposals for changes in electrical wiring at City Hospital. Blank

forms for proposals and specifications may be obtained at the office of the engineers, Densmore & McLearn, 88 Broad street. Bids to be filed at the office of the Superintendent of the hospital, Harrison avenue.

Bids close Monday, September 26, at 12 m.

Advertises for proposals for completing alterations and repairs for additional fire protection at the City Hospital. Blank forms for proposals may be obtained at the office of the architect, Edward P. Dana, 112 Water street. Bids to be filed at the office of the superintendent of the hospital, Harrison avenue.

Bids close Wednesday, September 28, at 12 m.

PENAL INSTITUTIONS DEPARTMENT.

STREET DEPARTMENT (Sanitary Division).

On September 9 the Mayor approved a contract with Patrick J. Lyons for collecting and removing ashes in the North Dorchester district. Bids on this work, opened August 22, were as follows:

Eugene Sullivan, \$8,750; Patrick J. Lyons, \$9,625; John H. Winsloe Company, \$9,937.50; John J. Loonie, \$9,968. The lowest bidder withdrew his bid.

WITHOUT ADVERTISING.

PENAL INSTITUTIONS DEPARTMENT, August 29, 1910.

To the Mayor of Boston:

SIR,—It is very necessary that additional rooms be furnished for the accommodation of officers at Deer Island at once. I have decided that the most available building at our disposal for this purpose is the receiving house on the wharf, but to use the said building it will be necessary to have some sort of a heating apparatus there.

I have looked into the matter and was of the opinion that the work for a suitable plant to meet the same would cost us less than \$1,000. Accordingly I invited various steam fitters to make plans and give estimates of the cost of the work, with the following result: D. J. Kinnally offers to do it for \$1,175; D. A. Horgan for \$1,250; Eastman Heating Company for \$1,448.

(Signed) FRED S. GORE,
Commissioner.

PENAL INSTITUTIONS DEPARTMENT.

On September 9, in view of the representations made by the Commissioner, the Mayor approved a contract with D. J. Kinnally, without advertising, for heating the receiving house at Deer Island, the amount being \$1,175.

ADDITIONS AND ALLOWANCES TO CONTRACTS.

The following additions and allowances on contracts have been approved by the Mayor:

SCHOOLHOUSE DEPARTMENT.

Addition, amounting to \$47, on contract with Pierce & Cox for boiler plant at Prescott School, on account of offsetting cold water main. Original con-

tract, \$12,073; total additions, \$47; contract as standing, \$12,120.

Addition, amounting to \$18.15, on contract with McGahey & O'Connor for addition to Blackinton School, on account of installing extra gas and electric outlet on stair landing. Original contract, \$66,000; total additions, \$18.15; contract as standing, \$66,018.15.

Addition, amounting to \$653, on contract with William Crane for Dorchester High School building, on account of installing 180 additional lockers, furnishing brass knees and screwing tables to floor.

Addition, amounting to \$162, on above contract with William Crane, on account of moving case in corridor and changing case in handicraft room. Original contract, \$125,875; total additions, \$2,897; total deductions, \$19,684; contract as standing, \$109,088.

Addition, amounting to \$25, on contract with J. E. Locatelli for Wyman School building, on account of miscellaneous work. Original contract, \$14,271; total additions, \$25; contract as standing, \$14,296.

Addition, amounting to \$37, on contract with Huey Brothers Company for Dorchester High School heating, on account of installing galvanized-iron stop-off in fan room. Original contract, \$12,827; total additions, \$74; contract as standing, \$12,901.

Addition, amounting to \$250, on contract with the Commonwealth Construction and Supply Company for the Ira Allen School, on account of miscellaneous work. Original contract, \$2,323; total additions, \$250; contract as standing, \$2,573.

LAND-TAKING FOR SCHOOL PURPOSES.

The Mayor has approved the vote of the Board of Street Commissioners, that in the matter of Mary A. Kelley, petitioner for damages occasioned her estate on Melrose street by taking made for schoolhouse purposes, after consultation with the Law Department, and on its advice, the board assess the petitioner's damages at the sum of \$7,000 without interest.

STREET COMMISSIONERS.

The Mayor has approved a vote of the Board of Street Commissioners, that in the matter of Abbie J. Linnell, petitioner for abatement of assessment levied to her estate (Lot 609) for the improvement of Columbia road, after consultation with the Law Department, and on its advice, the Board consents that the Corporation Counsel agree to judgment in said case for the sum of \$600, without interest, in addition to the sum of \$146.84, already paid by said petitioner, as assessment to said estate for said improvement.

The Mayor has approved the vote of the Board of Street Commissioners, that in the matter of James F. Sullivan *et al.*, petitioners for damages occasioned their estate (formerly in the name of heirs or devisees of John O'Sullivan) by the relocation, widening and construction of Hyde Park avenue, at West Roxbury, after consultation with the Law Department, and on its advice, assessing the petitioners' damages at the sum of \$500 without interest and with costs.

PETITIONS GRANTED.

The following petitions granted by the Board of Street Commissioners have been approved by the Mayor:

Signs.—Emmons Bros., corner Melcher and Necco streets, Ward 13; Samuel S. Levy, 6 Avery street.

Illuminated Signs.—Dowling & Sproules, 127 Havre street, Ward 2.

Order to Close Street.—Geneva avenue, between Wilder street and Blue Hill avenue during repairs.

Pole Locations.—New England Telephone and Telegraph Company, to attach wires to five poles of the Edison Company on Austin street, north from Harvard street, Ward 23; to attach wires to two poles of the Edison Company on Kendrick street, near Newton line, Ward 25.

PERMISSION TO CONSTRUCT.

The Mayor has granted to the Superintendent of Streets authority to do the following work, with the department force, without advertising; Build sanitary sewers and surface drains in private land between Westville and Speedwell streets, Dorchester, at an estimated cost of \$6,080. Build a surface drain and seven catch-basins in Wallingford road, Brighton, at an estimated cost of \$12,037. Build sanitary sewers and surface drain in Shawmut avenue, Roxbury, at an estimated cost of \$4,691.

"This work can, in my opinion, be as advantageously done by day labor methods as any work now necessary.

(Signed) JAMES H. SULLIVAN,
"Acting Superintendent of Streets."

APPOINTMENTS AND CONFIRMATIONS.

The following appointment was confirmed on the date given:

September 15, Charles D. Daly as Fire Commissioner.

PAYMENTS TO DISABLED EMPLOYEES.

STREET DEPARTMENT.

The following allowances made by the Superintendent have been approved by the Mayor:

William T. Noonan, Highway Division, 21 days, at \$3, \$63.

CLOSING OF BATHS.

The following beaches, floating baths and out-door swimming pools under the supervision of the Bath Department, closed for the summer season, 1910, Thursday evening, September 15, 1910:

L Street Beach Bath House, South Boston; North End Park, Commercial street, city proper; Wood Island Park Beach Bath House, East Boston; Dewey Beach Bath House, Charlestown; Tenean Beach Bath House, Neponset; McKenzie Beach Bath House, Ward 16; Warren Bridge Floating Baths, Charlestown; Border Street Floating Bath, East Boston; Jeffries Point Floating Bath, East Boston; Charlesbank Floating Baths, West End; Dover Street Bridge Floating Bath, South End; Spring Street Swimming Pool and River Bath, West Roxbury; Orchard Park Swimming Pool, Ward 17.

PERMISSION TO SELL.

HEALTH DEPARTMENT.

The Mayor has granted permission for the sale, by auction or otherwise, of vehicles and harnesses heretofore used by the department, not exceeding in value \$500, said vehicles having been replaced by automobiles.

FINANCE COMMISSION.

LEWIS DISTRICT SCHOOL SITE.

September 15, 1910.

HON. JOHN F. FITZGERALD, Mayor:

SIR,—The Finance Commission has received your communication of September 3, 1910, in regard to a site for the new school building about to be erected in the Lewis district. A brief statement of the essential facts is as follows:

On May 16, 1910, the School Committee designated the Lewis district for the erection of a new upper elementary school building; on May 28, 1910, the Schoolhouse department advertised for land in the Lewis district for the purpose of this new school building; on June 13, 1910, bids were publicly opened. Among the lots of land offered were the following, in close proximity to Washington Park, and on that account seeming to be especially fitted for the purpose. For convenience they will be called hereinafter by the letters set against them respectively.

A. A lot containing 34,169 square feet of land, bounded by Walnut avenue, Harold street and Bower street, offered by different brokers at prices varying from \$30,700 to \$35,000, but subsequently reduced to \$23,000.

B. A lot on Walnut avenue, running back to Paulding street, containing 25,056 square feet of land, offered first at \$15,000, but subsequently reduced to \$12,778.56.

C. A lot on Walnut avenue, running back to Paulding street, adjoining lot B, containing 15,909 square feet of land, offered at \$8,000. This offer has since been withdrawn but it is believed that the lot can be bought or secured by eminent domain at substantially this price, which is in excess of the assessed valuation.

D. A lot on the corner of Walnut avenue and Bainbridge street, running back to Paulding street, containing 8,802 square feet of land, offered at \$10,250. It is probable that a concession in price may be obtained from the owner.

E. A lot on Bainbridge street, containing approximately 21,455 square feet,

offered at \$19,309.50, in conjunction with the lot adjoining on Walnut avenue, containing 9,522 square feet, offered at \$7,000, a total of 30,977 square feet, at a cost of \$26,309.50. The owners have since reduced their offer to \$23,091.25.

These various lots are assessed as follows:

Lot A	\$30,700
Lot B	14,500
Lot C	7,100
Lot D	11,300
Lot E	20,200

Although these lots, with the exception of lots C and E, are offered at prices below their assessed valuation, yet it is probable that none would bring the assessed value if sold at the present time. For several years this district has been undergoing a change from large and expensive residences to moderate cost apartments, and sales have been made far below the assessments.

For example, lot B, first offered to the city at \$15,000, is assessed for \$14,500; yet only a few days prior to this offer it was bought for \$8,000, or \$6,500 less than its assessed valuation.

The Schoolhouse Commission has voted to take lots B and C and their decision is before your Honor for approval or disapproval.

The decision has been criticised by the owner of Lot A, who claims that although his price is greater and his area less the land has such superior advantages for schoolhouse purposes that it ought to have been taken in preference. It has advantages, being situated on an eminence and being bounded by three streets, but it contains only 34,000 square feet, which is less than the school authorities regard as desirable.

Under their rule, that 40,000 feet should be taken for schools of this class, except in congested districts, none of the lots offered is by itself large enough. Lots B and C together, however, make an area of 40,965 square feet. Lots C and D make an area of only 24,711 square feet. Lot E contains only 30,977 square feet.

Lots B, C and D together would make an ideal site for school purposes, but the total cost is too great. Lots B and C, being directly opposite Washington Park, also make a most desirable site, but there seems to be a serious difference of opinion as to the probable cost of a building erected thereon, as the land slopes badly and there is some uncertainty as to the amount of ledge that may be found. The owner of Lot A challenges the accuracy of the estimates made by the Schoolhouse Commission, and his expert says that a building there erected will cost several thousand dollars more than these estimates.

A solution of the problem, which has been submitted to and approved by the Schoolhouse Commissioners, the Superintendent of Schools, the chairman of the School Board and the Superintendent of Public Grounds, and which the Finance Commission now submits to your Honor, is to erect the new school on the city's own land on Washington Park, fronting on Paulding street, and thus save at least \$20,000 which otherwise would be expended for a site.

Washington Park was purchased by the city of Roxbury by deeds dated June 30, 1860, and passed, at the time of annexation, to the City of Boston. The premises were conveyed "subject to the restriction and on the condition that for a period of fifty years from the date hereof they shall be used as a public square or park and no buildings erected thereon." The fifty years' term expired on June 30 of the

present year and there are apparently no restrictions whatever to the city's use of the park.

The only possible objection is the general one that the city ought not to reduce its park area and its breathing spaces, with which sentiment the Finance Commission is in full accord. But it is to be remembered that Washington Park has an area of 396,125 square feet; that the school building will reduce this area by not exceeding 12,000 square feet, a comparatively insignificant amount, and that the school children will thus have the benefit of practically the entire park for the very purpose for which the park is established, a breathing space and playground. The more people, and especially the more children, who can be drawn to a breathing place the better. This is in the spirit of the recent legislation enlarging the powers of the School Committee in respect to physical education and the use of the public parks.

In this connection it should be remembered that this general locality is especially favored with public grounds, and that the small space to be occupied by the school building will not be missed here. Fountain Square is close at hand on Walnut avenue, containing 103,000 square feet. Cedar Square on Cedar street contains 27,730 square feet. Franklin Park, with its broad domain and splendid opportunities, is only about a half a mile distant. Any objection that might be raised on this account is thus readily answered so far as this particular case is concerned.

The commission recommends that none of the lots offered be accepted, but that the school be erected on Washington Park.

Respectfully submitted,

THE FINANCE COMMISSION,
by JOHN A. SULLIVAN,
Chairman.

September 15, 1910.

HON. JOHN F. FITZGERALD, Mayor:

SIR,—On August 17, 1910, your Honor submitted to the Finance Commission for investigation and report the alleged excessive charge by the architect who was employed in connection with the reconstruction of Curtis Hall, Jamaica Plain. The commission has made the investigation as requested and herewith submits its report.

The present Superintendent of Public Buildings stated that the architect's fee of 10 per cent on work costing about \$120,000 is, in his judgment, excessive "in view of the fact that the building is not to be rebuilt on the old lines, but is to consist in a great part of work which will be entirely new—such as a new roof, new addition to the rear of the building for a boiler room, new swimming pool," etc. He also stated that sometimes fees of only 5 or 6 per cent are charged for work of a like nature.

The former Superintendent of Public Buildings made an oral agreement with the architect to pay him for his services 10 per cent of the cost of construction. Bills have been submitted for a portion of the fees on this basis and have been approved by the auditor and paid by the treasurer. The contract seems to have been made fairly, and there is no contention that the work is not being done properly.

The commission is informed by experts that the rate is not excessive; but that it falls within the designation "alterations" for which a 10 per cent fee is permissible.

Immediately after his employment,

the architect made a survey of the work and measured the thickness of walls, foundations and girders for the purpose of determining the quality and strength of material which would be used in reconstruction. Later, he made a set of plans, which he was asked to amend, and accordingly he made an alternative set of plans to meet the desires of a citizens' committee, which had been appointed to consult with the architect and the Superintendent of Public Buildings. The architect had various conferences with the members of the committee, during which four schemes, marked "A," "B," "C" and "D" were prepared and submitted to them. These were not technically drawings, but merely preliminary studies, yet their preparation involved considerable labor. The conferences occupied a great deal more time than is required of an architect under ordinary circumstances, and, in the opinion of the commission, this should be taken into consideration in deciding whether the fee charge is a fair one.

The commission requested the Building Commissioner, himself an architect, to examine the drawings and specifications and to give to the Finance Commission his opinion as to whether the fee charged was excessive. This examination and report has been made as requested. The Building Commissioner believes that the work is properly classified as "alterations," and that the fee is a proper one. His report is appended hereto.

Cases like the present one are to be distinguished from additions to existing buildings where the architect employed on the original building is also employed on the addition, the plans for the original building being of great aid in the new work.

The Finance Commission has found no evidence that the fee is excessive and in its opinion the city is legally bound to pay at the agreed rate. The commission has, therefore, under section 19 of the charter amendments, notified the City Auditor that it has investigated the fee alleged to be excessive, that it has submitted a report thereon, and that, in its opinion, the bill should be paid.

Respectfully submitted,

THE FINANCE COMMISSION,
by JOHN A. SULLIVAN,
Chairman.

P. S.—Mr. Balch of the commission was prevented by absence from taking part in the investigations on which this report is based, and therefore takes no part in the decision.

BUILDING DEPARTMENT,
September 9, 1910.

MR. JOHN A. SULLIVAN,
Chairman Boston Finance Commission,
410-416 Tremont Building, Boston.

DEAR SIR,—At your request I have examined the drawings and specifications prepared by Mr. Lewis H. Bacon for the work to be done at the Curtis Hall building in Jamaica Plain and through a personal interview with him have learned the instructions under which he worked and the method pursued in carrying out such instructions.

My understanding is that Mr. George W. Morrison, then Superintendent of Public Buildings, appointed Mr. Bacon architect for the building and instructed him to prepare sketches in accordance with suggestions to be made by a committee or committees of citizens of Jamaica Plain.

Mr. Bacon at once measured the build-

ing as it stood and made complete drawings showing its condition.

After several consultations with committees Mr. Bacon prepared four sketches showing different arrangements for remodeling the building. These sketches are quite complete and are marked "A," "B," "C" and "D." The sketch D was recommended by the committee or committees jointly, and Mr. Bacon was instructed by Mr. Morrison to prepare full drawings for the building in accordance with scheme D.

Mr. Morrison agreed that the remuneration to Mr. Bacon should be upon the basis of 10 per cent. of the cost of the work, the fee to include all fees for domestic engineering.

Upon the completion of the drawings and specifications, the Mayor approved the employment of Mr. Bacon as architect and authorized advertisement for proposals for doing the work. One proposal only was received and the price given was considered so large that Mr. Morrison instructed Mr. Bacon to revise his drawings for the purpose of reducing the cost of the building. The amendments made in the drawings and specifications showed changes in one portion of the building, and upon receiving proposals from builders for the original set and for the revised set, it was determined to proceed with the building as shown by the original completed set of drawings and to abandon the proposition to revise the arrangement as shown on the amended drawings.

The reason for making a 10 per cent charge for alterations is that the work devolving upon the architect is quite as much and usually more than if an entire new building were to be erected while the cost of the work upon which the fee is based is considerably less.

In my opinion there is no doubt but that the work prepared for is an alteration and not new work.

If there were any doubt in my mind, an examination of the sketches with a knowledge of the work necessary to their completion together with an examination of the drawings made of the existing building from measurements made, would convince me that Mr. Bacon had earned in this preliminary work enough, when added to 6 per cent charge upon the cost of the actual work to be done, to make his total fee fully 10 per cent.

I note also that whereas, it is usual to make an additional charge for such services, Mr. Bacon includes the services of engineers for heating and ventilating and for the electric work in his 10 per cent fee.

Mr. Bacon makes a charge for the amended drawings and specifications made for the purpose of reducing the cost of the building. These drawings were abandoned and seem to have no connection with the three sketches, A, B, C, or the final completed set and it would seem proper that some charge be made for them. As I understand it, Mr. Bacon has based this charge upon an informal estimate of cost which is less in amount than the lowest formal bid received for that portion of the work.

Yours respectfully,
ARTHUR G. EVERETT,
Building Commissioner.

SMOKE SPECIALIST.

Dayton, Ohio, is so much in earnest in its efforts to get rid of smoke that the business men have raised a fund to be used to supplement such a salary as the city feels it can pay to procure the most expert man that can be found on this subject. Smoke is one of the most expensive and deadly products of the modern city.

THE COST OF SAVING LIFE.

The state of New York is now engaged in spending \$101,000,000 on the Barge Canal to facilitate commerce, and \$50,000,000 on good roads to make easy the way of the highway traveler; but in the thirteen years during which it has been the policy of the state to share in the expense of eliminating steam railway grade crossings which are a constant menace and danger to the public it has appropriated but \$1,600,000. Last year not one cent was appropriated by the state for this purpose. Under the state grade crossing law the cost of eliminating existing crossings is divided, the railway paying one-half and the state and the municipality each one-quarter. The total number of grade crossings eliminated with state aid is 233. Schenectady is the one city in the state which has completed the work of wiping out all grade crossings in the city limits; the work cost over \$2,000,000, of which the state paid \$400,000. This year provision is made for but \$350,000 for this work in the state outside Greater New York, and \$250,000 within the greater city. There are pending before the Public Service Commission, second district, to-day, applications which would, if granted, bring the state's expense up to over a million dollars; and if there were any prospect of additional state aid the number of applications would quickly take up every dollar appropriated, even though that amount were many millions. The attitude of the larger steam railways under the state aid plan has been one of willingness to pay their legal share when the state and municipalities are ready. The comparative position of New York state in the eliminating of its existing crossings can best be seen by comparing it with Massachusetts, which leads the country in state aid work, New York having approximately 8,000 miles of track and Massachusetts approximately 2,100 miles. New York has appropriated for this work \$1,600,000, and Massachusetts has spent \$8,376,174.38. Work in New York can progress only as the state appropriates money for its proportion of the expenses, as no crossings can be ordered eliminated unless there is money on hand to pay the state's proportion, even though the railway and municipality may be ready to proceed. Chicago has, notwithstanding the protests of the railways, secured legislation placing the entire cost of eliminating upon the railways, and already \$53,000,000 has been spent for track elevation and grade crossing eliminating, and \$19,000,000 more is to be expended in the very near future in this work. The only other states giving state aid are Massachusetts, Connecticut, Vermont and Wisconsin.—*The Outlook.*

CHANGES IN LONDON.

At the rate street widening is in progress in London that city will be pretty thoroughly up to date in another generation or so. Fleet street is being widened at a cost of about ten million dollars, and Piccadilly is opening up at a still greater cost. Most of the London improvements are made to pay for themselves by condemnation and resale of the land.

A CIVIC INSTITUTION.

Walla Walla recently held what was called a civic institute. A week was devoted to public lectures and displays of matters connected with the city government. Also there were discussions of civic questions and visits paid to the city's institutions.

PROCEEDINGS OF CITY COUNCIL.

Monday, September 12, 1910.

Regular meeting of the City Council, held in the Council Chamber, City Hall, at three o'clock p. m., President BALLANTYNE in the chair. Absent—Coun. Attridge, Brand, Curley, Kenny.

The Council voted, on motion of Coun. McDONALD, to dispense with the reading of the records of the last two meetings.

JURORS DRAWN.

Jurors were drawn in accordance with the provisions of chapter 514, Acts of 1894, the Mayor not being present, viz.:

Thirty-five traverse jurors were drawn for the Superior Civil Court, for each session, first to seventh, inclusive, to appear October 3, viz.:

First Session—Gustav Engewald, Ward 19; Rufus W. Page, Ward 11; Issachar M. Burdett, Ward 24; Harold G. Scudder, Ward 20; Arthur C. Jordenon, Ward 12; Gabriel M. Gordon, Ward 17; Philip O'Connell, Ward 16; Frederick A. June, Ward 22; George A. Gray, Ward 20; Frank S. Haskell, Ward 25; Owen H. Welch, Ward 20; John Berglund, Ward 6; John G. Raymond, Ward 1; Clement G. Kelsey, Ward 20; Matthew J. DeViney, Ward 19; Benjamin T. Baker, Ward 10; James J. O'Brien, Ward 20; Edward J. Doyle, Ward 14; Nathan A. Pelonsky, Ward 21; Francis P. McDonnell, Ward 20; Frank J. O'Donnell, Ward 8; Adna T. Wheelock, Ward 15; Patrick E. Little, Ward 3; Patrick Morley, Ward 17; Joseph J. Boucher, Ward 3; Thomas Brynes, Ward 13; Frank H. McLaughlin, Ward 17; John J. Cashman, Ward 19; Waldo C. Burt, Ward 24; Alfred J. Aberle, Ward 19; Hugh Barans, Ward 18; Humphrey J. Murphy, Ward 1; Christopher F. Sweeney, Ward 2; Laurence Whyte, Ward 16.

Second Session—Luigi Poto, Ward 6; Francis A. Mahan, Ward 19; Waldo H. Mason, Ward 20; George W. Parsons, Ward 23; John E. Counihan, Ward 4; Michael J. Hines, Ward 22; Joseph C. Pierce, Ward 19; John A. O'Brien, Ward 12; Charles E. Hanscom, Ward 21; Fred P. Trowbridge, Ward 25; Clayton Ringer, Ward 25; Herbert W. Towle, Ward 3; George T. McCormick, Ward 22; Alfred M. Mattson, Ward 14; Joseph E. Talbot, Ward 12; Joseph A. McIntire, Ward 8; Daniel J. Dowd, Ward 17; Patrick F. Doolin, Ward 14; Erik T. Johnson, Ward 2; Gustaf F. Johnson, Ward 20; John H. Dolan, Ward 25; John J. Foley, Ward 11; Charles Jackson, Ward 1; Edward F. Fitzgerald, Ward 25; Alexander Hunzelman, Ward 24; William B. Hooley, Ward 24; Albert J. McMurty, Ward 25; Ernst Carl Georg Schmidt, Ward 18; Daniel J. Kelleher, Ward 5; Charles E. Duncan, Ward 18; Denis Toland, Ward 3; Thomas L. Burnett, Ward 1; Richard A. Quilty, Ward 10; Jeremiah M. Burke, Ward 19; John J. Mullane, Ward 17.

Third Session—Thomas A. Sullivan, Ward 15; Albert O. Titcomb, Ward 1; Henry L. White, Ward 22; Peter Devine, Ward 4; William White Ferris, Ward 23; Theodore H. Best, Ward 16; John V. Footman, Ward 17; Charles W. Sands, Ward 4; George S. Sumner, Ward 23; John F. Glesheen, Ward 14; Andrew D. O'Leary, Ward 20; Wellington W. Cole, Ward 16; Daniel C. Fletcher, Ward 4; Edward L. Doyle, Ward 24; James J. Sheehan, Ward 18; Lewis I. Korb, Ward 21; Francis Waldron, Ward 20; Benjamin Cohen, Ward 6; Henry Kieseel, Ward 22; Charles A. Coolidge, Ward 11; Daniel B. Coughlan, Ward 14; Allen P. Jordan, Ward 12; Thomas W. Fletcher, Ward 6; William A. Alexander, Ward 23; Patrick J. Galvin, Ward 24; William Kiley, Ward 15; John B. Babcock, Jr., Ward 20; John Hurd, Ward 23; Daniel Campbell, Ward 23; Morris L. Hyman, Ward 20; Arthur W. Mudge, Ward 22; Edwin H. Spooner, Ward 20; Walter Barron, Ward 20; Charles A. Miller, Ward 20; John L. Woods, Ward 19.

Fourth Session—Joseph R. Chase, Ward 20; Daniel S. O'Brien, Ward 12; Thomas J. Harding, Ward 6; James E. Holbrook, Ward 22; James M. Linscott, Ward 10; Cornelius J. Bowen, Ward 19; Joseph Alpert, Ward 21; Harry E. Bagley, Ward 16; William G. Lash, Ward 24; Albert W. Habel, Ward 23; John H. Balmaia, Ward 5; George A. Anthony, Ward 23; Edward J. Hoelt, Ward 15; William McCartney, Ward 15; William A. Kelley, Ward 20; Thomas H. Pray, Ward 24; Richard O'Neil, Ward 18; Joseph C. Walker, Ward 16; David H. Lane, Ward 24; Ignatius F. Pierce, Ward 21; John R. McClenney, Ward 9; Alexander W. Sharpe, Ward 24; Kenneth S. DeWitt, Ward 20; William W. Hodson, Ward 20; William J. Wilson, Ward 23; Emery Harlow Talbot, Ward 20; Timothy J. Casey, Ward 22; Peter Marrow, Ward 14; Edward R. Brown, Ward 24; Henry F. Carroll, Ward 2; Timothy J. Murphy, Ward 8; William H. Hill, Ward 24; Augustus Cooper, Ward 7; David W. Rosen, Ward 6; Charles F. Dowd, Ward 10.

Fifth Session—James L. O'Neill, Ward 25; Patrick T. Doyle, Ward 20; Thomas Noonan, Ward 5; Edgar Woodruff, Ward 13; Richard F. Shallow, Ward 5; Walter I. Hodson, Ward 24; George C. Hall, Ward 3; John F. Curley, Ward 15; Bernard M. McMahon, Ward 20; Thomas J. Webb, Ward 16; William D. Irving, Ward 4; Morris Silverstein, Ward 20; James P. Holland, Ward 15; Francis J. O'Farrell, Ward 7; Edwin A. Hallett, Ward 20; John A. Walsh, Ward 17;

Jeremiah F. Sullivan, Ward 16; James P. Parker, Ward 23; William MacKerron, Ward 25; Bartholomew Clements, Ward 13; Frank Dodge, Ward 10; William F. Weinbecker, Ward 8; Abraham J. Felz, Ward 12; George O. Wendell, Ward 7; John F. Crowley, Ward 25; Daniel T. Lydon, Ward 13; Frank E. Mars, Ward 20; Edward C. Clark, Ward 21; Michael T. Donohue, Ward 9; John P. Carey, Ward 17; Silas M. Stevens, Ward 1; Andrew Kennedy, Ward 24; Angus Kell, Ward 20; Laurin A. Gaylord, Ward 20; Arthur W. Garland, Ward 5.

Sixth Session—John F. Bowditch, Ward 21; Emil Riesfelder, Ward 19; George W. Creney, Ward 9; Michael H. O'Connor, Ward 24; Chester A. Wilson, Ward 25; James D. Cameron, Ward 20; Stanley E. Faithful, Ward 22; George J. Alpers, Ward 22; Edward T. McGrath, Ward 15; Robert Ruf, Ward 19; Henry F. Keene, Ward 16; Felix L. Brust, Ward 18; George W. Lynch, Ward 19; Elmer E. Chandler, Ward 10; Francis Gogan, Ward 18; Thomas J. Bowen, Ward 19; John A. Devine, Ward 14; George M. Hanlon, Ward 12; F. W. Richard Roemer, Ward 19; Emil H. Richter, Ward 19; Arthur J. Trethewey, Ward 23; Lewis S. Roberts, Ward 4; John Skipp, Ward 23; Charles L. Underwood, Ward 20; John J. Hickey, Ward 23; Ernest T. Forbes, Ward 25; Joseph A. Emery, Ward 20; John J. Clasby, Ward 13; Michael C. Broughal, Ward 24; William P. Burley, Ward 20; Patrick Harkins, Ward 23; Frederick G. Clarke, Ward 13; Henry M. Gilpatrick, Ward 21; Charles C. Thomas, Ward 24; Arthur L. Kenney, Ward 8.

Seventh Session—David Cohen, Ward 20; Angus D. McEachern, Ward 16; Martin J. Queeney, Ward 24; John S. Godfrey, Ward 15; Jeremiah Connor, Ward 24; William O. Nye, Ward 13; John H. Geddis, Ward 16; Clarence P. Lewissan, Ward 10; Francis A. Norton, Ward 21; Thomas Enright, Ward 24; Charles Kraus, Ward 20; Henry C. Bamberg, Ward 16; George J. Henderson, Ward 20; David F. Savage, Ward 5; Edward F. Flynn, Ward 17; Angus A. McDonald, Ward 2; William H. McCarthy, Ward 16; Arthur F. Hatch, Ward 19; John T. Hosford, Ward 23; Eben S. Corson, Ward 14; George H. Richard, Ward 17; Thomas A. Morgan, Ward 20; Henry B. Thayer, Ward 21; John Silva, Ward 6; Edward F. Harkins, Ward 23; James A. De Courcy, Ward 19; James Bowen, Ward 24; Harry P. Mercer, Ward 23; Joseph H. Layton, Ward 24; James E. Sweeney, Ward 20; Robert Barr, Ward 9; John Foley, Ward 19; Conrad Masson, Ward 22; Charles S. Gallagher, Ward 10; John A. Wellings, Ward 2.

Eight petit jurors were drawn for the United States District Court to appear September 27, viz.:

John W. Magrath, Ward 5; Thomas H. Turner, Ward 22; James T. Wooley, Ward 20; Willis A. Traver, Ward 5; Harry C. Cushman, Ward 1; Edward D. Lattner, Ward 19; George F. Hurler, Ward 14; Daniel N. McDonald, Ward 9.

APPARATUS, ETC., FIRE DEPARTMENT.

The following was received:

City of Boston,

Office of the Mayor, September 12, 1910.

To the City Council:

I beg to transmit a letter from the temporary Fire Commissioner giving estimates of the sums needed to replace the fire apparatus which is in an unsatisfactory condition largely as a result of the Albany street fire, and to reconstruct the repair shop with and without an additional story. The commissioner also requests an additional appropriation of \$7,500 to provide for salaries, and I have approved a transfer from the Reserve Fund to the Fire Department for this purpose, made in accordance with the provisions of section 3 of chapter 486 of the Acts of 1909.

Respectfully,

JOHN F. FITZGERALD, Mayor.

Headquarters Fire Department,

Bristol street, September 1, 1910.

Hon. John F. Fitzgerald, Mayor:

Sir,—In compliance with your request for a statement of the urgent needs of the Fire Department, together with the cost of such apparatus as might be furnished through the same, I beg to say that, after consultation with the officers of the department, I find the following apparatus should be purchased immediately:

Two first size engines and three second size engines	\$27,500
One water tower (quick raising)	6,500
Two auto chemicals	11,000
Three straight chemical engines (horse drawn)	6,000
Three aerial trucks	16,500
10,000 feet of hose	9,000
1,000 feet of chemical hose	500
One combination ladder truck	2,500
Harnesses	1,000
Machinery	10,000
Supplies	5,000
Incidentals	10,000
One city truck	2,500
One power boat for marine district chief,	2,500
Total	\$110,500

The greater part of the urgency for the above apparatus is due to the fact of the fire at Albany street on August 9, where this department was a heavy loser.

It will also be necessary at this time to reconstruct the repair shop. To restore the building as it was originally (85 feet by 85 feet by 55 feet) will cost, according to estimates furnished me \$51,658.75.

I strongly recommend that an additional story be placed upon the building at a further cost of \$17,000.

Much of the equipment, consisting of tools, machinery and appliances in the shop were destroyed also; to restore these Superintendent Byington estimates that it will involve an expenditure of four or five thousand dollars.

We have within six weeks opened up the house at Forest Hills and have been obliged to make additions to the roster of the department on this account.

Several vacancies existing among the list of officers have also been filled. The fact of these two latter acts has been to cause us to over-run the amount set apart in the appropriation for salaries.

I therefore urge that an additional appropriation of \$7,500 be given us to provide for salaries.

Respectfully yours,

FRANCIS M. CARROLL,

Temporary Commissioner.

Referred to the Executive Committee.

SAFETY OF ELECTRICAL WORKERS ET AL.

The following was received:

City of Boston,

Office of the Mayor, August 24, 1910.

To the City Council:

The importance of the appended communication from the Wire Commissioner seems to justify me in referring it to your honorable body for discussion and for such action as may be deemed by you to be in the public interest. Of the four principal suggestions offered by Mr. Cole two might properly be made the subject of legislation by your honorable body and two of recommendation to the General Court. I beg to transmit this interesting document and to invite your earnest consideration to its subject matter, which intimately concerns the safety of the citizens in general and particularly that of the electrical workers whose business compels them to handle wires charged with dangerous currents of electricity.

Respectfully,

JOHN F. FITZGERALD, Mayor.

Wire Department,

Boston, August 17, 1910.

Hon. John F. Fitzgerald,

Mayor of City of Boston,

City Hall, Boston, Mass.:

Sir,—Referring to request in letter, date of August 11, for suggestions as to any amendment to the ordinances or any statutory legislation which in my opinion would insure a higher degree of safety to workmen employed on overhead wiring and would give the city more efficient control over the electric companies which receive permission to carry overhead wires through the public streets, I would say that it appears advisable that some legislation be taken limiting the potential of electric currents that may be legally transmitted by the medium of overhead wiring. At present there is no specified limit, and the potential of alternating current circuits in this city has been increased from time to time from 1,000 volts potential to (in some cases) 13,200 volts, which, in certain sections of the city, is at present transmitted by means of overhead wires, and this potential is liable to be still further increased. In my judgment this is unwise and unsafe and should be prohibited. While it must be recognized that from a commercial standpoint, on the part of the consumer as well as the producer, the utilization of extra high potentials are necessary, in my opinion the conductors used for the transmission of same in this city should be underground.

At the present time the upper crossarm and top of each pole is reserved by section 15, chapter 38, of the Revised Ordinances for the exclusive use, free of charge, of the departments of the city. Were the poles carrying only wires of so-called signaling systems such as fire alarm, police signal, telephone, telegraph, etc., this would be an admirable ordinance, but, under existing conditions, its desirability in its present form is, to say the least, questionable.

While from the standpoint of increased safety it would be desirable that so-called signaling wires and the wires for electric light, heat and power purposes should be run on separate lines of poles, wires of one class being on one side of the street, the wires of the other class to be on the other side, conditions are such that this is impracticable, and it is necessary in many cases that electric light and power wires and wires of so-called signaling systems be attached to same poles.

Under the existing conditions, with the city wires or wires of other signaling systems at the top of the pole, and the light and power wires attached to crossarms underneath, it is necessary for the linemen who work upon the signaling wires to pass up between the wires carrying electric currents dangerous to life, which, in my judgment, is an unnecessary hazard to subject them to; furthermore, the relative strength of the two classes of wires is such that under the stress of severe storms the wires of the signaling systems are more liable to break than those of the other class, and, falling, often come in contact with the light and power wires attached to crossarms beneath, thereby

becoming charged with currents at high potential dangerous to both life and property.

I would suggest the advisability of so amending ordinance referred to as to provide for the reservation of lower crossarm on poles for the use of city wires, rather than the upper crossarm as at present specified, thereby, in my judgment, removing one of the worst hazards to which linemen on signaling systems are at present subjected.

Under the provisions of chapter 347, Acts of 1908, the amount of streets that may be legally prescribed for the removal of poles and the placing of wires underground is two miles. In my judgment this is an inadequate amount, and I would suggest that when the proper time to bring such matters before the Legislature arrives, a bill be introduced increasing the amount which may be prescribed by the Commissioner of Wires.

I desire to take this opportunity to refer to another matter relative to overhead construction perhaps not necessarily called for by your communication.

In section 15, chapter 38, of the Revised Ordinances, previously referred to, one of the provisions prescribes that wires shall not be attached to poles for the support of wires at a height less than 25 feet above the ground.

There are at present many miles of wire scattered throughout the city which do not conform to the city ordinances in this respect as they are not placed on the poles the requisite distance above streets. Wiring referred to is all old construction antedating the present administration of this department.

Above reference to wires attached to poles at a height less than that called for by the ordinances is particularly applicable to electric railway feeders for the support of which trolley poles are utilized, and which, while not conforming to the ordinances, is better, not only for the company interested but better from a practical standpoint for our citizens, than it would be to install an additional line of poles for wires in question that would keep wires the required distance from the ground, the regulation trolley pole not being of sufficient height to do this.

In line with previous suggestions, I would suggest the desirability of amending existing ordinance so as to make the required distance 21 feet instead of 25 feet as at present. This would take care of such wires as are at present attached to poles too low to conform to present ordinances, and would enable a 35-foot pole to do work for which at present a 40-foot pole is needed.

Poles in our streets are objectionable but necessary, and a 35-foot pole, being shorter and less in diameter, is less objectionable than a 40-foot pole, and does not increase but tends to decrease the dangers from the wires.

Yours respectfully,
JAMES E. COLE,
Commissioner of Wires.

Referred to the Committee on Ordinances.

SIDEWALK, MELVILLE AVENUE—VETO.

The following was received:

City of Boston,
Office of the Mayor, September 2, 1910.
To the City Council:

I return herewith without my approval your order directing the Superintendent of Streets to make a sidewalk along both sides of Melville avenue, between Washington street and Dorchester avenue, Ward 20, for the reason that the officials of this department report that the work involved would cost \$12,500, which is not available at this time.

Respectfully,
JOHN F. FITZGERALD, Mayor.

City of Boston,
Street Department, Highway Division,
Boston, Mass., September 1, 1910.
Mr. Louis K. Rourke,

Superintendent of Streets:
Sir,—I return herewith order of the City Council for edgestones and artificial walks in Melville avenue, and inclose estimate of the cost of the work ordered—\$12,500.

This sum of money is not available for this purpose at this time, the division appropriation being almost exhausted.

I would respectfully suggest that the order be returned without approval.

Respectfully,
JAMES H. SULLIVAN,
Deputy Superintendent.

September 2, 1910.
In accordance with above report it is recommended that the order of the City Council for the construction of this sidewalk be not approved.

L. K. ROURKE,
Superintendent of Streets.

Placed on file.

EXPIRATION OF OFFICE TERMS.

The following was received:

City of Boston,
Office of the Mayor, September 1, 1910.
John T. Priest, Esq., City Clerk, Boston, Mass.:
Dear Sir,—I hereby notify you that the following appointments heretofore duly certified to you are for the terms provided in chapter 486 of the Acts of

1909, and that the appointees named are to hold office until the dates specified in the inclosed list, unless removed by the Mayor in accordance with the provisions of section 14 of chapter 486 of the Acts of 1909:

James A. Gallivan, Street Commissioner, January 2, 1913.

John M. Minton, Election Commissioner, March 31, 1914.

Edward B. Daily, Assessor, April 30, 1913.

J. Alfred Mitchell, City Auditor, April 30, 1914.

William Jackson,* City Engineer, April 30, 1914.

William P. Fowler, Institutions Registrar, April 30, 1914.

George E. McKay, Superintendent of Markets, April 30, 1914.

James M. Prendergast, Park Commissioner, April 30, 1913.

D. Henry Sullivan, Superintendent of Public Grounds, April 30, 1914.

Edward W. McGlenen, City Registrar, April 30, 1914.

Mrs. Agnes C. Bulger, Bath Trustee, April 30, 1915.

Mrs. Margaret G. O'Callaghan, Consumptives' Hospital Trustee, April 30, 1915.

Abraham Shuman, Trustee of the Boston City Hospital, April 30, 1915.

Alexander W. Longfellow, Art Commissioner, April 30, 1915.

James J. Minot, M. D., Consumptives' Hospital Trustee, April 30, 1915.

Thomas M. Babson, Corporation Counsel, April 30, 1914.

Charles H. Slattery, City Treasurer, April 30, 1914.

Rev. Alexander Mann, Library Trustee, April 30, 1915.

Thomas Sproules, Overseer of the Poor, April 30, 1913.

William P. Fowler, Overseer of the Poor, April 30, 1913.

James H. Smyth, Superintendent of Printing, April 30, 1914.

P. Robert Greene, Overseer of the Poor, April 30, 1911.

Mrs. Mary J. Gookin, Overseer of the Poor, April 30, 1913.

John E. Gilman, Soldiers' Relief Commissioner, April 30, 1914.

John J. Madden, Cemetery Trustee, April 30, 1915.

Thomas Allen, Art Commissioner, April 30, 1913.

Francis M. Carroll, Bath Trustee, April 30, 1915.

Francis X. Mahoney, M. D., Health Commissioner, April 30, 1913.

Charles D. Maginnis, Art Commissioner, April 30, 1914.

Louis K. Rourke, Superintendent of Streets, April 30, 1914.

John F. Kennedy, Schoolhouse Commissioner, May 31, 1913.

Mrs. Mary E. McIsaac, Music Trustee, April 30, 1915.

Bowdoin S. Parker, City Collector, April 30, 1914.

Thomas F. Lally, Overseer of the Poor, April 30, 1913.

William F. Fitzgerald, Sinking Funds Commissioner, April 30, 1913.

James W. McLaughlin, Bath Trustee, April 30, 1913.

Edward H. Eldredge, member Board of Appeal, July 31, 1915.

Fred E. Bolton, Assessor, April 30, 1913.

William M. Murphy, Bath Trustee, April 30, 1911.

Richard M. Walsh, Bath Trustee, April 30, 1912.

Manus J. Fish, Superintendent of Public Buildings, April 30, 1914.

Charles Logue, Schoolhouse Commissioner, May 31, 1911.

Charles B. Perkins, Schoolhouse Commissioner, May 31, 1912.

Philip O'Brien, Assessor, April 30, 1913.

Respectfully,
JOHN F. FITZGERALD, Mayor.

Placed on file.

ENGINE HOUSE, WARD 19.

The following was received:

City of Boston,
Office of the Mayor, September 12, 1910.
To the City Council:

I beg to transmit a letter of the temporary Fire Commissioner, in reply to an order passed by your honorable body at its meeting of August 8, to the effect that "his Honor the Mayor be requested to take such action as may be necessary to provide for the immediate issuing of the balance of the loan for, and for the construction of, the engine house at Parker Hill, Ward 19."

Respectfully,
JOHN F. FITZGERALD, Mayor.

City of Boston,
Headquarters Fire Department,
Bristol street, September 1, 1910.
Hon. John F. Fitzgerald, Mayor:

Sir,—Replying to your request, under date of August 10, inclosing an order to the City Council relative to the engine house loan for the Parker Hill district, I beg to say that the records of this office show that on January 17, 1908, a loan for

* Died June 30, 1910.

\$15,000 was authorized for house and apparatus on Parker Hill; that, thereupon, bids for a loan were advertised at an expense of \$27.90; no land has been purchased, so that the balance of the loan, according to the City Auditor's monthly exhibit, is now \$14,972.10.

Respectfully yours,
FRANCIS M. CARROLL,
Temporary Commissioner.

Placed on file.

APPOINTMENTS BY THE MAYOR.

Subject to confirmation by the City Council, the Mayor submitted the following appointments, viz.:

(1.) Jason Whitman Butters (11A Forest street, Ward 17), a Constable of the City of Boston for the term ending April 30, 1911.

(2.) George W. Whitney (33 Maverick street, East Dedham), a Weigher of Beef for the term ending April 30, 1911.

Laid over under the law.

ADDITIONAL LAND, CITY HOSPITAL.

The following was received:

City of Boston,
Office of the Mayor, September 12, 1910.
To the City Council:

The appended letter, from Robert T. Paine recalls an offer which has been under consideration for some time by the trustees of the City Hospital, and which has been recommended by them for acceptance. I would respectfully refer you to the letter of the chairman, dated July 14, appended to my communication addressed to your honorable body at its meeting of July 18, and would suggest that, in justice to the owner of the property, some definite reply should be made to his proposition.

Respectfully,
JOHN F. FITZGERALD, Mayor.

Robert T. Paine, Jr.,
16 State street, Boston, September 9, 1910.
Hon. John F. Fitzgerald,
Mayor of Boston,

City Hall, Boston:
My dear Mr. Fitzgerald,—Under authority received from the heirs of Robert Treat Paine, I hereby offer to the city for use by the Boston City Hospital the estate belonging to the late Robert Treat Paine bounded by Massachusetts avenue, Harrison avenue and Northampton street, for the sum of \$67,000, payment to be made as of August 12, with interest from that date to the date of payment at the rate of 5 per cent per annum; with taxes to be apportioned as of August 12 and with all rents received by me for the period subsequent to August 11, less all expenses, to be accounted for to the city; this offer to remain open for the period of six weeks from this date.

Very truly yours,
ROBERT T. PAINE.
Referred to the Committee on Finance.

PRIZE FOR AVIATION MEET.

The following was received:

City of Boston,
Office of the Mayor, September 12, 1910.
To the City Council:

Acting in behalf of the city, I have offered a prize for accuracy in the dropping of bombs from air ships, to be competed for at the aviation meet now being conducted at Squantum. It has seemed to me that the city, as such, has a special interest in the encouragement of skill in this art, as the destruction of hostile fleets by means of bombs dropped from air ships may conceivably become one of the most effective measures of coast defence in the not distant future. I beg to recommend, therefore, the appended order, which transfers one hundred dollars (\$100), the value of the prize offered by me, from the appropriation for Reserve Fund to the appropriation for Mayor, office expenses, etc.

Respectfully,
JOHN F. FITZGERALD, Mayor.

Ordered, That in accordance with the provisions of chapter 261 of the Acts of 1893 the City Auditor be, and hereby is, authorized to transfer the sum of one hundred dollars (\$100) from the appropriation for Reserve Fund to the appropriation for Mayor, office expenses, etc.

Referred to the Executive Committee.

NEW BOAT, INFIRMARY DEPARTMENT.

The following was received:

City of Boston,
Office of the Mayor, September 12, 1910.
To the City Council:

I beg to recommend the passage of the accompanying order, transferring two thousand five hundred dollars from the Reserve Fund to the appropriation for Boston Infirmary Department, new boat. The necessity for this additional sum is set forth in the appended letter from the chairman of the trustees of the Infirmary Department.

Respectfully,
JOHN F. FITZGERALD, Mayor.

City of Boston,
Boston Infirmary Department,
August 29, 1910.
Hon. John F. Fitzgerald,
Mayor of Boston,
City Hall, Boston, Mass.:

Dear Sir,—The Boston Infirmary Trustees would respectfully request that an additional appropriation in the sum of twenty-five hundred dollars (\$2,500) be allowed this department for the new boat now being built by the George Lawley & Son Corporation, increasing the amount of same from \$35,000 to \$37,500.

The builders have recommended a different type of fire pump with 50 per cent greater capacity—a 750 gallon, turbine-driven centrifugal pump—in place of the duplex pump named in the specifications. This suggestion meets with the approval of Mr. Carl H. Clark, engineer on the work, and of Mr. Louis K. Rourke, acting City Engineer, both of whom recommend the change.

The exact amount of the increase in cost has not as yet been determined, but the amount requested, \$2,500, will be sufficient to meet the expense with a small margin for any unforeseen expenditure that may be necessary, additional fire hose, etc.

Trusting that this request may meet with your favorable consideration,

Very respectfully,
E. M. GALLAGHER, Chairman.

Ordered, That the City Auditor be, and hereby is, authorized to transfer the sum of two thousand five hundred dollars (\$2,500) from the appropriation for Reserve Fund to the appropriation for Boston Infirmary Department, new boat.

Referred to the Executive Committee.

EXHIBIT FOR TOWN PLANNING CONFERENCE.

The following was received:

City of Boston,
Office of the Mayor, September 1, 1910.
To the City Council:

The City of Boston has been invited to participate in a Town Planning Conference which will take place in London, England, during the week of October 10 to 15. Many of the principal cities of the old world and the new are expected to send models and drawings to the exhibition in the galleries of the Royal Academy, which will be a feature of the conference. An opportunity is afforded us to display before an international gathering of experts some record of the past achievements of our own city and of the direction which progress is likely to take in our future municipal undertakings. Estimates and plans have been made which lead me to believe that a satisfactory exhibit of a pictorial character could be prepared and shipped for about one thousand five hundred dollars. In my opinion it is worth while to expend this sum in order to confirm the excellent reputation which our city now enjoys among the European nations.

The exhibit, as designed by Messrs. Arthur A. Shurtleff and Louis C. Newhall, will consist of seven frames, each about six by eight feet in dimension. The middle frame will contain a bird's eye view of Boston from the water front, painted by some artist of skill. In the middle of the other frames will be suitably colored maps showing the city proper, the metropolitan district, the harbor and the eastern part of the state. Arranged marginally around each of these centers will be photographs in frames of uniform size, about eight by ten inches each, illustrating in detail the particular phase of our municipal activity which is represented by the central map. These views will be connected by fine colored or gilded ribbons with appropriate features of the map.

The invitation from the honorable secretary of the exhibition subcommittee, with various documents relating to the conference, is appended herewith, together with an order for the transfer of \$1,500 from the Reserve Fund to a special appropriation to be expended by the Art Trustees for an exhibit at the London Town Planning Conference.

I desire to recommend the passage of this order.
Respectfully,
JOHN F. FITZGERALD, Mayor.

The Royal Institute of British Architects,
Town Planning Conference,
London, August 3, 1910.

W. A. Leahy, Esq.,
Office of the Mayor, Boston, U. S. A.:

Dear Sir,—I now send you particulars of the forthcoming Town Planning Conference and exhibition, which you will perhaps remember we were obliged to postpone from July until October next. We hope that you will be able to send us a good exhibit of plans and photographs explaining the town planning and improvement work which is contemplated in your city. I may say that Mr. Burnham is sending us all the plans which he made for the proposed reconstruction of Chicago, and we are assembling from all parts of the world a representative collection of town planning exhibits and, now that the Royal Academy have lent us their galleries in Burlington House, we are wishing to make the exhibition as complete as possible and trust you will be able to help us by sending such drawings as have been prepared for your city. We

shall be sending you in a few days the necessary papers to be filled in and returned.

Yours faithfully,
RAYMOND UNWIN,
Honorable Secretary Exhibition Subcommittee.

Ordered, That the City Auditor be, and hereby is, authorized to transfer the sum of one thousand five hundred dollars (\$1,500) from the Reserve Fund, to be expended by the Art Trustees for the preparation and shipment of an exhibit at the London Town Planning Conference.

Referred to the Executive Committee.

PETITIONS REFERRED.

The following petitions were received and referred to the committees named, viz.:

Claims.

Laurence Minot, for compensation for damages at 15-41 Broadway extension, on account of stoppage of sewer in the street.

Charles M. Griffin, to be refunded \$100 which he alleges he was unjustly fined while a member of the Fire Department.

Elias J. Stewart, for a hearing on his claim on account of injuries received while he was a member of the Fire Department.

John P. O'Connell, for compensation for expense incurred on account of injuries received while an employee of the city.

John McCarron, for compensation for injuries to horse on Morton street, Dorchester.

Mrs. Ella Solomon, for compensation for injuries caused by an excavation in front of 12 Morton street.

Michael J. Hughes, to be paid expenses incurred on account of an accident which occurred while he was employed at the pumping station.

F. J. Wall, for compensation for damage to buggy on ferryboat "D. D. Kelly."

C. O. Bennett & Son, for compensation for injuries to a horse by a defect in Parkman road.

Susan A. Brown, for compensation for injuries caused by a fall at 527 Columbia road.

Commonwealth Construction Company, to be paid for extra work on its contract for setting edgestones, etc., on Round Hill street.

Faneuil Hall, Etc.

Petitions for the use of Faneuil Hall, viz.:

Daniel J. McDonald, evening of September 14.

International Association of Machinists, Boston Lodge No. 264, on the evening of September 22.

George L. Cain, on the evening of October 1.

Democratic State Committee, on October 6 (daytime).

Socialist party, on the evening of October 10.

Executive Committee.

Petitions were received for sidewalks, as follows:

Brick with Granite Edgestone.

John Hanley *et al.*, 92-96 Calumet street, Ward 19.

Artificial Stone with Granite Edgestone.

Suffolk Trust Company, Broad, Central and Doane streets, Ward 6.

Morse Brothers, 254 Tremont street, Ward 7.

Morris Bronstein, 31-41 Astor street and on Bickerstaff street, Ward 10.

E. N. Foss, 642-648 Beacon street, Ward 11.

L. V. Niles, 569-571 Columbus avenue, Ward 12.

John E. Holden, 177-181 M street and on Eighth street, Ward 14.

Catherine Hannon, 71 Farragut road, Ward 14.

William J. Higgins, 73-77 Farragut road, Ward 14.

Mrs. Bella Gorrie, 37 Romey street, Ward 20.

Edward A. Talbot, 14 Elmo street, Ward 20.

Bessie B. Giles, 152 Rosseter street, Ward 20.

Mt. Pleasant Home, Ruthven street, side of estate 59 Elm Hill avenue, Ward 21.

M. Goldman, 43-47 Bainbridge street and 2 Kensington street, Ward 21.

Max Rosen, 79 Holworthy street, Ward 21.

Lottie L. Foley, 718-720 Morton street, Ward 24.

Walter Curley, 1329-1331 Blue Hill avenue, Ward 24.

F. F. Fuller, 1496-1498 Dorchester avenue and on Lincoln street, Ward 24.

William Duff, 311 North Harvard street, Ward 25.

James J. Kelley *et al.*, Edge Hill street, Ward 22.

WAGES OF CITY EMPLOYEES.

Communications were received from the Carpenters' District Council of Boston and vicinity relative to wages of carpenters and mechanics.

Referred to his Honor the Mayor.

COAL AND COKE LICENSES.

Copies of coal and coke licenses granted by the Secretary of the Commonwealth were received.

Placed on file.

CONSTABLE'S BOND.

The City Treasurer, after having duly approved of the same, submitted the constable's bond of Julian Codman.

Approved by the Council.

STORAGE OF EXPLOSIVES.

Notice was received from Abbott D. Gill, 115 Dudley street, of the keeping of explosives at said location and of intention to use said premises for same purpose for the ensuing year.

Placed on file.

NOTICES OF HEARINGS.

Notices were received from the Board of Railroad Commissioners of hearing on August 31 on petition of West End Street Railway Company for relocation of pole on Dorchester avenue, and of hearing on September 13 on approval of 320th and 321st locations of West End Street Railway Company.

Placed on file.

NOTICES OF CONTRACTS.

Notice was received from Coun. Timothy J. Buckley of intention to teach in Charlestown Evening High School.

Notice was received from Thomas Sproules relative to work for Schoolhouse and Public Buildings Departments.

Placed on file.

ELEVATED TO ACT AS COMMON CARRIER.

A petition was received from the Boston Elevated Railway Company, lessee, for permission to operate as a common carrier of newspapers, baggage, express matter and freight on tracks of West End and Old Colony Street Railway Companies in the City of Boston.

Referred to the Executive Committee.

ERECTION OF POLES, ETC.

Copies of orders were received from the Street Commissioners as follows:

Erection of posts on Dorchester avenue by the Fire Commissioner.

Erection of post on Atlantic avenue, corner of Pearl street, by the Fire Commissioner.

Erection of post on Dorchester avenue, corner of Harvest street, by the Police Commissioner.

Removal of pole of New England Telephone and Telegraph Company on Beacon street, Ward 11.

Attaching of wires of New England Telephone and Telegraph Company to two poles on C street, Ward 13.

Attaching of wires of New England Telephone and Telegraph Company to poles on Washington street, Ward 23.

Erection of poles of Edison Electric Illuminating Company on Alger street and Crescent avenue.

Attaching of wires of same company to one pole on Eleanor street, Ward 2.

Attaching of wires of same company to one pole on Gladstone street, Ward 1.

Attaching of wires of same company to seven poles on Mapleton street, Ward 25.

Attaching of wires of same company to pole on Massachusetts avenue.

Attaching of wires of same company to pole on North Harvard street, Ward 25.

Attaching of wires of same company to three poles on Quincy street.

Attaching of wires of same company to pole on Rockland street, Ward 21.

Alteration of location 320 of West End Street Railway Company at Columbus avenue and Centre street.

Alteration of location 321 of West End Street Railway Company at Warren street, from Intervale street to Devon street.

Placed on file.

REQUEST FOR PUBLIC HEARING.

A petition was received from Edmund D. Codman, John D. Bryant, Alexander McGregor and Alexander Whiteside asking that a hearing be given as early as possible relative to legislation now pending before the Joint Board of Railroad and Transit Commissioners under the provisions of chapter 58, Resolves of 1910.

Referred to the Executive Committee on motion of Coun. HALE.

Later in the session Coun. HALE said: I move a reconsideration of the reference to the Executive Committee of the request for a public hearing in regard to the subway. I moved to have it referred because I thought it was something more than formal. As I see it is simply a request for a public hearing in regard to this subway location I would be glad to have it go right through.

The motion to reconsider was carried.

Coun. BUCKLEY offered an order—That the petition of John D. Bryant, Edmund D. Codman, Alexander McGregor, Alexander Whiteside and others relative to legislation now pending before the Joint Board of Railroad and Transit Commissioners under the provisions of chapter 58, Resolves of 1910, requesting that a public hearing be given by the City Council, be referred to the Executive Committee with instructions to give a public hearing on the same on or before September 24; the expense of said hearing, including advertising and stenographic report of the same, to be charged to the appropriation for City Council, incidental expenses.

Passed.

MINORS' LICENSES.

President BALLANTYNE submitted petitions for minors' licenses for fourteen newsboys, one bootblack and four vendors, and asked the approval of the Council on the same.

The licenses were granted on the usual conditions.

SOLDIERS' RELIEF.

Coun. HALE, for the Committee on Soldiers' Relief, submitted a report recommending the passage of an order for the payment of aid to soldiers and sailors and their families in the City of Boston for the month of September.

Report accepted; order passed.

USE OF FANEUIL HALL.

Chairman BALLANTYNE, for the Committee on Faneuil Hall, etc., submitted reports on petitions (severally referred to-day) for the use of Faneuil Hall—that leave be granted, viz.:

Daniel J. McDonald, evening of September 14.

International Association of Machinists, Boston Lodge No. 264, evening of September 22.

George L. Cain, evening of October 1.

Democratic State Committee, daytime, October 6.

Socialist Party, evening of October 10.

Reports severally accepted; leave granted on the usual conditions.

CONFIRMATION OF APPOINTMENTS.

The Council proceeded to consider unfinished business, Nos. 1 and 2, viz.:

Action on appointments submitted by the Mayor August 22, viz.:

1. William H. McNulty, to be a Weigher of Coal for the term ending April 30, 1911.

2. William E. Stewart, to be a Weigher of Coal, a Measurer of Wood and Bark, a Measurer of Grain, a Weigher of Boilers and Heavy Machinery and a Weigher of Beef, for the term ending April 30, 1911.

The question came on confirmation. Committee, Coun. Hale and McDonald.

Whole number of ballots cast 5, yeas 5, and the appointments were confirmed.

RETIREMENT SYSTEM FOR EMPLOYEES.

Coun. HALE called up No. 3, special assignment, viz.:

3. Whereas, The Legislature of the Commonwealth of Massachusetts has passed an act authorizing the cities and towns of the Commonwealth to establish a retirement system for their employees; and

Whereas, It is the opinion of the Boston City Council that such a retirement system would be of benefit to the city and to the employees; therefore be it

Ordered, That the provisions of chapter 619 of the Acts of 1910 be accepted by the Boston City Council in behalf of the City of Boston.

Coun. COLLINS—Mr. President, in view of the importance of this question and also in view of the fact that scarcely a majority are here to-day, it seems to me singularly appropriate that an order of this significance and importance should be at least deferred until we have more here. Accordingly I move you an assignment of this matter to two weeks from to-day.

Coun. HALE—Mr. President, I shall not oppose that if Coun. Collins insists on it, but I introduced this order about a month ago and then, on my own volition, asked to have it postponed so that each of us could look the matter up and be ready to vote at the next meeting—and that was especially assigned for to-day; and I think we ought to take action as soon as we can, for the next step is to put it on the ballot and have a long campaign of publicity and have it passed by a referendum vote. Of course, if Coun. Collins insists I shall not oppose his motion. The matter has been approved by the Old Age Pension Commission and the State Legislature and by the Mayor.

Coun. COLLINS—Mr. President, I ask not for myself so much as in deference to four other members of this body who are not here. I insist on my request.

Coun. Collins' motion prevailed and the amendments and order were assigned for two weeks.

CLOSING OF STREETS.

Coun. BUCKLEY offered an order—That the Police Commissioner be authorized to close to travel by vehicles, except fire, police, hospital and mail wagons, the streets to be used for the formation and passage of the Knights of Columbus parade on October 12, 1910, and the City Messenger is hereby

authorized to rope off said streets at such points as may be deemed necessary by the Police Commissioner, the expense thus incurred to be charged to the appropriation for City Council, incidental expenses.

Passed.

SIDEWALK ORDERS.

Coun. COLLINS offered an order—That the Superintendent of Streets make a sidewalk along the westerly side of Glenway street, from 147 to the corner of Harvard street, Ward 20, in front of the estate bordering thereon; said sidewalk to be from 3 to 10 inches above the gutter adjoining, to be from 5 to 12 feet in width, and to be built of artificial stone with granite edgestone, under the provisions of chapter 437 of the Acts of 1893.

Passed.

Coun. COLLINS offered an order—That the Superintendent of Streets make a sidewalk along both sides of Welles avenue, between Argyle street and Talbot avenue, Ward 24, in front of the estates bordering thereon; said sidewalk to be from 3 to 10 inches above the gutter adjoining, to be from 5 to 12 feet in width, and to be built of artificial stone with granite edgestone, under the provisions of chapter 437 of the Acts of 1893.

Passed.

Coun. COLLINS offered an order—That the Superintendent of Streets be requested to provide the necessary street crossings along Glenway street, Ward 20, at the intersections of streets between Harvard and Bradshaw streets.

Passed.

EXECUTIVE COMMITTEE REPORTS.

Coun. HALE, for the Executive Committee, submitted reports on petitions for sidewalks (severally referred to-day)—recommending the passage of orders that the Superintendent of Streets make sidewalks on the following named streets in front of the hereinafter named estates; said sidewalks to be from 3 to 10 inches above the gutter adjoining, to be from 5 to 12 feet in width and to be built as specified, the owner to furnish the material, viz.:

Brick with Granite Edgestone.

John Hanley *et al.*, 92-96 Calumet street, Ward 19.

Artificial Stone with Granite Edgestone.

Suffolk Trust Company, Broad, Central and Doane streets, Ward 6.

Morse Brothers, 254 Tremont street, Ward 7.

Morris Bronstein, 31-41 Astor street and on Bickerstaff street, Ward 10.

E. N. Foss, 642-648 Beacon street, Ward 11.

L. V. Niles, 569-571 Columbus avenue, Ward 12.

John E. Holden, 177-181 M street and on Eighth street, Ward 14.

Catherine Hannon, 71 Farragut road, Ward 14.

William J. Higgins, 73-77 Farragut road, Ward 14.

Mrs. Bella Gorrie, 37 Romsey street, Ward 20.

Edward A. Talbot, 14 Elmo street, Ward 20.

Bessie B. Giles, 152 Rosseter street, Ward 20.

Mt. Pleasant Home, Ruthven street, side of estate 59 Elm Hill avenue, Ward 21.

M. Goldman, 43-47 Bainbridge street and 2 Kensington street, Ward 21.

Max Rosen, 79 Holworthy street, Ward 21.

Lottie L. Foley, 718-720 Morton street, Ward 24.

Walter Curley, 1329-1331 Blue Hill avenue, Ward 24.

F. F. Fuller, 1496-1498 Dorchester avenue and on Lincoln street, Ward 24.

William Duff, 311 North Harvard street, Ward 25.

Reports severally accepted; orders passed.

COST OF LIBRARY PRINTING.

Coun. McDONALD offered an order—That the Library Trustees be requested, through his Honor the Mayor, to furnish the City Council, at their earliest convenience, with the cost of maintaining yearly the printing plant attached to the Library Department, said information to include all expenses connected with said library printing.

Passed.

TRIMMING AND REMOVAL OF TREES.

Coun. McDONALD offered an order—That the Superintendent of Public Grounds be requested to trim two trees in front of No. 512 Sixth street, Ward 14, the expense attending the same to be charged to the appropriation for Public Grounds Department.

Passed.

Coun. McDONALD offered an order—That the Superintendent of Public Grounds be requested to remove a tree in front of estate No. 206 Harvard street, Dorchester, the expense attending the same to be charged to the appropriation for Public Grounds Department.

Passed.

GENERAL RECONSIDERATION.

Coun. HALE moved a general reconsideration on all business transacted at the meeting, hoping that the same would not prevail. Lost.

Adjourned at 4.10 o'clock p. m., on motion of Coun. COLLINS, to meet on Monday, September 19, at three o'clock p. m.

PROCEEDINGS OF SCHOOL COMMITTEE.

Sept. 12, 1910.

A meeting of the School Committee of the City of Boston was held in the School Committee Chamber, Mason-street Building, at 5:15 o'clock P.M., the Chairman presiding.

Present: Messrs. Brock, Ellis, Lee, Mahenis and Scannell.

APPROVAL OF RECORDS.

The reading of the records of the last meeting was omitted, the Board approving them as printed.

USE OF SCHOOLHOUSES FOR REGISTRATION PURPOSES.

A communication was received from the Board of Election Commissioners, under date of Sept. 9, 1910, requesting that the rooms in schools now used for registration purposes be further assigned for such purposes for the evenings of Sept. 17, 19 and 20 from 6 o'clock P.M. until 10 o'clock P.M., as follows: Emerson School, Bunker Hill Grammar School, Mayhew School and Prince School.

Placed on file, and the application approved, subject to the conditions governing the use of such accommodations for the current year.

WITHDRAWAL OF APPOINTMENT.

A communication was received from the Superintendent, under date of Sept. 12, 1910, withdrawing the appointment on probation of James E. Downey, at the latter's request, as principal of the South Boston Evening High School, to date from Oct. 3, 1910, which was presented and approved at the meeting of June 6, 1910.

Placed on file.

Sherry, Elizabeth M. Shine, Mary E. Smith, Julia E. Sullivan, Agnes G. Tarpey, Mary E. Towle, Laura J. Westcott.
Placed on file.

LEAVE OF ABSENCE RESCINDED.

On motion of the Superintendent, it was ORDERED, That the following leave of absence, granted at the meeting of April 4, 1910, be, and hereby is, rescinded:—

Normal School—Dora Williams, assistant, Sept. 14 to 19, 1910, four days.

TRANSFER OF A CLERICAL ASSISTANT.

A communication was received from the Superintendent, under date of Sept. 12, 1910, reporting that he had made the following transfer:—

Mechanic Arts High School—To the same position in the Dorchester High School, Sadie H. Roberts, clerical assistant, from Sept. 20, 1910.
Placed on file.

TEMPORARY CLERICAL ASSISTANT, MECHANIC ARTS HIGH SCHOOL.

On motion of the Superintendent, it was ORDERED, That a temporary clerical assistant be, and hereby is, allowed in the Mechanic Arts High School until such time as the position may be permanently filled in accordance with the Civil Service rules.

A communication was received from the Superintendent, under date of Sept. 12, 1910, stating that, subject to the approval of the Board, he had appointed Eunice W. Alden temporary clerical assistant in the Mechanic Arts High School, to date from Sept. 20, 1910.

Placed on file, and the appointment approved.

On motion of the Superintendent, it was

ORDERED, That the salary of Eunice W. Alden, temporary clerical assistant in the Mechanic Arts High School, be, and hereby is, established at two dollars and fifty cents (\$2.50) per day.

EMPLOYMENT OF AGNES C. FLYNN. CHARLESTOWN HIGH SCHOOL.

On motion of the Superintendent, it was

ORDERED, That the employment in the Charlestown High School, beginning Sept. 14, 1910, of Agnes C. Flynn, an assistant in the Prescott District, be, and hereby is, authorized for such portion of the school year 1910-11 as the Superintendent may deem expedient, Miss Flynn to be paid at the same rate as if she were teaching as an assistant in an elementary school.

On motion of the Superintendent, it was ORDERED, That while Agnes C. Flynn, because of her service in the Charlestown High School, is absent from her regular position in the Prescott District, her place in that district be filled by a temporary teacher.

EMPLOYMENT OF MARY E. O'NEILL HIGH SCHOOL OF PRACTICAL ARTS.

On motion of the Superintendent, it was

ORDERED, That the employment in the High School of Practical Arts, beginning Sept. 14, 1910, of Mary E. O'Neill, an assistant in the Thomas Gardner District, be, and hereby is, authorized for such portion of the school year 1910-11 as the Superintendent may deem expedient, Miss O'Neill to be paid at the same rate as if she were teaching as an assistant in an elementary school.

On motion of the Superintendent, it was ORDERED, That while Mary E. O'Neill, because of her service in the High School of Practical Arts, is absent from her regular position in the Thomas Gardner District, her place in that district be filled by a temporary teacher.

EMPLOYMENT OF CAROLINE R. PULSIFER, SOUTH BOSTON HIGH SCHOOL.

On motion of the Superintendent, it was

ORDERED, That the employment in the South Boston High School, beginning Sept. 14, 1910, of Caroline R. Pulsifer, an assistant in the Washington District, be, and hereby is, authorized for such portion of the school year 1910-11 as the Superintendent may deem expedient, Miss Pulsifer to be paid at the same rate as if she were teaching as an assistant in an elementary school.

On motion of the Superintendent, it was ORDERED, That while Caroline R. Pulsifer, because of her service in the South Boston High School, is absent from her regular position in the Washington District, her place in that district be filled by a temporary teacher.

PAYMENT TO ESTATE OF ROBERT E. BURKE.

On motion of the Superintendent, it was

ORDERED, That the sum of thirteen dollars (\$13) be paid to the estate of Robert E. Burke on account of an expense incurred for typewriting, the same to be charged to the account of Supplies and Incidentals.

ATTENDANCE IN BROOKLINE OF CHILDREN IN PRINCE DISTRICT.

On motion of the Superintendent, it was

ORDERED, That the Business Agent be and hereby is authorized, during the school year 1910-11, to issue permits to children in the first three grades, residing in that portion of the Prince District ly-

ing west of Dearfield street, to attend school in the town of Brookline, the city of Boston to pay tuition for such attendance.

SALARY OF ALICE G. WALSH.

On motion of the Superintendent, it was ORDERED, That Alice G. Walsh, assistant in the office of the Superintendent, be placed upon the fourth year of the schedule of salaries for clerks and stenographers employed in the offices of the School Committee, viz., seven hundred and eighty dollars (\$780) per annum, beginning Oct. 1, 1910.

APPOINTMENT OF ASSISTANT, SEC- RETARY'S OFFICE.

A communication was received from the Secretary, under date of Sept. 9, 1910, reporting that, subject to the approval of the Board, and with the approval of the Civil Service Commission, he had appointed Margaret E. McDermott as assistant in his office, to date from Aug. 22, 1910.

Placed on file, and the appointment approved.

ANNIVERSARIES OF TEACHERS ON LEAVE OF ABSENCE.

A communication was received from the Business Agent, under date of Aug. 22, 1910, recommending that section 345, paragraph 2 of the regulations, which now provides that teachers absent from duty on leave without pay for a continuous period of three months or more shall have the dates of their anniversaries advanced by the amount of such absence, be amended to provide that such advance of anniversaries shall only apply to teachers who are out on such leave for one year.

Laid over.

AMENDMENT TO SALARY SCHEDULE.

A communication was received from the Business Agent, under date of Aug. 22, 1910, recommending an amendment to Order No. 11 of the salary schedule for 1910-11.

Placed on file, and it was

ORDERED, That Order No. 11 of the salary schedule for 1910-11 as printed in the Minutes of June 20, 1910 (p. 121), be rescinded and the following substituted therefor:

ORDERED, That Emma F. Temple, first assistant kindergarten, be placed upon the second year of the salary of her rank, six hundred forty-eight dollars (\$648) per year, to date from Sept. 1, 1910, upon her passing the first promotional examination, and that she be advanced thereafter until the maximum of the rank is reached, subject to the provisions of the regulations with reference to promotional examinations.

APPROPRIATIONS AND EXPEN- DITURES TO SEPT. 1, 1910.

A communication was received from the Business Agent, under date of Sept. 1, 1910, submitting a statement showing the appropriations, expenditures and balances of the first eight months of the current financial year, the total expenditures, and expenditures for the corresponding eight months of the financial year 1909-10, with the increases and decreases in the several items.

Placed on file.

APPROPRIATIONS AND EXPEN- DITURES, SUPPLIES AND INCIDENT- TALS.

A communication was received from the Business Agent, under date of Sept. 1, 1910, submitting a statement of the appropriations, expenditures and balances for each of the items of the appropriation for supplies and incidentals up to and including the Sept. 1 draft.

Placed on file.

EXPENDITURES OF SALARIES FOR NORMAL, LATIN AND HIGH SCHOOL TEACHERS, AND APPROPRIATIONS AND EXPENDITURES FOR NURSES.

Communications were received from the Business Agent, under dates of Aug. 29, and Sept. 6, 1910, relating to the estimated and actual expenditures for salaries for teachers in the Normal, Latin and High Schools, during the current

year, and the appropriations and expenditures for nurses during the same period.

Placed on file.

TUITION IN EVENING SCHOOLS.

A communication was received from the Business Agent, under date of Aug. 25, 1910, recommending rates of tuition to be charged non-resident pupils attending evening schools for the ensuing term.

Placed on file.

On motion, it was

ORDERED, That for the term 1910-11 tuition be charged non-resident pupils in the following schools at the following rates:—

Central Evening High School.

Pupils attending five nights per week	\$21
Pupils attending three nights per week	 17
Pupils attending two nights per week	 13
Evening Commercial High Schools..	 17
Evening Elementary Schools.....	 18

On motion, it was

ORDERED, That the State Board of Education be requested to establish the cost for tuition of non-resident pupils attending the Boston Evening Industrial School for the term 1910-11 at \$32.00.

APPOINTMENT OF ASSISTANT, BUSI- NESS AGENT'S OFFICE.

A communication was received from the Business Agent, under date of Sept. 10, 1910, recommending that the appointment of an additional assistant in his office be authorized.

Placed on file, and on motion it was

ORDERED, That the appointment of an additional assistant in the office of the Business Agent is hereby authorized.

SALARY OF ANNA J. WAGNER.

A communication was received from the Business Agent, under date of Sept. 12, 1910, recommending an advance in the salary of Anna J. Wagner, assistant in his office.

Placed on file, and on motion it was

ORDERED, That Anna J. Wagner, assistant in the office of the Business Agent, be placed upon the third year of the schedule of salaries for clerks and stenographers, beginning Sept. 23, 1910.

RESIGNATION OF JANITORS.

A communication was received from the Schoolhouse Custodian, under date of Sept. 12, 1910, transmitting the following resignations of janitors, to date from July 25, 1910, and Aug. 19, 1910, respectively:

Francis Beadle, Portables Nos. 51 and 106, Blackinton School-yard.

John J. Kearns, Portable No. 54, May-

hew School-yard.

John McCloskey, Portables Nos. 10, 31

and 33, Dorchester High School-yard.

James McNabb, Portable No. 80, W. L.

P. Boardman School-yard.

Jeremiah Shaw, Portable No. 65, Asa

Gray School-yard.

Henry J. Mahoney, Joy-street Portables

Nos. 98, 97, 99 and 100, from Aug. 19, 1910.

Placed on file, and the resignations accepted.

JANITORSHIP, ALBERT PALMER SCHOOL-HOUSE, AND PORTABLE NO. 62.

A communication was received from the Schoolhouse Custodian, under date of Sept. 12, 1910, submitting a list of applicants for transfer to the janitorship of the Albert Palmer School-house and Portable No. 62 and recommending that John H. Palmer janitor of the Harvard Hill School-house, who stands at the head of the list, be transferred to said position to date from Sept. 13, 1910.

Placed on file, and the transfer of John H. Palmer to said position approved from the date stated.

JANITORSHIP, PETER FANEUIL SCHOOL-HOUSE.

A communication was received from the Schoolhouse Custodian, under date of Sept. 12, 1910, submitting a list of applicants for transfer to the janitorship of the Peter Faneuil School-house, and recommending that David F. Sennott, janitor of the Benjamin Pope School-house, who stands at

the head of the list, be transferred to said position, to date from Sept. 18, 1910.

Placed on file, and the transfer of David F. Sennott to said position approved, from the date stated.

JANITORSHIP, WEST-CONCORD STREET SCHOOL-HOUSE.

A communication was received from the Schoolhouse Custodian, under date of Sept. 12, 1910, submitting a list of applicants for transfer to the janitorship of the West-Concord street School-house, and recommending the transfer of Edward J. Powers, janitor of the Parkman School-house, who stands second on the list, to the position, to date from Sept. 18, 1910.

Placed on file, and the transfer of Edward J. Powers, being the second candidate on the list, was approved from the date stated, the candidate standing at the head of the list being passed over without prejudice because of his advanced age.

APPOINTMENT AS JANITORS OF ELLEN G. HART, NELLIE G. WATSON, AND MARGARET WALSH.

A communication was received from the Schoolhouse Custodian, under date of Sept. 12, 1910, recommending that Nellie G. Watson, janitor of the Heath-st. School-house, Ellen G. Hart, janitor of the Sherwin Portables, and Margaret Walsh, janitor of the Adams and Chestnut-streets School-house, all provisional appointees, be permanently appointed.

Placed on file, and the Secretary authorized to take such steps as may be necessary to make the aforesaid appointments permanent.

ENGLISH HIGH SCHOOL ANNEX JANITOR SERVICE.

A communication was received from the Schoolhouse Custodian, under date of Sept. 10, 1910, stating that premises at the corner of Clarendon and Tremont streets have been hired for the use of the English High School, and recommending that the compensation for janitor service of these premises be established in accordance with the regular schedule at \$11.10 per week.

Placed on file, and on motion it was ORDERED, That the compensation of the janitor of the English High School Annex at the corner of Clarendon and Tremont streets be fixed at the rate of \$11.10 per week beginning Sept. 6, 1910, and until otherwise ordered.

A communication was received from the Schoolhouse Custodian, under date of Sept. 12, 1910, recommending the provisional appointment of Michael Finn as janitor of the English High School Annex, situated at Nos. 557 and 561 Tremont street, who is employed in that capacity by the owner of the building.

Referred to Mr. Brock for consideration and recommendation.

APPOINTMENT OF JANITORS OF PORTABLE SCHOOL-HOUSES.

A communication was received from the Schoolhouse Custodian, under date of Sept. 10, 1910, containing the following list of portable buildings recently erected in school yards, and stating that in each instance he has placed the janitor of the main building in charge of the portable and recommends that they be appointed as the regular janitors, to date from Sept. 1, 1910.

Comins Portable No. 65, Samuel A. Dodds.
Cook Portable No. 51, James F. Cooper, Jr.
Gaston Portable No. 54, William F. Griffin.
Howard-avenue Portables Nos. 102 and 105, Samuel T. McClellan.
Hull Portables Nos. 80 and 100, Henry C. Hunneman.
John G. Whittier Portables Nos. 10 and 103, John J. Smith.
Mt. Vernon st. Portable No. 106, Simeon Robinson.
Phillips Brooks Portables Nos. 97, 98 and 99, Charles F. Hartson.
Roger Wolcott Portable No. 33, Henry E. Meyer.
Tileston Portable No. 31, William H. Cook.
Placed on file, and the appointments approved.

APPOINTMENTS AND PAYMENT OF ACTING JANITORS.

A communication was received from the Schoolhouse Custodian, under date of Sept. 10, 1910, submitting a list of temporary appointments and reappointments of janitors for periods of ten days or less, and amounts due for services rendered, as follows:

Albert Palmer and Portable No. 62 School-houses—Charles Timmins acting janitor—reappointed Sept. 2 and 12, 1910. Amount due Sept. 2 to 12, inclusive, \$22.47.

English High School Annex, corner Clarendon and Tremont streets—Michael Finn appointed acting janitor Sept. 6, 1910. Amount due Sept. 6 to 12, inclusive, \$11.10.

Peter Faneuil School-house—Henry J. Mahoney, acting janitor—appointed Aug. 20, 1910, reappointed Aug. 30, Sept. 8, 1910. Amount due Sept. 9 to 12, inclusive, \$5.27.

West Concord st. School-house—John Hoey, acting janitor—reappointed Sept. 2 and 12, 1910. Amount due for services rendered Sept. 2 to 12, inclusive, \$24.22.

Placed on file and the reappointments approved.

On motion, it was

ORDERED, That for services rendered as acting janitors of various school-houses, payments be made as follows:—

To Michael Finn, English High School Annex, from Sept. 6 to 12, 1910, inclusive, eleven and 10-100 dollars (\$11.10).

To John Hoey, West Concord-street School-house, from Sept. 2 to 12, 1910, inclusive, twenty-four and 22-100 dollars (\$24.22).

To Henry J. Mahoney, Peter Faneuil School-house, from Sept. 9 to 12, 1910, inclusive, five and 27-100 dollars (\$5.27).

To Charles Timmins, Albert Palmer and Portable No. 62 School-houses, from Sept. 2 to 12, 1910, inclusive, twenty-two and 47-100 dollars (\$22.47).

CERTIFICATION OF AREAS, PETER FANEUIL SCHOOL-HOUSE.

A communication was received from the Schoolhouse Custodian, under date of Sept. 11, 1910, transmitting a certification of the areas of the Peter Faneuil School-house, upon which the compensation for janitor service is based.

Placed on file, and the Chairman authorized to approve the same.

PETITION FOR THE DISCONTINUANCE OF VACATION SCHOOL IN EVERETT SCHOOL-YARD.

A petition was received, under date of Sept. 6, 1910, from Adelaide M. Adams and fifteen other owners and residents in the immediate vicinity of the Everett School, that the Vacation School in that yard be discontinued.

Referred to the Superintendent with full power.

PETITION FOR NAMING A SCHOOL IN HONOR OF GEORGE A. HIBBARD.

A petition was received from Sherwin L. Cook, under date of Aug. 30, 1910, that one of the elementary schools to be erected during the coming year, be named the George A. Hibbard School.

Placed on file, and the Secretary directed to transmit a copy thereof to Dr. Scannell; and to inform Mr. Cook and Mrs. Hibbard that this matter will have the careful consideration of the Board when the naming of a suitable school is under consideration.

ESTABLISHMENT OF A NEWSBOYS' COURT.

A communication was received from Alexander Peckham, E. L. Curran and Mitchell Freiman, under date of Sept. 1, 1910, enclosing the following tentative plan for a Trial Board in connection with the Newsboys' Court:

Tentative Plan for a Newsboys' Trial Board.

(1) The Trial Board shall consist of five (5) members, as follows:—Two (2) adults to be appointed annually by the School Committee for the term of one (1) year from October 1, 1910, and three (3) newsboys, one elected annually from the North, South and West End, respectively. These geographical sections shall include the schools which the School

Manual now groups and includes under these sections.

(2) Newsboy candidates shall be nominated from each section by not more than fifty (50) signatures of the licensed newsboys in the section, no boy to sign for more than one candidate, the election to be held the first week in October, and the nominations to be handed in at least ten (10) days before the election. The preparation of the ballot and the mode, manner, and place of election shall be decided by an official or officials to be appointed by the Superintendent of Schools. The elections shall be decided by plurality vote.

(3) If any judge resigns or moves out of the section which he represents, a special election shall be held to fill the vacancy.

(4) The meetings of the Board shall be held at the Boston Newsboys Club, 277 Tremont street, and the mode, manner and method of procedure and time of meetings of the Trial Board, shall be established by the Board, itself.

(5) The Board shall have power to investigate, make findings and recommendations to the School Committee for all violations of Newsboy licenses.

(6) The Supervisor of Licensed Minors shall be authorized in his discretion to bring his complaints before this Board instead of to the Juvenile Court. The Police Commissioner shall be requested to instruct the officer now specially detailed for these offenses, to cooperate in so far as feasible with this board.

(7) The Board shall have jurisdiction over all newsboys attending the Boston Public Schools.

(8) The Newsboy-judges shall be paid fifty cents (50c.) for their attendance at each of the official sessions of the Board. Placed on file and the plan adopted on the part of the Board.

WARRENTON STREET SITE FOR THE HIGH SCHOOL OF COMMERCE.

A communication was received from William Peel, under date of Aug. 19, 1910, in favor of the selection of the Warrenton street lot as a site for the proposed High School of Commerce and School Administration Building.

Placed on file.

FREE HAND DRAWING EXHIBIT AT MECHANICS FAIR.

A communication was received from Boston Mechanics Exposition, under date of Sept. 12, 1910, offering prizes to pupils of the Grammar and High Schools of Boston who compete in a Free Hand Drawing Exhibit to be held in connection with Mechanics Fair, Oct. 3 to 29, 1910.

Referred to the Board of Superintendents for consideration and report.

MOVING PICTURE SHOWS.

A communication and set of resolutions were received from the Crescent Bay Women's club, Venice, Calif., under date of Aug. 30, 1910, setting forth the evil effects of some moving picture shows, and recommending that moving pictures be established and maintained by the Boards of Education as a part of the curriculum of the schools which they govern.

Placed on file, and the Secretary directed to reply thereto to the effect that this general subject is now being considered by a special committee.

PAYMENT TO ACTING PRINCIPAL OF PRE-APPRENTICE SCHOOL OF PRINTING AND BOOKBINDING.

The Superintendent offered the following:—

ORDERED, That there be paid Augustus H. Kelley the sum of \$100 for services rendered by him as acting principal of the Pre-Apprentice School in Printing and Bookbinding from March 1 to June 30, 1910.

ORDERED, That the salary schedule, adopted by the Board on June 20, 1910, be amended by the insertion of the following item to follow immediately after the item relating to the School on Spectacle Island, on page 108:—

PRE-APPRENTICE SCHOOL IN PRINTING AND BOOKBINDING.

Acting Principal, per month, \$50.00.
Laid on the table.

NOTICE TO SUBSCRIBERS.

Subscribers will find the expiring date of their subscription stamped upon the mailing wrapper. As payment must be made in advance, remittance should be made on or before that date.

City of Boston — Street Department NOTICE

The Board of Street Commissioners, in accordance with chapter 393 of the Acts of 1906, have passed orders for the laying out and construction of the following highways:

SOUTH BOSTON.

Emmet street, between East Third street and East Second street.

WEST ROXBURY.

Ainsworth street, between Centre street and South street.

Danville street, between Bellevue street and Wren street.

ROXBURY.

Brinsley street, between Columbia road and Washington street.

Granville street, between Adams street and Milton street.

ROXBURY AND DORCHESTER.

Intervale street, between Blue Hill avenue and Normandy street.

Notice is hereby given that the Street Department is about to do the work contemplated in said orders, and that all work to be done in said highways by all persons or corporations having rights in the same to lay or repair either sewer, gas, water or other pipes must be done before MONDAY, October 3, 1910, as after that time no permits for openings will be granted until two years after said highways are completed.

LOUIS K. ROURKE,
Superintendent of Streets.

Boston, September 6, 1910. (Sept. 17-24.)

CITY OF BOSTON.**PROPOSALS FOR THE DISPOSAL OF REFUSE.**

The Superintendent of Streets of the City of Boston, office 47 City Hall, invites proposals for the disposal of refuse for a term of 10 years from January 1, 1912, and giving bond therefor of a surety company approved by the superintendent. The proposals can be obtained at said office on and after September 1, 1910, and must be filled out, signed by the bidder and left at said office before 12 o'clock m. of Monday, October 17, 1910, with a certified check for five thousand dollars (\$5,000), payable to and to be the property of the city if the proposal after acceptance is not carried out, and will at said hour and place be publicly opened and read. Proposals must be made in duplicate, the duplicate, without check, to be deposited by the bidder with the City Auditor previous to the time named for opening the bids. The undersigned reserves the right to give preference to the proposals of bidders agreeing to pay the trade unions' rate of wages and the right to reject any or all proposals. The proposals should be inclosed in an envelope, sealed, and marked "Proposal for Disposal of Refuse."

L. K. ROURKE,
Superintendent of Streets.
Boston, August 25, 1910. (Sept. 17.)

CITY OF BOSTON.**PROPOSALS FOR PIPE SEWERS.**

The Superintendent of Streets of the City of Boston, office 47 City Hall, invites proposals for pipe sewer and drains in Rockdale and Rosewood streets, Dorchester, and giving bond therefor of a surety company approved by the superintendent in the sum of fifteen hundred dollars (\$1,500), to secure the due performance of the contract and the full protection of the city. Forms of bids may be obtained at the said office of the Superintendent of Streets. Each bid should be inclosed in an envelope, sealed, marked "Bid for Sewer in Rockdale and Rosewood Streets," and left at the said office of the Superintendent of Streets before 12 m. on Tuesday, September 27, 1910, with a certified check for five hundred dollars (\$500), payable to and to become the property of the city if the bid after acceptance is not carried out. The bids will then and there be publicly opened and read. Bids must be made in duplicate, the duplicate without check to be deposited by the bidder with the City Auditor previous to the time named for opening the bids. The undersigned reserves the right to give preference to the proposals of bidders agreeing to pay the trade unions' rate of wages and the right to reject any or all proposals.

LOUIS K. ROURKE,
Superintendent of Streets.
Boston, September 14, 1910. (Sept. 17.)

CITY OF BOSTON.**PROPOSALS FOR MACADAM ROADWAY AND ARTIFICIAL STONE SIDEWALKS.**

The Superintendent of Streets of the City of Boston, office 47 City Hall, invites proposals for constructing a macadam roadway and artificial stone sidewalks in Westcott street, between West Park street and Talbot avenue, Dorchester, and giving bond therefor of a surety company approved by the superintendent. Only proposals obtained at said office, filled out, signed by the bidder and left at said office before 12 o'clock m. of Tuesday, September 27, 1910, with a certified check for \$500, payable to and to be the property of the city if the proposal is not carried out, will at said hour and place be publicly opened and read. The proposals must be made in duplicate, the duplicate, without check, to be deposited by the bidder with the City Auditor previous to the time named for opening the bids. The undersigned reserves the right to give preference to the proposals of bidders agreeing to pay the trade unions' rate of wages, and the right to reject any or all proposals, and no proposal will be accepted unless a fair, reasonable price is bid for each item. The proposals should be inclosed in an envelope, sealed and marked "Proposal for Macadam Roadway and Artificial Stone Sidewalks in Westcott street."

L. K. ROURKE,
Superintendent of Streets.
Boston, September 15, 1910. (Sept. 17.)

CITY OF BOSTON.**PROPOSALS FOR FLOUR.**

The Penal Institutions Commissioner invites proposals to supply the House of Correction, Deer Island, with 300 barrels, more or less, of hard wheat flour, and to furnish a bond in a surety company of \$500, if required by the commissioner. Said flour to be delivered on or before October 15, 1910, on board the steamer "Monitor" at Eastern Avenue Wharf, Boston, Mass. Specifications and sample of the grade as the standard may be obtained at office of the Penal Institutions Commissioner, 32 Tremont street. Proposals will be received until September 22, 1910, at 12 m., when the same will be publicly opened. The commissioner reserves the right to reject any or all bids. A duplicate of bid must be filed with City Auditor at or before same time.

FRED S. GORE,
Commissioner.
(Sept. 17.)

CITY OF BOSTON.**PROPOSALS FOR PIPE SEWER.**

The Superintendent of Streets of the City of Boston, office 47 City Hall, invites proposals for pipe surface drains in Danville street, between Wren street and Bellevue street, West Roxbury, and giving bond therefor of a surety company approved by the superintendent in the sum of two hundred dollars (\$200), to secure the due performance of the contract and the full protection of the city. Forms of bids may be obtained at the said office of the Superintendent of Streets. Each bid should be inclosed in an envelope, sealed, marked "Bid for Surface Drains in Danville Street," and left at the said office of the Superintendent of Streets before 12 m. on Monday, September 26, 1910, with a certified check for one hundred dollars (\$100), payable to and to become the property of the city if the bid after acceptance is not carried out. The bids will then and there be publicly opened and read. Bids must be made in duplicate, the duplicate without check to be deposited by the bidder with the City Auditor previous to the time named for opening the bids. The undersigned reserves the right to give preference to the proposals of bidders agreeing to pay the trade unions' rate of wages and the right to reject any or all proposals.

LOUIS K. ROURKE,
Superintendent of Streets.
Boston, September 15, 1910. (Sept. 17.)

BOSTON PUBLIC SCHOOLS.

Examinations for certificates of qualification to teach in the evening schools and to serve as interpreters in said schools will be held in the Boston Normal School, Huntington avenue, near the Fenway, on Friday, September 23, 1910, at nine o'clock a. m. For further information with regard to these examinations application should be made to the undersigned.

THORNTON D. APOLLONIO,
Secretary School Committee.
(Sept. 17.)

CITY OF BOSTON.**PROPOSALS FOR MACADAM ROADWAY AND ARTIFICIAL STONE SIDEWALKS.**

The Superintendent of Streets of the City of Boston, office 47 City Hall, invites proposals for constructing a macadam roadway and artificial stone sidewalks in West Park street, between Bernard street and the New York, New Haven & Hartford Railroad, Dorchester, and giving bond therefor of a surety company approved by the superintendent. Only proposals obtained at said office, filled out, signed by the bidder and left at said office before 12 o'clock m. of Tuesday, September 27, 1910, with a certified check for \$300, payable to and to be the property of the city if the proposal is not carried out, will at said hour and place be publicly opened and read. The proposals must be made in duplicate, the duplicate, without check, to be deposited by the bidder with the City Auditor previous to the time named for opening the bids. The undersigned reserves the right to give preference to the proposals of bidders agreeing to pay the trade unions' rate of wages, and the right to reject any or all proposals, and no proposal will be accepted unless a fair, reasonable price is bid for each item. The proposals should be inclosed in an envelope, sealed, and marked "Proposal for Macadam Roadway and Artificial Stone Sidewalks in West Park street."

L. K. ROURKE,
Superintendent of Streets.
Boston, September 15, 1910. (Sept. 17.)

CITY OF BOSTON.**PROPOSALS TO CONTRACTORS.**

The Boston City Hospital, Boston, Mass., September 17, 1910. The trustees invite sealed bids or proposals for erecting and completing alterations and repairs for additional fire protection at the Boston City Hospital, the same to be addressed "The Trustees, The Boston City Hospital, Boston, Mass.," and indorsed "Proposal for Erecting and Completing Alterations and Repairs for Additional Fire Protection at the Boston City Hospital." Proposals for doing this work will be received at the office of the superintendent of the hospital on Wednesday, September 28, 1910, at 12 o'clock noon, at which time the said proposals will be publicly opened and read. All proposals must be made upon blank forms to be had at the office of the architect, Edward P. Dana, 112 Water street, on and after 9 a. m. Monday, September 19, where the form of proposal in duplicate, the form of contract, specifications, etc., may also be obtained. The duplicate copy of the proposal must be filled out by the bidder and filed with the City Auditor before 12 o'clock noon on the date given above for receiving proposals. Bidders will be required to give the trustees satisfactory assurance of their competency, experience and responsibility. Bids or proposals must be accompanied by a certified check on a Boston bank for five hundred dollars (\$500), made payable to the City of Boston. Bidders will be required to give a bond in the sum of ten thousand dollars (\$10,000) in some surety company doing business in Boston, for the satisfactory performance of their contract. The right is reserved to reject any and all bids and to waive any defect or informality at the discretion of the trustees.

By order of the trustees.
JOHN H. McCOLLOM,
Superintendent.
(Sept. 17.)

CITY OF BOSTON.**PROPOSALS TO CONTRACTORS.**

The Boston City Hospital, Boston, Mass., September 17, 1910. The trustees invite sealed bids or proposals for changes in the electric wiring in the Boston City Hospital, the same to be addressed, "The Trustees, The Boston City Hospital, Boston, Mass.," and indorsed "Proposal for Changes in the Electric Wiring in the Boston City Hospital." Proposals for doing this work will be received at the office of the Superintendent of the Hospital on Monday, September 26, 1910, at 12 o'clock noon, at which time the said proposals will be publicly opened and read. All proposals must be made upon blank forms to be had at the office of the engineers of the work, Densmore & LeClear, 88 Broad street, Boston, on and after 9 a. m., Monday, September 19, 1910, where the form of proposal in duplicate, the form of contract, specifications, etc., may also be obtained. The duplicate copy of the proposal must be filled out by the bidder, and filed with the City Auditor before 12 o'clock noon on the date given above for receiving proposals. Bidders will be required to give the trustees satisfactory assurance of their competency, experience and responsibility. Bids or proposals must be accompanied by a certified check on a Boston bank for five hundred dollars (\$500), made payable to the City of Boston. The right is reserved to reject any and all bids and to waive any defect or informality at the discretion of the trustees. By order of the trustees.

JOHN H. McCOLLOM,
Superintendent.
(Sept. 17.)

HIGH PRESSURE FIRE-FIGHTING SYSTEMS.

SUCCESS OF THOSE IN USE AND THEIR FAVORABLE EFFECT ON COST OF FIRE INSURANCE.

High pressure water systems for fighting fires that threaten to develop into conflagrations are not new, nor have they come into general use, but where they have been given a fair trial, as in Philadelphia and in New York City, they have proved to be the greatest instrument that has been perfected for extinguishing rapidly spreading fires. In both of these cities they have supplanted steam fire engines to a certain extent. They have effected a saving in the cost of fire insurance to business men and to property owners in the protected districts. In Philadelphia and in New York City the systems have been extended to cover larger sections of the cities where heavy values, destructible by fire, are compactly grouped. Medium size high pressure pumping systems, like those at Coney Island and at the Jamestown Exposition, have been equally successful.

Probably the chief advantages of these systems are that they instantly give several hose streams under a heavy water pressure from a single hydrant without the intervention of a steam fire engine; and that they make it possible for the public department to successfully cope with several threatening fires at one time without crippling the manual force. Before the system in the Borough of Manhattan had been in commission a year, the department had three big fires on its hands at one time.

CHIEF CROKER'S TRIBUTE TO HIGH PRESSURE SERVICE.

Before the high pressure service in the Borough of Manhattan had been in commission a year, Chief Croker of the fire department paid this tribute to it in his annual report:

"Since the installation of the high pressure system, July 6, 1908, the wisdom of this expenditure for increased water pressure has been clearly demonstrated at fires in which it has been used by the decrease in the duration of fires and consequent decrease in loss of property, as well as less wear and tear on men and apparatus of the department. In addition to the indicated value above mentioned of this system, it is beyond a doubt the surest and most reliable asset in the prevention of and possibility of conflagrations which have destroyed other cities in years past, for with the high pressure system it has been shown that simultaneous fires of large magnitude, occurring in different locations, can be handled and extinguished without the necessity of calling on more apparatus and men than are required on a first alarm, which would have called for a second or third alarm with the old water pressure. With the further installation of this system throughout the city, as its initial trial has clearly proven its efficiency, it is my opinion that the days of the old fire engine, with its cumbersome apparatus and attachments, have passed, and with the further introduction of automobile hose wagons it will result in a much less outlay eventually than for costly engines, horses and their necessary renewal. It has been deemed expedient to dispense with the services of engine companies previously called for on first alarms in the high pressure section, thus proving the saving principle of the system, and allowing a reserve force for any extremity likely to arise in the extinguishment of fire and its possible extension."

First Alarm Fires.—Evidently Chief Croker had no reason to change his good opinion of high pressure service, for later in the same year (October, 1909) he gave orders to use the new service on all fires in the protected area to the exclusion of steam fire engines. The orders were, in part:

"The high pressure service will be used exclusively in lieu of engines at all fires in the high pressure zone, and from the time the alarm is given until this department directs that the service of the pumping station be discontinued it shall remain under the orders of this department. Upon receipt of all stations (street boxes) in the high pressure zone the engineer in charge of the pumping station is whose district the alarm is located will start the pumps at a pressure of 125 pounds and will continue at that pressure until ordered to change it. If at any time the fire does not warrant the use of the high pressure service the officer in charge will at once notify the pumping station of same. . . . Upon receipt of all stations (street boxes) in the high pressure zone, except border line stations, all engine companies will respond with hose wagons only. Engines will be left in quarters in charge of a driver and, when possible, an engineer."

On learning of the new order, *Insurance Engineering* made this inquiry of Chief Croker:

Will you advise us how many fire companies located in the high pressure zone are equipped to use the high pressure pumping system, and how many of the companies so equipped answer the first alarm for any fire in the high pressure zone?

Chief Croker's reply was that all companies in the high pressure zone, and those bordering on same, are fully equipped to operate the high pressure system. All stations in the high pressure zone have four engine companies, two hook and ladder companies, and two chiefs of battalion; and a great many of the most important stations have a water tower, which responds on the first alarm; and companies bordering on the water front are assisted by two fireboats on the first alarm.

Discretion of Commanding Officer.—The order of Chief Croker to use the high pressure service for all first alarm fires in the protected district raised, among insurance engineers and underwriters, the question "Is it advisable to use high pressure pumping systems for first alarm fires to the exclusion of steam fire engines?" Apparently it was thought that unnecessary water damage might result, but Chief Croker's order gave to the officer in charge authority to use his discretion as to whether the high pressure service was needed.

Second Alarm Fires.—In Philadelphia the high pressure service is used only on the second alarm. In referring to the use of the new part of the system in that city, Inspector McDevitt made the following statement:

"The new system will be used as judiciously as is the original in the mercantile district, wherein the high pressure service is used only on second alarm. On such alarm the companies responding take hold of the high pressure apparatus, leaving their portable engines in reserve. On the occurrence of a threatened conflagration at the beginning, a second signal is given, which may include a second and third alarm at once, bringing the allotted men and apparatus for the different alarms at one time.

"The fire officials are continually study-

ing the best means for the handling of the high pressure service, and at every instance, where brought into play, any existing foothold from which streams can be delivered on a level with the different floors of a burning building is taken advantage of, displaying good fire fighting results."

Because of the wide attention which Chief Croker's order attracted, *Insurance Engineering* invited an expression of opinion on (1) the advisability of using high pressure streams on first alarm fires; (2) the wisdom of removing steam fire engines from districts protected by high pressure systems, and (3) desirable changes in the fire-fighting methods of public departments. The limited experience with high water pressures made some engineers hesitate to express an opinion, but the selected answers presented herewith give a fair idea of the attitude of practical men toward this new weapon of defense against conflagrations and will undoubtedly serve as the basis of future consideration.

Philadelphia: The use of high pressure fire mains with separate pumping stations is not developed sufficiently so that methods of the use of such systems at fires can be fairly criticised. In this city it is customary to use the steam fire engine and the chemical fire apparatus for first alarm fires, holding the high pressure system in reserve. On receiving the first alarm the pumps at the high pressure pumping station are started immediately, so that, should a call be received from the fire ground for additional pressure, the same will be available instantly. It is my judgment that the maximum pressure at the hydrant of 125 pounds is the limit for safe handling of the high pressure system, unless it is handled by specially designed devices, such as the water tower or the cannon wagon. Chief Baxter of this city has been very successful in our high pressure district with his method of using the high pressure mains as a reserve, to be called for only when necessary. I am informed that Chief Croker of your city has been equally successful in using the high pressure mains for first alarms. I am inclined to think, however, that in such cases there will necessarily be a greater water loss.

Cleveland: It is our opinion that a standard high pressure fire system is adequate to take care of the districts under its protection without the use of steam fire engines. We also are of the opinion that at least one hose wagon should respond to all first alarms. Owing to the fact that a separate system of this nature is intended to furnish a strong pressure, and is intended to be used in connection with large size hose, it is our opinion that the chemical engine and steam fire engine should not be totally dispensed with in these districts. Where there is one fire of large magnitude, requiring such special service as is delivered through a special fire main system, there are at least ten fires that could be extinguished by the chemical engine and steam fire engine with less damage from water. Underwriters will no doubt agree that a standard high pressure fire main system will check a conflagration, or a great fire. However, on account of the polluted water source, which is usually the case, and the damage resulting from large hose streams, they will hardly agree that the fire engine and chemical engine should be entirely eliminated.

Winnipeg: I have been unable to make up my mind with regard to the questions you ask. They are broad ones and call for careful consideration. I may say that

they are questions which are troubling the insurance interests and the citizens generally in our city at the present time. I would say, further, that I have recently been in correspondence with several eastern cities where the situation is much the same as in Winnipeg in regard to these very points. As you are doubtless aware, a little over a year ago there was completed in this city a high pressure fire-fighting plant, with separate mains and hydrants. The plant is up to date in every particular and, except as to size, is the equal of any plant of its kind on the continent. The power used is producer gas. The plant, consists of six units, four with a pumping capacity of 1,800 gallons and two with a pumping capacity of 900 gallons per minute. The pumps are three-throw, vertical pumps, direct-connected to horizontal reciprocating gas engines. The system of mains and hydrants cover the whole congested district of the city. The water supply is from the Red river, which is inexhaustible. Since the completion of this system, however, we have had three of the most serious fires in the history of the city, and our fire loss has been heavier within the last year (1909) than it has been for many years. In the case of these three fires, all of which occurred in modern warehouse buildings from five to seven stories in height, the loss was in a great part occasioned, in our opinion, not by fire, but by water. In fact there has been some doubt in the minds of the insurance interests as to whether we were not better off with the domestic service and fire engine streams, barring, of course, the one possibility of a conflagration. While there is no doubt that the high pressure plant will in the future save much property loss, there is also no doubt that it needs to be used with considerable care and judgment. There is a tendency on the part of the firemen, when they have an ample supply of water at a heavy pressure, to stand away and simply drown the fire out, instead of going in and fighting it at close quarters, as was of necessity the case when they had nothing better than the ordinary fire engine streams. You will see from these remarks that the situation is one which is troubling us, and I may say that I am not prepared at the present time to give you answers to your questions which would be of value. From our short experience with the high pressure system, I would say, however, that it should be used for all fires within the congested district of the city, provided that due judgment is used in the pressure and capacity at which the pumping plant is run. It is not necessary to have 250 pounds pressure at the hydrants for a first alarm fire. It is not only not necessary, but is disastrous. With regard to your second question, I certainly think that steam fire engines should be kept within the high pressure district in any case, unless the system is one with a duplicate system of mains. Of course, in a city the size of Winnipeg, that is, between 130,000 and 150,000, fire engines can be kept outside of the congested district, and still be on hand in ample time to render assistance in case of any break down in the high pressure system. For a city of larger size, however, I would say that fire engines should certainly be kept within the pressure zone, unless the system is in duplicate.

Detroit: Regarding the advisability of depending on high pressure fire main systems for first alarm fires, our experience in Detroit has hardly been such that the opinion of this office would be of much value, as our high pressure system depends for its water upon a fireboat connected

to the river end of the system and is, therefore, subject to the same delays, only to a greater extent, as the obtaining of pressure from steam fire engines. It would seem, however, to the writer, that where the pressure is maintained at the hydrant at all times, the streams from the high pressure service could be brought into action quicker than those from steamers, but whether they should be depended upon would be largely a question of local conditions and fire department organization.

Portable valves for reducing, at the hydrant, the pressure from high pressure systems have been invented and if successful will give firemen better control of the pressure and should also help them to minimize the damage from water. One of these reducing valves has been on trial in New York City and was submitted to the Underwriters' Laboratories, Inc., Chicago, for their examination.

Apparently the pressure must be controlled at the hydrant, otherwise a pressure at the pumping station that would be adequate for one fire might be inadequate for another. The valve that is being tried in New York City is easily carried to each fire.

High pressure hose streams must be under control constantly, not only to prevent unnecessary water damage, but also to protect the firemen, especially when they are working on fire escapes or inside of buildings. Half a dozen New York firemen working from a fire escape were nearly knocked from their position by a misdirected high pressure stream being operated from the street with the assistance of the special holders that have been provided.

The problem of reducing water damage incident to extinguishing a fire is not easy to solve. What is necessary damage and what is unnecessary damage? The matter should have the constant consideration of the officer in charge at every fire that is being fought with high pressure streams.

While poor building construction and excessive heights prevail, there appears to be little doubt that high pressure fire systems must be a part of any comprehensive plan for dealing with the conflagration hazard in the congested districts of cities. They are not beyond the reach of small cities, many of which are exposed to the same danger that is found in larger places. If gas power, or electric power from a public station, is adopted, the cost of maintenance is much less than for the same pumping capacity secured from steam fire engines.—*Insurance Engineering*.

SAN FRANCISCO'S HIGH PRESSURE SERVICE.

Before the conflagration of April, 1906, San Francisco's population was about 400,000. The present population, according to the new report of the Committee on Fire Prevention of the National Board of Fire Underwriters, is estimated to be 450,000. There is a different class of buildings in the congested district than there was at the time of the great conflagration, due chiefly to a co-operation between the underwriters and property owners. The city is still handicapped by not owning its own water supply. The management of the Spring Valley Water Works is said to be efficient, "but lack of satisfactory agreement with the city has caused a complete cessation of construction." The supply lines into the city are said to be barely sufficient to deliver at a rate corresponding to that of the maximum

daily consumption and are not in duplicate. The public fire department is only nominally under civil service regulations.

The proposed auxiliary water supply for fire protection, provided for under a \$5,500,000 bond issue authorized in 1908, includes (a) A system of high pressure fire mains using fresh water from gravity reservoirs for regular fire service; (b) Duplicate high pressure pumping stations which will supply the system with water from the bay in an emergency; (c) Two fireboats for the protection of the water front which can be also used as auxiliary pumping stations to supply the high pressure fire mains; (d) A system of fire cisterns to be kept filled with fresh water for emergency use with steam fire engines.

The pumping stations are to be built on solid rock. One of them will be completed before the end of the year and it is expected that the entire auxiliary equipment will be ready by the end of 1911. The buildings will be 85 by 160 feet, of reinforced concrete (especially designed to resist earthquake shocks), and all window and door openings will be protected against the passage of fire by the use of wireglass windows in metal frames, metal-covered doors and rolling steel shutters. The equipment to be installed immediately will consist of four sets of horizontal multistage turbine pumps coupled to steam turbines. Each set will have a capacity of 2,700 gallons per minute against a discharge pressure of 300 pounds per square inch, with 150 pounds steam pressure at the throttle. Oil fuel will be burned under the boilers supplying steam for the turbines. Five fuel oil tanks each with a capacity of 432 barrels, are to be built of concrete underground, outside of the station. This oil supply is intended to be sufficient to operate the station under full capacity for 72 hours after standing by for four weeks. One battery of boilers will be kept constantly under a working steam pressure of 200 pounds. The distributing system will consist of a gridiron of 20 to 10-inch pipes, with gate valves to be closed to prevent bleeding the system in case of a break caused by the effects of an earthquake. Cast-steel manifolds with gated hose connections, check valves and gate valves will be provided for the use of the fireboats. All pipe will be coated cast iron. Hydrants will be of the post type, set on concrete bases and tied to the main line by tie-rods; each hydrant will have 3½-inch outlets with independent gates and reducers for 3-inch hose. Four-inch connections may be permitted for standpipes in fireproof (Class A) buildings.

The new water system has been designed to deliver 15,000 gallons per minute at about 220 pounds working pressure in the congested value district. The reservoirs will be the primary supply.—*Insurance Engineer*.

PLAN VACUUM CLEANER FOR CLEVELAND.

Public Service Director A. B. Lea and Superintendent Mundinger, of the Street Cleaning Department, have completed work on the model for a vacuum street cleaning device, and the first vacuum street cleaner built after the design will be ready by August 15. "It will be a great success," said Mr. Mundinger. "By using this device we can save the city a great deal of money." Vacuum cleaners are used in a number of European cities and in eastern cities of this country, but according to Commissioner Mundinger the Cleveland street cleaner will not resemble any of them.—*Municipal Journal and Engineer*.

DELINQUENT TAX SALES.

CITY OF BOSTON.

CITY COLLECTOR'S NOTICE.

The owners and occupants of the following described parcels of real estate situated in the City of Boston, in the County of Suffolk, and Commonwealth of Massachusetts, and the public are hereby notified that the taxes and assessments thereon severally assessed for the years 1900, 1902, 1903, 1906, 1907 and 1908, according to the lists committed to me as City Collector of taxes and assessments of said City of Boston, including the assessments for the suppression of gypsy and brown-tail moths, levied under the provisions of chapter 381, Acts of 1905, and chapter 268, Acts of 1906, remain unpaid, and that the smallest undivided part of each of said estates sufficient to satisfy said taxes and assessments with interest and all legal costs and charges, or the whole of each of said estates, if no person offers to take an undivided part thereof, will be offered for sale by public auction at the City Collector's office, room numbered eleven, in the basement of City Hall, in said City of Boston, on Wednesday, September 28, 1910, at 9.30 o'clock a. m., for the payment of said taxes and assessments, with interest, costs and charges thereon, unless the same shall be previously discharged.

The sums set against the following descriptions of the several estates show the amounts due thereon respectively for the taxes and assessments for the nonpayment of which each of said estates is to be sold, but not including the costs and interest thereon and costs and charges incident to this sale.

WARD ONE.

Samuel Barkin, set off to Anna Hill—Building and about 2,500 feet of land, numbered 213 Princeton street, tax for 1908.....	\$ 19 60
James Biggio (Bk. 12, p. 3)—About 2,056 feet of land on the southwesterly side of Boardman street, adjoining an estate of Michele Sacco (numbered 16), apportionment of sewer assessment for 1908.....	9 27
Edward F. Burke (Bk. 13, p. 8)—About 7,500 feet of land on the northeasterly side of Wordsworth street, adjoining an estate of Ellen Anderson (numbered 30), apportionment of sewer assessment for 1908.....	10 19
Cumberland Dock and Storage Company—Buildings and about 40,000 feet of land and flats on the northerly side of and at end of Noy street, adjoining an estate of Bay State Dredging Company, tax for 1908.....	212 85
Abbie S. Evans (Bk. 17, p. 4)—About 5,000 feet of land on the northeasterly side of Montmorency avenue, being lot 22, block C, H. T. Whitman plan, dated 1894, recorded Suffolk Deeds, at end of Book 2204, apportionment of sewer assessment for 1908.....	14 00
Annie J. Fowler—Buildings and about 2,500 feet of land, numbered 218 and 218 rear Saratoga street, balance of tax for 1908.....	39 10
Also building and about 2,500 feet of land, numbered 216 Saratoga street, tax for 1908.....	37 95
Elizabeth C. Giblein—Building and about 2,500 feet of land, numbered 517 Orleans street, to be sold for tax for 1907.....	47 70
Then for tax for 1908.....	51 15
Also building and about 2,500 feet of land, numbered 518 Bennington street, to be sold for tax for 1907.....	36 57
Then for tax for 1908.....	37 95
Hannah T. Mahoney—Building and about 2,135 feet of land, numbered 4 Neptune road and 383 and 385 Bennington street, tax for 1908.....	107 25
Also building and about 1,946 feet of land, numbered 387 Bennington street, tax for 1908.....	79 20
James F. Nolan, Administrator—Building and about 2,000 feet of land, numbered 262 Bremen street, to be sold for tax for 1907.....	9 54
Then for tax for 1908.....	9 90
Then for assessment for the suppression of gypsy and brown-tail moths for 1907.....	1 11
David Pope Heirs or Devises (Bk. 9, p. 9)—Building and about 2,500 feet of land, numbered 86 Wordsworth street, to be sold for apportionment of sewer assessment for 1908.....	4 50
(Bk. 14A, p. 10) Then for apportionment of street construction assessment for 1908.....	5 60

James Robertson (Bk. 11, p. 2)—Building and about 5,000 feet of land, numbered 47 Chaucer street, apportionment of sewer assessment for 1908.....	\$14 00
---	---------

WARD TWO.

George C. Fitzpatrick—Buildings, wharf and about 60,167 feet of land, numbered 368, 370, 372 and 374 Maverick street, tax for 1908.....	\$221 40
Also about 75,500 feet of land and flats on the southwesterly side of Maverick street, adjoining another estate of said Fitzpatrick (numbered 2 Jeffries street), tax for 1908.....	99 00
William S. Kenny—Building and about 1,210 feet of land, numbered 101 London street, to be sold for balance of tax for 1906.....	46
Then for tax for 1907.....	47 70
Then for tax for 1908.....	49 50
Also building and about 1,210 feet of land, numbered 103 London street, to be sold for balance of tax for 1906.....	46
Then for tax for 1907.....	47 70
Then for tax for 1908.....	49 50
Also building and about 1,416 feet of land, numbered 104 Meridian street, to be sold for balance of tax for 1906.....	46
Then for tax for 1907.....	69 96
Then for tax for 1908.....	72 60
Also building and about 1,416 feet of land, numbered 106 Meridian street, to be sold for balance of tax for 1906.....	46
Then for tax for 1907.....	69 96
Then for tax for 1908.....	72 60
Also building and about 1,210 feet of land, numbered 99 London street, to be sold for balance of tax for 1906.....	46
Then for tax for 1907.....	47 70
Then for tax for 1908.....	49 50

WARD THREE.

Willard Welsh—Building and about 1,650 feet of land, numbered 79 Pearl street, tax for 1908.....	\$66 00
--	---------

WARD FOUR.

George T. Horan, Trustee—Building and about 1,200 feet of land, numbered 125 Bartlett street, tax for 1908.....	\$63 00
Also building and about 1,200 feet of land, numbered 123 Bartlett street, tax for 1908.....	26 40
David Kelley (Bk. 18, p. 8)—About 7,000 feet of land on the southeasterly side of Roland street, between the boundary line of Somerville and Boston (formerly Charlestown), and an estate of Joseph Middleby, Jr., apportionment of street construction assessment for 1908.....	20 23
Frank P. Moxworthy—Buildings and about 8,000 feet of land, numbered 400, 402, 402½, 404, 406 and 408 Main street, and 5 Middlesex street, tax for 1908.....	181 50

WARD FIVE.

Alma Tucker—Building and about 1,574 feet of land, numbered 58 Soley street, tax for 1908.....	\$75 90
Alice G. Horan—Building and about 6,000 feet of land, numbered 118, 120 and 122 Main street and 14 and 14A Union street, tax for 1908.....	280 50
George T. Horan—Building and about 1,150 feet of land, numbered 66 Chapman street, tax for 1908.....	67 65
George T. Horan, Trustee—Buildings and about 2,600 feet of land, numbered 74, 76 and 78 Lawrence street, tax for 1908.....	52 80
Elizabeth Poole (Bk. 13, p. 20)—Buildings and about 1,750 feet of land, numbered 54 and 56 Harvard street, apportionment of sewer assessment for 1908.....	8 42

WARD SIX.

John J. Ahern—Building and about 2,900 feet of land, numbered 2, 4 and 6 Cambridge street, balance of tax for 1908.....	\$804 50
Raffaella Bevilacqua—Building and about 959 feet of land, numbered 3 Phipps place, balance of tax for 1908.....	15 50
Also building and about 949 feet of land, numbered 5 Phipps place, balance of tax for 1908.....	15 50
Theresa Giangrande (Bk. 15, p. 12)—Building and about 220 feet of land, numbered 197 North street, apportionment of sewer assessment for 1908.....	3 98

Michael and Luigia Langone (Bk. 17, p. 9)—Building and about 640 feet of land, numbered 5 Douglass court, apportionment of sewer assessment for 1908.....	\$2 02
---	--------

WARD SEVEN.

William Lyons and John J. Coleman, Trustees will of John Nagle—Building and about 1,526 feet of land, numbered 675 Atlantic avenue, South Union Station betterment assessment levied in 1900.....	\$1,742 18
William Lyons—About 1,406 feet of land on the northwesterly side of Atlantic avenue, adjoining an estate of William Lyons and another, Trustees (numbered 675), South Union Station betterment assessment levied in 1900.....	1,598 33
Winifred Wolff—Building and about 1,998 feet of land, numbered 69 Carver street, tax for 1908.....	136 95

WARD EIGHT.

Jacob Grosbavn—Building and about 1,054 feet of land, numbered 16 Willard street, tax for 1908.....	\$145 20
John W. Kimball—Building and about 630 feet of land, numbered 18 Allen street, to be sold for tax for 1907.....	85 86
Then for tax for 1908.....	89 10
Sarah Kroll (Bk. 15, p. 21)—Buildings and about 2,428 feet of land, numbered 20, 22 and 24 Wall street and 6, 8 and 8A Coting street, apportionment of sewer assessment for 1908.....	17 02
Israel Sirk and Joseph Alpert—Building and about 1,774 feet of land, numbered 19 North Russell street, balance of tax for 1907.....	88 37
Also building and about 1,774 feet of land, numbered 17 North Russell street, balance of tax for 1907.....	88 37
Also building and about 1,774 feet of land, numbered 15 and 15A North Russell street, balance of tax for 1907.....	88 36

WARD NINE.

William H. Appleton and Mary E. Ansell (Bk. 20, p. 14)—Building and about 1,091 feet of land, numbered 30 Village street, apportionment of sewer assessment for 1908.....	\$4 75
Beacon Trust Company (Bk. 20, p. 13)—Building and about 866 feet of land, numbered 38 Albion street, apportionment of sewer assessment for 1908.....	4 81
Abraham Berkman—Building and about 900 feet of land, numbered 227 Albany street, and 57 Oswego street, tax for 1908.....	146 85
Also building and about 900 feet of land, numbered 55 Oswego street, tax for 1908.....	115 50
Also building and about 900 feet of land, numbered 53 Oswego street, tax for 1908.....	107 25
Also building and about 900 feet of land, numbered 51 Oswego street, tax for 1908.....	107 25
Also building and about 900 feet of land, numbered 49 Oswego street, tax for 1908.....	107 25
Also building and about 900 feet of land, numbered 47 Oswego street, tax for 1908.....	82 50
Mary A. Donahoe—Building and about 1,262 feet of land, numbered 350 Shawmut avenue, tax for 1906.....	114 48
James J. Grace (Bk. 22, p. 21)—Building and about 1,174 feet of land, numbered 2 Lovering place, apportionment of sewer assessment for 1908.....	8 97
(Bk. 22, p. 21) Also building and about 950 feet of land, numbered 1 Lovering place, apportionment of sewer assessment for 1908.....	7 80
John H. Kelley (Bk. 20, p. 19)—Building and about 984 feet of land, numbered 84 Village street, apportionment of sewer assessment for 1908.....	6 33
Benjamin Lancy—Building and about 1,650 feet of land, numbered 130 Union Park street, balance of tax for 1908.....	15 50
John Madden, two-thirds (j) and Jane Noonan Heirs or Devises, one-third (j)—Building and about 900 feet of land, numbered 215 Albany street and 43 and 45 Oneida street, tax for 1908.....	90 75
Daniel Madden—About 1,400 feet of land on the southeasterly side of Albany street (formerly numbered 210 and 214), adjoining another estate of said Madden (numbered 206 Albany street), tax for 1908.....	57 75
Mary A. Mansfield—Building and about 920 feet of land, numbered 21 Cobb street, tax for 1908.....	112 20

John McCarthy Heirs or Devises (Bk. 20, p. 10)—Building and about 1,100 feet of land, numbered 15 and 17 Albion street, apportionment of sewer assessment for 1908.....	\$6 42
John McGonagle Heirs or Devises—Building and about 800 feet of land, numbered 21 Hamburg street, balance of tax for 1908.....	7 42
Also about 800 feet of land on the northeasterly side of Hamburg street, between an estate of Bernard Doherty heirs or devisees, and an estate of James McLaughlin, 2d, heirs or devisees, balance of tax for 1908.....	2 48
James L. Plimpton—Building and about 6,587 feet of land, numbered 1077 Washington street, tax for 1908.....	1,065 90
Charles F. Smith (Bk. 10, p. 2)—Building and about 883 feet of land, numbered 9 Andrew street, apportionment of street construction assessment for 1908.....	9 10
Walter F. Smith (Bk. 20, p. 16)—Building and about 966 feet of land, numbered 44 Village street, apportionment of sewer assessment for 1908.....	4 20

WARD TEN.

Mary A. Pierce (Bk. 13, p. 28)—Building and about 1,379 feet of land, numbered 267 St. Botolph street, apportionment of sewer assessment for 1908.....	\$6 97
Elizabeth Prevost—Building and about 939 (assessed as 1,028) feet of land, numbered 5 Carleton street, to be sold for apportionment of betterment assessment for 1906.....	4 50
Then for apportionment of betterment assessment for 1907.....	10 50

Austin (Bk. 11, p. 197)—About 5,000 feet of land on the northeasterly side of Fletcher street, adjoining an estate of David Keery (numbered 39), apportionment of sewer assessment for 1908.	\$12 60	Also about 18,546 feet of land on the southwesterly side of Baker street, being lots 20 and 22, same plan, tax for 1908.	\$4 95	(Bk. 22, p. 48) Also about 6,250 feet of land on the northerly side of Belgrade avenue, being lot 219, same plan, to be sold for apportionment of sewer assessment for 1908.	\$3 51
Frank L. Bickford (Bk. 9, p. 254)—Building and about 5,350 feet of land, numbered 22 Westbourne street, to be sold for apportionment of sewer assessment for 1908.	8 25	Also about 9,788 feet of land on the northeasterly side of Glendale road, being lot 19, same plan, tax for 1908.	1 65	(Bk. 23, p. 163) Then for apportionment of street construction assessment for 1908.	17 44
(Bk. 14B, p. 479) Then for apportionment of street construction assessment for 1908.	16 18	Also about 9,847 feet of land on the northeasterly side of Glendale road, being lot 21, same plan, tax for 1908.	1 65	Jennie McLean (Bk. 15, p. 109)—Building and about 5,000 feet of land, numbered 103 Amherst street, to be sold for apportionment of sewer assessment for 1908.	10 50
Lottie E. Brown (Bk. 20, p. 60)—About 10,468 (assessed as 10,648) feet of land on the northeasterly side of Auburn street, adjoining an estate of August Webberson (numbered 45), apportionment for sewer assessment for 1908.	10 50	Also about 10,642 feet of land on the northeasterly side of Glendale road, being lot 23, same plan, tax for 1908.	1 65	Florence B. Morrison—Building and about 29,200 feet of land, numbered 973 South street, assessment for the suppression of gypsy and brown-tail moths for 1908.	57
George A. Cahill—Building and about 5,600 feet of land, numbered 3381, 3383 and 3383 rear Washington street, tax for 1908.	72 60	Richard Cronin Heirs or Devises and Catherine Cronin—About 8,775 feet of land on the southwesterly side of Rockland street, being lot 35, N. Smith plan, October, 1888, recorded Suffolk Deeds, Book 1846, page 403, tax for 1908.	6 60	Ella E. Morse (Bk. 15, p. 139)—About 4,671 feet of land on the northwesterly side of Vermont street, making the westerly corner of La Grange street, being lot 33, Nathaniel Smith plan, January 1, 1893, recorded Suffolk Deeds, attend of Book 2112, apportionment of sewer assessment for 1908.	7 00
Maria J. Cahill (Bk. 9, p. 232)—Building and about 3,973 feet of land, numbered 33 and 35 Rosemary street, apportionment of sewer assessment for 1908.	9 80	Mary A. and Katherine E. Daly—Building and about 3,956 feet of land, numbered 204 South street, to be sold for tax for 1908.	95 70	(Bk. 15, p. 139) Also about 4,731 feet of land on the northwesterly side of Vermont street, being lot 34, same plan, apportionment of sewer assessment for 1908.	7 00
Caroline F. Carleton—About 33,000 feet of land on the southwesterly side of Ashland street, adjoining an estate of James Smith (numbered 231), tax for 1908.	26 40	(Bk. 18, p. 81) Then for apportionment of street construction assessment for 1908.	7 00	George H. Richards (Bk. 7, p. 73)—Buildings and about 43,700 feet of land, numbered 155 Bellevue street, apportionment of sewer assessment for 1907.	36 81
Henry Carnell (Bk. 20, p. 88)—About 6,600 feet of land on the easterly side of Orange street, adjoining an estate of Alice G. Toomey, Trustee (numbered 16 West street), apportionment of sewer assessment for 1908.	7 00	John J. Dorey (Bk. 17, p. 93)—About 6,875 feet of land, on the southwesterly side of Calder street, being lot 23, S. C. Ellis plan, October 8, 1887, recorded Suffolk Deeds, at end of Book 1795, apportionment of sewer assessment for 1908.	2 80	Sadie T. Riley (Bk. 11, p. 231)—Building and about 6,250 feet of land, numbered 116 Perham street, apportionment of sewer assessment for 1908.	8 06
Daniel Carroll Heirs (Bk. 20, p. 82)—About 2,500 feet of land on the easterly side of Meyer street, adjoining an estate of Michael and Amelia Uhl (numbered 6), apportionment of sewer assessment for 1908.	14 00	Owen F. Flanders—About 6,250 feet of land on the southeasterly side of Montclair avenue, making the southerly corner of Fletcher street, being lot 50, Garbett & Wood plan, May 1, 1888, recorded Suffolk Deeds, at end of Book 1819, assessment for the suppression of gypsy and brown-tail moths for 1908.	2 50	Thomas W. Ryan—Building and about 12,619 feet of land, numbered 25 Custer street, tax for 1908.	79 20
Mary F. Connolly (Bk. 22, p. 38)—About 5,850 feet of land on the southeasterly side of Addington road, being lot 23, W. C. Bates plan, October 1, 1897, recorded Suffolk Deeds, at end of Book 2478, apportionment of sewer assessment for 1908.	7 56	John T. Foster—About 6,600 feet of land on the northwesterly side of Augustus avenue, being lot 13, J. E. Jones plan, July 2, 1892, recorded Suffolk Deeds, Book 2148, page 257, tax for 1908.	4 95	Michael J. Shields—About 3,975 feet of land on the northeasterly side of Garfield street, being lot C. J. E. Jones plan, August 28, 1896, on file in the Assessors' office, tax for 1908.	13 20
(Bk. 22, p. 38) Also about 4,925 feet of land on the southeasterly side of Addington road, being lot 24, same plan, apportionment of sewer assessment for 1908.	7 56	Bernard J. Gray (Bk. 12, p. 147)—Building and about 4,119 feet of land, numbered 16 Knoll street, to be sold for apportionment of sewer assessment for 1908.	12 24	Albert C. Smith (Bk. 11, p. 165)—About 2,500 feet of land on the northeasterly side of Angell street, being lot 2, A. E. Haskell plan, August, 1895, recorded Suffolk Deeds, Book 2316, page 203, to be sold for apportionment of sewer assessment for 1908.	5 37
(Bk. 22, p. 38) Also about 5,145 feet of land on the southeasterly side of Addington road, being lot 61, same plan, apportionment of sewer assessment for 1908.	7 56	Then for assessment for the suppression of gypsy and brown-tail moths for 1908.	1 17	(Bk. Div. 2, p. 102) Then for apportionment of street construction assessment for 1908.	10 00
(Bk. 22, p. 37) Also about 5,400 feet of land, on the northwesterly side of Addington road, being lot 62, same plan, apportionment of sewer assessment for 1908.	7 56	Louis L. Green (Bk. 22, p. 82)—Building and about 6,800 feet of land, numbered 32 Landseer street, apportionment of sewer assessment for 1908.	22 18	Mary E. Stanton—Buildings and about 22,902 feet of land, numbered 133, 135 and 153 Hyde Park avenue, to be sold for tax for 1908.	306 90
(Bk. 22, p. 36) Also about 5,450 feet of land on the northwesterly side of Addington road, being lot 64, same plan, apportionment of sewer assessment for 1908.	7 56	Mary A. Griswold (Bk. 7, p. 50)—Building and about 2,900 feet of land, numbered 47 Arundel street, apportionment of sewer assessment for 1908.	16 58	(Bk. 22, p. 74) Then for apportionment of sewer assessment for 1908.	20 78
(Bk. 22, p. 38) Also about 4,593 feet of land on the southeasterly side of Addington road, being lot 65, same plan, apportionment of sewer assessment for 1908.	7 56	Leopold Kahler (Bk. 20, p. 92)—Building and about 6,050 feet of land, numbered 91 Orange street, apportionment of sewer assessment for 1908.	7 00	(Bk. 23, p. 205) Then for apportionment of street construction assessment for 1908.	13 50
(Bk. 22, p. 37) Also about 4,907 feet of land on the southeasterly side of Addington road, being lot 93, same plan, apportionment of sewer assessment for 1908.	7 56	Annie M. Kelley (Bk. 22, p. 89)—About 35,943 feet of land on the northerly side of Neponset avenue, being a lot shown on C. H. W. Wood plan, May 15, 1895, recorded Suffolk Deeds, Book 2273, page 471, apportionment of sewer assessment for 1908.	44 28	(Bk. 23, p. 205) Then for apportionment of street construction assessment for 1908.	12 95
(Bk. 22, p. 36) Also about 5,700 feet of land on the northwesterly side of Addington road, being lot 94, same plan, apportionment of sewer assessment for 1908.	7 56	James Kelley (Bk. 20, p. 68)—About 6,582 feet of land on the westerly side of Berry street, being lot 41, shown on Assessors' plans, Volume 10, page 189, on file with Suffolk Deeds, apportionment of sewer assessment for 1908.	7 00	(Bk. 23, p. 204) Then for apportionment of street construction assessment for 1908.	13 17
(Bk. 22, p. 36) Also about 5,035 feet of land on the northwesterly side of Addington road, being lot 100, same plan, apportionment of sewer assessment for 1908.	7 56	Emilie B. Kramer (Bk. 7, p. 66)—Building and about 5,051 feet of land, numbered 97 Florence street, apportionment of sewer assessment for 1908.	8 93	(Bk. 23, p. 205) Then for apportionment of street construction assessment for 1908.	11 95
(Bk. 22, p. 37) Also about 4,593 feet of land on the southeasterly side of Addington road, being lot 101, same plan, apportionment of sewer assessment for 1908.	7 56	(Bk. 7, p. 80) Also building and about 5,490 feet of land, numbered 148 Sycamore street, apportionment of sewer assessment for 1908.	4 83	(Bk. 23, p. 206) Then for apportionment of street construction assessment for 1908.	15 64
(Bk. 22, p. 37) Also about 5,035 feet of land on the northwesterly side of Addington road, being lot 102, same plan, apportionment of sewer assessment for 1908.	7 56	(Bk. 7, p. 79) Also about 14,758 feet of land on the northwesterly side of Sycamore street, adjoining another estate of said Kramer (numbered 148), apportionment of sewer assessment for 1908.	40 12	Daniel P. Sullivan and James W. Loughlin—About 10,614 feet of land on the westerly side of Bradford terrace, being lot 129, C. H. W. Wood plan, June 1, 1896, recorded Suffolk Deeds, Book 2389, page 89, assessment for the suppression of gypsy and brown-tail moths for 1908.	50
(Bk. 11, p. 270) Also about 6,630 feet of land on the northerly side of Weld street, being lot 114, same plan, apportionment of sewer assessment for 1908.	7 00	Mary J. Lawson (Bk. 23, p. 159)—Building and about 5,000 feet of land, numbered 103 Belgrade avenue, apportionment of street construction assessment for 1908.	17 44	William H. Thomas, surviving Trustee will John Thomas (Bk. 13, p. 127)—About 2,118 feet of land on the southwesterly side of Cornell street, making the southerly corner of Westbourne street, being the southeasterly part of lot 73, shown on Assessors' plans, Volume 10, page 190, on file with Suffolk Deeds, to be sold for apportionment of sewer assessment for 1908.	13 10
Catherine Cronin—About 10,605 feet of land on the southwesterly side of Baker street, being lot 18, N. Smith plan, May 22, 1885, recorded Suffolk Deeds, Book 1686, page 338, tax for 1908.	3 30	Massachusetts Title Insurance Company (Bk. 15, p. 122)—Buildings and about 17,162 feet of land, numbered 45 and 47 Farrington street, to be sold for apportionment of sewer assessment for 1908.	9 88	(Bk. 14B, p. 477) Then for apportionment of street construction assessment for 1908.	10 03
		(Bk. 15, p. 122) Then for apportionment of sewer assessment for 1908.	14 31	(Bk. 14B, p. 477) Also about 5,812 feet of land on the southwesterly side of Cornell street, being lot 74, same plan, apportionment of street construction assessment for 1908.	5 74
		John J. McGuinness (Bk. 22, p. 48)—About 6,250 feet of land on the northerly side of Belgrade avenue, being lot 218, Garbett & Wood plan, May 11, 1892, recorded Suffolk Deeds, Book 2075, page 241, to be sold for apportionment of sewer assessment for 1908.	3 51	(Bk. 17, p. 105) Also about 8,215 feet of land on the southwesterly side of Cornell street, being lot 77, same plan, apportionment of sewer assessment for 1908.	15 68
		(Bk. 23, p. 162) Then for apportionment of street construction assessment for 1908.	17 44	(Bk. 17, p. 104) Also about 7,094 feet of land on the southwesterly side of Cornell street, being lot 78, same plan, apportionment of sewer assessment for 1908.	12 77

(Bk. 17, p. 104) Also about 7,913 feet of land on the southwesterly side of Cornell street, being lot 79, same plan, apportionment of sewer assessment for 1908.	\$13 44	man & Breck plan, July, 1885, recorded Suffolk Deeds, Book 1693, page 178, to be sold for apportionment of sewer assessment for 1908.	\$3 86
Louis Weisner (Bk. 23, p. 172)—About 6,237 feet of land on the northeasterly side of Montello street, making the easterly corner of Belgrade avenue, being lot 68, Garbett & Wood plan, April 1, 1889, recorded Suffolk Deeds, at end of Book 1876, apportionment of street construction assessment for 1908.	8 70	(Bk. 7, p. 88) Then for apportionment of sewer assessment for 1908.	15 72
Willard Welsh—About 5,200 feet of land on the northwesterly side of Belle avenue, being lot 28, shown on Assessors' plans, Volume 10, page 97, on file with Suffolk Deeds, tax for 1908.	3 30	William M. Butler—About 6,060 feet of land on the easterly side of Lucerne street, making the southeasterly corner of Harvest street, being lot 52, H. C. Mildram plan, March 25, 1899, on file in Assessors' office, assessment for the suppression of gypsy and brown-tail moths for 1908.	50
WARD TWENTY-FOUR.		Also about 4,697 feet of land on the southerly side of Harvest street, being lot 55, same plan, assessment for the suppression of gypsy and brown-tail moths for 1908.	67
Charles A. Anderson—Building and about 4,000 feet of land, numbered 39 Bertram street, assessment for the suppression of gypsy and brown-tail moths for 1908.	\$0 50	Also about 6,212 feet of land, on the southerly side of Harvest street, being lot 59, same plan, assessment for the suppression of gypsy and brown-tail moths for 1908.	67
Edward Atkins, Trustee will of Amasa Harmon—About 5,884 feet of land on the southerly side of Maxwell street, being lot 2, H. T. Whitman plan, June 9, 1892, recorded Suffolk Deeds, Book 2072, page 571, assessment for the suppression of gypsy and brown-tail moths for 1908.	67	Also about 6,640 feet of land, on the southerly side of Harvest street, being lot 61, same plan, assessment for the suppression of gypsy and brown-tail moths for 1908.	67
Annie C. Bailey—Building and about 6,540 feet of land, numbered 104 Lauriat avenue, assessment for the suppression of gypsy and brown-tail moths for 1908.	1 12	Also about 4,087 feet of land, on the northerly side of Harvest street, being lot 62, same plan, assessment for the suppression of gypsy and brown-tail moths for 1908.	1 00
Edmund K. Baker—Building and about 20,500 feet of land, numbered 29 Plain street, assessment for the suppression of gypsy and brown-tail moths for 1908.	12 73	Also about 4,538 feet of land, on the northerly side of Harvest street, being lot 64, same plan, assessment for the suppression of gypsy and brown-tail moths for 1908.	1 00
(Bk. 11, p. 316) Also building and about 5,500 feet of land, numbered 64 Oakridge street, apportionment of sewer assessment for 1908.	9 62	Also about 4,910 feet of land, on the northerly side of Harvest street, being lot 67, same plan, assessment for the suppression of gypsy and brown-tail moths for 1908.	50
George E. Barker—Building and about 3,642 feet of land, numbered 93 Norfolk street, assessment for the suppression of gypsy and brown-tail moths for 1908.	50	Eliza J. Caldwell—Building and about 3,701 feet of land, numbered 19 Elmhurst street, assessment for the suppression of gypsy and brown-tail moths for 1908.	50
Jonathan B. L. Bartlett (Bk. 13, p. 154)—About 5,297 feet of land on the southeasterly side of West Selden street, being the southeasterly part of lot 6, William O. Badger plan, September 26, 1892, recorded Suffolk Deeds, Book 2087, page 246, to be sold for apportionment of sewer assessment for 1908.	13 52	Dennis Callahan—Building and about 14,961 feet of land, on the northerly side of Chickatawbut street, making the northeasterly corner of Bowman street, adjoining an estate of Abigail H. Blanchard (numbered 29 and 31 Chickatawbut street), registered in the Court of Land Registration, certificate number 1410, tax for 1908.	99 00
(Bk. 18, p. 127) Then for apportionment of street construction assessment for 1908.	14 83	William E. Carleton and George E. Marvin, Trustees will of William Carleton (Bk. 9, p. 313)—Building and about 4,037 feet of land, numbered 69 Mascot street, apportionment of sewer assessment for 1908.	24 38
(Bk. 13, p. 156) Also about 3,331 feet of land on the southeasterly side of West Selden street, being the southeasterly part of lot 7, same plan, to be sold for apportionment of sewer assessment for 1908.	13 52	Patrick and Mary Caulfield and Bridget J. Downey (Bk. 15, p. 170)—About 9,464 feet of land, on the easterly side of Blue Hill avenue, being the easterly part of lot A, shown on Assessors' plans, Volume 9, page 301, on file with Suffolk Deeds, apportionment of sewer assessment for 1908.	42 00
(Bk. 18, p. 128) Then for apportionment of street construction assessment for 1908.	9 33	J. Philips Cavanagh—Building and about 5,072 feet of land, numbered 10 Elm Lawn, assessment for the suppression of gypsy and brown-tail moths for 1908.	50

BOWDOIN S. PARKER,
Collector of Taxes for the City of Boston.

WATERSHED LANDS.

The watershed lands owned by many municipal water departments represent a dead loss in most cases, except as the protection of the supply from pollution is an asset. This is neither thrifty nor hygienic, and it is interesting to observe how this fact is gradually being recognized. There are manifest advantages in having the watershed covered with trees, not only in preventing the wash of surface soil into the reservoir but also in obtaining a revenue from the land. The water departments of a number of cities are now doing more or less forestration, the best results unquestionably being obtained where a trained forester is employed. Growing sound, healthy trees of the right species to yield the largest income from the land is by no means a simple undertaking that anybody can carry on at odd moments, although it is easy enough to grow a lot of worthless brush and shrubbery. Incidentally the growth of trees on watershed lands under competent supervision will prove such a useful educational proceeding in this country of timber destruction that in all probability municipalities will have little difficulty in obtaining the co-operation of the United States forest service. Just as soon as our states will remove annual taxes from wooded lands and substitute a tax on the timber when it is cut there will be an incentive to grow trees on every abandoned pasture and cut-over tract which will support them, and the object lessons afforded by forested watersheds will then prove as valuable educationally as the trees will be useful sanitarially.—*Engineering Record.*

WHAT IS NEEDED IN AMERICAN CITY PLANNING.*

What is needed in the planning and rebuilding of American cities? A critical observer, especially one having the achievements of the European and South American cities in mind, is tempted to answer: Everything. For, with few exceptions our cities are lacking in almost all of those essentials of convenience, comfort, orderliness, and appropriate beauty that characterize the cities of other nations. But above all, generalities and indefiniteness must be avoided. We must be specific. Therefore I shall confine my remarks to three points. We need (1) to make recreation more democratic; (2) to develop the individuality of our cities; (3) to stop waste. First, then, we need to make many improvements which are for the benefit and enjoyment of everybody, for the common good. In this respect how striking the contrast is between Europe and America! The poorest workingman in Europe has some advantages and opportunities which here the wealthiest can seldom command. Forty years ago Germany planned to provide in its cities, and for all the people in them, facilities for wholesome physical exercise, large and convenient opportunity to enjoy the beauty and wonder of the nature world, and a more intimate knowledge of noble kinds of human life and beautiful products of human work. Fine city streets, orderly railroad approaches and surroundings, truly beautiful public buildings, open green squares and plazas, refreshing waterfronts, ennobling statuary, convenient and ample playgrounds, numerous parks, parkways, and boulevards, art museums, theaters, opera houses, and concert halls—all these in Europe are free, or so nearly free that they are easily available for all the people. These are not only worthy pleasures in themselves, to relieve from the grind and fatigue of yesterday's and to-day's toil, but they make a definite and indispensable contribution toward to-morrow's efficiency. In political rights we have democracy enough; judging by results, perhaps more than we have fitness for. But should we not work for a wider democracy of recreation, for more opportunity to enjoy those forms of beauty and pleasure which feed and refresh the soul as bread does the body? We should no longer be content with mere increase in population and wealth. We should insist upon asking, "How do the people live, where do they work, what do they play?"

Secondly, we need to consider more attentively the opportunity to improve our cities by the development of their individuality, their personality. Mr. James Bryce has pointed out that the one most serious drawback to American life is its uniformity and that this criticism applies especially to cities. With but five or six exceptions, he says, American cities differ from one another only that some are built more with brick than with wood, and others more with wood than with brick; their monotony haunts one like a nightmare. This criticism becomes clearer and more pointed if we recall the cities and towns of England and more especially of Italy, and contrast them with our own. What is the explanation? It is partly the lack of an historic past and of memorials and old buildings resulting from that past. But most of it is due to factors more largely in our control. For example, it is in our failure to echo more

closely in our city plans the physical situation and topography of our cities. Many illustrations could be given. The rectangular street systems and the colorless names, if the numbers can be called names, which are repeated from one end of the country to the other, regardless of natural features or local history, are indications of our failure to embrace easy and economical opportunities to gain individuality in our cities and to make them a fundamental form of expression. There is failure, likewise, of the people to express themselves and their ideas. As our interest in human life is in the distinctly personal, so is it in towns and cities. We need a local concept, a love and pride in local conditions and local ideals. Civic art furnishes the most available means to express these local customs and local inspirations, and it should be remembered that only in expression do we truly realize them. The future need no longer be taken at haphazard. What we see about us is not the finished product, but only the raw material. We should, therefore, frame an ideal of what we wish the city to be, and then work to make it real.

One of the main obstacles to greater achievements in American cities is the cost. My final point, therefore, is to earnestly advocate a stopping of waste. Stopping waste, to my mind, however, does not mean primarily a reduction of public expenditure, although there is a close relation between moral reform and material progress. A mere honest, economical and wiser expenditure is indeed sorely needed, and ultimately the change of policy proposed would lead here, as it has elsewhere, to a decided reduction in taxes. Germany has not only better housing, more parks, and greater provision for education, but a comparative study appears to indicate, lower taxes also. Yet at first we must effect our saving mainly by preventive measures and by a bold but well-considered and conservative investment of capital. The main sources of this new wealth, the extent of which is beyond all estimate, is in a wiser husbanding of our aesthetic and human as well as our natural resources, in the promotion of physical health, in legislation that meets more successfully the needs of twentieth century city life, in doing things at the right time, especially as this applies to the purchase of land and the establishment of thoroughfares, and in doing things in the right way, using to our advantage science, art, skill and experience. By saving waste in these ways and by the timely investing (not spending) of public money in great enterprises, we shall be able to get many of the improvements which we all now desire, but which we think we cannot afford. European cities lead us in wholesale opportunities for recreation, for the promotion of health, for the enjoyment of art. They lead in the developed individuality of their cities. In what do we lead? Mainly in a larger death rate and a larger tax rate.

To sum up, it appears that the present methods are fatal to good results and that American towns and cities need (1) an open-minded and skilful investigation of their problems; (2) united and hearty co-operation on the part of various public authorities and private individuals in the solution of these problems; (3) finally, prompt and courageous execution of the plan found to be best for all concerned. —*Des Moines City Hall.*

A municipal drydock, 1,000 feet long, which can accommodate the largest vessels, has been proposed for New York by the dock commissioner, Mr. Calvin Tompkins.—*Engineering Record*

TENEMENT HOUSE ON STILTS.

Plans for a novelty in the building line have been prepared by a Cleveland architect and approved by the inspector of buildings, and a capitalist is to put up the necessary money. The building, which is to be 264 feet long and 76 feet wide, will be built on pillars or stilts, leaving an open space beneath it 7 feet high above the ground. This is done for two reasons—to give the children in the tenement houses a playground and to afford ventilation for six great airshafts, 20 by 25 feet in size, which extend up for three full stories, being entirely open at the bottom and top, so the air can circulate freely.

Of the 360 rooms the tenement house is to contain, every one is to have an exposure either on the outside or on one of the spacious light courts. The whole structure will be strictly fireproof, and will be of reinforced concrete, with exterior walls of brick. Even the floors are to be of cement, so that when a room is vacated a janitor with a hose can go in and wash the room out, disinfect it and make it sweet and clean for a new tenant.

The rooms are arranged so they can be occupied separately, instead of in the form of suites. If a family desires several rooms it may rent them in that way. Every third room will be supplied with a chimney flue so a gas stove may be used. There will be a number of bath rooms on each floor, and each room will be supplied with gas. Many of them will have running water.

Around the entire three floors on the outside there will be spacious balconies, down which there will be ten stairways. The light courts will also have balconies on each floor and iron stairways leading down. The building could be emptied of its occupants in a very few minutes, if necessary.

The building will be provided throughout with modern sanitary devices, will be steam heated, and gas will be furnished for lighting and cooking. Two rooms on each floor are to be reserved for emergency hospital purposes. It is intended to rent the rooms to poor workingmen and their families. The building will cost about \$75,000.—*Municipal Facts.*

LIVERPOOL'S NEW DOCKS.

Liverpool's new dock scheme, as adopted by the Mersey Docks and Harbor Board on July 7, will involve an expenditure of about \$2,500,000. The plans contemplate a dock 1,020 feet long, having an entrance 120 feet wide and a sill laid at a level of 25 feet below the old dock sill. The floor is laid in concrete 29 feet below the old sill with a center line of keel blocks and side lines of blocks where necessary. A single story shed 900 feet long and 100 feet wide will be built on the north quay, with the necessary paving, roadway and railroad sidings. Four movable cargo cranes with a range of travel the full length of the shed will be installed. The dredging of the entrance channel to a depth of 27 feet below the old sill will form part of the improvement work. The docks are designed to accommodate 40,000 or 50,000 ton combined passenger and cargo steamers 1,000 feet long. The depth of water on the sill at the lowest tide will be 35 feet and on the highest tide 46 feet 6 inches. The ships "Olympic" and "Titanic" of the White Star Line, which are now under construction, will have a tonnage of 45,000 and a length of 860 feet. The Cunard Line is said to have under consideration the building of a vessel about 1,000 feet long with a tonnage of 50,000.—*Engineering Record.*

* Address by John Nolen, Landscape Architect, Cambridge, Mass., at the First National Conference on City Planning, held at Washington, May 21, 22, 1909.

THE VALUE OF THE APPRENTICE SYSTEM.

The Pennsylvania Railroad Company has recently made two interesting announcements, one of which illustrates the extent to which this great system is constantly striving to improve its service by training its men, and the other shows one of the many methods used to maintain and strengthen the good feeling existing between the company and the employees. One announcement pertains to the establishment of schools and of an apprentice course in the signal department for giving instruction in the proper maintenance and operation of signal apparatus. In the apprentice course it is proposed to use college graduates who will serve their first year with the repair and construction gangs, the second in the office of the supervisor of signals, and the third or last year of the course on outside work, principally with electrical and electro-pneumatic appliances. After his apprenticeship is finished the next position open to a man is that of assistant inspector, and when he is appointed to this position he is considered to be in line for promotion. A school for providing instruction to the employees of the signal department will be established on each division.

The other announcement makes public the names of two young men, sons of employees of the Pennsylvania system, who have succeeded by competitive examinations in securing scholarships, amounting to \$600 per year for each man, for the purpose of pursuing a college course. Including these two young men who have just received appointments there are now eight holders of these scholarships. Matters of this sort have an important influence for good on the *esprit de corps* of any organization, and, while the number of men affected in this case is small, it should be remembered that this is only one of the many ways employed by the Pennsylvania Railroad Company to promote that feeling of loyalty which is so conspicuous in most of its employees. There can be no doubt but that the apprentice system as carried on by large corporations is an excellent thing both for them and for the apprentices. When a young man begins his service in each branch of the work in which he is successively placed he is of little or no value to his employer, but after he has been through the different stages his usefulness soon becomes apparent and he is all the more valuable to the company because he has a greater breadth of view and a better understanding of the functions and relations of the different departments. The criticism sometimes made of large companies because they place a young man in a position which requires him to do and to know only one class of work is frequently deserved. While it is true that he may be a useful tool in the small sphere in which he is placed, yet he is likely to become so narrow as not to render his employer the most efficient service. For example, if a bridge company employs a draughtsman and keeps him at the drawing table for a great length of time he may render good service in this capacity, but the question naturally arises whether he would not be of greater value, even in the draughting room, because of a year's experience in the shop and another in the erection department. The influence of the shop and field experience would certainly make itself felt in the quality of his work when the apprentice returned to the drawing table. Some bridge companies recognize this and have established apprentice courses of this kind, but it would seem that, on the whole, not enough attention has been given to developing

the greatest efficiency of young engineers in office forces.

A large technical school has recently found considerable difficulty in getting members of its graduating class to accept positions as draughtsmen with bridge companies, largely because there is a feeling that most companies require too long a service at the drawing board before opportunities for advancement are presented. Of course this is the beginner's viewpoint, but it must be confessed that the criticism is appropriate in cases of some organizations, while in others there is no ground for it. No doubt the engineers of those companies where long draughting service is required have good arguments to defend their methods, but on the whole the advantage seems to lie with some such system as that suggested above by which a capable beginner will have the opportunity of obtaining a varied experience by working successively in different departments. The chief advantage of this arrangement lies in the fact that it makes a man realize the interdependence of the various departments, and in performing his work in one he will have the requirements of the others in mind.—*Engineering Record*.

ST. LOUIS GARBAGE REDUCTION PLANT.

The garbage reduction system of St. Louis has given considerable trouble because of the inability of the plant to handle the amount collected. About 5,400 tons of garbage has been strewn along the main line tracks of the railroad over which the garbage cars are hauled to the plant, and the odor therefrom has aroused the citizens of St. Charles and the Missouri State Board of Health to an endeavor to compel the company to abate the nuisance. The St. Louis Board of Public Improvements has taken up the complaints with the company, which has expressed its willingness to do anything in their power. During the last week in March conditions became so intolerable that the Board directed the company to bury the garbage above referred to under three feet of earth, after mixing it with 1,800 tons of lime, the cost of which to the company was estimated at between \$2 and \$3 a ton. The plan outlined by the city's chief sanitary officer and those of St. Charles and the State Board of Health was to spread the garbage on the ground in layers 1 foot deep, with 3 inches of lime and 6 inches of ashes or earth over each layer, the entire pile to be covered with 3 feet of earth. The officials estimated that there was enough garbage to cover five acres 1 foot thick, or one acre with five 1-foot layers. Something like forty to fifty carloads of lime and 165,000 cubic feet of earth were needed to cover the garbage. The company was ordered to do this work within ten days, and immediately put a gang of twenty-four men at it, under the oversight of a city sanitary inspector.

This garbage had accumulated through inability of the reduction plant to handle it. Several weeks ago the garbage company which had been having a great deal of trouble with the drying machinery, decided to replace it with machinery in successful use elsewhere, and is installing a drying equipment similar to that used in Buffalo and a few other cities. While the change was being made part of the plant was out of service, and not all of the garbage sent to the plant could be handled. As there is a penalty clause of \$10 a ton for failure to accept garbage offered by the city, the company piled it on the ground. During the cold weather this

practice gave little offence, but the intention of the company to have this garbage put through the plant before warm weather was not realized, with the result above described.

According to the president of the company, Mr. Lawrence B. Pierce, the plant is now in shape to handle all the garbage furnished by the city, but has not yet the capacity to handle any of the accumulated garbage. The present capacity, however, will be about doubled when all of the new drying machines, nine in number, have been installed, which will provide for the largest amount expected during the summer. In addition to replacing the drying machines, the company has replaced the whole working management of the plant by men who have become expert through service in successful plants elsewhere.

In March the garbage amounted to 2,628 tons, 142 tons more than in March, 1909. The cost to the city of disposing of it, including the 27 cents a ton paid to the company, and the salaries of garbage weighers and a foreman, was \$1,498 this year, or 56 cents a ton, against \$3,001 or \$1.19 per ton for March, 1909. The present contract was in effect for part of March, 1909, but the old system was maintained for a few months to provide against the possible failure of the new plant. The amount of garbage is now about one-third of what it will be during the summer months.
